As I know we can get no communication here from the outside, and believe our dispatches do not reach their destination, I fear you have not been able to get the facts of the case and will not for several days. Hence I send you this by mail, hoping it may reach you and be of some importance.

The recent affair was one of the most unprovoked and uncalled for assaults that was ever perpetrated on a civilized community. On the evening of the 10th instant the chairman of our committee received an anonymous letter informing us that the United States Marshal would be here on the 11th to dispossess certain of our men. We gave it no credit, as such letters are frequently received. Early on the morning of the 11th we repaired to Hanford to make preparations for the mass meeting of that day. On arriving there we were informed that the Marshal was there, and that he and Clark, the railroad grader, had gone to dispossess our men. This was evidently to be done while we, and the people generally, were preparing for and going to the metting. As soon as we heard of it we got ready such papers as we desired for the United States Marshal, and at once followed them to prevent any dispossessing, as we had been advised by our counsel to do. We went to Wm. Braden's place, but found that the Marshal had set his things out and gone on. We then went to Bet's place, but found that the Marshal's party had not been there, but had been seen going in the direction of Brewer and Storer's place. We followed on, but soon discovered that some of our men, who were on horseback, had got ahead of us. Knowing the orders they had, we rushed on to prevent any further work, if possible. They reached the even lands of Brewer and there found the United States Marshal and posse. The Marshal got out of his buggy and met them.

A protest was then handed to the Marshal, by one of the settlers, of which the following is the substance:

We present the following facts:

First—These lands were never granted to the Southern Pacific Railroad Company.

Second—We have certain equities that must be respected, and shall be respected.

Third—The patents they hold to our lands were acquired by misrepresentation and fraud, and we, as American citizens, cannot and will not respect them.

Fourth—The Southern Pacific Railroad Company have not complied with their contract, both with our people and with our Government, and, therefore, for these several reasons we are in duty bound to ask you to desist.

BY AUTHORITY OF THE LEAGUE.

Our party informed him he could not serve any additional papers, and commanded him to surrender, which he did, with the understanding that he would not be molested. He requesied as the right of a United States officer to retain his side-arms. With a promise that he would not use them, permission was accorded him to do so. He was put under guard of two men, A. McGregor and E. Haymaker, neither of whom was armed except with pocket-knives. They were to see that he was not harmed. The men then went to Clarke, the grader. One of the men presented a pistol and commanded Clarke to surrender. He gave up his arms. Some of the men then went on toward the wagon that contained Walter Crow and M. D. Hart. Mr. Pryor rode up to the wagon and said: "Walter, what in the name of God have you got those arms for? We don't want any trouble. What do you want to take our homes from us for? We have done you no harm." Crow made no reply but drove around past Mr. Pryor, and said to Hartt, "Do not shoot yet." But the next thing Pryor knew Hartt shot I. V. Knutson, killing him instantly. Knutson had no arms. Then the shooting began between Crow, Hartt, J. M. Harris, John Henderson and Daniel Kelly. Harris and Henderson were killed on the spot. Crow then shot at McGregor, who was guarding the Marshal, and was unarmed, hitting him in the stomach. He then advanced toward McGregor and fired. The ball passed through McGregor's body and he fell, mortally wounded. Crow then shot Kelly. Harris and Knutson were killed with a shotgun, and Kelly was mortally wounded with the same kind of a weapon. Crow and Hartt had both got out of their wagon at the beginning of the fight, and when the shooting began their team ran off. Hartt was shot in the abdomen and mortally wounded, and Crow received a ball in the left side, near the shoulder. E. Haymaker, who was also guarding the Marshal, was shot just above the right ear, the ball cutting the skull but he was not seriousiy hurt. Crow left the field, but died on his way home. Kelly died the same evening about 7 o'clock. McGregor died on the following morning at about 5 o'clock. Every man engaged in the shooting was killed. After this terrible tragedy attention was directed to the Marshal and Clarke, who were in a very excited state of mind. They were naturally greatly alarmed, as they could see the settlers coming in almost every direction. Clarke was given back his arms and a guard of four settlers was then placed him and the Marshal for their protection, and taey were escorted to Kingston, Fresno county. We hold Clarke, with the company he represents, responsible for the blood of our people. It is a fact that Crow and Hartt had a complete arsenal at the former's house. The house was pierced with port holes and Crow, Hartt and others had been practicing for months in expectation of a collision. They repeatedly said that they would get away with some of those Leaguers. James Harris was buried yesterday. Knutson, Henderson, Kelly and McGregor will be buried to-day. McGregor will be buried under the auspices of the I. O. G. T., of which order he was a member. The Coroner's investigation, I think, will not take place as soon as anticipated, as there is some material evidence which we wish to produce. We think that this collision was the result of a deep-laid plan by the Southern Pacific Railroad Company to frighten the settlers off. The people never were in such a state of mind as at present.

CUBA'S TROUBLE.

The report of the departure of a filibustering steamer from Philadelphia for Cuba has caused sufficeint excitement in Madrid to lead to definite measures for the suppression of a possible insurrection, and, notwithstanding the denial of the Spanish Minister at Washington that there is any serious trouble, the matter appears to the Spanish Government to merit a degree of attention which they seldom bestow on their unhappy province. In fact, the habitual indifference to the welfare of Cuba, and the spasmodic action on special occasions, always in the form of military repression, constitute the chief cause of the island's unsettled condition, as far as the home government is concerned. Viewing the present conduct of the government at Madrid, however, from the standpoint which the Spaniards naturally take, it is the most sensible plan which could be devised. The lawless men who lead Cuban insurrections, and infuse into the ignorant people a spirit of resistance and destruction which they miscall patriotism, are for the most part fanatics and agitators, sometimes renegades, and the most wholesome treatment for them is precisely that which has been decided upon by the Government of Spain.

It is a sad feature of the misgovernment of Cuba and Ireland, that whenever the patriotism of their inhabitants is aroused to resist the oppressive authority of the governing country, it is utilized by unprincipled agitators for their personal ends, and filibustering is the result. Thus every movement towards the amelioration of the state of the natives of either island degenerates at its very start into the wild scheming and witless hurrah of a crowd of ill guided people, led by professional agitators. In these circumstances the United States Government, a democratic republic and the greatest friend that oppressed humanity ever had, must consent to and aid the forcible repression by the foreign powers of their respective subjects. Those who have faith in the human race trust to see this all changed in time.

MARRIED.

At Bishop Creek, May 18, 1880, by Rev. A. Clark, CHARLES H. HOLLENBECK to ANNIE M. WHITE, both of Bishop Creek.

At Bishop Creek, May 16, 1880 by Seth G. Sneden Justice of the Peace, WILLIAM W. OWENS to Mrs. LOVINA TURNER.

NEW ADVERTISEMENTS.

PROPOSAL TO CHANGE SCHOOL TEXT BOOKS.

PUBLIC NOTICE IS HEREBY GIVEN by the County Board of Education of Inyo county, this 17th day of May, 1880, that it is proposed to change the following text books now and heretofore in use in the public schools of this county.

Reading,
Spelling,
Writing (copy books),
Arithmetic,
Geography,
Grammar,
Language Lessons,
History of the United States,
Industrial Drawing,
Physiology,
Music, and
Algebra.

Sealed bids or proposals will be received by this Board for furnishing books to replace them. Separate bids or proposals for supplying any part of this list will be received.

Said sealed bids or proposals will be opened at Independence, the county seat of Inyo County, at 10 o'clock A. M.,

On Wednesday, July 28, 1880.

The Board reserves the right to reject any or all bids or proposals.

Said bids or proposals must be accompanied with sample copies of the books proposed to be furnished, together with a statement of the wholesale and retail price at which the publisher agrees to furnish each book at Independence, in this county of Inyo, during the full time for which said books are to be adopted.

The publisher or publishers, whose proposals shall be accepted, must enter into a written contract with this Board of Education, and shall give a good and sufficient bond in the sum of $500 for Readers, $300 each for Geography and Arithmetic, and $100 each for the remainder of the said list of text books.

By order of the Board of Education of Inyo county.

J. W. SYMMES,
Secretary.

INYO INDEPENDENT.

INDEPENDENCE, CAL.:

SATURDAY, MAY 22.....1880

THE BOARD OF EDUCATION. — Pursuant to notice, all the members of the County Board of Education, except Mr. Blaisdell, met on Monday, took the oath of office and effected a permanent organization, Judge Conklin being chosen President, Superintendent Symmes, by virtue of his office, being Secretary. The other two members present were Daniel Crough and P. A. Chalfant. Mr. Blaisdell, who resides at Bishop Creek, did not receive notice of the time of the meeting until about the time it was to take place, consequently too late to get here. We learn, however, he has since been down and qualified, thus completing the membership. It was ordered that an advertisement be published in this paper inviting proposals to supply new text books throughout—but it does not follow from this that a complete change or any change in particular has been decided upon, though it is quite likely some changes will be made. Ordered, also, that a notice be similarly published requiring all desiring teacher's certificates to appear for examination, as required by law. Also, that the Secretary procure an official seal, necessary blanks, etc., required by law for the proper transaction of the business of the Board. Wednesday, the 28th day of July next, was the time fixed upon for the next, and the first semi-annual meeting of the Board, on which day bids to supply text books will be opened and considered, and on the following day, the examination of candidates will be commenced according to advertised programme. Messrs. Conklin and Crough drew short terms. The Board adjourned to the said 28th of July. It is well to add here that all teachers hereafter must hold certificates granted or accepted by County Boards of Education before they can draw any public money as teacher's salary. School Trustees and all persons intending to teach will do well not to overlook this fact.

IN FULL BLAST.—It is pleasant once more to note that two of the Darwin furnaces are once more in full blast, and both running beautifully. These are the Defiance, under Supt. John Gorman and Foreman Martin Mee, and the New Coso, we presume under Supt. J. J. Williams. For sometime past, Gorman has had a small force at work upon the Custer mine, taking out ore day by day in remarkably uniform quantities until recently, since when the daily output has about doubled, and is quite sufficient to keep one stack fairly supplied. The total on hands amounts to about 600 tons. We are not advised as to the quantity on hands at the New Coso. The Lucky Jim, the company's principal mine, is known to be capable of producing regular and rather large amounts, but that it cannot be extracted advantageously until a new shaft is sunk, which undertaking has been pending for some time past. But, we are assured, neither of the furnaces are dependent upon their own mines for ores; the chloriders are able to supply both. Under these circumstances no doubt need be felt but that Darwin will live and flourish henceforth. P. S.—The following, received this morning, from Mr. C. F. O'Brion, modifies a portion of the foregoing: "The Defiance furnace commenced running last Monday on ore from the Custer, taken out by Messrs. Gorman & Eddy, and has produced about 10 tons of bullion every 24 hours. The New Coso commenced running on the same date, and is making a splendid run. The town is quite lively, and will continue so for the balance of the month. Will send you statistics next week."

THE U. S. CENSUS.—Chas. W. Dana, Supervisor of the Fourth Census District of California, is busily engaged in organizing his forces for the great national census taking, which is to be begun and concluded in June, now close at hand. As this work of preparation for this county has to be done by correspondence, and a good deal of it, it is doubtful if it will be completed in time for all the Enumerators to begin on the 1st proximo. There will be four Enumerators for this county; who the appointees will be is yet unknown. They are each to receive $6 a day, paying their own expenses. The four districts are planned as follows: 1st.—All the country within the county lines north and including Big Pine. 2d.—Including all from the Big Pine line to Olancha and north of Darwin. 3d.—From and including Darwin to Panamint, thence south along that range and west thereof to county boundaries. 4th.—Resting Springs and all that portion of the county.

OFF FOR HOME.—Mr. Daniel Crough, who has resided among us for about a year and a half, took his departure for Sonora, Tuolumne county, his old home, on Tuesday morning's southern stage, to renew his acquaintance with his old friends in that section. We are sorry to lose so genial and companionable a citizen as Dan., but as he has been almost continuously employed in teaching school since he has been here, and having an opportunity to take a rest he concluded he could rest easier and have a pleasanter time on the other side of the mountains; hence his departure. However, he contemplates returning to Independence about the last of July to attend to his official duties. He leaves a host of friends here, who wish him success wherever he may go.

FROGS.—The frogs around this neighborhood these evenings favor us with delightful frog-operas, which they keep up most of the night. It is said by some that the croaking of frogs is a sure sign of Spring. If the last few nights are any criterion to go by in respect to the singing of his frogship, we have a sure thing on the weather.

SCARCER.—The man who for months has regularly and justly been complaining about the coldness of the weather and all that is much scarcer than he was; 92 degrees in the shade is what scarced him.

DEEP SPRING DISTRICT.—A party consisting of Messrs. Rose and Skidmore, of San Francisco, and Hudgin and Hedge, of this place, have just returned from a visit of inspection to Deep Spring District, where they spent three days in an examination of the mines on the east side of the valley near Gilbert's Ranch. They report that there are now about twenty prospectors in the vicinity, and that locations of promise are being made daily. As yet, however, it is a prospector's camp, no permanent work having been commenced. Operations are of an exploratory nature, in distinction to work of development. Many of the prospectors are interested in more than one claim and are engaged in doing the necessary work to hold the various claims; consequently the development of the district is retarded. But such work as has been done since our last notice of this district more than confirms our often expressed opinion of its brilliant future. On the west side of Deep Spring Valley from Antelope Spring to the summit, discoveries are being made daily of rich ores, but here the ores are of a heavy character and will require roasting. The trip was made via Big Pine, and the actual time on the road was 12 hours. The completion of the new grade, about the 1st of next month, will reduce the time to ten hours from Independence, provided a change of horses be made at Big Pine. In that case the trip may be made in one day from Independence to Deep Spring. The latter place is 62 miles from Columbus, and the completion of the Virginia and Truckee Railroad to the foot of Walker Lake will place the district within 110 miles of railroad communication.

CINDERELLA.—This is the name of a very promising mine situated on the west side of Deep Spring Valley. It is owned and being worked by Mr. A. Wingard, who has had a force of three or four men at work on it for some time past. A shaft 68 feet deep has been sunk on the ledge, showing it to be a well defined vein. We were shown an assay yesterday made from a piece of the ore taken from this mine which went $78.54 in silver and $8 in gold, making a total of $86.54 per ton. Mr. Wingard informs us that the vein is about seven feet wide at the bottom of the shaft, four feet of which will assay similar to the above. The mine is eligibly situated for the easy and cheap extraction of the ore. It is about five miles west of the Whiteman, Horton, Thanksgiving and other promising locations in that vicinity. Mr. Wingard is very sanguine of the future greatness of that district.

PERSONAL. — Mr. Robert Stein, a well known mining man, arrived in town a couple of days ago. Mr. Stein has been on a visit of inspection to Panamint, Darwin, Beveridge and the other outlying districts. He speaks in very cheerful terms of all the localities he visited, and expresses the opinion that the whole mining country to the south of us will soon give a good account of itself: Mr. Stein's next trip will probably be over into the White Mountains.... Mr. D. E. Coughanour, of San Francisco, arrived in town on Thursday night's stage and proceeded the next morning on horseback to Beveridge District, where he is interested with Uncle Peter Taylor in the mines of that section. He also goes over to see about a tramway proposition that is in contemplation. From what we can learn of that locality Mr. C. will be favorably impressed with it.

KEELER CITY.—We haven't had an item from Keeler City for so long that we had begun to have fears for that promising embryo metropolis. But the old saw, "calm before a storm," or words to that effect, holds good in this instance. We are reliably informed by a gentleman who lately stopped over at that point that active operations are about to be commenced in the work of construction and general improvement. A large force of men will be put to work in the matter of building the mill. The Stevens' flume, which has been used to float wood from the Sierra Nevada mountains to the lake, is to be put in ship-shape for the same purpose. All these things are to go into effect at the beginning of the coming week. If all this is only verified, all we can do is to exclaim, "Rah for Keeler City!"

FOR SAN QUENTIN.—Phillipi Gonzales, the young Mexican who appropriated Johnny Lucas' horse, the details of which were given last week, started on his journey for the State Prison, at San Quentin, on Tuesday morning's stage, there to remain two years. He was in charge of Daniel Crough, who acted as Deputy Sheriff for the occasion, and who no doubt landed his prisoner safely in that institution. Phillipi seemed to be quite cheerful in the matter of making the penitentiary a visit, and remarked that he had "lots of acquaintances boarding at that hotel."

DEPARTED. — Messrs. Rose, Skidmore and Hudgin left on yesterday morning's southern stage for San Francisco. It was the intention of the first two named gentlemen to continue their trip northward from Deep Spring District, whither they went to inspect some mining property, and reach the city via Aurora and Carson, but it being imperative that they should be in San Francisco by the 25th instant, to arrange some urgent business matters pertaining to the mines of Deep Spring, they concluded to make the trip by way of Mohave, thereby gaining one day over the northern route, and arriving at their destination in due time.

CERRO GORDO. — From Mr. John Davis, who came up from Cerro Gordo the other evening, we learn that things on the Hill are rather quiet just at the present time. However, there are a few at work in some of the mines there, who still hold to the theory (and no doubt a good one) that the day is not far distant when the old camp will again resume her place and rank as one of the greatest bullion producers in this State, at least.

FROM CANDELARIA.— Dr. Blair and Jos. Schalten, Esq., who started a week or two since on a tour of inspection among the new camps up the country, returned a couple of days since direct from Candelaria. They both propose to go back there soon to start in business, but, at present, will not remove their families. All the leading mines are closed to the public, visitors to the place can say nothing more of their apparent value than many who make it their study to stay a long ways off. Nevertheless, the place has an air of permanence and great business life, and is likely to retain both; but as an agricultural country, it is the deadest failure that has yet invited {so much attention— not a drop of water nearer than Columbus, seven miles distant, whence comes all that is used by the hundreds if not thousands of human and other animals in and about the camp; and as the water is execrable stuff before it is hauled and churned in the hot sun over seven miles of road it don't require much intellect to understand that, when delivered, it is not real nectar, except, perhaps, to the man who has fired his coppers with artificial substitutes. This liquid from Columbus, which is not real nectar, sells for five cents a gallon and no discount to man or mule. Wood is brought from the White Mountains, some twenty miles distant, and sells at $20 per cord. Lumber is brought from Benton, and sells at $80 per M.; as yet the demand for this article far exceeds the supply. The labor market is greatly overstocked.

REVERSED HIMSELF.—A number of persons in this county and elsewhere feel a direct interest in the legal proceedings affecting the bankrupt Emigrant Mining Co., of Lee District, hence the following: Last July Patrick Mullen, Reddy & Conklin, his attorneys, attached the concern for some $7,000. Plaintiff died shortly after. Within 90 days after the attachment issued, numerous other creditors joined interests, and put the company in bankruptcy, to force Mullen to take his pro rata with them, C. F. O'Brion being appointed Assignee. The Sheriff was barred from selling under the judgment. Application was made to Judge Halsey, U. S. District Court, by Reddy & Conklin, to have the proceedings in bankruptcy vacated. This was denied, thereby establishing the fact that a corporation was simply an individual in law in matters of this sort—that is, that while two or more co-partners must apply individually in insolvency, a corporation could do so as an individual. The decision was deemed important. Subsequently, however, and but a week or two ago, the Judge reversed his former decision, so now, as will be seen by Sheriff's notice in another column, the property, on the 1st of next month, is to be sold to satisfy the Mullen judgment —and, we presume, other creditors will have to institute new proceedings in bankruptcy, if anything further is done in that direction.

BEVERIDGE.—From a gentleman who lately visited Beveridge we learn a few facts concerning that district. The steam arastra has been running pretty steadily since the good weather set in, but the run now being made with it will probably be the last, as Supt. Taylor is going to have the stamps perform the work of crushing. There is any quantity of ore on the dumps and plenty of it in sight in the mines to keep the stamps hammering away at a lively rate and for a long period of time. It is expected when this new improvement is inaugurated regular shipments of gold bullion will be in order.

AT BIG PINE.—Mr. J. D. Hudgin informs us that while at Big Pine the other day he met his old foreman, Harry Ashley, who occupied that position in the days when Mr. Hudgin was Superintendent of the Rex Montis Company. Harry's objective point is Deep Spring District. He informed Mr. H. that things were not looking very well at Candelaria in a mining point of view, there being only at the present time there but two or three paying mines. He says if he doesn't strike it in Deep Spring he is going to quit the country entirely.

ROUND VALLEY.—George Bartshe, formerly of this place but now of Round Valley, was in town a couple of days this week. From his appearance we should judge that the climate of that section was agreeing with him pretty well, but George accounts for it by saying that it is all owing to the pious and moral life he is leading. However, he says the farmers are very hopeful up that way of having bountiful crops. Al. Rose, another old resident of these parts, and with whom he is working, will raise enough grain and potatoes this season to supply all who may desire such truck. George returned home Thursday.

STRUCK IT.—Our old townsman, Billy Lake, who left here some two weeks ago to do some prospecting in the White Mountains section, we are informed, has succeeded in discovering a three-foot ledge of average grade silver ore. The new location is situated about one mile from the mines of Messrs. Broder, Whiteman and others. Hope Billy has struck a veritable bonanza.

GETTING BETTER.—Ed. Thompson, the miner who had his leg hurt by a flying rock caused by a blast while at work in one of Mr. Wingard's mines in Deep Spring Valley, was resting quite easy when that getleman left him last Tuesday. Although a bad and painful wound, fortunately no bones were broken, and by proper care it is thought he will be all right again shortly.

BIG ASSAYS.—Messrs. Skidmore and Rose had some samples of ore assayed by Mr. Woodhull, of the Independence Assay Office, which went "way up." The ore was taken from the Whiteman and Horton, two Deep Spring properties. Following are the results: Horton, gold, $200.93; silver, $406.63. Whiteman, gold, $120.50; silver, 851.92.

STATED MEETING.—A stated meeting of Inyo Lodge, No. 221, F. & A. M., takes place to-night.

NEW LANDLORD. — The Eight Mile House, near the dump of the Black Rock sawmill flume, is now under the control of James S., alias Jimmy, Peel, who, without doubt, will do the satisfactory thing with all who have occasion to patronize him. See his card under "New Advertisements."

ARRIVING.—Almost every stage from the south for the last week or so brings from one to four passengers, some of whom are bound for Bodie, Mammoth and Candelaria, but the greater portion are those who have mining and other interests in this section.

HIS OBJECT.—The Junior of this establishment is circling around among the folks up the country. His object is to get photographs of the man who would rather pay the doctor than the printer, but neglects both—till he gets a bad taste in his mouth.

THE NOTICES.—The notice for proposals to supply text books appears in this issue; that to candidates for teachers' certificates, as referred to elsewhere, will, we presume, appear next week.

THE EVIDENCE.—The evidence that Darwin feels that she has a future is, that they sling dice out there, here of late, at $20 a throw; during the recent blue term, 20 beans was considered reckless.

ARIZONA LETTER.

Following is an extract from a private letter written to H. M. Isaacs, Esq., of this place, by Robert Burnham, a gentleman well known to everybody in this section. Mr. Burnham is now Superintendent of a 20-stamp mill at Contention City, Pima county, Arizona, at which place the letter was dated May 12:

We have a very fine mill of twenty stamps, and very complete in all particulars and a good mine to back it. Since March 14 we have shipped $201,000, and still it is coming out at the rate of from $4,000 to $6,000 per day. The country is very good for a mining camp. There is plenty of water and three 20-stamp mills will be built here this season and perhaps more. The mines are at Tombstone, nine miles from here. This is the nearest point to water for milling purposes. The country at and about Tombstone is very nearly like Bodie, and all of the mines are good. In a month there will be 40 hoisting works running. There is a great rush to this country now, and stages are loaded every day. When I came down here I had 120 miles of staging. Next week it will be only 10, and they are pushing the railroad on to make connection with the East as fast as possible, and another company is about to build a narrow-gauge road to run to Tombstone and draw ore to the mills. So you see the prospect is good for a lively camp. A great many people are excited, but I am cool and do not count on too much in the future. I do not believe in too much haste and heat in mining matters. I see many people here that I knew in Nevada and California, but none that I knew at Independence except Colcord, who was down here to examine some mines at Patagonia, a new mining camp of great promise, about 50 miles south of this place. I do not think that he made any arrangements there, as he has not returned.

Another Narrow Gauge.

At the request of Samuel Sloan, President of the Delaware, Lackawana and Western Railroad Company of Pennsylvania, a gentleman who participated in the building of that road and was connected with its operation for twenty-eight years, has been since December last gathering statistics of the consumption of wood, lumber and timber in Bodie, examining large tracts of timber lands, and looking for an eligible route for a narrow-gauge railroad from Bodie into the great forests of the Sierra Nevada, and will in the course of a day or two forward his report. The report will be highly favorable to the building of such a road, the erection of sawmills, etc., and the material for the road will doubtless be shipped immediately and the work of grading at once commenced. The proposed road will be twenty-five miles in length, and will have one branch extending off from the main trunk about twelve miles, thus enabling the projectors to reach a large body of heavy timber and also an extensive forest of nut pine, the latter being the best firewood in the mountains. Under the laws of Pennsylvania the Delaware, Lackawana and Western Railroad Company is required to pay into the State Treasury all surplus earnings above a certain percentage of interest on their capital stock, but is allowed to expend such surplus in building new roads, or making other improvements, at any point it may select, and hence the company is anxious to put such surplus into a narrow-gauge road between Bodie and the great forests of the Sierra rather than forfeit it to the State. Mr. Sloan instructed his agent that, if there was a reasonable prospect of such a road earning, for any reasonable length of time, six per cent. per annum interest on the capital required to construct it, he would at once furnish plenty of money, not only to build and stock the road, but to erect sawmills, etc.—*Bodie Standard.*

A DREAM.

[PUBLISHED BY REQUEST.]

I was lost upon the desert, wandering to and fro;
The sands were hot and burning, and I knew not where to go.

I saw no cool oasis where sparkling waters shone—
I was lost upon the desert, and was wandering all alone.

My feet were torn and bleeding from the thorns that around me lay.
My heart was proud and bitter, and I would not kneel to pray.

The sun's hot rays were burning upon mine aching head;
I cursed the day that gave me birth, and wished I were dead.

At last, when hope had left me, I sank down in despair,
When, lo! I heard the music of water in the air.

I looked; and close beside me, was its cooling, dashing spray;
But thousands stood around and motioned me away.

I tried to reach the fountain, but my limbs were sore and weak;
I raised my hands imploring, for my tongue refused to speak.

There was gossip, pride and envy; there was duty and despair;
And all, with bitter, taunting words, refused me entrance there.

I begged, with eyes imploring; I gave one bitter cry.
But they said that "On Life's Desert there was lots of room to die!"

I looked at the road behind me, with its hot and burning sands,
And then at the road before me that reached to unknown lands;

And then at the cool oasis, where the sparkling waters shone.
And I knew that I on its very edge must die on the sands alone.

I raised my eyes to heaven for just one pitying gleam,
When an angel's voice whispered: "'Tis nothing but a Dream!"

BERYL STAR.

Machine Jokes.

The rain falls on the just and the unjust, but not on the man who has just stolen an umbrella.

The word "boom" has reached England. Now maybe they'll wish they hadn't sent that "hardly ever" contrivance. Revenge is sweet!

A burglar alarm is a good thing. It lets you know of the approach of the burglar in time to hide under the bed before he can come up and gag you.

A Savanna man recently invented a water velocipede, but the priceless secret of its construction is lost forever, as the sharks took the man and machine in on the first trip.

He—"Why, you see, the fact is, my dear, I knocked your medieval teapot off the top shelf and broke—" She—"My prophetic soul! My teapot?" He (bitterly)—"No. Merely my head!"

A Philadelphia commercial editor, who was once a small boy with a mother who knew the value of a slipper in cases of emergency, cannot to this day write about a "movement in leather" without hitching uneasily in his chair.

When a Denver deacon forgets himself and remarks to the man who doesn't notice the contribution box, "Are you going to chip?" the folks in the congregation wink at each other and the clergyman tries to look as though he doesn't see where the fun comes in.

There are eight pin factories in the United States, with an annual production of about 7,000,000,000 pins. And when a man so far forgets himself as to put his arm around the waist of one of Eve's fair daughters, he somehow gets the impression that he is wrestling with all eight of the factories with a full year's stock on hand.

Our ironclad navy at present consists of twenty-four ships, of which two are in commission, five on the stocks, seven repairing and ten ready to be sold to a junk-man. We do not wish to alarm England unnecessarily, but merely mention these facts with the view to warning her that it is her policy to be civil.

When the Greeks were about to sail for Troy, Menelaus brought a bundle of straw and put it carefully away in his cabin. "What is that for?" asked Agamemnon. "To tell us the direction of the breeze," answered Menelaus. "You'r crazy!" said Nestor. "Why," remarked Menelaus, "don't straws show which way the wind blows?"

Little Georgie was taken to church last Sunday, for the first time. Of course he was plied with questions when he got home—What did he think of this, that and the other; what did he see and what did he hear? "What did the minister say, Georgie?" asked his mother. "He said 'Dreat Dod!' dust 'way papa did todder day when he was putting down tarpet and hit his finger wiv um yammer."

When the shrewd small boy who is left alone in the house during the evening makes such a mess of his raid on the pie closet that it is bound to be noticed when his parents return, he hies him to the room, puts a pillow in his bed to represent himself, extinguishes the gas and gets under the bed. And when the old man comes up stairs, madder than a wet cat, and without stopping to light the gas, lathers that pillow with a trunk strap, the boy yells as though he was getting it, and the old man goes off satisfied. That's the sort of a boy who will grow up to run ward caucuses and be a Senator.

THE report that has been in circulation for the past week, that the managers of the Bodie extension of the Virginia and Truckee Railroad had concluded to change the route from the one originally proposed to that of Carson Valley and through by Wellington Station, is without foundation. The work will be commenced on the 1st of June and carried through according to the surveys. Grading will commence at the Mound House.—*Bodie Free Press.*

LEGAL.

SHERIFF'S SALE.

BY VIRTUE OF AN EXECUTION ISSUED out of the Superior Court, in and for the County of Inyo, State of California, in the suit of Patrick Mullen, Plaintiff, against Emigrant Silver Mining Company, Defendant, upon a judgment rendered in the District Court of the Sixteenth Judicial District of the State of California, in and for the County of Inyo, on the Thirteenth day of November, A. D. 1879, for the sum of Seven Thousand and Seventy-eight 86-100 Dollars, besides costs amounting to the sum of Forty-four 70-100 Dollars, duly attested the Third day of May, A. D. 1880, whereby I am commanded to make the amount of $7,123 56-100, besides accruing costs and interest, I have levied upon all the right, title and interest of the said Defendant in and to the following described real property, to-wit:

All those certain mines, lodes or leads known and designated as the Valentine and Cactus mines. Also, all that certain mill site and quartz mill known as the Emigrant Silver Mining Company's mill site and mill, together with all the machinery, buildings, offices, shops and appurtenances belonging thereto or in anywise appertaining. Also, all the following named springs and water rights, to-wit: The Willow Springs; the Black Rock Springs; the Grapevine Springs; the Burro or Jackass Springs, and the Bail or Emigrant Springs, together with all the water tanks and water pipes leading from said springs to said mill, with all the appurtenances belonging thereto—all the above described property being situated in Lee Mining District, County of Inyo, State of California.

Notice is hereby given that on TUESDAY, the FIRST day of JUNE, A. D. 1880, between the hours of 9 o'clock A. M. and 4 o'clock P. M., to wit: at the hour of 1 o'clock P. M. of that day, in front of the Court House door, in the town of Independence, County of Inyo, State of California, I will sell all the right, title and interest of the said Defendant, Emigrant Silver Mining Company, in and to the above described property, or so much thereof as may be sufficient to satisfy said judgment and all costs, at public auction, to the highest bidder or bidders, for cash in hand in gold coin of the United States.

J. W. SMITH, Sheriff,
By J. J. MOORE, Under Sheriff.

Sheriff's Office, Inyo County, California, May 6, 1880. n516t4

SHERIFF'S SALE.

BY VIRTUE OF AN EXECUTION ISSUED out of the Superior Court, in and for the County of Inyo, State of California, in the suit of A. R. Conklin, Plaintiff, against Boushey Silver Mining Company, Defendant, upon a judgment rendered in said Court on the Third day of May, A. D. 1880, for the sum of Three Thousand Eight Hundred and Seventy four 65-100 Dollars, besides costs amounting to the sum of Ten 25-100 Dollars, duly attested the Third day of May, 1880, whereby I am commanded to make the amount of $3,884 30, besides accruing costs and interest, I have levied upon all the right, title and interest of the said Defendant in and to the following described real property, to wit:

All that certain mine, lode or lead known and designated as the Boushey mine, situated on the top of Buena Vista Mountain, about one mile southerly from the town of Cerro Gordo, and about one thousand feet southwesterly from the Jefferson mine, said mine being fifteen hundred feet in length. Also, the Boushey tunnel and tunnel site. Said mine and tunnel situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California.

Notice is hereby given that on TUESDAY, the FIRST day of JUNE, A. D. 1880, between the hours of 9 o'clock A. M. and 4 o'clock P. M., to-wit: at the hour of 12 o'clock M. of that day, in front of the Court House door, in the town of Independence, County of Inyo, State of California, I will sell all the right, title and interest of the said Defendant, Boushey Silver Mining Company, in and to the above described property, or so much thereof as may be sufficient to satisfy said judgment and all costs, at public auction, to the highest bidder or bidders, for cash in hand in gold coin of the United States

J. W. SMITH, Sheriff,

SUMMONS.

IN THE SUPERIOR COURT, IN AND FOR the County of Inyo, State of California.

J. S. Rothschild and A. W. Eibeshutz, partners doing business under the firm name and style of J. S. Rothschild & Co., Plaintiffs, vs. G. W. Smalley, Defendant. Action brought in the Superior Court, in and for the county of Inyo, State of California, and the complaint filed in the office of the Clerk of said Superior Court.

The People of the State of California send Greeting to G. W. Smalley, Defendant: You are hereby required to appear in an action brought against you by the above named Plaintiffs, in the Superior Court, in and for the County of Inyo, State of California, and to answer the complaint filed therein within ten days (exclusive of the day of service) after the service on you of this Summons—if served within this county; or, if served out of this county, but in this district, within twenty days; otherwise, within forty days—or judgment by default will be taken against you according to the prayer of said complaint.

The said action is brought to recover judgment in favor of Plaintiffs and against Defendant for the sum of $650 49-100 in U. S. gold coin, besides interest, being the amount due on a promissory note given May 1st, 1878, due one day after date, with interest thereon at the rate of one per cent. per month until paid—together with costs of suit, as will more fully appear by the complaint filed herein, to which reference is hereby made.

And you are hereby notified that if you fail to appear and answer the said complaint, as above required, the said Plaintiffs will take judgment against you for the sum of $650 49-100 and interest, together with costs of suit.

Given under my hand and the Seal of the Superior Court, in and for the County of Inyo, State of California, this 12th day of March, in the year of our Lord one thousand eight hundred and eighty.

[SEAL] JOHN CROUGH, Clerk.

REDDY & CONKLIN, Plaintiff's Attorneys.

New Railroad Scheme.

Last evening a number of leading citizens of Stockton met in one of the Superior Court-rooms, to consider the question of a narrow-gauge railroad from Stockton to some point in the State of Nevada. A. J. Hatch, Surveyor General of Nevada, and H. A. Gaston, author of a book called "The Little Lawyer," and Speaker of the late Assembly of Nevada, were present. A. C. Paulsell was elected Chairman of the meeting, and E. L. Colmon Secretary. Mr. Hatch hung up a map of the Pacific States and Territories, by the aid of which he explained to those present the narrow-gauge railroad system of Nevada, now built and projected. Many of the roads surveyed, and which will be built the coming Summer, will extend north into Idaho, northwest into California, and east into Utah. Several lines are projected in the western portion of Nevada, which could be easily connected with the outlet to the sea, proposed in the road from Nevada to Stockton. Mr. Hatch said he was not there to further any personal interests of his own or anybody else's. What the people of Nevada wanted was a narrow-gauge railroad connection with their home roads, and leading to some center of commerce. As they are situated now they are slaves to the Central Pacific Railroad. This road discriminates against them all the time because it has a monoply of transportation, and the people cannot help themselves. To illustrate: A car load of freight coming from New York to San Francisco costs $300; from New York to Winnemucca, in Nevada, it costs $600. Yet Winnemucca is 500 miles nearer to New York, on the line of the road, than San Francisco is. The people of Nevada want to throw off this yoke. If they had any other line to patronize, the Central Pacific would never get a dollar of their money. Therefore, as a State officer of Nevada, and a property holder there, he had come to Stockton to make certain representations to the people here, which he thought was as much to their advantage as to the advantage of Nevada or anybody in it. Although he was a surveyor and civil engineer, it must not be inferred that he might want a job to survey some new line. He would have nothing to do with the surveying, or with anything else connected with the enterprise, beyond furthering it in a general way. Nor did he come to Stockton to ask the people to subscribe money to build a railroad. No money would be necessary, as he would explain: Certain New York capitalists, who are building a narrow-gauge road south through Nevada to Columbus, are anxious to have an outlet this way, so as to increase their business. They have plenty of money and are willing to use it or loan it. They would prefer, instead of building a road themselves from Nevada to Stockton, to have the people here do it with their money, which they would loan at five or six per cent. per annum. The reason of this is because, if the people are interested, they will endeavor to get business for the road and prevent adverse legislation, should any be attempted. Either of these would be difficult for Eastern men to do, especially with the earnest opposition they would experience from the Central Pacific Company. Authorized agents of the New York syndicate had instructed him to make this proposal. It seemed to him that the people of Stockton at present occupy the position which Stanford & Co. occupied when they commenced building what was then called the Atlantic and Pacific Railroad—they had an opportunity to build a railroad with other people's money and finally own it when it pays for itself. It would take, he thought, about $2,000,000 to build the road, all of which could be paid back out of the profits of the business in two years. The Virginia and Truckee Railroad, which is a broad gauge and was a most expensive road to build, paid for itself the first year. The Eureka and Palisade road, which is a narrow gauge, has paid for itself over and over every year since it was first built. There is no reason why the proposed line from Stockton to Nevada should not have half as much business as the lines mentioned. It might have just as much. The country to be traversed was full of developed and undeveloped resources, while the development of Nevada had but just commenced. The supplies for that whole region would naturally be drawn from Stockton, because they could be got here, or should be got here as cheap as anywhere else, while the cost of transportation by a narrow-gauge railroad is one-third less than by any other. Stockton, in short, would be the marketing place for a greater area of country than any other interior city on the Pacific coast could, by any possibility, supply. It remained for the people to say whether they would organize and build this road or not.—*Stockton Mail.*

THE novelty of the Chinese presence is beginning to wear off the mind of New Yorkers. It was at first very great, as in California in the early days. But there is a practical feature to John's character, the same as there is to that of other men, which he is certain to demonstrate sooner or later. The New York journals have learned that the Chinese in that city have laws of their own, under which their disputes among themselves are adjusted. When they give offense to a white man, however, it is different. Lately a Caucasian sued a Chinese laundryman in New York for the sequestration of four garments. The defendant and a number af his countrymen came into court, when the plaintiff could not identify his man, because, as he said, "Chinamen all looked alike." Judge Dinkel presided. He ordered the doors of the court-room to be closed and guarded, declaring that "some one must suffer for the offense." Accordingly, he rendered a verdict of damages against Lee Tacoon, the last one examined. Tocoon offered two Chinamen, who had become legally naturalized American citizens, and were jointly worth $50,000 in real estate, as bondsmen, but Dinkel would not accept the Mongolian bonds. The case was appealed, and the higher Court reversed the decision of Judge Dinkel, declaring that "he did not know his business," and thereupon issued an order to compel the lower Court to show cause why Tom Lee and Lee Tung were not good bondsmen. The laundryman who stole the garments is safe. He cannot be identified, and without identification there can be no conviction. This is said to be the first experience of the ability of "John" to do "tricks that are vain."—*S. F. Call.*

STATE and National Conventions for the promotion of the different industries of the country are becoming quite common. A "Butter and Egg" Convention was recently held at Indianapolis, where some alleged facts were brought out not generally known to the public. It was asserted that the annual dairy product of the country—butter and cheese—is worth $350,000,000, or one-fifth more than the wheat crop, one-seventh more than the hay crop, one-third more than the cotton crop, and only one-fifth less than the corn crop. There are 13,000,000 cows in the United States, which is over six times the number in Great Britain and more than twice the number in France. The cheese and butter exported this year have paid $1,000,000 in freights to ocean steamers; they pay to railroads $5,000,000 a year in freights, and milk pays as much more—the annual product of milk in this country being estimated at $500,000,000. In the dairy business New York stands first, Vermont second, Pennsylvania third, and Ohio fourth. Indiana stands first in eggs and poultry.

THE excessive indulgence in any appetite is injurious, but it has long been a question whether the moderate use of tobacco in any of the customary forms is accompanied with deleterious effects. Here is an item on this head that can be taken for what it is worth: At Yale College each class is graded in divisions according to scholarship, the best scholar being in the first, and so on down to the fourth, where they are rated "not too good, "yet good enough" to keep in the ranks. In the Junior Class it was found that only 10 out of 40 in the first division were addicted to smoking; 18 out of 37 in the second; 20 out of 27 in the third, and 22 out of 26 in the fourth. The proportion of smokers, it will be observed, increases in regular ratio with the falling off in scholarship. The inference is against the smokers, but it is not certain that there are not other causes to account for the falling off in mental ability. It is not unusual for people to reform their vices as they grow older, and this might to some extent account for the advance in scholarship of the first division of the Yale Junior Class.

ANY discharged soldier of the United States who has not made application for pension on account of wounds or disability received while in the service, must do so before July 1, 1880. After that time pensions will date only from the time of application. The same is true regarding applications for additional bounty not yet claimed by many soldiers.

THURMAN is the choice of the California Democracy for President. Field got two votes. Field is a strong railroad man.

Various Things.

Utah has 105,000 inhabitants.

The present population of Tombstone exceeds 2,000.

At Tahoe City twenty feet of snow fell during April.

It is said that specimens of zinc ore have been found in the Belt mountains, Montana.

Sacramento county is to have a Hall of Records. Plans have been accepted, and the building will cost $24,000.

The railroad company have completed their water tank and turn table at Pantano, Arizona.

Silver-copper matte, of the value of $100,000, awaits shipment from the Montana and Colorado Smelting Works in Montana.

On the Middle Fork, Sierra county, it is said the creek is covered for four miles by an immense slide, so that one would hardly know that there was a creek there.

A correspondent of a Reno, Nevada, paper says about 100 men are employed in the Kinsley District taking out copper ore. Smelting works have been erected, and operations will commence soon.

The Contra Costa Grangers have a Business Association, owning a warehouse at Martinez. Their annual report shows an encouraging increase in their earnings, there being a surplus of over $11,000 above expenses.

Capt. Sam, Chief of the Nevada Piutes, says that representatives of that tribe in that State will soon assemble at a point on the Truckee for the purpose of holding a grand fandango, at which Naches, Winnemucca, Breckenridge and Princess Sarah will deliver addresses.

The compressed air locomotives at the Sutro tunnel are giving perfect satisfaction. A train of loaded cars was hauled out from Shaft No. 2 a few days ago in fourteen minutes, and as soon as the track shall have been put in order to the north branch, the locomotive will be used regularly for this work.

At Santa Rosa lately, the employés of the railroad company drove four cows and two oxen belonging to Korbel Bros. on board a freight car, with guards six feet high all around it. The oxen performed the almost incredible feat of leaping over the guard to the ground. One lost a horn and fractured a hip, and the other dislocated a shoulder. Both had to be killed immediately.

At Suisun, on May 10, a serious accident happened to one of its prominent citizens. Harvey Rice, an old pioneer, went to his barn to hitch up his team for a ride. While in the act of carrying the harness across the stable to the horses, he tripped on a bunch of bags and fell. One of the hames struck him in the right eye, and gouged it out and mutilated his face badly. He then walked home and sent for physicians, who are now attending him, and think they will be lucky if they save the other eye.

A Powerful Disinfectant.

We are indebted to Dr. W. H. George, of this place, for the copy of the following, originally published in the *Physician and Pharmacist*. Its value is well established:

Chloride of lead is said to be the most powerful and safe disinfectant known. To prepare it for use on a small scale for ordinary purposes, take a drachm of the nitrate of lead and dissolve in one pint of hot water; dissolve two drachms of common salt in two gallons of water, and mix the solutions. This forms a solution of chloride of lead.

A cloth wet with this and hung up in a room filled with a fetid atmosphere will sweeten it instantly; and the solution thrown into a water closet, sink, or drain will produce the same effect.

Nitrate of lead is a dry crystal, and is sold, according to quality, at from 18 to 25 cents a pound, and a pound is sufficient to make several hundred gallons of the solution of the chloride of lead.

THE towers of Cologne Cathedral are now the highest in the world, the hight they have attained being 5 feet higher than the tower of St. Nicholas' Church in Hamburg, which has hitherto been the highest edifice. Ultimately they will be 51 feet 10 inches higher. The Cologne *Gazette* gives the following as the hights of the chief buildings in the world: Towers of Cologne Cathedral, 524 feet 11 inches from the pavement of the cloisters, or 515 feet 1 inch from the floor of the church; tower of St. Nicholas, at Hamburg, 473 feet 1 inch; cupola of St. Peter's, Rome, 469 feet 2 inches; cathedral spire at Strasburg, 465 feet 11 inches; tower of St. Stephen's, Vienna, 443 feet 10 inches; tower of St. Martin's, Landshut, 434 feet 8 inches; cathedral spire at Freiburg, 410 feet 1 inch; cathedral at Antwerp, 404 feet 10 inches; cathedral of Florence, 390 feet 5 inches; cathedral at Madgeburg, 339 feet 11 inches; St. Paul's, London, 365 feet 1 inch; ridge tiles of Cologne Cathedral, 360 feet 3 inches; tower of the new Votive Church at Vienna, 314 feet 11 inches; tower of the Rath-haus at Berlin, 288 feet 8 inches; towers of Notre Dame at Paris, 232 feet 11 inches; Pyramid of Cheops; 449 feet 5 inches.

THE Chicago *Inter-Ocean* gives Mormonism the following center shot: "Clarence Davis, the Illinois bigamist, got five years in the Penitentiary and $1,000 fine for having three wives. Cannon, M. C., has four wives, gets two years in Congress and $5,000 a year. Have we a privileged class in this country?"

PEOPLE who have subscribed for a newspaper would do well to bear in mind that the only legal way to discontinue their subscription is to pay up all arrears and order the paper stopped. A paper in New Haven, Conn., sued a man for $43 due for papers on subscription. The defendant set up the plea that he had several times ordered the paper discontinued, but the Court held that under the laws of the State and under the United States, a publisher may continue to send his paper until all delinquencies were settled up, and that the parties to whom the papers are sent are liable for all copies so sent, and judgment was rendered for the amount and costs.

FROMM'S NEW Restaurant and Saloon,

Cor. Edwards and Kearsarge Sts.,

Independence. - - - Cal.

THE UNDERSIGNED WOULD INFORM THE public that he is now located in his New Building, where he will be happy to meet all old and new patrons. Restaurant, saloon and Lodging House combined. Bar and Table always supplied with the best. Rates the very lowest.

CHALFANT & PARKER.

J. E. PARKER. P. A. CHALFANT.

INDEPENDENCE, CAL.:

SATURDAY, MAY 29.....1880

WITH the June number, our western magazine, the *Californian*, completes its first half yearly volume. That the *Californian* is a literary success is an established fact; if not equally so as a business venture, it most assuredly ought to be. This time, we shall make special reference to but two of the many readable articles in its table of contents. Chapter VI of Dr. Gally's "Sand" concludes as if intended for the conclusion of the story; if it does so end we are constrained to say the manner of the ending is a disappointment—flat, in fact. The story of "A Duel in the Backwoods of Alabama," by James Wilton, is well told throughout, and in parts, is as beautifully worded as Gray's Elegy, only that the latter is in measure, while the other is but straightforward prose and in relation to a ludicrous incident not in the least poetical.

THE American *Mining Exchange* thinks the coming season will undoubtedly be prolific in the production of precious metals, and the discoveries to be made result in adding millions of dollars to the wealth of the world. All that is necessary to cause the public to place as much confidence in mining ventures as in any other line of business, is education and corroborative testimony from reliable and practical men employed to report on mines and their prospects. There seems to be no reason to doubt that we are soon to have a reaction in prices of meritorious mining stocks, and a consequent increase of interest in all things pertaining to mines and mining.

THE United States Exhibition at the Berlin Fish Exhibition is, the English papers declare, the most remarkable collection there. It shows not only that America boasts of the best fishing rods and tackle, flies, etc., but that our supply of eatable fish far exceed those of Europe in variety, delicacy and size. "In the matter of fish, as in many other matters," says one of the leading London journals, "we will all have to yield the palm to the United States."

THE highest mine in the United States, and probably in the world, is the Present Help, on Mount Lincoln, in the main range of the Rocky mountains, Park county, Colorado. Mount Lincoln has an altitude of 14,297 feet. The Present Help boarding house, built alongside of the main drift, is about two hundred yards from the summit of the mountains, and 140 feet lower down. This leaves it 14,157 feet above the sea level.

THE outlook for Lake District for a lively season of mining operations and a general revival in all branches of business as well, is now considered as assured. The Mammoth City *Herald*, in an article on this subject, speaks in very glowing terms of the future greatness of the district, and says "a season of rich harvest and prosperity will take the place of the dull times and despondency which has clouded the horizon during the past long and severe Winter."

IT is reported that the position of editor of the *Territorial Enterprise* has been offered to Joseph Wasson, and declined on account of his connection with mining interests, which occupy too much of his attention to admit of the close application required in that position. Joe is a forcible and ready writer, and would be a great acquisition to the *Enterprise*.

THE explosion of five boxes of giant powder at the blacksmith shop of the High Lode mine, near Deadwood, instantly killed Samuel Kimble, foreman of the mine, James Trudell and Jonas Gilmore, employés. Their bodies were torn to pieces, and the country for an area of a mile square was strewn with fragments of flesh and the ruins of the shop.

THE IXL mine, situated in Lake District, is turning out some excellent ore. According to the *Herald* some of the samples assayed as high as $600 per ton in gold and silver, and the width of the deposit has not yet been determined. The ore which gave this return was taken from a depth of thirty-five feet.

ON Sunday last a train on the Santa Cruz Railroad carrying excursionists to a picnic jumped the track and sixteen persons were killed and about fifty wounded, some of whom are likely to die.

WATER, pure and free from alkali, has been struck at Red Rock, Arizona, between Pichaco and Desert station, at a depth of 280 feet.

THE Mill Creek (Mono County) Coroner's jury fully exonerated Jim Slack from all blame for the shooting of John Clark.

DON'T LIKE THEM.

Dr. Platt, a San Francisco preacher, is preaching and writing against our public school system. He wants the State system of education abolished, and sectarian teaching and management substituted therefor. He does not want public money applied to the support of any school other than the primary. This, though, is not altogether satisfactory to him—only a sort of a compromise measure by which to get people to contribute their coin. He says: "This is not altogether as I would have it, for the Church ought to have access to children in their earliest school days, and keep it, and most cases would have it." That is, he wants the Church to have absolute control of everything, temporal, without doubt, as well as spiritual.

With all due deference to true religious belief and its honest upholders, without regard to creeds, and in the sincere belief that sincere religion is a good thing for all mankind, we well know that pretense of religion, or religious fanaticism, is the curse and horror of mankind. The history of the world from the earliest ages down to King Theebaw and Dr. Platt, proves that unrestricted religious power is more to be feared than absolute savagism; it does not matter a particle which of the grand religious denominations of the earth, nor which of their thousand and one sub-divisions or sects, might secure such power, final results would be the same as regards the liberties of all non-believers in the predominating sect or grand division. In this age of the world, in this age of *intelligence and free* schools, no such wide-spread power can ever fall to any denomination, and we thank God such is the fact. But if we were compelled to make choice between absolute Church control, no matter whether Protestant, Catholic or what not, and absolute infidelity, we would choose the latter first, last and all the time—yet we firmly believe in and maintain what we conceive to be true Christianity; and we just as firmly believe that true Christianity, or true religion under whatever name, asks for nothing more of people or Governments than it is itself willing to accord. This Dr. Platt, being a Protestant, is doubtless bitterly opposed to the Church of Rome, chiefly, perhaps, not upon doctrinal teachings in general, as upon account of its never ceasing struggles for temporal power through which to make more absolute its spiritual control; nevertheless, the Dr. now joins hands with the priesthood to accomplish the precise result which above all things has done the most to antagonize the non-Catholic world against Catholicism. But for that one thing, more salient in that one church than others because of its wide spread power and effective organization, the opposing world would care no more for its peculiar tenets than it does for those of all churches in general. Let any church, no matter what one it may be, or how truly respected its aims in general may be—let any church start out to build itself up by temporal means or aid of statutes framed for that purpose, that church becomes at once nothing less than a political party, and more to be feared than any mere political party because such efforts can only be sustained by religious fanaticism, which, given the power, means death to all who oppose. The day is past for things of that kind. Such propositions will be as readily trampled under foot by the great majority of Catholics in this country of free schools as they will be by the masses of all other denominations, Jew and Gentile; of this, there is no doubt whatever. But among the priesthood and clergy both, are to be found some bigots who cannot realize this fact, and propose to make trouble if they can. It is these bigots, not their churches, whom we condemn.

Says a contemporary: "Whatever power controls the public schools, will mold the destinies of the nation." True as gospel. If that is to be a sectarian power, for fear untrammeled education may reduce the nation to ungodliness, what particular sect is it to be? The name of the different religious sects in this country is Legion; not one of these (to take its own estimates) but is better than any of the rest, therefore, would claim its especcial fitness for great trust proposed.

We are quite willing to leave it wholly to Dr. Platt, and such priests, Rabbins, Mormon Elders, etc., who, like him, contend that the public schools must be placed under sectarian control, provided they can mutually agree upon any one sect to take this control. For this purpose, let them be put into a room (divested of carnal weapons); let them proceed to talk; if within a year they have agreed, amicably or otherwise (bulldosing barred), that any one of the sects represented is to so become our national religion, everybody will concur without a murmur; if, at the end of the year, they have not agreed, then let somebody touch off a box of giant powder under the building, sending the whole pack of mischief makers to the place specially designed for such, and where they can appropriately continue their controversy. For it is plain, if such truly religious, good and learned church leaders cannot come to an agreement dispassionately, they have no right to impose such an impossible thing upon those who do not raise such issues of the dark ages.

TWO CONVENTIONS.

The State Conventions of the two parties, namely: the Democratic and Workingmen, have been held, the former at Oakland on the 19th and the latter at Sacramento on the 18th instants respectively. S. M. Wilson was elected Chairman of the Democratic Convention, which body elected delegates to the Cincinnati National Convention, to take place in that city on the 22d of next month. Following are the names of the delegates: Wm. P. Frost, John Foley, J. B. Metcalfe, J. E. McElrath, George H. Cassel R. D. Stevens, Thos. L. Thompson, Andrew Stevenson W. C. Hendricks, C. H. Maddox J. D. Carr and Wallace Woodworth, the three latter named gentlemen represent this (the Fourth Congressional) District. The Democratic State Central Committee is composed as follows: At large—Phillip A. Roach, Stuart M. Taylor, Wm. Blanding, A. Newman, A. W. Seale, John Hackett and J. Wolfskill. By Districts—J. H. Wise, Robert Tobin, F. G. Newlands, Gus. Reis, W. W. Black, Peter Hopkins, Niles Searls, D. E. Thrift, C. H. Livingston, Paul Shirley, W. W. Selkirk, W. D. English, A. Goodyear, C. W. Taylor, C. C. Farmer, J. Hart, J. H. Dollison, D. Spencer, A. H. Glasscock, N. A. Covarrubius, P. H. Dunn, J. D. Spencer, T. A. Carroll and A. W. Ryan. The Convention elected the following as Presidential Eelectors: J. C. Shorb, W. B. C. Brown, Barclay Henly and R. D. Del Valle. At Large—Wm. T. Wallace, David S. Terry. The Convention expressed a preference for Thurman for President. The nomination for Representative in Congress from this, the Fourth District, was deferred until August.

The Workingmen elected the following as delegates to their Convention, to be held in Chicago on the 9th of June next: At Large—Denis Kearney, A. Musselman, John Robinson, Stephen Maybell, L. B. Clark. By Districts—Wm. Wright, J. C. Gorman, J. H. Jewett, A. P. Truesdale, A. A. Udell, W. O. Howe, E. M. Hamilton J. P. Moran The delegation from the First Congressional District that left the Convention, met and nominated John S. Enos for Congress. Thurman was the choice of the Convention for President.

A COLD-BLOODED murder was perpetrated at Agua Mansa, one mile south of Colton, in this State, on Saturday last. Horse races were in progress, and in one race a Mexican horse was pitted against an animal belonging to an American. Upon the decision of the judges that the American horse had won, the stakeholder gave up the money accordingly. As soon as the race was decided, Francis Ortega, a Mexican, rode away, procured a pistol, and with it concealed in his bosom, rode up to the stakeholder and asked him if he had the money. Upon his replying that he had handed it to the winner, Ortega drew his pistol and fired, killing the stakeholder instantly.

A BLOODY duel was fought in San Rafael, Lower California, where Col. Ranjel's troops are stationed, a few days ago. Two captains, of the line, between whom there has been an ill feeling for some time, on the 20th of this month engaged in a duel with swords, and both are so badly wounded that their lives are dispaired of. The combat was continued with desperate determination for more than half an hour and only ended when both men fell exhausted from loss of blood. Each officer has terrible cuts about the head and thrusts in the chest and limbs. It is stated that the duel was conducted in strict accordance with the laws of the code, several officers, friends of the respective parties, being present, besides the seconds.

THE Pacific Coast appropriations are distributed as follows: The Sundry Civil Appropriation bill includes $35,000 for continuing work upon the public building in San Francisco; also $50,000 for improving Tillamook Head, Washington Territory; $5,000 for Point-No-Point. For the coast and geodetic survey of the Pacific coast, $180,000; for the navy yard dry dock Mare Island, $75,000.

AT the meeting on the 21st instant Attorney General Devens read some correspondence from the United States Marshal in this State in relation to the recent loss of life on the Southern Pacific Railroad, in which the Marshal had asked for a military force to assist him. The Attorney General replied that until every other endeavor had been exhausted, United States troops could not be employed to act against a posse of citizens.

SURVEYORS left Wadsworth on the 25th instant to make a preliminary survey of the Western Nevada Railroad.

Political Points.

Washburne, says the Cincinnati *Commercial*, has tried to throw away his popularity and can't.

Henry Watterson's idea about Tilden seems to be that he is healthy—not too healthy, but just healthy enough.

An exchange says that the impression is general that Mr. Tilden holds both bowers and the ace. It seems to be forgotton, however, that Kelly holds the "joker."

Washburne says he is for Grant first, last and all the time, repudiating all combinations with other candidates, and will not be a candidate under any circumstances.

At a recent municipal election in Indianapolis, Ind., the first vote polled by a Chinaman in that State was cast. He was conducted to the ballot box by a colored man.

The Chicago *Times* says: "It is quite manifest that the two-thirds rule is to be maintained at Cincinnati, which is entirely in accordance with the Tilden programme. If he can not procure his own nomination he can the more readily name the man."

THE 30th of May, selected as the day on which to decorate with flowers the graves of the dead soldiers of the Federal and Confederate armies throughout the Union Falls on Sunday this year. The late Legislature of California enacted a law making Memorial Day—the 30th—a legal holiday, and providing that when it falls on Sunday the following Monday shall be observed; consequently, the soldiers' graves in this State will be decorated on the 31st, which is next Monday. In the other States and Territories of the Pacific coast, as we learn through a contemporary, the ceremony will take place today, the 29th. The Grand Army of the Republic, National Guards and citizens of San Francisco have taken active steps for a fitting observance of the day in that city, and doubtless the same is being done in places all over the Union.

THERE is at present in the heavens, so the astronomers say, near the north star, a comet, the tail of which is three minutes in length. To the naked eye it is invisible, but by the aid of a small telescope of good power, or a strong pair of field glasses, it can be easily discovered. Our star gazing friends should take it in.

A DISPATCH from Chicago of the 21st instant says the sensational reports sent from the Far West as to the prospects of an Indian war are not confirmed by advices received at the Interior Department. On the contrary, it is the belief in that Department that there will be no further trouble, and certainly no Indian war.

A BAROMETER shows the hight of a mountain thus: For every 100 feet of perpendicular hight the barometer will fall one-tenth of an inch; if, therefore, the barometer has fallen one and a half inches, we know that we have ascended to a hight of 1,500 feet.

THE House Naval Committee proposes to move an amendment to the Civil Sundry bill, appropriating $3,000,000 to complete the three unfinished iron clads contracted for four years ago and partially built.

A DISPATCH from Plymouth says that a portion of a vessel's stern, supposed to belong to the missing training-ship *Atalanta*, has been picked up on the Irish coast and handed over to the Admiralty.

THE rush to the Skagit country is rapidly increasing. The trail will soon be completed to Central Point, in the diggings, and probably by the middle of June there will be 7,000 men on the ground.

THE Methodist conference has, by a vote of 228 to 113, refused to elect a negro bishop. Colored delegates threaten withdrawal.

DURING 1879 some 255 deaths were reported to the Registrar of Vital Statistics of New York directly due to drunkenness.

A RAILROAD will be constructed between Matamoras and Monterey, and between the latter place and Saltillo.

THE Railroad Commission held its first session in Southern California at Colton, San Bernardino county, on the 24th instant.

THERE is some difference between "cheek" and "brass." Cheek asks for anything, at any time, without the sign of a blush. Brass comes up and takes it without asking.

BURLINGTON, Iowa, according to mortality statistics, is the healthiest city in the United States. Stockton, Cal., stands next.

A COUNTERFEIT of the standard silver dollar, made of brass and heavily plated with silver, was detected at the Sub-Treasury in New Orleans.

GOV. CORNELL, of New York, has respited the murderers Chastine Cox and Balbo.

THE silver now in the vault of the Treasury of the United States weighs 500 tons.

TOM LEE, a Chinaman, has been made a Deputy Sheriff in New York.

THE Philadelphia and Reading Coal Company has suspended.

Coast Items.

Austin, Nev., will soon have a street railroad.

The Fresno *Expositor* has been enlarged and otherwise improved.

Several white deer were recently killed on Whidby Island, W. T.

Two horse thieves were captured in Lincoln county, Nev., after an exciting chase of seventeen days.

Five hundred and forty three bales of wool, the largest shipment of the season, were sent from Stockton to San Francisco a few days ago.

Gold has been found near Milwaukee, a few miles above Portland, and there is considerable excitement over the discovery.

The work of completing the branch State Prison at Folsom has been commenced, and will be done, as far as possible, by convicts from San Quentin.

Arizona has still another new paper It is called the *Drill*, and is published at Pinal City by J. D. Reymert and James Head. It promises not to bore its readers.

The grain which was beaten down in Sutter county during the late storm is becoming erect again, and it is expected that the yield will exceed that of any former year.

The lake at the mouth of the Sutro tunnel contains hundreds of thousands of fish from three to fourteen inches long. None but cold water from the tunnel flows into the lake.

The articles of association of the Sixth District Agricultural Society of Los Angeles, San Bernardino, Santa Barbara, Ventura and Inyo counties have been filed with the Secretary of State.

It is stated on good authority that out of five hundred Piute Indians who one year and a half ago came to Fort Simcoe, on the Yakima (Or.) reservation scarcely two hundred, all told, now remain alive.

Hay making has commenced in Santa Barbara country. Barley is averaging four feet high, with long heads. Honey-making has also begun, and the crop will be immense. Corn averages about eight inches high.

Judge Wilson, on the 21st instant, assigned the trial of the case of Isaac M. Kalloch, against whom information was recently filed by District Attorney Smoot for the murder of Charles De Young, to Department No. 11 of the Superior Court. No date has been fixed for the arraignment of the accused.

Don Mateo Keller and Major Hansen, of Los Angeles, have just finished planting 170,000 vines of the Blanc Elba, Zinfindel, Muscat, Riesling, Burgundy and other varieties of grapes. Mateo Keller proposes to commence next Winter to plant 10,000,000 vines on his Malibon ranch on the coast.

Speaking of the late shower of fish near Napa, the *Register* says: Gen. Jacks has a hundred or more of the fish Mr. Alumbaugh found on his newly plowed ground May 12th, that evidently rained down the night before, still alive. They are about half an inch long and resemble brook trout. Millions of these fish fell upon the field mentioned.

A. W. J. Wilsey, of Petaluma, who dreamed twice two months ago that he would die May 1st, joined the Ancient Order of United Workmen and the Knights of Honor, and then died as he had dreamed, and his family will realize $4,000 at a cost of about $25. It is now believe that he committed suicide, and his body has been exhumed for proof.

THE superficial character of a Nevada earthquake was noticed some months ago. The Eureka (Nevada) *Leader*, of April 17, relates another and similar experience. A miner at work in a mine on Prospect Mountain during the last shake at Secret Cañon says that while the tremor was plainly felt by his partners on the surface, he, at a depth of eighty feet, noticed nothing unusual. The same miner says through an experience of fifteen years underground he has observed one peculiar phenomenon, namely, that loose stones and bits of earth in mines are sure to fall between 12 and 2 o'clock at night. At this time it seems that everything begins to stir, and immediately after 12, although the mine has been as still as the tomb before, the fall of little particles of rock and earth will be heard, and if there is a caving piece of ground in the mine it is sure to fall. It would be interesting to know if other miners have ever observed this phenomenon.—*Scientific American*.

GEO. C. GORHAM has been called pretty much everything by the California press. The latest blast is to dub him a hoodoo. The *Alta* joins with Senator Booth that Gorham's touch is contamination. It says: "Gorham has quit identifying himself with the Grant movement, in his letters from Washington. If he had never begun it, it would have been much better. Our State Convention instructed against Gorham, not against Grant. It was Gorham's officious thrusting of himself to the front that induced the convention to pledge the delegates. So that, once more, George was just powerful enough to hurt the man he wished to aid. It will be a miracle if the Grant movement survives his continued advocacy. He is a "hoodoo."

A CORRESPONDENT of the *Scientific American*, writing from Colorado, says there is much need in those parts for a portable steam drill for prospecting purposes. It should be so constructed that it could be packed on a mule or carried in parts by two men. Its weight should not exceed 150 pounds, and it should not cost over $200. The machine should be capable of drilling granite to a depth of 50 feet, making a bore three-eighths to three-fourths inch in diameter. The correspondent is confident that a large market would be found in Colorado for such a drill in prospecting for gold and silver, and hopes for its early invention.

LATE advices from New York state that the price of lead has declined to four and a half cents in that market.

THE wheat crop of the whole world for 1878, shows a deficiency of 375,000,000 bushels, nearly 200,000,000 bushels of the deficiency falling to Europe. The following table, compiled from the *Bulletin des Halles et Marches*, shows the yield for each large wheat raising country compared with the average yield:

	Average yield.	Yield for 1879.
	Bushels.	Bushels.
United States....	337,500,000	337,500,000
France.....	230,172,000	172,125,000

SENATOR BRUCE, of Missippi, is willing to become the tail of the Republican kite in the Presidential business. It is claimed that all of the colored delegates from the South will urge his claims for the Vice Presidency.

NEW ADVERTISEMENTS.

PROPOSAL TO CHANGE SCHOOL TEXT BOOKS.

PUBLIC NOTICE IS HEREBY GIVEN by the County Board of Education of Inyo county, this 17th day of May, 1880, that it is proposed to change the following text books now and heretofore in use in the public schools of this county.

Reading,
Spelling,
Writing (copy books),
Arithmetic,
Geography,
Grammar,
Language Lessons,
History of the United States,
Industrial Drawing,
Physiology,
Music, and
Algebra.

Sealed bids or proposals will be received by this Board for furnishing books to replace them. Separate bids or proposals for supplying any part of this list will be received.

Said sealed bids or proposals will be opened at Independence, the county seat of Inyo County, at 10 o'clock A. M.,

On Monday, June 28, 1880.

The Board reserves the right to reject any or all bids or proposals.

Said bids or proposals must be accompanied with sample copies of the books proposed to be furnished, together with a statement of the wholesale and retail price at which the publisher agrees to furnish each book at Independence, in this county of Inyo, during the full time for which said books are to be adopted.

The publisher or publishers, whose proposals shall be accepted, must enter into a written contract with this Board of Education, and shall give a good and sufficient bond in the sum of $500 for Readers, $400 each for Geography and Arithmetic, and $100 each for the remainder of the said list of text books.

By order of the Board of Education of Inyo county. J. W. SYMMES,
n519td Secretary.

TEACHERS' CERTIFICATES.

PUBLIC NOTICE IS HEREBY GIVEN that the semi-annual examination of persons desiring to teach school in the county of Inyo, will be held by the Board of Education of said county at the District School House, in the town of Independence, commencing at 10 o'clock A. M., on

Tuesday, June 29, 1880.

All applications for examination must be filed with the members of the Board on or before June 28, 1880.

Section 1772 of the Amended School Law provides that applicants for second-grade County Certificates shall be required to pass a satisfactory examination in Arithmetic, Grammar, Geography, Composition, History of the United States, Orthography, Defining, Penmanship, Reading and Method of Teaching.

Applicants for first-grade County Certificates will be required to pass a satisfactory examination in all of the foregoing studies, and also in such other studies as the Board may determine upon.

Sections 1772 and 1775 require that all teachers must hold certificates from the County Board of Education, notwithstanding they may hold either a Life Diploma, State Educational Diploma, Normal School Diploma, State University Diploma or State and County Certificates granted prior to the first day of January, 1880.

By order of the Board of Education of Inyo county. J. W. SYMMES, Secretary.
n519td

NOTICE OF CO-PARTNERSHIP.

STATE OF CALIFORNIA, }
County of Inyo. }

WE, THE UNDERSIGNED, DO HEREBY certify that we are partners transacting business in this State, at Bishop Creek, Inyo county, under the firm name and style of Elkeles & Lasky; that the names in full of all the members of such partnership are Jacob Elkeles and Levi Lasky, and that the places of our respective residences are set opposite our respective names hereunto subscribed.

In witness whereof we have hereunto set our hands this 22nd day of May, A. D. 1880.

JACOB ELKELES, Bishop Creek.
LEVI LASKY, Lone Pine.

STATE OF CALIFORNIA, }
County of Inyo. } ss.

On the 22nd day of May, 1880, before me, Seth G. Sneden, a Notary Public, in and for said county, residing therein, duly commissioned and sworn, personally appeared, Jacob Elkeles and Levi Lasky, known to me to be the persons described in, whose names are subscribed to and who executed, the within instrument, and they duly acknowledged to me that they executed the same.

In witness whereof, I have hereunto set my hand and affixed my official seal, at my office in the county of Inyo, the day and year first above written.

[SEAL.]

n519t3
SETH G. SNEDEN, Notary Public.

CONSTABLE'S SALE.

BY VIRTUE OF AN EXECUTION ISSUED out of Justice Seth G. Sneden's Court, of the 4th Township, county of Inyo, State of California, dated the 27th day of May, 1880, in a certain action wherein A. Dell, as Plaintiff, recovered judgment against J. A. Seehorn, as Defendant, for $101 56 100 damages and $19 50 100 costs on the 27th day of May, 1880, I have levied upon the following described property, to wit:

All the right, title and interest of Defendant J. A. Seehorn in and to that certain water ditch, located on the east side of Owens river, in the 4th Township, Inyo county, California, and known as the "Edson and Hughes' Ditch," being the same property as heretofore conveyed by A. J. Walter to J. A. Seehorn by deed and of record in Book K of Deeds, page 35, Records of Inyo county.

Notice is hereby given that on MONDAY, the TWENTY-FIRST day of JUNE, 1880, at 12 o'clock M. of that day, in front of Sneden's office, in the town of Bishop Creek, county of Inyo, I will sell all the right, title and interest of said J. A. Seehorn in and to the above described property, at public auction, for cash, to the highest and best bidder, to satisfy said execution and all costs.

Dated at Bishop Creek, the 27th day of May, 1880.

WILLIAM GOODMAN, Constable.
n519td

NOTICE.

THE PARTNERSHIP HERETOFORE EXisting between V. Hoff and W. R. Johnson is this day dissolved by mutual consent, V. Hoff assuming all liabilities and receiving all dues of the late firm. V. HOFF.
W. R. JOHNSON.

Cerro Gordo, Cal., May 20, 1880. n519t3

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, MAY 29.....1880

DEATH OF A UNKNOWN MAN.—Tuesday morning last, Mr. Jas. Shepherd, of Georges Creek, came up to notify Coroner Thompson of the fact that an unknown man had died at the Shepherd place early that morning under circumstances that might require an inquiry by a Coroner's jury. The Coroner was not at home, so the matter was submitted to Justice of the Peace Thos. Parker, who, after hearing a statement of the facts, decided it unnecessary to hold a formal inquiry, but nevertheless, at Mr. Shepherd's request, attended in an official capacity, and ascertained the following: Deceased was on his way from Benton, Mono county, to Tulare county, where he said his home was; reached the Shepherd place on the Friday or Saturday evening previous, traveling in an old cart drawn by an old white horse; asked permission to stake his horse where there was good feed, saying that he had no money, which permission was, of course, accorded; he was traveling with a man, seemingly an acquaintance and former neighbor, who was driving a four-horse team; in the morning this man hitched up and went on, leaving deceased in camp, which was quite close to the house; he was soon after visited by Mr. Jas. Shepherd, to whom he stated the following: That at the suggestion of some friend in Benton, he had lately gone to that place expecting to get employment for himself, horse and cart, at four dollars a day; found he could get nothing whatever to do, so traded his cart for a lighter one, and was trying to get back to his home in Tulare; that the man with the team would be back this way in three or four weeks; that he, himself, was "a very unfortunate man; a bug bit me on the leg two years ago, and I've never been right since," indicating the spot where he had been bitten, but which, on examination, showed no trace whatever, of such an occurrence. He was manifestly sick, but said he required nothing except rest. On the following day, seeing that he was no better, the Messrs. Shepherds both strongly urged him to return here and apply for admission in the County Hospital; this he declined positively to do, saying he was going on home. Early on Tuesday morning John Shepherd found him much worse, and had him conveyed to a bed in the house, sending here immediately for Dr. W. H. George, but before the doctor arrived, the man was dead. He was buried that evening in the cemetery south of town. Dr. George ascribed his death to natural causes. On his person was found a letter in several pieces, dated at Mineral King, September 17, 1879, addressed to Thos. White, Visalia, the subject matter of which was a quit-claim deed; the signature was torn off. This letter was written on a printed letter-head of A. S. Hallidie, Wire Rope Manufacturer, San Francisco. On blank portions of this were memoranda in pencil, giving figures of various bills, and these names: "Evens," and "Hickmon;" no money, valuables, or papers whatever by which he could be identified, hence these details.

FROMM'S HOTEL BURNED DOWN.—On Monday evening last, Fromm's hotel and restaurant, on the opposite side of the street, a little over two hundred feet distant from THE INDEPENDENT office, was totally destroyed by fire, together with nearly everything the building contained. The fire was caused by the explosion of a kerosene lamp, just lighted by Mrs. Fromm, in a front room on the upper floor. Almost instantly the entire room was ablaze, but fortunately, Mrs. F. escaped without personal injury, but so badly alarmed it was almost beyond her power of words to tell what occurred. However, it was but an instant till the alarm was given, and but a minute or so later when scores of men were actively at work, first in the vain hope of subduing the flames, next to save whatever could be reached on the lower floor, and to keep the flames from the adjoining building, H. Levy's residence, which stood but a few feet distant, on the north side, from which direction the wind blew almost a gale. The Fromm building was a two-story structure, as above intimated, built less than two years ago, balloon style of frame and thin partitions, so that it was hardly ten minutes from the start till the flames had enveloped it from top to bottom, and were streaming far out to the southward; in about half an hour later, perhaps in less time, all that remained of quite a large and prominent structure was a mass of coals at a white heat. The building was insured for $2,000 and its contents for $500 more, in some company in San Francisco, but what one is not known here, the policy being in the city. Mr. Fromm expects to rebuild immediately, but less pretentiously, most likely. It required every possible effort to save Levy's house and adjoining place of business. The roof on the dwelling and porch, and some pairs of blankets used for protective purposes, were more or less damaged by the heat, while a portion of his yard fence was burned and several trees and things of that sort killed. A stream of blazing shingles and sparks whirled past directly in front of this office building, once kindling a blaze on the roof of Jos. Schalten's dwelling, but which was soon extinguished. Had the wind blown as strongly from the south as it did from the north, the whole of the business portion of the place, courthouse included, would have been destroyed.

STRAWBERRIES.—Mr. Elijah Robinson is hereby awarded premiums on four counts, namely: first, for being the first in the market with strawberries; second, for having plenty to fill all orders; third, for liberal measurements and reasonable rates; fourth, for knowing what printer folk like in the way of luxuries, and a willingness to do his share toward satisfying that liking in the most practical and only feasible way.

BEVERIDGE.—Mr. David Coughanour, to whom reference was made last week, favored us with a call on Thursday, immediately following his return from a visit to Messrs. Chandler, McEvoy & Taylor's scene of operations over in Beveridge. Mr. C. is very much pleased with the prospects upon which these gentlemen are operating, although he says it is about the ruggedest locality he was ever in to examine mines. The company have about a dozen openings on three or four different ledges. Mr. C. says that no piece of rock from the pay streak in any one of these openings can be found, even by a blind man, but what will yield a good color in gold; in general, the value would appear to be about $100 per ton, though, so far, by arastra process, it has yielded but about half that. He thinks the prospects in general will amply justify the erection of a small stamp mill. This work is to be commenced at once, or as soon as a clean-up of the present run of the arastra is made, which will be in about a week. The mill has been ordered, and the engine in use to drive the arastra was designed for 10 stamps. Mr. Coughanour has amassed a competency in gold quartz mining in the Gold Hill mine and mill near Placerville, Idaho, and is eminently a practical man in all respects, and his judgment of mines of this character may be relied upon. It is noteworthy that Messrs. Chandler and McEvoy, who are hammering away over here in Beveridge, were the original locaters and operators upon the same Idaho mine which has since done so well for Mr. Coughanour, who purchased their interests, the claim not then being deemed of much value by either party.

FAVORABLY ACCEPTED. — We were shown a private letter received by a gentleman of this place from San Franciso on Thursday evening last, from which we are permitted to state a few facts in regard to the Deep Spring mines. The letter states that the report of Mr. Rose (who was sent up here by Alvinza Hayward to examine the property for which that gentleman has been negotiating) has been favorably received and accepted, and ere this all matters pertaining to a transfer of the property have probably been perfected. Mr. Hudgin will return in a few days, when the work of development of the property will be vigorously prosecuted. This is quite encouraging, to say the least, for if such parties as are reported as having taking hold of these prospects conclude there are mines there—which we haven't the least doubt of—they have an abundance of capital to test the same thoroughly.

FROM BODIE.—Dick Glenn, for a long time driver on the Southern line, and who about a month ago concluded to take a trip up north, returned on last Thursday morning's buckboard from Bodie. The reason for his returning so soon to these parts is that he contracted a severe cold in that section, which he was unable to rid himself of, so he thought he would leave the gay and festive scenes of that burg for the more genial clime of Inyo. He reports times very lively there, and is of the opinion that the camp has good staying qualities. The mines, he says, are reported as looking well. Dick informs us that he run across a good many Independence boys up there, and a number of them, he thinks, would return here again if they only had a sufficient amount of coin to liquidate their expenses on the trip.

NEW AGENT.—W. R. Johnson, these several years past, our agent at Cerro Gordo, has dissolved his connection with V. Hoff in the mercantile business in that place and gone to Arizona. Mark Hoff, whom everybody knows, takes W. R.'s place in the store and also as THE INDEPENDENT agent. The responsibilities and emoluments of this latter position is what made Mark think it might be about the proper size to have the new sign to read: "Mark Hoff & Father;" but the old gentleman still retains his full physical powers, so Mark concluded the old sign was the most concise, if it wasn't quite so euphonious; besides that, the old gentleman had gone to Candelaria, and might take it into his head to come this way on his return to his home in the city. The firm has established a store in Candelaria.

CERRO GORDO.—A note from a friend in Cerro Gordo informs us that times there are very dull. Capt. Keeler has a couple of men at work on the Gold Hill Extension, and they have struck some very fair prospects. Crapo is making a survey of the Santa Niño mine, which adjoins the Ygnacia. In the Cuervo a body of ore of unknown dimensions has been struck which averages assays of $300.

DARWIN.—Mr. O'Brion writes: "Will defer my report upon the two furnaces until next week. Will say, however, that Messrs. Gorman & Eddy are making a fine run, without stoppages, and turning out 9 and 10 tons a day. Supt. Williams has also made a good run on his ore, but having finished same, is now running on flue dust; this finished, he goes to the city."

COMING. — According to numerous play-bills scattered about town, we are, on Wednesday evening next, to have an entertainment of "fun, wit, talent, beauty, sketches, songs, jig and clog dancing, comic singing," and all that sort of thing, plain and colored, by a troupe of celebrated male and female artists.

GONE OUT.—Assessor May has appointed Mr. J. F. Dillon, the former incumbent, as a Deputy Assessor, to assist him in the work appertaining to that office. Frank took the field a few days ago, and is now operating in the southern part of the county.

PREACHING.—Rev. F. M. Willis will hold his regular semi-monthly services in this locality, according to standing announcements for the second and fourth weeks of the month.

EARTHQUAKE.—Quite a severe shock of an earthquake was felt in Round Valley on Sunday last.

DEEP SPRING DISTRICT.—Messrs. V. G. Thompson, of the Blaney House, and H. D. Gelatt, of the Post, "took in" that much-talked-of and promising district during the first few days of the present week. Both gentlemen speak in very flattering terms of the outlook of that section—that is, as far as the mines there have been developed, for as they stand at the present time the can be designated as simply prospects. Of course, there are a few ledges there upon which considerable work has been done, but these are locations that were made several years ago, and the deepest shaft down on any of them we are informed, will not exceed 80 feet. The most noticeable features of the mines there are the extraordinary width and boldness of the croppings, which can be easily traced for a distance of at least 6,000 feet, as is the case in regard to the vein upon which the Whiteman, Horton, Thanksgiving, Broder and several other locations are made. The Cinderella, the property of Mr. Wingard, is considered by these gentlemen, as far as developed, to present as good a showing as any mine they have seen anywhere. A force of men is kept constantly employed in the work of development. Joe Bowers, the Piute chief, who has been sojourning in that locality for some time past, brought in some fine looking ore, which he informed Scott Broder, his old-time friend, if he would accompany him he would show where it came from. He consented, and the next morning started for the new find. Sure enough, Joe led him directly to the place, but how far it is distant from his other mines, we have not been informed. Anyhow, Scott thinks it is the richest thing that has been struck yet. In view of the fact that San Francisco capitalists have interested themselves in locations there, and intend to put a force of men immediately to work upon them, it is reasonable to suppose that the merit or demerit of Deep Spring District will soon be thoroughly tested.

PERSONAL.—S. P. Moffat, Esq., returned home on Wednesday evening's stage, after being absent nearly a fortnight at the Bay city. He expresses himself as having had a very pleasant trip. He met Frank Blaney and Dan. Crough in the city, the former leaving for his home in Texas on Sunday last. In regard to that habeas corpus case, Mr. Moffat informs us, it remains now as it did at first. New papers will have to be gotten out, as the writ presented to the Court by Mr. Moffat as guardian was denied on the ground that the guardianship was not fully established....Judge A. R. Conklin, expects to take a trip Bodieward in a few days.

SHEEP.—From the clouds of dust we have noticed raising on the east side of Owens river for the last three or four mornings, it is presumed that large bands of sheep are now being driven through the valley, headed northward. As the warm season has not as yet fairly set in, and as the bountiful rains which we have had throughout the whole State will make feed abundant for the animals, it is expected that they can be successfully landed at their objective points without incurring any extensive loss to them by oppressive heat or from the lack of food.

DEPARTED.—Jos. Schalten, Sr., Dr. J. D. Blair and Jos. Schalten, Jr., left for Candelaria this morning. The two first named gentlemen propose engaging in business at that point. The Doctor intends to practice his profession, and Joe Schalten Sr., expects to go into the brewery business. They all being old timers of this section they leave behind them a large number of friends and acquaintances who wish them success in their new field.

TO TEACHERS.—The attention of persons desiring to obtain teachers' certificates for this county, is directed to the official notice, under "New Advertisements," fixing the time and place for the required examination.

CATTLE.—We learn that Mr. Rafael Dias, of Lone Pine, is at present engaged in transferring some 100 head of cattle, which he purchased of Mr. Dick Hessian, of Big Pine, some time ago, to the southward.

DOING WELL.—The Mexicans have eight arastras in regular operation in Beveridge District, all of which seem to be doing quite well. The ore worked yields $25, gold, per *carga* of 300 pounds.

STRYCHNINED.—The dog poisoner was abroad this morning—no less than four or five dogs coming to grief from the effects of strychnine—a cruel way to dispose of a dog, be he good, bad or indifferent.

Mammoth Items.

From the Mammoth City *Herald* of the 19th instant we collate the following items:

The snow has almost entirely disappeared from the summits of Mineral Hill.

Johnny McCarthy and Patterson are reported to have struck the ledge in the Last Chance.

James Argall and Clint Joice are at work on the Geneva. They have the tunnel in over fifteen feet.

The White Mountain mine, in Antelope District, Col. Bowley manager, is working 100 men.

The True Blue case has been reopened in the Superior Court, so that the question of title now rests just as it did before the suit was commenced.

Harry Dickenson has been busily engaged for several days past in shoveling out the grade hence to Mineral Park. In some places the work is from nine to twelve feet deep through the heaviest drifts.

Frank P. Austin and Joe Moody arrived with a pack train of provisions from Fresno, by way of Walker Pass, on their way to Laurel Hill, to commence operations on the claims they located there last Summer.

Late News Items.

The opinion is that Peru is in a bad financial way.

It is claimed that Tilden will capture the Missouri delegation to Cincinnati.

The Louisiana State Convention met on the 24th instant, and Grant and Sherman delegates were probably selected.

Gen. Bradley Johnson says Field is flooding the country with literature favoring his own nomination for President.

The smelters' strike at Omaha is ended, a compromise being effected. Common laborers will get $1 65 per day.

W. K. Fenton shot and instantly killed Daniel Haley near Sheridan, Cal., last Sunday. Land troubles was the cause.

Albert Masterson, a prisoner being conveyed to San Quentin for burglary in Mendocino county, jumped off the boat on Monday last and was drowned.

On account of the ill-health of his mother, Speaker Randall has left Washington for a short time. This will delay the adjournment of Congress.

Some 100 workingmen created a riot in Christiana, Norway, last Saturday. The military charged the crowd and wounded several. Nine soldiers were killed.

One hundred and thirty-one Monarchists, Senators and Deputies have joined against the Spanish Government. The new organization takes the name of the Liberal party.

C. A. Gorney went to the residence of Alice M. Arnold, on third street, San Francisco, last Sunday, and shot her through the heart. He then killed himself. She did not love him; hence the deed.

Robert King, Secretary of the San José Savings Bank, committed suicide on the 23d instant, by cutting the artery of the left arm. What drove him to this is not yet known. A note was left by him, which was addressed to Miss Eva Hobbs, to whom he was greatly attached.

A SIX-HORSE wagon, with a four-story frame or cage, in which were seated a numerous family, with all their household goods inside, on top, or fastened to the sides and ends of the cage, passed up Main street to-day, attracting a great deal of attention. The family was from Bishop Creek, and came to Bodie to settle.—*Bodie Standard.*

THE youngsters are talking about the last snow-shoe ride of the season. The snow is getting too rotten and the ground is getting bare in places on the main streets. A large stream of water is now flowing down the ravine, and there is no more freezing at nights.—*Mammoth Herald.*

THE seat made vacant by the resignation of Senator Gordon, of Georgia, has been filled by ex-Gov. Joseph E. Brown, of the same State. The reason for Gordon's resignation, it is stated, is on account of weariness of politics and the pressure of private business.

MISS LILLIE BOOTH, daughter of John Booth, proprietor of the Austin *Reveille*, has just been married to L. W. Getchell. Having married into a journalistic family he'll Getchell through the *Reveille* if he don't treat his wife properly.—*Carson Appeal.*

EDISON gets $25,000 a year and tries to make light of it.

Machine Jokes.

Conductors ought to make good pugilists—they are always on the punch.

A great many men who start out to reform the world leave themselves for the last job.

In the halcyon days when women shall run for office and vote, the gray mare will be the better dark horse.

In peace prepare for war, particularly where it is a single piece of pie and two hungry boys want it.

During a lesson in the life of King David, a class of girls was asked: "Who killed the giant?" whereupon one answered "Jack."

"Now, this is what I call business," remarked a Brooklyn undertaker, as an unfortunate gentleman stepped into his store and died.

The principal beauty of the Mormon religion is that the same woman doesn't have to get up first the entire Winter to build the kitchen fire.

At this period of the year the recording angel closes his book and goes off on a vacation until the last carpet has been whipped and the last tack driven.

If Whittaker had lived in the days of Mark Anthony, he'd have been counted out when Mark said: "Friends, Romans and countrymen, lend me your ears."

"Silence is golden." Aunt: "Has any one been in these preserves? [Dead silence.] Have you touched them, Jimmy?" Jimmy: "Pa never 'lows me to talk at dinner."

Denver is bragging about a resident who is gradually turning to stone while yet alive, but he is nothing compared to lots of chaps who turned to brass soon after they were born.

A broken down clergyman, being in a moody condition of mind from the continuous study of theological works, was advised to take up Josh Billings' humorous works "for a spell."

Nothing is more pathetic than to see a gentleman rise in a street car and offer his seat to a lady who has been standing for a mile, overcome her protestations and finally receive her gratitude, and then with a benignant and satisfied smile, hop right off at his own store.

"Does your sister Annie ever say anything about me, sissy?" asked an anxious lover of a little girl. "Yes," was the reply; "she said if you had rockers on one of your shoes it would make a nice cradle for my biggest doll."

Worthy Magistrate—"What! a man can be cruel enough to maltreat his lawful wedded wife, and even hurl a plate at her head?" Prisoner—"But, your honor do you know my wife?" Worthy Magistrate—"I have not that honor." Prisoner—"Then just go slow."

BLAINE committed two fatal mistakes in his canvass for the Presidential nomination. The first was in Ohio; the second in Illinois. The latter may be excused on the ground that Grant was the strong man and the one he had to beat, if he succeeded at all. But the Ohio blunder is wholly inexcusable in a man of Blaine's alleged shrewdness as a political manipulator. The effort to take Ohio from Sherman was the rock on which he wrecked his hopes. The move was a bold and brilliant one, but it should never have been attempted without a certainty of success. Resulting as it did, its only effect was to embitter and alienate the Sherman forces, and cut off all hope of succor from that direction. Blaine erred still earlier in the fight, in failing to make Pennsylvania and New York the chief battle ground. He could have entered these States without getting on the corns of conspicuous rivals for the nomination. As things have shaped he has lost all, and cannot come within 75 votes of success, on any ballot, in the National Convention; provided always, that the silent man remains in the field.—*Eureka Sentinel.*

A CHICAGO agriculfural journal gives an account of the largest plow ever known to be made, which has recently been turned out by an Illinois firm of agricultural implement makers for use on the St. Louis, Iron Mountain and Southern Railway. It is attached to a platform bar of a construction train in such a way as to cut its ditch a sufficient distance from the railway line. It will make one mile of ditch 2 feet wide and 3 feet wide every four hours, thus doing the work of 1,000 men. The beam is made of swamp oak, and is 8x4 inches, the landside being made of bar iron 8 inches wide and 1½ thick, which had to be forged expressly for the purpose. Its total weight is 1,700 pounds.

AN economical Delegate from Washington Territory, wishing to array himself in befitting style at the national capital, invested in a suit of clothes costing fifteen dollars. The garments did not please him, and he brought suit to compel the tailor to take them back and refund him the money. The tailor offered to make another suit but refused to yield up the coin. The aid of the law was invoked by the irate Delegate and the result was that the Justices' Court gave judgment for the tailor.

The Presidential situation is thus summarized by "Gath,": "Hancock's prospects look a little clouded for the Democratic nomination, though his friends are steadfast. Bayard and Jewett are both supported by a considerable number of enthusiastic Democrats. Field has no following that I can see in New York. Thurman is considered as having some chance. Tilden's health continues to improve as his opponents die off."

THE Stratton survey case has been postponed again as Secretary Schurz wishes to present new facts to the House Private Lands Committee. It is to be feared that this Congress will never see the end of the San Francisco Pueblo case.

LEGAL.

SHERIFF'S SALE.

BY VIRTUE OF AN EXECUTION ISSUED out of the Superior Court, in and for the County of Inyo, State of California, in the suit of Patrick Mullin, Plaintiff, against Emigrant Silver Mining Company, Defendant, upon a judgment rendered in the District Court of the Sixteenth Judicial District of the State of California, in and for the County of Inyo, on the Thirteenth day of November, A. D. 1879, for the sum of Seven Thousand and Seventy-eight 86-100 Dollars, besides costs amounting to the sum of Forty-four 70-100 Dollars, duly attested the Third day of May, A. D. 1880, whereby I am commanded to make the amount of $7,123 56-100, besides accruing costs and interest, I have levied upon all the right, title and interest of the said Defendant in and to the following described real property, to-wit:

All those certain mines, lodes or leads known and designated as the Valentine and Cactus mines. Also, all that certain mill site and quartz mill known as the Emigrant Silver Mining Company's mill site and mill, together with all the machinery, buildings, offices, shops and appurtenances belonging thereto or in anywise appertaining. Also, all the following named springs and water rights, to-wit: the Willow Springs; the Black Rock Springs; the Grapevine Springs; the Burro or Jackass Springs, and the Ball or Emigrant Springs, together with all the water tanks and water pipes leading from said springs to said mill, with all the appurtenances belonging thereto—all the above described property being situated in Lee Mining District, County of Inyo, State of California.

Notice is hereby given that on TUESDAY, the FIRST day of JUNE, A. D. 1880, between the hours of 9 o'clock A. M. and 4 o'clock P. M., to wit: at the hour of 1 o'clock P. M. of that day, in front of the Court House door, in the town of Independence, County of Inyo, State of California, I will sell all the right, title and interest of the said Defendant, Emigrant Silver Mining Company, in and to the above described property, or so much thereof as may be sufficient to satisfy said judgment and all costs, at public auction, to the highest bidder or bidders, for cash in hand in gold coin of the United States.

J. W. SMITH, Sheriff.

SHERIFF'S SALE.

BY VIRTUE OF AN EXECUTION ISSUED out of the Superior Court, in and for the County of Inyo, State of California, in the suit of A. R. Conklin Plaintiff, against Boushey Silver Mining Company Defendant, upon a judgment rendered in said Court on the Third day of May, A. D. 1880, for the sum of Three Thousand Eight Hundred and Seventy four 65-100 Dollars, besides costs amounting to the sum of Ten 25-100 Dollars, duly attested the Third day of May, 1880, whereby I am commanded to make the amount of $3 884 30 besides accruing costs and interest, I have levied upon all the right, title and interest of the said Defendant in and to the following described real property, to wit:

All that certain mine, lode or lead known and designated as the Boushey mine, situated on the top of Buena Vista Mountain, about one mile southerly from the town of Cerro Gordo, and about one thousand feet southwesterly from the Jefferson mine, said mine being fifteen hundred feet in length. Also, the Boushey tunnel and tunnel site. Said mine and tunnel situate, lying and being in the Cerro Gordo Mining District, County of Inyo, State of California.

Notice is hereby given that on TUESDAY, the FIRST day of JUNE, A. D. 1880, between the hours of 9 o'clock A. M. and 4 o'clock P. M., to-wit: at the hour of 12 o'clock M. of that day, in front of the Court House door, in the town of Independence, County of Inyo, State of California, I will sell all the right title and interest of the said Defendant, Boushey Silver Mining Company, in and to the above described property, or so much thereof as may be sufficient to satisfy said judgment and all costs, at public auction, to the highest bidder or bidders, for cash in hand in gold coin of the United States.

SUMMONS.

IN THE SUPERIOR COURT, IN AND FOR the County of Inyo, State of California.

J. S. Rothschild and A. Schlutz, partners doing business under the firm name and style of J. S. Rothschild & Co., Plaintiffs, vs. G. W. Smalley, Defendant. Action brought in the Superior Court, in and for the county of Inyo, State of California, and the complaint filed in the office of the Clerk of said Superior Court.

The People of the State of California send Greeting to G. W. Smalley, Defendant: You are hereby required to appear in an action brought against you by the above named Plaintiffs, in the Superior Court, in and for the County of Inyo, State of California, and to answer the complaint filed therein within ten days (exclusive of the day of service) after the service on you of this Summons—if served within this county; or if served out of this county, but in this district, within twenty days; otherwise, within forty days—or judgment by default will be taken against you according to the prayer of said complaint.

The said action is brought to recover judgment in favor of Plaintiffs and against Defendant for the sum of $650 49-100 in U. S. gold coin, besides interest, being the amount due on a promissory note given May 1st, 1878, due one day after date, with interest thereon at the rate of one per cent per month until paid—together with costs of suit, as will more fully appear by the complaint filed herein, to which reference is hereby made.

And you are hereby notified that if you fail to appear and answer the said complaint, as above required, the said Plaintiffs will take judgment against you for the sum of $650 49-100 and interest, together with costs of suit.

Given under my hand and the Seal of the Superior Court, in and for the County of Inyo, State of California, this 12th day of March, in the year of our Lord one thousand eight hundred and eighty.

NOTICE OF FORFEITURE.

TO HENRY DUNLAP, CO-OWNER:

You are hereby notified that the undersigned have expended the sum of Six Hundred Dollars in labor and improvements upon the Trade Dollar mine, situate in the Pine Mountain District, County of Inyo, State of California, being the amount of expenditures required to be made and done for the year 1879, in order to hold said mine under the provisions of Section 2324 Revised Statutes of the United States. And if within ninety days after the expiration of the publication of this notice, you shall fail or refuse to contribute and pay your legal proportion of such expenditure as co-owner, your interest in said mine or claim will be forfeited and become the property of the undersigned, as provided for under Section 2324 of the Revised Statutes of the United States.

DESTINY.

There is a mystic thread of life
So sweetly blended with my own,
That Destiny's relentless knife
Must sever both, or none.

There is a form on which these eyes
Have often gazed with fond delight;
By day, an ever sweet surprise;
In dreams attending thro' the night.

There is a voice whose tones inspire
Such thrills of rapture in my breast;
I would not hear a seraph's choir,
Unless that voice would join the rest.

There is a face whose blushes tell
Affection's tale upon the cheek,
Whose pallor at the word, "Farewell!"
Proclaims the love lips earnest speak.

A heart there is, once all my own,
Whereon I've leaned my aching head,
And felt it beat for me alone—
Eyes whose tears with mine were shed.

Our hearts with love's divinest thrill,
In dearest unison did meet,
And felt if one in death was still,
The other then would cease to beat.

The waves of Destiny have borne
My dearest treasure from my sight,
And I must walk the world alone
Till that bright day dispels the night.

—LUNA.

A Movement to Reform the American Spelling-Book.

Some days ago Mr. Ballou, of Rhode Island, introduced in the House a bill in the interest of the so-called "spelling reform," providing for the appointing of a commission of seven persons, "who shall examine the orthography used in the public documents and in the public schools of the District of Columbia, and inquire how much its defects increase its cost of the public printing, and how far they are an impediment to the acquisition and use of the English language and to education, and inquire what amendments in orthography, if any, may be easily introduced into the public documents and schools of the District of Columbia, and accepted in examinations for the civil service, and whether it is expedient to move the Government of Great Britain to unite in constituting a joint commission to consider such amendments." The bill was referred to the Committee on Education and Labor, which has submitted a favorable report upon it. The bill is now on the calendar. The report, written by Mr. Ballou, declaring that it is deemed worthy of serious consideration and careful inquiry whether the language which perhaps is destined to become universal, may not be simplified and abbreviated in its orthography by omitting the silent and unnecessary letters and using only those which most naturally and simply convey the sound of the words when pronounced. The Committee say it has been informed by leading educators that the irregular spelling of the English language causes a loss of two years of each child's school time, is a main cause "of the alarming illiteracy of our people," involves an annual expense of many millions of dollars for teachers and for writing and printing superfluous letters, and is in many other ways an obstacle to the progress of education. The Committee has also been told by experienced teachers and learned scholars that a great reform can be made in English spelling, and that a system can be devised "to be gradually and wisely introduced, which will be a great improvement in facilitating education, and a great saving of expense to the Government and the people, in the printing of public documents, school books and periodicals." The Committee, therefore, recommends the appointment of a commission, "as a preliminary step and for the purpose of having some well defined plan and system presented to the public before any definite and radical change is made."—*New York Times.*

The Bodie Extension.

It now affords us much pleasure to inform a large and inquisitive circle of anxious readers that active work on the Carson and Colorado Railroad (as the proposed road from the Mound House to Candelaria is termed) will begin on or about June 1st. White laborers will be employed, at least on the start, and 250 will probably be engaged at once. Mr. J. B. Laws, Roadmaster of the Western Division of the Central Pacific Railroad, who has been granted a leave of absence, will have general charge of the grading, and act as Superintendent of Construction. He is considered one of the best railroad men on the coast, in his peculiar branch of the business. The steepest grades occur between the Mound House and Dayton. Beyond Dayton, the route, as surveyed, is for many miles as smooth as a barn floor, and passes through a rich agricultural country. Wm. H. Corbett, of Carson, will attend to the corporeal sustenance of the white labor employed, and is now erecting two boarding houses; one about a mile east of the Mound House and the other a further distance of a mile and a half. The houses will be built in sections and will be moved from place to place as the work advances. They are so arranged that four men can readily move each building. The road, as previously stated, will be a narrow gauge, three feet wide. It will be laid with steel rails (35 pounds over the level country and 45 pounds on the grades) supported by redwood ties. The officers are as follows: President and General Superintendent, H. M. Yerington; Secretary, D. A. Bender; Treasurer, S. P. Smith; Chief Engineer, Jas. Oliver; Superintendent of Construction, J. B. Laws; official organ, the Carson *Times*. The road will be of considerable benefit to Carson, at least while building.—*Carson Times, May, 26.*

MANY persons have heard the question: "Who struck Billy Patterson?" without knowing the origin of it. We propose to enlighten them a little on the subject. William Patterson was a a very wealthy tradesman or merchant of Baltimore, in the State of Maryland. In the early days of Franklin county he bought up a great many tracts of land in that county, and spent a good portion of his time in looking after his interests there. He was said to be as strong as a bear and as brave as a lion, but, like all brave men, he was a lover of peace, and, indeed, a good, pious man. Nevertheless his wrath could be excited to a fighting pitch. On one occasion he attended a public gathering in the lower part of Franklin county, at some District Court ground. During the day the two opposing bullies and their friends raised a row and a general fight was the consequence. At the beginning of the affray, and before the fighting began, Billy Patterson ran into the crowd to pursuade them not to fight, but to make peace and be friends. But his efforts for peace was unavailing, and while making them some of the crowd, in the general mêlée, struck Billy Patterson a severe blow from behind. Billy at once became fighting mad, and cried out at the top of his voice, "Who struck Billy Patterson?" No one could or would tell him who was the guilty party. He then proposed to give any man a hndred dollars who would tell him "Who struck Billy Patterson." From one hundred he rose to one thousand dollars; but that amount would not induce any man to tell him "Who struck Billy Patterson?" And years afterward, in his will, he related the above facts and bequeathed one thousand dollars to be paid by his executors to the man who would tell, "Who struck Billy Patterson?" His will is recorded in the Ordinary's office at Carnesville, Franklin county, Georgia, and any one curious about the matter can there find it and verify the preceding statements.—*Carnesville Register.*

THE discovery of gold near Plainfield, N. J., which is exciting interest in that section. It is stated an old copper mine half a mile from Bond Creek, known as the field mine, was recently prospected by the Postmaster of Plainfield, who had several specimens of Arizona and Colorado ores in his possion. Specimens taken from the mine assayed in silver and gold sufficiently to justify working it. A lease was at once obtained of the field mine for twenty years, and leases on adjacent property to the amount of many hundreds of acres have been procured. From forty to fifty thousand dollars' worth of machiney has already been ordered, and it is expected ore, or what is said to be ore, will be transported from the mines to the mill that have been secured on a line of the Central Railroad at Plainfield. It is said veins of ore eight feet thick crop out on the surface at many places where mining privileges have been secured, and miners estimate the yield of gold and silver will be heavy and profitable, as the copper will pay enough to meet all expenses.—*N. Y. Sun.*

JOHN WILLIAMS, a merchant at Rutledge, Ga., sued a desperado. The fellow entered the store in a furious passion, held out the summons in one hand, clutched a long knife in the other, and said: "Williams, have you sued me?" Williams knew that an immediate "Yes," would make him sure of a stab. "Let me get my spectacles, so that I can read the paper," he said. He went behind the counter and came back, not with his glasses, but with an axe across his shoulder. "Yes," he said, "I have sued you." "All right," remarked the desperado, "I guess I'll pay the bill."

Esmeralda Items.

Charley Reynolds, the short-hand reporter, accompanied by his wife and baby, arrived in Aurora last Tuesday.

The Thanksgiving mine has been sold to an Eastern Company.

Work in the Real del Monte is being pushed in sinking the shaft and running the south drift from the 500 level.

Mr. A. H. Dickson has bonded the Inter-Ocean Consolidated mine at Alum Creek, and will proceed to prospect it, with the intention of purchasing if the results come up to expectations.

Officer Withrow, last Wednesday, captured a Frenchman by the name of Nelson Ramonet, in Bodie, who had a horse in his possession stolen from Dr. Richardson, of Mason Valley. The officer arrived here with his prisoner the same day, and Mr. Remonet was placed in the charge of Sheriff Ogg, to await further developments.

Our town has been quite lively for the past week. Compared with the past few months business is very much improved. Business men who had grown dyspeptic for the want of proper exercise, now wear the smile of persons with healthful livers. Almost every day a train of mules arrive here and engage in the wood-packing business. Men are being put to work on quite a number of mines that have lain idle for some time. Everybody seems to be busy at something. The result of all this is that everybody wears a smile, and are cheerful, happy and content.

Reports come to us from all parts of Esmeralda county where farming is carried on, to the effect that though Spring has been a little loth to disengage herself from the arms of old Winter, good crops will be harvested. In Fish Lake Valley the hay crop, we are informed, will be better than ever, and a large potato crop will be had. In Mason Valley everything is looking splendid. A large amount of land has been put under cultivation, and water being abundant a large crop of hay, grain and vegetables will be raised. Other parts of the county will also raise good crops. The large amount of snow that fell during the Winter has done much toward keeping the ranges from dying out. Altogether the year 1880 will be a prosperous one for the farmers and stock-raisers of this county.—*Esmerald Herald.*

Bodie Items.

A wagon load of twenty pound trout came in this morning, and the fish found ready sale at two bits a pound.

Ned Reddy and Jack Wilson are now "going prospecting" with a four-horse buckboard. It is an agreeable mode, to say the least.

Jos. Wasson is coming up soon to "go through" Mono and Inyo counties, will make an all Summer's work of it, take notes, and, of course, is bound to print 'em.

George Daily, formerly of Bodie, has been appointed Superintendent of the Lowland Chief and Colorado Prince mines at Leadville, in the State of Colorado.

The Piutes—men, women and children—are busily engaged in panning out gold from gravel obtained at the old Bodie dump.

Yesterday H. Ward sold his lot and new house, adjoining Miners' Union Hall, to Mrs. B. B. Norton, of Reno, for $6,400.

The Bodie Extension Railroad Company has sent to Oregon for 100 head of mules and horses to work on the new road.

The Nevada Fast Freight Company is now running freight through from Carson to Bodie in three and a half days.

Yesterday's paper mentioned the fact that some woodmen operating some miles to the eastward of Bodie had discovered what was said to be very rich gold quartz, and that they had taken an expert to the place to determine the value of the find and to locate the vein or veins. Upon arriving at the spot yesterday the expert, looking at the shining metal from his saddle, and without getting off his horse, pronounced the yellow stuff to be mica, and such it proved to be.

Judge Elijah Padeght Robinson, Justice of the Peace and a highly respectable citizen of Benton, in this county, died rather suddenly on Tuesday last. Deceased was a native of Georgia, and was about forty eight years of age. He had been complaining for a few days, but was out upon the street on the morning of his death.—*Bodie Standard.*

THE wife of the editor of the Petaluma *Peavine* ran away with a tenor singer of the period. Another paper in the immediate vicinity humorously remarks: "It was a good deal of a financial relief to the journalist, now that white paper is eleven cents per pound, but it galled him awfully to have her state in the note, which ladies always leave sticking in the looking-glass on such occasions, that she regretted that she was forced to have him "crowded out for more interesting matter."

A PARTY composed of the following gentlemen and ladies left San Francisco for Chicago in a special car, the first of the week: Mr. Benson and wife, Alameda; Mr. Foster, Contra Costa; Creed Haymond and wife, Sacramento; Mr. Russ, Humboldt; Socrates Huff, Alameda; Messrs. Wilmerding, Pixley, Lischer, Kenny, S. Mosgrove, San Francisco; Mr. Scott, Portland; Gov. Kinkead and wife, Nevada, and Mr. Stevenson.

DID you ever reflect upon the fact that a man's name often has much to do with his claim to fame and immortality? No man with a comic name achieved greatness. How, for instance, could Moses have been respected by the Israelites if his name had been Mortimer J. Byng. Or how would Pharoah have supported regal dignity with such a title as Joe McClafferty? Imagine Cæsar laboring under the name of Lemuel S. Toombs, or Hannibal signing himself B. Tomlinson Pugh! They would have died first. Cleopatra would not have been loved by Antony had her clothes been marked Amelia Duffy; and if Joan of Arc had been baptized Matilda G. Malloy, probably we should never have heard of her. Napoleon reached a throne only because his parents persisted in not calling him William Henry Johnson, and Mary, Queen of Scots, escaped oblivion because she did not appear in the directory as Mary Jane Bumgardner. And so if Shakespeare had been known as Sam Macilhenny, or Calvin as Washington T. Smooth, both would have sunk into forgotten graves. These things are suggestive to parents who want their children to achieve greatness.—*Philadelphia Bulletin.*

AT the Dusseldorf Exhibition, which opened on the 9th of May, a member of the Rhenish and Westphalian Stenographic Society exhibited a German postal card, which is is somewhat larger than an English postal card, containing Voss' translation of the first three books of Homer's Odyssey and part of a very long debate which recently took place in the German Imperial Parliament. The number of words in the extract of the Odyssey is 11,000, while in the Parliamentary debate the number is 22,000. The whole of the 33,000 words have been written in the Gablesberg system of short-hand, and with the naked eye. The quality of matter contained in this German short-hand manuscript would be equal to what is contained in about nine pages of the London *Times.—Ex.*

ON Monday, June 7, the Grand Encampment of Odd Fellows will meet in Virginia City. Also, on the same day, the Grand Chapter of the Masons will meet. The next day—Tuesday, June 8—both the Grand Lodge of Masons of the State and the Grand Lodge of Odd Fellows will hold their meetings in that city.

IT is said the Central Pacific Railroad Company now employs 300 passenger cars and upwards of 4,000 freight cars.

INDEPENDENCE, CAL.:

SATURDAY, JUNE 5.....1880

THE West Point Board of Inquiry, which has been examining into the alleged outrage upon cadet Whittaker, has made its report, which is that he mutilated himself. Of course, his expulsion from that institution will now be in order. The testimony which caused the Board to come to the conclusion it finally arrived at was no doubt that of Lieut. McClernard, who testified to finding, in company with Recorder Sears, citizen's pants, overcoat and sleeve in Whittaker's room. Whittaker afterwards confessed that the pants were his, but only when his name was found on the binding. A coat and vest were also found in his room, which he said he had not seen since last Christmas, and somebody else must have placed them there. The Recorder said there were other things tending to show that Whittaker was unreliable. He had a love affair which made him morbid. Also, that the cadet was in a dangerous position just before April 5, as to passing an examination. Whittaker's motives were a fear of not passing, and being jilted by a girl, he took this method of exciting sympathy in her and becoming a martyr to the world.

A DISPATCH from San Francisco of the 1st instant says Capt. Edward R. Warsaw, well known in years past as a commander in the service of the Pacific Mail, and latterly a prominent stock operator, committed suicide on Tuesday morning last, by shooting himself through the heart. He was a native of Vermont, aged 53 years, and had been suffering from heart disease for a long time past. He was supposed to have been recently out of his mind. This is the same Captain Warsaw who visited this section several months ago on mining business. He was Captain of the steamer *Japan*, which was lost some years ago, and about which, our readers will remember, we had quite a controversy with a contemporary. Personally, he was a man for whom we could but feel a great liking, even on so slight an acquaintance as we had with him.

THE New York *Mining Record* of May 22 has the following regarding the lead market. The tone of the market has continued dull and weak. Western is offered, and a few small sales have been effected at 4¾@4⅞ cents, and Newark is held at five cents, with but few buyers. The stock and visible supply at all points is reported to be comparatively light, but in the face of absence of demand, has no visible effect upon the situation. There has been no call for refined, and the nominal quotation is 5¼ cents.

OF the delegates chosen by the Democracy of Nevada to the Cincinnati Convention, three prefer Tilden, two Thurman, one Field; but the Convention, by a vote of 58 to 36, declared Tilden the preference of the party. Geo. W. Cassidy, was nominated a member of Congress, and C. H. Belknap Supreme Judge. J. H. Dennis, W. E. F. Deal and J. C. McFarnahan were nominated Presidential Electors.

DENIS KEARNEY was liberated from the House of Correction on the afternoon of the 28th ultimo, by order of the Supreme Court, and in the evening he was escorted through the streets by the Workingmen's military companies and at least a couple of thousand men and women. A hundred guns were fired on the sand lots, in rejoicing over the event.

WHILE getting a check cashed at the Treasury Department, Washington, a few days ago, the clerk of the Librarian of Congress laid aside the package of bank notes, and when he reached the street he found that some one had substituted for his package a lot of Treasury tape in similar form.

THE Southern Pacific Railroad Company has commenced suits in the Superior Court of Tulare county against one hundred and ten Mussel Slough settlers on the company's land, each suit being for $5,000 back rents and profits, and $5,000 for unlawful holding over.

FIVE county officials and ex-officials of Kern county are now under arrest for forgery and embezzlement. Two are under indictment now, and the others will be proceeded against by information.

COL. J. F. GODFREY, of Los Angeles, has been nominated by the Workingmen's party as a candidate from this (the Fourth Congressional) District.

THIRTEEN cases of sunstroke occurred in New York city and Brooklyn last Saturday, twelve of which proved fatal.

THE MINING BUREAU.

The State Mining Bureau established by the late Legislature is now placed in good working condition, with Henry G. Hanks, eminently the "right man in the right place," at its head as State Mineralogist. Our Inyo-Mono Representative, Hon. Jos. Wasson, introduced the Mining Bureau bill in the Legislature, and finally succeeded in getting it made a law, but in the face of obstacles of various kinds that would have killed it almost at the start, had its mover been other than a most persistent worker and an able and determined man, fully imbued with the future importance of the measure in hand, especially to his own constituency. From the day of the adjournment of the Legislature down to the past week, Mr. Wasson has had to devote his time almost exclusively to getting the Bureau into working condition. This he has done at his own expense. His personal care in that direction came to an end after the Governor had commissioned Prof. Hanks to take charge.

The Bureau was made a reality through the efforts of the Representative of this section; it is now under control of an old Inyo pioneer, and a man who, like Mr. Wasson, feels an especial interest in this region, and like him, too, has an abiding faith in it as a field for extensive and profitable mining operations. It can be depended upon that whatever this Bureau can legitimately do toward introducing our mineral recources to the attention of the mining world will be done, and as soon as may be. In addition to this, the personnel of the institution, so to speak, makes it almost a local affair and responsibilty, and for those reasons, as well as material ones in common with all the coast, should receive whatever assistance we can possibly lend toward fulfilling its mission; this is a duty especially incumbent upon all engaged in mining in whatever line or capacity There is reason to expect that one of the ablest mineralogists, geologists, etc., in the United States will, during the year, be sent to this field. In the meantime, however, let all and every one who can, do whatever they can toward a compliance with the simple requests contained in the circular from Prof. Hanks, to be found in another column in this issue.

Various Things.

Out of the four dairies in Eureka, Nev., no less than $4,000 worth of cows died during the Winter.

Nineteen ewes were killed by dogs and several others crippled on the Cotate ranch, in Sonoma county, in a single night last week.

In chopping down an oak tree, near Santa Rosa, the axeman came on an iron hinge, fastened with screws, eight inches from the bark, completely hidden by the enveloping wood.

The farmers of Stanislaus are offering $2 per day and board for harvest hands. The crops are so abundant that it is feared neither men nor horses enough can be obtained to supply the demand.

Grasshoppers have appeared in multitudes in some portions of the valley between Reno and Steamboat, Nev. They have already destroyed four acres of young wheat on a ranch near Brown's.

A drove of about 1,200 head of cattle arrived at Winnemucca, Nev., and were loaded on the cars for shipment to Nebraska. It required two trains of thirty cars each to take them to the Platte valley.

Work on the new Bodie narrow gauge road has been commenced at the Mound House. Three hundred men have been put on, and the force will be increased as fast as needed. Two dollars a day and board yourself is the rate of wages paid.

A new source of amusement has been adopted in Nevada City. Lovers of racing make up a purse of 25 cents and a soda cracker. A crowd of boys are started around the block and the one who makes the circuit quickest is given a cracker immediately on his arrival. If he eats it before any of the other contestants get there he receives the stake of two bits.

The latest reports from Leadville are to the effect that the miners' strike at that place is about ended. There is no likelihood, the Governor thinks, of any violence at that point. It is now thought that the Chrysolite, Little Pittsburg and Little Chief mines will resume work at the old rate.

The editor of the Los Angeles *Herald* has been shown a remarkable curiosity. It consisted of a small piece of virgin gold, found in an Arizona mine, on which was the profile of the head and bust of a woman. It was nature's own handiwork, absolutely unassisted by art, the latter being confined solely to the mounting of the eccentric freak of nature as a scarf pin.

A lady residing in San Andreas is the owner of a gander which recently caught the sitting fever, and kept driving the mother goose off her nest. At last a nest was made for the gander and chicken eggs placed therein and he immediately went to sitting and in the course of time brought forth a brood of little chicks. He is as proud of them as any old hen would be, and takes the best of care of them.

The case of Isaac M. Kalloch, the slayer of Charles De Young, was called in Department No. 12 of the Superior Court on the 29th ultimo, Judge Bowers presiding. In order that the case might come before Judge Freelon, and by agreement of counsel, the defendant was allowed until next Monday to plead to the indictment and make any motion that he desired.

SOME OF THEIR DUTIES.

Following is a synopsis of some of the things the United States Census Marshals are required to find out and record for future generations to ponder over:

Each Enumerator must visit each dwelling in his district personally, and every family therein, and all persons occupying lofts in buildings, warehouses, factories, stables, etc., or living in solitary cabins, huts or tents, sleeping on boats or barges or locked up in prison.

Every person is bound to answer the questions of the Enumerators to the best of his or her knowledge, and if he or she refuses, to the bastile they must go if they can't, or must pay $100.

The ladies may as well make up their minds to give up their claim of right to secrecy as regards age, for each Enumerator is instructed to get the ages at all hazards, even to the fractional part of a month, and they will draw them out if all the family Bibles in every district have to be overhauled, and all the jealous people in the county have to be interviewed.

The Enumerator is instructed that he is under no obligation to give every man's occupation just as he expresses it. If he cannot tell intelligibly what he is, "the Enumerator is to find out what he does, and characterize his profession accordingly." No man is to be called a "commissioner, a collector, agent, artist, overseer, professor, treasurer, contractor or speculator." No man is to be described as a mechanic, but the branch of labor followed must be given.

Every Enumerator has to report to the Supervisor of his district and to the Census Superintendent at Washington daily, by postal card blanks furnished, the number of persons enumerated by him each day.

There are five blanks for Enumerators. Schedule No. 1 is for population alone, and the questions to be asked and answers written relate to the names of streets, number of the dwelling-house, number in order of visitation, name of each person in the house on June 1, 1880; the color, white, black, mulatto, Chinaman or Indian; age on last birthday, and if in months, the fraction of the year, if born within the year; relationship of each person in the house to the head of the family; whether wife, son, daughter, servant or boarder; whether single, married, widowed or divorced; occupation or trade of each person; male or female; number of months each person has been employed from June 1, 1879, to June 1, 1880; if persons are sick, whether temporary, blind, deaf, idiot, insane, married, crippled or bed-ridden; what caused the sickness, or where the illness or disability was contracted; whether the person can read or write; place of birth, what State or Territory or foreign country, with place of birth of both father and mother.

Schedule No. 2 is marked agriculture, and relates to a farm, the number of persons who conduct it; the number of acres of land tilled, including fallow, grass and rotative crop, pasture or meadow, orchards, vineyards, woodland, forests, old fields and growing wood; the value of the farm including land, fences and buildings, farm improvements and machinery and live stock; cost of building and repairing fences, and cost of fertilizers purchased during 1879; amount paid for wages for labor in 1879, including housework; estimated value of all farm productions sold, consumed or on hand in 1879; acreage of grass lands, mown or not mown, hay, clover, and grass seed; number of horses of all kinds; mules, asses and neat cattle, and their products; also, sheep, swine and poultry on hand June 1, 1880.

Schedule 3 is for manufacturers. The Enumerator must ascertain the name of the corporation, company or individual doing a business of $500 per year; name of the business, manufacture or productions, capital invested in the business, average number of hands employed, hours of labor, wages paid, average day's wages, number of months during the year in operation, value of material and products; what power is used—whether water, steam, or horse-power; if water, then the name of the river or stream and the number of feet fall; if steam, the number of engines and boilers in use.

The fourth schedule relates wholly to social statistics, but has recently been withdrawn from the Enumerators.

The mortality schedule, which is numbered 4, must exhibit the names of persons who died in the census year, personal description, age on last birthday; sex, color, white, black, mulatto, Chinese or Indian; married, single, widowed or divorced; cause of death, name of physician who attended deceased, and where the disease causing death was contracted.

There are seven special and other schedules: First, for insane; second, for idiots; third, for deaf mutes; fourth, for blind; fifth, for homeless children; sixth, for inhabitants in prison; seventh, for paupers and indigent persons in institutions.

There are twelve schedules of manufactures: First, for agricultural implements; second, for paper mills; third and fourth, boots, shoes and leather; fifth and sixth, brick-yards, tile-works, lumber and saw-mills; seventh and eighth, flour and grist-mills, cheese and butter and condensed milk factories; ninth and tenth, slaughtering, meat-packing and salt works; eleventh and twelfth, coal mines and quarries.

DISAGREEING MINE-OWNERS.—In an action begun yesterday, J. S. Rothschild alleges that he has been with defendant, George T. Hawley, tenant in common of the Greenley, San Francisco and Ygnacio mines, in the Cerro Gordo District, in Inyo county, and that over $100,000 has been expended in their development. But it is inexpedient to work them, except under an intelligent management, and plaintiff has unsuccessfully endeavored to make with defendant an arrangement for the competent superintendency of the property, that it might be worked for both according to respective interests. Plaintiff, therefore, asks for the appointment of a receiver to assume the management of the mines; also, that they be sold by order of the Court and the proceeds be distributed between himself and defendant.—*S. F. Chronicle.*

CIRCULAR FROM THE STATE MINING BUREAU.

OFFICE OF STATE MINERALOGIST,
SAN FRANCISCO, May 25, 1880.

Dear Sir—By an Act of the Twenty-Third Legislature, there has been established in the city of San Francisco, a State Mining Bureau, and a State Mineralogist, appointed by the Governor, authorized to carry out the provisions of the law. As it is an institution new to the people, this circular is prepared to set forth the objects and aims of the Bureau, and at the same time to request the co-operation of all who are interested in the development of the mining interests of the State. The law would on first thought seem exclusive, yet its scope is as liberal as to the mining interests of "other States, Territories and countries," as the tax for the support of the institution comes from the stock of companies operating in the world at large, but who have their transfer and chief offices in the mining metropolis and cosmopolitan city of California. It is proposed to make the State Bureau of Mining a depository of useful and interesting information in every department.

Heretofore, mining in California, and throughout the country generally, has been confined chiefly to the precious metals, while the State and Coast at large are rich in many other minerals possessing great economic value in connection with the arts and manufactures. Now that railroads are being built which offer increased facilities for transportation, the utilization of mineral substances hitherto considered worthless, is no longer a problem. Old mines and mining districts that were abandoned because inaccessible, and for want of cheap and rapid transportation, are again attracting attention. As rapidly as possible, everything bearing on these subjects in the way of practical and reliable information will be gathered into the State Bureau, to which the public will have free access at reasonable hours during every legal day of the year.

The State Mineralogist is empowered to employ scientific and practical assistants, as the funds will permit, to operate in the field, and there will be new and interesting matters constantly added, such as maps, statistics, reports, surveys, &c., besides a collection of all the ores, minerals, fossils, rocks, metallurgical products, building stones, &c., of the Pacific coast, with models of mining machinery in use and newly invented, and a general collection of ores and minerals of other countries for reference. It is intended to include everything that pertains to practical and legitimate mining.

The Bureau will constitute an historical repository, and all maps, reports, volumes of newspapers, copies of district laws and records, however old and seemingly out of date, will be sought for and preserved; many, if not all such documents, will be found to possess value outside of their rarity, involving as they may, questions of title to valuable property, neglected or idle. The Museum of Practical Geology will be made a special feature of the Bureau, and contributions will be duly accredited, displayed and preserved. A feature of leading interest will be the procuring and exhibiting of models of mining machinery; all that is interesting, whether old or new, will be carefully preserved and shown. Inventors are specially requested to exhibit models in the rooms of the Bureau, which will also include a reading room, where the press will be represented, and a reference library of works on mineralogy, geology, metallurgy, and kindred subjects will be collected. The State Mineralogist has secured for an indefinite period the central, commodious and well appointed rooms formerly occupied by the San Francisco Art Association, No. 313 Pine street, near Sansome, which he will occupy on the 1st of June. Satisfactory arrangements with the principal transportation and express companies have been made, whereby persons contributing articles of value and interest can forward such without expense to themselves.

The law requires that all mineral waters of the State be examined, their value and characteristics ascertained, and the formulation duly published. This will materially increase the interest of the world at large in California as a health resort.

It is desired to make the ethnology of the Pacific coast a feature of the Museum. All Indian relics, recent or prehistoric, will find a place, and the collection will no doubt throw much light on the ancient history of the State.

It is the intention of the Bureau to make, sooner or later, a thorough industrial survey of the State. As every county is, to a certain extent, a mining county, all should be represented, and the prominent men of each are requested to see that the State Museum is provided with a full representation of mineral resources of the county in which they reside.

As every article of value sent to the Bureau will become the property of the State for the use and benefit of the public, and will be carefully preserved in the State Museum, and as it is desirable to make it as instructive and attractive as may be, donations of other articles of interest, such as views, pictures, paintings, curiosities and works of art—in short, anything which would add to the general interest of the Bureau and tend to make the Museum a place of popular resort for information and study, are solicited.

The Bureau commences with a large and valuable donation of ores, rocks, fossils, reports, books, etc., the entire collection and property of the State Geological Society.

Miners and prospectors are requested, when new finds are made, for better determination as to value and character, to always accompany ores with samples of the wall and country rocks, with written descriptions of the same. It is desirable that every mine in the State and adjoining States and Territories, which has a name, should be represented in the Bureau.

When anything occurs in the workings of the Bureau that is of special or immediate interest, it will be given to the public through the medium of the press. Annual reports to the Governor will be printed for general distribution. These reports should be valuable for permanent reference.

FOR the past few days there has been work going forward on the tramway. The bull wheel and ore-dump have been moved to the mouth of No. 3 tunnel. During the week quite a number of men have been put to work at the Mammoth mine and about the mill. Curt Ober and Johnny Paul are getting everything about the mill in order for work again, and at noon to-day the whistle at the mill blew long and loud—the first time its welcome sound has been heard in many days. Mr. Crittenden, the new Superintendent, seems to have taken hold of the affairs of the company with a determination to push them to a successful issue. The Mammoth mine will without a doubt be proven to be the bonanza of the Sierras. Work has already commenced on several other mines. The South End is fast coming to the front. The True Blue troubles are about settled. Welles Barnes is about to commence work on the Chrysolite. J. C. Brown and Pete Simas have thrown off their coats and gone to work on the Albion. Johnny McCarthy and Jas Patterson are working on the Last Chance. Black Jack says he has the best thing in the world and intends to stay with it. Budd Harniss will open his old house at Pine City in a few days, and Saylor is preparing his house at Pine for the reception of guests. The merchants, hotel and saloon keepers are repairing, painting and refitting their places of business, and there is more bustle and activity about town than has been seen since last Spring. Altogether there seems to be a feeling of hopefulness and faith in the future of Mammoth, which is quite gratifying to those who have witnessed and pulled through the extreme dull times of the past Winter. —*Mammoth Herald.*

PROF. THOMAS EGLESTON read a paper a few evenings ago before the members of the New York Academy of Sciences, on the origin of gold nuggets and alluvial gold nuggets. He said that all placer deposits were in sands which were alluvial, and are of two kinds, shallow and deep. The deep placers of California average 30 to 40 cents per quarter yard. The time would come when the tailings which are now wasted would be worked to greater advantage than much of their lighter deposits. In a discussion with J. L. Newberry, President of the Academy, Prof. Egleston affirmed the solubility of gold, and stated that the large nuggets were formed by a process of chemical deposit. The speaker exhibited a large number of vials containing gold combined with its amalgamates, the result of many months experiment, which illustrated the theory of chemical deposits.

THE Omaha Smelting works strikers have compromised on an advance in wages of five per cent., and have resumed work.

BORN.

Near Lone Pine, Inyo county, Cal., May 28, 1880, to the wife of G. W. BETTS, a daughter.

INYO INDEPENDENT.

INDEPENDENCE, CAL.:

SATURDAY, JUNE 5.....1880

THE U. S. CENSUS.—Commissions as U. S. Census Enumerators for Inyo county have come to hand for the following named appointees: S. W. Blaisdell, Bishop Creek; Jas. F. Dillon, Independence; Frank Fitzgerald, Lookout; —— Bates, Resting Springs. The Enumerators should have commenced work last Tuesday, but it is doubtful if any of them have received commissions and instructions in time to do so. The extent of the work in hand may be surmised by a perusal of an article on the subject in another column. We fear some Inyo noses won't get counted this time, because of the enforced delays in getting after them, and the fact that so many are scattered afar off in the mountains, nobody knows where. Supervisor Dana has resigned, so it is not here known who has the work in charge for this district.

PIUTE DISTRICT.—The property best known as the Johnson mine and mill, opposite Bishop Creek, has been worked some two or three months under the management of D. H. Sullivan, lessee. The mines consist of gold ledges known as the Golden Era, Tender, Buena Vista and Luella Nos. 1 and 2, and belong to Messrs. Sneden, Spencer and Bennett. Mr. Sullivan has been running the 5-stamp mill and arastras for a short time, under great difficulties and lack of steam for heating, but has already shipped gold amounting to about $500. As the snow is clearing away he is putting on a larger force and following up his work with increased capital and experience.

PROPOSED MANUFACTURES. — Certain enterprising citizens of Bishop have struck on to the right track to add materially to our county's future prosperity. Mr. J. H. Bulpit, a practical tanner of many years' experience, has been experimenting with the bark of the fir and pine trees of Lake, with every assurance of success. The establishment of a soap and candle factory at Bishop is under contemplation, and both together would save thousands of dollars annually to the county, as well as proving a big paying thing to the projectors.

A PHENOMENON.—Nature's phenomena passeth comprehension—or words to that effect. Out here to the eastward a little way is a mining camp wherein many shafts have been sunk—so report says. Capitalists who want to see how the ledges look three or four feet below the surface can't find these shafts. The semi-occasional whirligusts which sweep that region blow all the rock and dirt back into the shafts, yet never disturb a single claim notice. That is the phenomenal part.

MUST BE ASSESSED.—Assessor May is instructed by the State Board of Eqalization that "all personal property and improvements of settlers on the Camp Independence Reservation lands must be assessed" the same as that of settlers on public domain open to entry. Sufficient citations of authorities accompany the instruction to satisfy anybody that this is the correct view, last year's simple-minded State Board of Equalization to the contrary notwithstanding.

A CHANGE.—Mr. J. W. McMurry intends changing his base of operations from Big Pine to Deep Springs, where he will build more house-room and provide accommodations for bathing at his warm spring. In numerous cases these waters have proved a sure relief for rheumatic patients. He proposes to repair his road across the mountains and throw it open, free for all.

"THE FROLICS."—A troupe of six, with the foregoing title, on Wednesday evening, gave a variety entertainment, mostly minstrel, in Mairs' Hall. The presentations were new in this region, and better rendered than is common with traveling performers, with nothing to offend the most fastidious theatergoer in the matter of proprieties.

DOING WELL.—In his new location, at Big Pine, our old friend D. P. Macarter seems to be progressing in his business at a rate fully up to the prosperous farming and mining region around him. "Mac." is a popular dealer and keeps safely pushing his business ahead. See his advertisement among the new ones of this week.

INSURANCE.—L. Fromm has recovered from the underwriters the sum of $1,300, out of an insurance of $1,500 upon a building which cost about $2,800. But the sum recovered is vastly better than to have nothing left out of it.

SCHOOL.—The School Trustees of Bishop give notice of an election to vote a tax to enlarge the school house. The building at present will not half accommodate the pupils, and the light tax asked should be cheerfully voted.

FOR THE VACATION.—Miss Lillie and Master Joseph Harris, who have been attending school in San Francisco for a number of years past, are spending their vacation here at home with their parents.

PREACHING.—Rev. F. M. Willis will hold regular services in the school house at this place to-morrow evening, and at the Post on the evening of the following Tuesday.

LIST OF LETTERS.—Letters addressed to the following named persons remain in the Independence Postoffice: John Beveridge, D. P. Blue, Philip Hearney.

FOR BODIE.—Judge Conklin, accompanied by his son, Norman, have gone to Bodie, for a stay of a couple of weeks or thereabouts.

SALOON.—See card of Messrs. McDonald & Brown, who are running the popular new saloon at Big Pine.

The Bishop Creek Country.

Whatever business depression the mining communities of Inyo County are suffering from, the fact does not appear to affect in the least the general prosperity of the farming country to the north of us. The productive lands, with abundance of water for irrigation, make Big Pine, Bishop and Round Valley veritable oases in the vast desert of mining districts which surround. As a natural sequence, land is steadily increasing in value, and cannot help continuing to do so. During the present year many new farms have been placed under cultivation and much new land belonging to the older places broken up. At a safe calculation, in the three settlements named there is now at least 2,000 acres of growing grain in soil heretofore lying idle and unproductive. Good crops are considered almost infallible, and prices invariably high as compared to other localities in the State. Yet there never has been a season but that the market demanded more than was produced. Last year's crop has been cleaned out for some time, by sale and seeding, and a leading merchant is importing wagon loads of grain from Los Angeles. The revival of Mammoth now seems a settled fact, thus for the present at least giving Round Valley a splendid market at its very doors; but in any event the products of our whole valley will not suffice to supply the demands of Benton, Belleville, Candelaria, Marietta, Columbus, Silver Peak, Palmetto, Lida or Deep Spring, not to consider any settlements liable to spring up in the mines at any time. Enterprising farmers are availing themselves of the Forest Culture and Desert Land Acts in adding to their acreage of arable soil. Through the pluck and enterprise of the leading Big Piners, in all probability the coming Fall and Winter will witness the completion of the 24-mile ditch, which will add some 5,000 acres to the available land next year. On the west side of the river the two new ditches are already yielding handsome returns on the investment of labor and money. But one of the inevitables of the future is the

GRAND IRRIGATING CANAL

So long advocated by this paper and promoted by Surveyor Seeley and others. Starting out from the river at the upper end of Bishop Creek Valley, it would at once begin to utilize and save the enormous wealth now annually lost by the aimless flow of the river waters into the lake. It would cover 100,000 acres of land, adding at least 50,000 acres to the lands now producing—and double the taxable property of the county.

The central portion of Bishop Creek exhibits many solid improvements in fencing and buildings. Bob. Ford comes to the front with a ditch a mile and three-fourth long, eight feet in depth, to serve the double purpose of irrigation and drainage in case of high water. In consequence of like improvements all around, the roads are much better than usual at this time of the year. But it is in the

TOWN OF BISHOP CREEK

Proper where is noticeable the greatest increase of business houses and population. The place has widened out in all directions, while the valley to the east has so filled up with farms that the town stands nearer the center of population than ever before. When, thirteen years ago, the writer of this screed first staked out a plug horse to browse upon the wild grasses of Bishop, there stood in place of the present settlement a single board house, the property of John Clark. John still takes an active hand in shaping affairs thereabouts, more, however, by business management than through the effect of his scriptural quotations. The

GENERAL BUSINESS

Of Bishop is carried on by firms and parties hereafter mentioned.

Beginning with the merchants, and with the oldest house, there is the well-known establishment of J. H. Stoutenborough, the business of which has been so long and so regularly represented in our advertising columns. The institution's chief is at present in San Francisco; hence we cannot speak from first hand, but it is generally understood that he is about erecting an extensive new store, with a hall above it, on the site of the present concern, which was occupied as temporary quarters by his predecessor—Mr. Sneden—after the store and hall was burned in 1870. In Johnny's absence, the store, express, post and stage offices are amiably handled by Mr. Stacey, John B. White and Budd Stoutenborough.

A. K. Briggs, a pioneer rustler and business man, of Cerro Gordo, Darwin, Tuscarora and about everywhere else, don't seem to have missed it very bad when he located in the flourishing settlement under notice. He is just completing and moving into one of the best store buildings in the county, its general arrangement being especially convenient, while its interior architecture is strikingly unique and handsome. The roof, dressed and painted redwood, constitutes the ceiling, supported by a series of intricately framed and well finished trusses—giving the whole an appearance of loftiness and strength suggestive of a railroad depot. The builder was Mr. Levi Gerrish, who, having better building material than this part of the valley affords, has made an unexceptionable job of it. The building is 64x26 feet in size, and stands on the southwest corner of Clark and Sneden streets. With the aid of his regular assistants, Messrs. Eugley and Lewis, Al. will be ensconced in his fine quarters this week and will fling out a new advertisement in our next issue.

Messrs. Elkeles & Lasky, a firm of some two years standing on Bishop, are pleasantly located up the main street opposite the Baptist Church. Mr. Elkeles is the resident manager, and the concern attracts trade by low prices and a well-selected stock of goods. Appreciating the value of printers' ink, they are joined to our small army of live advertisers.

A. Spencer, of West Bishop, a very large and old-established house.

J. H. Bulpit, general merchandise.

C. L. Van Eps, merchandise and varieties.

Millinery—Mrs. Rilla Clark.

Official—S. G. Sneden, Notary and J. P.; Charles Hollenbeck, Deputy Sheriff; Wm. Goodman, Constable.

Flouring Mills—Dugan & Blair. Mr. Blair, of this firm, is now below getting machinery for doubling the capacity of these noted works.

Corn Cracker—Eben Marr.

Physicians—F. T. Bicknell, H. H. Howell, C. C. Wainright.

Druggist—C. C. Wainright.

Hotels—J. B. Swearingen, Mrs. Mary Parker.

Stables—Wm. M. Nichols, B. Peeler.

Brewery and Malt House—Munzinger, Phillippay & Co.

Saloons—J. M. Horton, Wm. B. Hutchings, Larry Mulholland.

Blacksmiths—John Clarke, George Blazier, J. Eldred.

Wagon Makers—John Clarke, D. E. Hunter.

Carpenters—L. Gerrish, J. W. Mahoney, J. Merithew.

Butchers—B. Peeler, M. Heller.

Harness, etc.—H. F. Rediker. See advertisement.

Bootmaker—W. L. Zimmerman.

Barber—J. Koch.

LETTER FROM DARWIN.

DARWIN, June 2.

MESSRS. EDITORS: Monday, May 17, will long be remembered with favor and feelings of joy by the residents of our at present sparsely settled burg. What seemed to set them all in ecstacies was the fact of their being waked from their peaceful slumbers at early morn by the old Defiance and New Coso furnace whistles, and as their shrill shrieks filled our fine, clear atmosphere once more it caused us all to feel we had a new lease of business life for a season, and that we would be able to furnish visible evidence that our mines had value, merit and doubtless untold wealth in them, only awaiting a combination of coin and skilled labor to bring them into favorable notice. For the last two weeks this place has presented an unusual activity in its streets. Teamsters have been busy hauling wood, coal and iron ore and ore from the mines. Everybody almost who chanced this way got work at good wages. Boarding houses are reaping a rich harvest, saloons doing a fair business and times for our place good.

A new and satisfactory departure in the manner of settling up accounts has been introduced, by doing away with checks upon San Francisco offices, and substituting Uncle Samuel's $20 gold pieces instead. About 160 tons or so of bullion has been made, and the total debt of making the same paid right here in coin to the men. Everybody is pleased, no growling and all saying how good it is to be here, if they have any coin to receive. The ores worked by the New Coso furnace came from their mine. Those worked by the Defiance furnace are principally from the Custer, owned by Messrs. P. Reddy and J. S. Gorman, but may be classified as follows:

Name of Mine	No. Tons.
Custer	200
Promontorio	64
Vulcan	8
Other mines	78
Total number of tons	350

Following are the statements of the run made by each furnace respectively: Gorman & Eddy, Defiance furnance, run 15 days, and produced 100 tons of bullion, which is valued at $30,000.

The New Coso furnace made 1,557 bars of bullion, worked 300 tons of ore, and made 63 tons of bullion, the value of which is $15,000.

Mr. J. S. Gorman, long and favorably known in this camp as a smelter of undisputed ability, whose record is stamped throughout with success, became somewhat wearied of our apparently decaying camp, and like all young men, concluded a change would do him good, both physically and financially, and resolved to emigrate about a year ago, not in the direction Horace Greeley recommended, "west," but he went north, and took in Mammoth, Bodie, Candelaria, Mill Creek, etc., and after a year's experience up in those regions we find him wending his way back here with expressions such as these: "Of all the places and mines I have seen that could be obtained, etc., I think my chances are just as good for making a raise in the Custer and more flattering than any seen by me." After concluding to "stay with the place," and being a one-third owner in the Custer, he concluded to associate with him some good, practical miner, and selected Mr. J. C. Eddy, an old resident of this county, and together they started in to work taking out ore, working along alone, until they had room for more men, which they put to work when it could be done. They leased the interest of Mr. Reddy for six months, and as a result of their labors, before even five months of the time passed, you see by referring to their report the result that can be obtained where men go to work with a will and mean business. If the mines of this camp had been worked in a similar way Darwin would not to-day be spoken so unfavorably of abroad, but on the contrary, the leading mining magnates of the coast would have had plenty of money invested here, and received good returns. We went fast on the start, built furnaces and roads to them and the mines, put up offices, etc., and by the time the managers got comfortable quarters erected the idea struck them it was about time to commence the development of their mines; but it was in many cases too late, as the stockholders had tired of putting up, operations stopped and roads and furnaces are all they have to show for their coin. Gorman & Eddy's example shows what can be done, and it is about the only rational way to build up and develop our properties. Capital will come when we can show capitalists something. What this place wants is some good, sensible mining men to come here and stop for a month, look around and give all of our prospects a little personal observation, and I doubt not but what they would find properties that would please them.

Brother Lank came down on Monday's stage, and will stop a day or two, and while here will erect over the grave of Nancy Williams a beautiful head and foot stone, and inclose the grave with a fine iron fence. It is to be hoped now, that Nancy will stand an even chance of being resurrected with the balance, as whoever is sent this way to blow the resurrection trumpet can't miss her resting place.

Mr. F. Fitzgerald is over from Lookout, and reports favorably for that locality, and that the manager has strong hopes of bringing the Modock mine up into favor.

We also have among us the man of all others, who the people, without regard to sex, standing or previous condition, are looking for with joy, who appears in their presence, just as pay day approaches, and with smiles upon his radiant countenance, greets them with his pat expression, "Come down with your poll and hospital taxes, boys." They all think J. F. Dillon must have quite a sensitive nose, and the fact of the furnace smoke going toward Independence on the first day's run, believe he detected it in the atmosphere. There is no more popular man in the county, and he would be a trump card to run for Assemblyman.

Yours, truly,

C. F. O'BRION.

Direct Trade with Eastern Manufacturers in Harvesting Machines.

We have with much interest observed this year's contest for the mastery among the rival hay and grain cutting machines on this coast. Our hay and grain is exceedingly heavy this year, and difficult to handle, consequently the machines that go through solid will be popular for many years to come. While there are many good machines for sale and in use among our friends, whose interests we would not interfere with, yet justice to the general public demands some expression from us in an extraordinary year like this. It appears that the new strong improved machines made by D. M. Osborne & Co., of Albany, N. Y., especially for their San Francisco Branch House, have carried off the palm—fully seventy-five per cent. of all sold on the coast thus far this year being of this kind. Their new combined binder and header is a marvel in its way, being purely Californian, and is doing splendid work. We were shown large numbers of letters and telegrams from Southern California, where these machines are now in operation, all of them most satisfactory to the firm. We are glad to note the result, because it will stimulate other Eastern manufacturers to come to our coast and do likewise. *What we need is a hundred more just such enterprising firms out here.—San Francisco Farmer and Dealer.*

It will be seen from the above that the heavy houses of the East are beginning to see the importance of doing their own business on this coast. By so doing they can get their goods out by water freights at a half a cent a pound from New York to San Francisco, and with the many other advantages to be gained by being located among us, they can put down goods at much lower prices than by the old "sole agent system." The above named firm is one of the largest in the world in its line. Its factories cover about fifteen acres of ground, at Auburn, N. Y. They have appointed Mr. J. H. Smith, of Bishop Creek, in this county, as an agent, with full powers to canvass the county and take such orders as our farmers care to offer. The *Farmer and Dealer* is right, "we need more just such firms out here," and the more patronage this one gets the more encourgaement for others to come. Mr. Smith has on hand samples of their mowers, reapers, self-binders and combined binders and headers. He was formerly a resident of Auburn and, of course, knows whereof he speaks when he guarantees good machines and liberal fair dealing. He is selling quite fast. Give him a call or drop him a line at Bishop Creek.

MR. BARNEY CARTER, who returned from dry Lake Mining District last Wednesday, reports that he and Wm. Wozencraft, while out prospecting about twenty miles from the district and 35 miles from water, discovered the skeleton of a horse, also a saddle, bridle and blankets, a good canteen and a quantity of wearing apparel and general outfit of some prospector who had evidently lost his way on the desert and perhaps perished. They were unable to find any human body, but appearances indicated that whoever it was had become crazed for the want of water and had stripped himself of his clothes and wandered off from the place, leaving everything, in search of water. The clothes and trappings were of good quality and demonstrated that the owner must have been in good circumstances. A song book and several papers were found, but nothing to indicate who the unfortunate was. This will add one more mystery to the deserts beyond our mountains.—*Colton Semi-Tropic, May 29.*

LUNDY has again been the scene of a bloody affray. Yesterday afternoon Martin Goodshaw had a difficulty with Tom Gunn, in regard to a lot in that town, resulting in Gunn shooting Goodshaw. The wounds will undoubtedly prove fatal as there is no doctor in Lundy to render any aid in cases of emergency. Lundy is fast winning an unenviable name.—*Bodie Chronicle.*

Wonder if this is the same Gun(n) who has killed so many people?

THE State Board of Equalization in California has assessed the Central Pacific road bed on a valuation of $20,264 per mile, which is the highest value placed on any road in the State, and the lowest rate is on the twenty miles of the Santa Cruz narrow gauge, connecting the Southern Pacific at Pajara, being $7,477 per mile. The assessment in Nevada has never been over $12,000 per mile, and for some years in most of the counties $6,000 per mile.

IN the case of Showers vs. Taylor (contest for the office of Sheriff), Judge Briggs yesterday denied defendant a new trial, and allowed fifteen days in which to file appeal and appeal bond in the sum of $6,000.—*Bodie Standard, May 25.*

THE British are still having a rough time about Cabul, and the war seems likely to continue for years.

The Comstock.

The San Francisco *Bulletin* lately furnished some facts and figures concerning the Comstock mines, from which we glean the following:

It is now about twenty years since work began on the Comstock claims. The first great bonanza was struck in 1870, in the Crown Point. Just previous to that event the market value of the entire list of capitalized mines there was but $5,000,000. In 1872 the market value of the shares was $271,000,000. Two years later the value had dropped to $71,000,000. Then followed the discovery of the bonanzas in the Consolidated Virginia and California, and the sudden increase of the market value of all shares. Another and quite rapid decline followed, when many an unfortunate speculator went to the wall, losing everything. A year ago, there were twenty-nine incorporated companies on the Comstock lode, the number of shares being 3,630,160. The total dividends paid since they began to be worked have amounted to $116,820,000. The assessments in the same period have reached the enormous sum of $79,096,114, leaving a profit, however, of $37,723,886. The California and Consolidated Virginia have never levied assessments, though they have long ago ceased their monthly dividends. Some of the companies have been regular in their assessments from the beginning, and these "Irish dividends" are apprehended all along the line. The cost of mining has steadily increased, and in some parts of the mines it costs more, by reason of the intense heat and the great depth, to get out a ton of ore than it is worth when laid on the surface. The heat makes it expensive to hunt for new bonanzas, and the stocks generally have a downward tendency. The long cessation of dividends and the frequency of assessments have put high priced stocks down to a ridiculously low figure, and all the efforts of the managers to give them another hoist seem fruitless. Investors want something more substantial than promises of big things in the dim future, and holders are becoming sick over the constant drain upon their purses. They are like the fellow who caught the bear—they would like to let go, but cannot do so without assistance. The general impression seems to be that the Comstock is worked out, and will never again be profitably operated. Now and then a straggler will appear and let the sharpers fleece him, but the days of booms in Comstock mines and Comstock shares, have gone by.

OUR latest dates in reference to the Chicago trouble are dispatches to the Bodie papers of the 3d. The only fact to the point is that a temporary organization of the Convention was effected on the 2d, Hoar, of Massachusetts, being its Chairman. The multitude in the city is immense, and the interest intense. The Grant boom has unquestionably flattened out considerably, but without a corresponding swelling in that for Blaine. The final result is just as much a matter for guess-work as at any time heretofore, except, perhaps, that there will be no nomination on the first ballot.

Machine Jokes.

A mere matter of form—cutting a dress.

"I'll let you off easy this time," as the horse said when he threw his rider into the mud.

A Boston artist painted an orange peel so naturally on the sidewalk that three fat men slipped down on it.

The young man who wants to get up with the sun must not sit up too late with the daughter.

Reward of merit: The "next" pupil who spelled chimney correctly was told by his teacher to go up one—but didn't want to.

One point of difference between a timid child and a shipwrecked sailor is that one clings to its ma and the other to its spar.

"How do you define 'black as your hat?'" said a schoolmaster to one of his pupils. "Darkness that may be felt," replied the young wit.

The difference—"Ah, yes," said a cabinetmaker to a crockery-dealer, to whom he was introduced—"ah, yes; you sell tea-sets, and I sell settees."

A negro teamster in Nashville declares that he must either give up driving mules or withdraw from the church, the two positions being incompatible.

In some respects the gentler sex surpass us. No man, for instance, can deliver a lecture with a dozen pins in his mouth.

Artemus Ward, during one of his lectures, remarked: "Ladies and gentlemen: I possess a gigantic intellect; but I haven't got it with me."

"Do you sing tenor?" asked a lady of her musical friend. "Well," replied the facetious man, "I've been known to sing ten or eleven times altogether."

"Ain't that a lovely critter, John?" said Jerusha, as they stopped opposite the leopard's cage. "Waal, yes," said John; "but then he's dreffully freckled, ain't he?"

The discouraged collector again presented that little matter. "Well," says his friend, "you are round again?" "Yes," says the fellow, with the account in his hand, "but I want to get square."

"Will you always trust me, dearest?" he asked, looking down into her great blue eyes with unspeakable affection. She was a saleswoman in a shirt store, and she told him business was business, and he'd have to pay cash every time.

"You will observe from this word pater," said the schoolmaster to one of his pupils, "the great flexibility of the Latin language. Pater is a father; and here we have patruus an uncle; and propratruus, a great-uncle on the fathers's side. Can you make any such change in our language? Pater, patruus, propatruus—father; is there any way you can change father into uncle in English" "I don't think of any," said the boy, "unless you get him to marry your aunt."

A BOY can imagine almost anything; he can lug an old shot gun about all day without firing at a living thing and be under the impression that he's having a howling good time. But all attempts to induce a boy to imagine that he is killing Indians when he is sawing wood have proved futile.

THE Denver *News* has a special from Leadville relative to the striking miners at that place, which says: At noon the mine managers and superintendents held a meeting and acted largely under instructions from New York, and resolved positively not to accede to the strikers' demands. On the morning of May 28 a large body of miners attempted to drive away the guards at the Chrysolite mine, in order that they might get possession of the pumps, and by stopping them, allow the water to flood the mines. This did not result in a serious rupture. The business men met this morning and took measures towards organizing a Committee of Safety. All the mines are carefully guarded. At the Chrysolite and Little Pittsburg breastworks have been thrown up and the buildings fortified, and every arrangement made for defense.

MIKE MCCLUSKY, well known in Pioche, White Pine, Eureka, Virginia City, Gold Hill, and in fact almost all over the coast, and who "cleaned up" several thousand dollars in the first named place during its flush days, some seven years ago, went East and fitted up one of the finest saloons on Long Island, N. Y., blew his brains out in Brooklyn on the 24th of last month.

FOUR men came over the Sonora road, arriving on this side on the 24th ultimo. They came on foot and report considerable snow, most of it on this side of the mountains, but fast melting. They say there are hundreds on the other side waiting for the snow to go before they start for Mono county.—*Bridgeport Union.*

MINING.

NOTICE OF FORFEITURE.

TO HENRY DUNLAP, CO-OWNER:

You are hereby notified that the undersigned have expended the sum of Six Hundred Dollars in labor and improvements upon the Trade Dollar mine, situate in the Pine Mountain District, County of Inyo, State of California, being the amount of expenditures required to be made and done for the year 1879, in order to hold said mine under the provisions of Section 2324, Revised Statutes of the United States. And if within ninety days after the expiration of the publication of this notice, you shall fail or refuse to contribute and pay your legal proportion of such expenditure as co-owner, your interest in said mine or claim will be forfeited and become the property of the undersigned, as provided for under Section 2324 of the Revised Statutes of the United States.

Inyo County, Cal., April 3, 1880. n511d90

NOTICE OF FORFEITURE.

TO HENRY HERON, G. HOOVER AND T. McKnight, co-owners:

You are hereby notified that the undersigned has expended the sum of Three Hundred and Sixty 30 100 Dollars in labor and improvements in and upon the Cerro Gordo mine, situate in the Cerro Gordo Mining District, County of Inyo, State of California, being the amount of annual expenditures required to be made and done for the years 1878, 1879 and 1880 in order to hold said mine under the provisions of Section 2324, Revised Statutes of the United States. And if within ninety days after the expiration of the publication of this notice, you or either of you fail or refuse to contribute and pay your proportion of such expenditures as co-owners, your interest in said mine or claim will be forfeited and become the property of the undersigned, as provided for under Section 2324 of the Revised Statutes of the United States.

LEGAL.

NOTICE OF CO-PARTNERSHIP.

STATE OF CALIFORNIA, County of Inyo. }

WE, THE UNDERSIGNED, DO HEREBY certify that we are partners transacting business in this State, at Bishop Creek, Inyo county, under the firm name and style of Elkeles & Lasky; that the names in full of all the members of such partnership are Jacob Elkeles and Levi Lasky, and that the places of our respective residences are set opposite our respective names hereunto subscribed

In witness whereof we have hereunto set our hands this 22nd day of May, A. D. 1880.

JACOB ELKELES, Bishop Creek.
LEVI LASKY, Lone Pine.

STATE OF CALIFORNIA, County of Inyo. } ss.

On the 22nd day of May, 1880, before me, Seth G. Sneden, a Notary Public, in and for said county, residing therein, duly commissioned and sworn, personally appeared, Jacob Elkeles and Levi Lasky, known to me to be the persons described in, whose names are subscribed to and who executed, the within instrument, and they duly acknowledged to me that they executed the same.

In witness whereof, I have hereunto set my hand and affixed my official seal, at my office in the county of Inyo, the day and year first above written.

[SEAL] SETH G. SNEDEN, Notary Public.

CONSTABLE'S SALE.

BY VIRTUE OF AN EXECUTION ISSUED out of Justice Seth G. Sneden's Court, of the 4th Township, county of Inyo, State of California, dated the 27th day of May, 1880, in a certain action wherein A. Dell, as Plaintiff, recovered judgment against J. A. Seehorn, as Defendant, for $101 56 100 damages and $19 50 100 costs on the 27th day of May, 1880, I have levied upon the following described property, to wit:

All the right, title and interest of Defendant J. A. Seehorn in and to that certain water ditch, located on the east side of Owens river, in the 4th Township, Inyo county, California, and known as the "Edson and Hughes' Ditch," being the same property as heretofore conveyed by A. J. Walter to J. A. Seehorn by deed and of record in Book K of Deeds, page 35, Records of Inyo county.

Notice is hereby given that on MONDAY, the TWENTY-FIRST day of JUNE, 1880, at 12 o'clock M. of that day, in front of Sneden's office, in the town of Bishop Creek, county of Inyo, I will sell all the right, title and interest of said J. A. Seehorn in and to the above described property, at public auction, for cash, to the highest and best bidder, to satisfy said execution and all costs.

Dated at Bishop Creek, the 27th day of May, 1880.

WILLIAM GOODMAN, Constable.

SUMMONS.

IN THE SUPERIOR COURT, IN AND FOR the County of Inyo, State of California.

J. S. Rothschild and A. W. Eibeshutz, partners doing business under the firm name and style of J. S. Rothschild & Co., Plaintiffs, vs. G. W. Smalley, Defendant. Action brought in the Superior Court, in and for the county of Inyo, State of California, and the complaint filed in the office of the Clerk of said Superior Court.

The People of the State of California send Greeting to G. W. Smalley, Defendant: You are hereby required to appear in an action brought against you by the above named Plaintiffs, in the Superior Court, in and for the County of Inyo, State of California, and to answer the complaint filed therein within ten days (exclusive of the day of service) after the service on you of this Summons—if served within this county; or, if served out of this county, but in this district, within twenty days; otherwise, within forty days—or judgment by default will be taken against you according to the prayer of said complaint.

The said action is brought to recover judgment in favor of Plaintiffs and against Defendant for the sum of $650 49-100 in U. S. gold coin, besides interest, being the amount due on a promissory note given May 1st, 1878, due one day after date, with interest thereon at the rate of one per cent. per month until paid—together with costs of suit, as will more fully appear by the complaint filed herein, to which reference is hereby made

And you are hereby notified that if you fail to appear and answer the said complaint, as above required, the said Plaintiffs will take judgment against you for the sum of $650 49-100 and interest, together with costs of suit.

Given under my hand and the Seal of the Superior Court, in and for the County of Inyo, State of California, this 12th day of March, in the year of our Lord one thousand eight hundred and eighty.

[SEAL] JOHN CROUGH, Clerk.

PROPOSAL TO CHANGE SCHOOL TEXT BOOKS.

PUBLIC NOTICE IS HEREBY GIVEN by the County Board of Education of Inyo county, this 17th day of May, 1880, that it is proposed to change the following text books now and heretofore in use in the public schools of this county.

Reading,
Spelling,
Writing (copy books),
Arithmetic,
Geography,
Grammar,
Language Lessons,
History of the United States,
Industrial Drawing,
Physiology,
Music, and
Algebra.

Sealed bids or proposals will be received by this Board for furnishing books to replace them. Separate bids or proposals for supplying any part of this list will be received.

Said sealed bids or proposals will be opened at Independence, the county seat of Inyo County, at 10 o'clock A. M.,

On Monday, June 28, 1880.

The Board reserves the right to reject any or all bids or proposals.

Said bids or proposals must be accompanied with sample copies of the books proposed to be furnished, together with a statement of the wholesale and retail price at which the publisher agrees to furnish each book at Independence, in this county of Inyo, during the full time for which said books are to be adopted.

The publisher or publishers, whose proposals shall be accepted, must enter into a written contract with this Board of Education, and shall give a good and sufficient bond in the sum of $500 for Readers, $400 each for Geography and Arithmetic, and $100 each for the remainder of the said list of text books.

By order of the Board of Education of Inyo county.

J. W. SYMMES,
Secretary.

TEACHERS' CERTIFICATES.

PUBLIC NOTICE IS HEREBY GIVEN that the semi-annual examination of persons desiring to teach school in the county of Inyo, will be held by the Board of Education of said county at the District School House, in the town of Independence, commencing at 10 o'clock A. M., on

Tuesday, June 29, 1880.

All applications for examination must be filed with the members of the Board on or before June 28, 1880.

Section 1772 of the Amended School Law provides that applicants for second-grade County Certificates shall be required to pass a satisfactory examination in Arithmetic, Grammar, Geography, Composition, History of the United States, Orthography, Defining, Penmanship, Reading and Method of Teaching.

Applicants for first-grade County Certificates will be required to pass a satisfactory examination in all of the foregoing studies, and also in such other studies as the Board may determine upon.

Sections 1772 and 1775 require that all teachers must hold certificates from the County Board of Education, notwithstanding they may hold either a Life Diploma, State Educational Diploma, Normal School Diploma, State University Diploma or State and County Certificates granted prior to the first day of January, 1880.

By order of the Board of Education of Inyo county.

J. W. SYMMES, Secretary.

How Spools Are Made.

Drummondsville is situated on the St. Francis river, and the northern division of the Southeastern Railway, Canada, passes through it. Several years ago the prevailing wood which grew in the vicinity was white birch, which does not, we believe, make first-class firewood, but which appears to be best for the manufacture of spools. This, probably, was the reason why Drummondsville was the place selected in which to locate these factories, and the farmers in the vicinity can always find a ready market for this kind of wood at about $2 50 or $3 per cord. The wood, after being delivered to the factories, is first sawed into pieces about four feet long and from an inch to an inch and a half square, according to the size of spool it is desired to make. These pieces are put into the dry-house and thoroughly dried, from whence they are taken to the factory and given to the roughers, who, in an incredibly short space of time, bore a hole in the center a couple of inches deep, turn about the same space round, and then cut off the length required for a spool. The machines used for this purpose are revolving planers, in the center of which is a revolving gimlet or bit, and immediately to the right a small circular saw with a gauge set to the proper size for the spools. The roughers receive one and a half cent per gross for their work, and experienced men can turn out from 100 to 130 gross per day. The round blocks pass from them to the finishers, who place them in machines which give them the shape of spools, and make them quite smooth. The spools are thrown loosely into a large cylinder, which revolves slowly, so that the spools are polished by the constant rubbing upon each other for some time. On being taken out of the cylinder they are placed in a hopper with an opening at the bottom, through which they pass down a slide for inspection. Here the inspector sits and watches closely to see that no imperfect spools are allowed to pass, and a very small knot or scratch is sufficient to condemn them. They are packed in large boxes, made the proper size, so that the layers of spools exactly fill the box, and no additional packing is needed. The packer receives one quarter of a cent per gross for packing, and a smart boy who is accustomed to the work can pack about 200 gross per day. One proprietor ships over 2,000,000 spools per month to England, and another firm ships over 1,000,000 to Glasgow, Scotland.—*N. Y. Mail.*

IN the Methodist General Conference, at Cincinnati, were representatives from the Mission Conference, in India. When the name of one of them, Ram Chandar Rose, was called upon the roll, the Conference showed their appreciation of him by clapping of hands. He seemed greatly disturbed, until he was told it was intended as a compliment. "Oh!" he said, "I see that now; but in my country that demonstration would mean that I was not wanted, and that I must get out of the place."

OVER $1,000,000 is lying idle as a sinking fund in the County Treasurer's office. Efforts to loan it have met with offers of interest of only 1½ ynd 2 per cent. per annum. The condition of the money market here could be shown in no more emphatic manner. The banks, too, are glutted with money. It is a phenomenon of trade, commerce and finance that this surplus money is not engaged in manufacturing.—*S. F. Stock Report.*

WHILE a Leadville lawyer was cross-examining a woman who was on the witness stand, last week, she exclaimed: "I'm a lady, and by thunder don't you forget it."

Lung Culture by Singing.

Some interesting researches by Prof. Monassein, as cited in the *Medical Wochenschrift* of St. Petersburg, show that the practice of singing, merely as a physical exercise, is one of the most healthful in which a person of any age can employ himself. He examined two hundred and twenty-two singers from nine to fifty-three years of age, with reference to the pneumatometric and spirometric condition of the singers, and proved that the circumference of the chest is greater, relatively and absolutely among singers than among those who do not sing, and that it increases with the age and growth of the singer. This fact is corroborated by the experience of skilful trainers of the voice, who combine with tone-building a physical training based upon thorough anatomical and hygeinic science. It is asserted by some that many of the ills which afflict haman kind, and particularly the female portion, arise from faulty breathing, by which the lungs are but partially inflated, and as a consequence, the poisons which should be thrown off by the breath are absorbed into the system, causing all manner of mysterious diseases. In fact, many cases can be cited, in which diseases, not only of the pulmonary organs, but of others remote from them, have been cured, apparently by the improved respiration which singing enforces. One cannot sing without breathing deeply. The muscles of the chest and abdomen must have full play, the body must be erect, and every facility must be given for the ingress and egress of the air to the lungs. A fine voice is of little consequence, if the singer cannot breathe freely and to the very bottom of the lungs. Everybody knows the comfortable and stimulating effect of a long-drawn breath after sitting in a cramped positon. This stimulating effect, reproduced by frequent practice in singing, strengthens the lungs, enlarges the chest, and, by admitting large accessions of oxygen to the lungs, purifies the blood, and sends its healing and strengthening streams to every part of the body. —*Springfield Union.*

IT is only in America, says the New York correspondent of the Rochester *Democrat*, that distinguished criminals have taken to the lecture platform, and it may be added that the ill success which has attended this feature in the system is highly discouraging. The first to make the attempt was John Allen, notorious as the "wickedest man in New York." After general publicity had compelled him to close his dance house, he announced himself to lecture in Stamford, but no one attended, and he never repeated the effort. Hayden also made the attempt, and although it has been repeated twice, it has not proved profitable, and hence will not be resumed. Cove Bennett also lectured, but did not take in enough to pay hall rent. Another Bennett, who, though not a murderer, had served a term in the penitentiary for circulating improper publications through the mail, recently lectured in this city. To increase the attraction he was announced to appear at this time in the very dress which he wore in prison. Even this, however, failed to attract, and it may be inferred that this method of lecturing will fall into disuse. Bad as may be the condition of public morals, it will not justify such attempts to glorify crime.

DELEGATE DOWNEY, of Wyoming, has introduced a bill requiring Superintendents of Mints and assay offices to make assays free of charge for any mineral claim owner, or locator, who sends with his ore a certificate from the Recorder of the mining district that he is unable to bear the expense. It is a good bill and ought to become a law, as it will have the effect to stimulate prospecting for and development of mines.

THERE must have been some lively business in New York for the first three months of the current year. The increase of collections for imports for that period was $37,000,000 more than for a corresponding period last year, and of this increase $24,000,000 are credited to New York. With his income increasing at this rate it is no wonder that John Sherman can afford to pay the National debt.

CHEERING reports are coming in from every mining camp and district in Utah, says the Salt Lake *Tribune*. With the best mines, the most extensive ledges, there is nothing to prevent the Territory from walking right ahead of Colorado and taking the front rank among the great mineral producers on the continent.

THE Gunnison *News*, the first paper published in Gunnison Valley, Colorado's new mining attraction, had its first paper struck off and sold to the highest bidder, F. G. Kubler, Mayor of the town, whose $50 is to be turned over to the first church or charitable institution built at Gunnison.

SO GREAT has been the destruction of the forests about Leadville, Colorado, that the future supply for mining timbee is becoming a serious subject. Already that obtained has to be hauled long distances. A Leadville paper says that a good timber ranch will soon be as valuable as a mine.

ADDING together the estimates of the number of delegates to Chicago that are "sure" for the rival candidates, by their respective organs, we find that there should be 1,432 delegates in the Convention! It's as bad as the "gem" puzzle.—*Eureka Sentinel.*

IF you want to raise a good crop of garden "sass," turn your hens into your neighbor's lot.

A Valuable Secret.

It is related of Franklin that from the window of his office in Philadelphia he noticed a mechanic, among others at work on a house which was being erected close by, who always appeared to be in a merry humor, and who had a kind and cheerful smile for every one he met. Let the day be ever so cold, gloomy or colorless, the happy smile glanced like a sunbeam on his cheerful countenance. Meeting him one day Franklin requested to know the secret of his constant flow of happy spirits. "It's no secret, Doctor," the man replied. "I've got one of the best of wives, and when I go to work she always gives me a kind word of encouragement and a blessing with her parting kiss, and when I go home she is sure to meet me with a smile and a kiss of welcome; and then tea is sure to be ready, and, as we chat in the evening, I find she has been doing so many little things during the day to please me that I cannot find it in my heart to speak an unkind word or give an unkind look to anybody." And Franklin adds: "What an influence then hath women over the heart of man to soften it and make it the fountain of cheerful and pure emotions. Speak gently, then; a happy smile and a kind word of greeting after the toils of the day are over cost nothing, and go far toward making a home happy and peaceful."

The International Exhibition of 1883.

The original bill providing for the holding of an International Exhibition in this city 1883—the 100th anniversary of the recognition of the independence of the American Colonies—passed the Senate some weeks ago, and ran the gauntlet of the House of Representatives without anything more serious than the tacking on of an amendment providing for the addition of the names of the members of what is known as the Hilton Committee to the original list of incorporators. The bill thus amended was referred back to the Senate for concurrence, and was approved. There is nothing now in the way of the success of the project, unless it may arise out of the previous troubles of the rival committees. We expect now to see all these differences settled, and the entire body of incorporators set to work to make the exhibition a magnificent success.—*N. Y. Engineering Journal.*

AT a meeting of the Trustees of the California Bible Society, held yesterday, the following gentlemen were elected officers: President—Annis Merrill, San Francisco; Vice Presidents—Revs. John Hemphill, T. K. Noble, E. H. Gray, Otis Gibson, D. D., M. M. Gibson, D. D., W. P. Parsons, Albert Williams, Robert MacKenzie, San Francisco; W. H. Hill, Los Angeles; Robert Wylie, Napa; —— Gordon, Marysville; Samuel Sprecher, J. K. McLean, Lucius Hamilton, D. D., Oakland; ——Finley, Santa Rosa; J. R. Bushnell, D. D., San José; S. H. Wiley, D. D., Santa Clara; —— Barlow, Stockton; J. E. Dwinelle, D. D., Sacramento. Secretary—William Abbott, San Francisco.—*Alta, June 5.*

DR. WIER MITCHELL, lecturing on a case of nervous affection in which constipation existed, said that he recommended the girl to take each morning on rising, a tumblerful of water in which was dissolved a teaspoonful of common salt. The water should be cold, or it might nauseate. "This simple aperient I frequently employ in cases of constipation, and generally find it efficient. There is a great advantage in starting the bowels and keeping them in a soluble condition, particularly in cases of nervous disorder in women, as it sometimes clears up obscure points in the case, and, at all events, eliminates one source of error."

A PRESIDENTIAL year, the Washington *Post* asserts, isn't a favorable time for third parties. There isn't room for them to skirmish between the two great political armies. We notice that the Greenback Conventions of this Summer show a thinness, a sort of a goneness, a general flavor of mild decay. They try to make up for this attenuation by the abnormal pomposity and stupendous length of their resolutions. As the woman remarked to her ague-stricken offspring, "the thinner he gets the louder he roars."

A company of Ute Indians are going through the settlements of Utah giving entertainments. Their performance consists of a variety of Indian dances, such as are in vogue among the Sioux, Ute, Snake, Arapahoe and Navajoe nations. The troupe is from the Uintah reservation, and have been forced, it is said, on account of failure of last season's crops, to undertake a theatrical tour for the purpose of raising money to buy flour and provisions for their families at home.

At a recent meeting of the Pioneer Society at Virginia, Nev., nearly 300 members were dropped from the list for non-payment of dues. It is said that most of them have become so poor of late that they are utterly unable to raise the funds to maintain a place in the society they take so much pride in. The rule which drops them from the roll is inexorable, and under its workings leaves but fifty active members.

A SELECT party of American bicyclers have left New York for a tour through England. The company was principally made up in Boston, and is limited to twenty. The general idea of the trip is to make an excursion to London through the midland and western counties, and thence through Kent, Sussex, and other southern counties back to London. The party will be absent about forty days.

HOTELS.

THE BLANEY HOUSE,
Independence, - Cal.,
V. G. THOMPSON, Prop'r.

THE PROPRIETOR OF THE "BLANEY" respectfully announces to his friends and the traveling public that the house will be conducted as a

INDEPENDENCE, CAL.:

SATURDAY, JUNE 12.....1880

AT LAST.

It is not Grant, neither is it Blaine of Maine, but an ebony horse from Ohio who gets away with the Chicago baggage. 'Rah! for Ohio, mother of dark Presidential horses, also of a certain proportion of THE INDEPENDENT force. It took no less than thirty-six ballots of over seven hundred able-bodied men to bring out this fact—not that relating to THE INDEPENDENT, but the other. Gen. Garfield, who fooled along, sometimes with one vote in his favor, more generally with none at all, proved to be the dark horse in question. The 36th ballot stood: Garfield, 399 (20 more than was necessary to a choice); Grant, 306 (his regular vote from the start to the last); Blaine, 42; Washburne, 5, Sherman, 3. Now, if the Democrats are wise, they will stand off this Ohio matter by taking their Ohio man, Thurman—make it Thurman vs. Garfield. THE Republican nominee for the Vice-Presidency, Chester A. Arthur, of New York. has not been noticeably prominent in public life. He was Colonel of a New York regiment during the war. During the last term of President Grant Arthur was appointed Collector of the Port of New York. His removal from that position by President Hayes some two years ago gave great offence to Senator Conkling, who made a party issue on his account in the ensuing Conventions, and gained something of a triumph, resulting in his re-election to the Senate. The nomination of Arthur by the Chicago Convention seems to be a concession to Conkling, but is not calculated to add strength to the ticket.

A CORRESPONDENT of the Los Angeles *Express*, writing from Silver City, Arizona, June 10, depicts Eastern Arizona as completely terrorized from the frequency of murders by the Indians. In one instance a whole settlement of fifteen persons or more were butchered on the Frisco river, while many others, including the Deputy Sheriff of Apache county, have been killed in the noted "dark and bloody grounds," known as Ash Springs. "No one is safe in Eastern Arizona or Western New Mexico. All mining interests and farming is paralyzed." Gen. Hatch is denounced as an old "imbecile, unfit to command a band of geese," and as "strutting around like an old turkey-gobbler, sending false dispatches and refusing ammunition to parties who would fight these devils incarnate." It seems that a Capt. Parker, in command of a company of Indian scouts, came upon a band of the murderers a few days before the massacre at Fort Cummings, surrounded them and killed many. Running out of ammunition, he sent to Hatch for more, but the latter refused to send it. "He [the old Imbecile], however, rushed off to the nearest red-tape telegraph office and telegraphed a victory over the Indians by his Ninth regiment, yet it was not within forty miles of the Indians." By aid of the military telegraph, but nothing else, this General Hatch has hatched not less than half a dozen sweeping victories over old Victorio, and, magnetically, has "dispatched" vast numbers of Apaches to the happy hunting grounds; but as a matter of fact not one in a hundred so dispatched by the General's magnetic method stays dispatched more than a few hours at a time. They are all back at their bloody work again more numerous and vigorous than ever, almost before the General's wires have cooled off. Outside of military circles, it is a general conviction that the Hatch method of killing Indians by telegraph is a dead failure; further, that the General has acted in a manner that should bring him before a court martial.

ACCORDING to the proofs presented in a pamphlet for sale by J. K. Cooper, 746 Market street, San Francisco, (price 50 cents), Mayor I. S. Kalloch is one of the most unmitigated hypocrites and scoundrels outside of San Quentin. Let those who doubt this get a copy of the pamphlet in question and see what it says.

ACCORDING to San Bernardino and Los Angeles papers, Resting Springs is shipping between $3,000 and $4,000 in bullion per month. Resting Springs is in Inyo County, and this bullion business has got to be stopped.

THE columns of the Fresno *Expositor* bristle with the announcements of candidates for local offices. Will some self-sacrificing citizen please start the ball rolling in this county?

IN its regular report, the *Herald* states that the Mammoth mill will be started up between the 15th and 20th of the present month.

GROWING SMALLER.

Should any entertain the idea that this country may be controlled by a landed aristocracy, they have but to read the following compilation: In 1850 the average size of farms in the United States was 203 acres; in ten years the averge size was four acres less, and at the late census a further reduction of 47 acres appeared, and farms averaged 153 acres. The decline between 1800–1870 was so general that the only exception in all the States and Territories was an increase in Califorania from 466 to 682 acres, from 94 to 133 in Massachusetts, and from 25 to 40 in Utah. Prior to 1850, land monopoly had some claim to existence in California; in 10 years the average size of farms was diminished by a reduction of 4000 acres. In Texas the reduction was in the first decade from 642 to 591 acres, and in the second to 301 acres. The next census is expected to show a further decline. Minnesota had 157 farms in 1850, 18,181 in 1860, 46,500 in 1870, and now claims more than 68,000. There were 5,464 farms of more than 1,000 acres in 1860; in 1870 there were only 3,720. In the same period the number from 500 to 1,000 acres declined from 20,619 to 15,873, while all the classes of the smaller farms increased, the ratio of increase getting larger as the scale of size descended.

VIRGINIA feels encouraged at the prospect of better times. It is noted that among the Northern men who are making investments in that State are several Republicans. Senator Blaine is of the number. It is said he has put a large sum of money in the stock of the James River Railroad. The tone of political feeling is softened on account of these ventures. A Richmond gentleman writes to a Philadelphia journal as follows: "With us the war is done. What we are after now is to develop our resources. As to politics, we want for President a man who will be acceptable to the North and West. We can have no ower again until we are rich, and this our people are realizing more and more every day."

WE have seen, says the Salt Lake *Tribune*, an invention by one of our townsmen, which is destined to bring a revolution in the working of gold ores. It is a simple machine, operated by only two men (water or steam power included), and will outwork a 15 to 20-stamp mill without the slightest exertion, besides costing only one-fourth of such stamp mill, no expensive buildings being required. The main feature of the machine is that no loss of precious metals can occur, since it absorbs the smallest particles without additional labor or cost.

IT is stated that notwithstanding the immense number of immigrants who are arriving daily at Castle Garden, New York, the Employment Bureau of that city is in some fortunate way enabled so to divide and assign them, as to provide them all with employment. About 75 per cent of the immigrants go West at once, to engage in farming, 10 per cent of them remain in New York State, and about 15 per cent find occupation in New York City.

VISCOUNT DE LESSEPS has gone to England to seek financial support for the Panama Canal project, and will soon visit Holland on the same errand. His own zeal in behalf of the enterprise appears to be unabated, but the French public has grown a little cold, and he is forced to turn to the capitalists of London and Amsterdam for help which a few months ago he thought he would have no occasion to ask.

SOME of the papers in San Francisco are evidently bulling the market when they talk about 40,000,000 bags being required this year for the grain crop, when less than 22,000,000 were used in 1879. While we quote, says the San Francisco *Merchant*, bags in the regular way at $11.25 cents, it is within our knowledge that a large lot has been offered to a dealer this week at $10.80.

RICHARD BARRETT CONNOLLY, the Controller of New York during the supremacy of the Tweed Ring, died Sunday at the residence of his only son in Marseilles, France, in his seventieth year. He went abroad in 1872 and has never returned. Mr. Connolly leaves two daughters and one son.

A BILL is before the New York Legislature providing for the restoration of the surrounding scenery of Niagara Falls and to prevent its desecration or destruction. Niagara Falls are the attraction of the wide world, and the views and scenery as nature formed them should not be despoiled.

NEW YORK at last is about to avail itself of London's greatest achievement, in the way of rapid transit—an underground railroad. Work on the first section of the road will probably be started soon.

CHAS. W. DANA has been superceded in the office of Supervisor for the Fourth (this) Census District by J. W. Haverstick, of Los Angeles.

HOW IT AFFECTS THEM.

Let the final result of the labors of the Chicago Convention be what it may as regards the defeat or election of its nominee, the incidents of its proceedings will go down in history as the most remarkable ever witnessed in a body of deliberation composed of staid men of lawful age and of a reasonable quantity of brains. Why, the mere mention of the name of a favorite candidate would produce as excited demonstrations as would a handful of cayenne pepper scattered in a crowded ballroom. Says a *Chronicle* dispatch: "The speech of the New York Senator aroused such an enthusiasm on the part of the Grant adherents as was never before seen in a representative body. Both those on the floor and in the galleries seemed intoxicated with excitement. Cheers were prolonged for half an hour, and when they had shouted themselves hoarse, the delegates from the States which had declared for Grant formed in procession and marched about the hall." Just imagine three or four hundred staid old boys so excited as to execute a grand walk-around at such a time and occasion! "Such a scene," continues the dispatch, "it is safe to say, was never witnessed before at a National Convention."

THE wages for miners in Leadville are $3 per day. The work is not one-half as hazardous as it is on the Comstock, yet the misguided men have struck for $4 per day, and taken riotous and unlawful means to enforce their demands. In view of the situation as depicted by an old prospector writing from Leadville, the action appears unusually wild and foolhardy. The correspondent says: In all my experience in mining camps, from Montana to Arizona, I have never struck a place like Colorado, and Leadville in particular, for destitution and utter want. The labor market is overdone to an alarming extent, and where one man is at work twenty-five are idle.

REAL estate in Guymas has appreciated wonderfully in value, owing to the presence of the railroad there, and town lots and still increasing in price. Five hundred Yaqui Indians are now at work on the railroad, which is graded seven miles out from the lower part of Guymas. The telegraph line is completed to Hermosillo, and is being built north from there and south to Mazatlan. Surveyors are starting from Hermosillo to meet the Guymas end of the railroad, and the general impression is that it will come up through the Magdalena and Cocospera valleys, and take in Tombstone and Patagonia in Arizona.

IT has almost escaped the public mind that three or four months ago certain Ute Indians—among the number Chief Douglas—were arrested and confined in one of the frontier forts, to be tried on a charge of participating in the White River Agency massacre, and for committing other brutal crimes. Soon after it was reported that Douglas made two unsuccessful attempts to escape. Since that time, not one word has been heard from these prisoners—whether they are still held or are at large. A question in which the country feels some interest is, what has become of them?

NILES SEARLES of Nevada County, ex-District Judge and ex-State Senator, it is announced, will be a candidate for Congress from the Second District on the Democratic ticket. Grove L. Johnson of Sacramento, A. C. Henry of Alameda, H. T. Dorrence of San Joaquin, G. W. Tyler of San Francisco, and H. F. Page are announced as probable candidates before the Convention on the Republican side. Judge Nye of Alameda, who was before the Convention last year, it is said, will not be a candidate.

IN Nevada City, Cal., an ordinance was passed requiring the Chinese to remove from the city limits within a given time, but the City Marshal has been notified, on behalf of the Chinese Legation of San Francisco, that any attempt to enforce the ordinance will be legally resisted. The decision of the U. S. Circuit Court in the case of ex parte Tiburcio Parrott is quoted as the ground of the protest made by the Legation.

LAST Monday, June 7, an election came off in Oregon, the result of which is at this writing unknown to us, but should reach us in time for this issue. The officers chosen were a Representative in Congress, three Supreme Court Judges, a State Printer, members of the Legislature, a Judge and Prosecuting Attorney in each of the five Judicial Districts in which the State is divided, and a full set of county officers in each county.

IT has been found necessary in Virginia City to pass an ordinance prohibiting boys under ten years of age from carrying revolvers. Several severe accidents have occurred there recently, through the careless handling of firearms by boys under ten.

THE supplies for the Arizona military posts will be drawn from Los Angeles and San Bernardino this year.

Mining in the Higher Sierra.

A few days ago we had something on the subject of the western slope of the Sierra Nevada Mountains as a field for safe and profitable mining. The article was descriptive of the old "mother lode" portion of the State, the origin, of the placer deposits which made California so celebrated and attractive nearly a generation ago. The deep and costly gravel diggings at a few places and some little quartz mining scattered along through half a dozen counties have served to keep the State to the front as a regular producer of the precious metals, particulorly gold. This is a field, however, that is as yet but slightly prospected in comparison to its future importance. It is too easily gotten at to longer attract the sensational portion of our mining population; it is too prolific in every facility for cheap and profitable development. It is safe to say that no other State or country surpasses or equals it in these respects. California has been the mother of States and men wholly devoted to and skilled in mining for the precious metals, and will continue to build up and feed other communities and at the same time increase her own bullion product manifold. Without digressing it is hoped here to call special attention to a vast section of the State, rich in minerals of all kinds, and which has lain dormant, fresh as nature itself, almost. It embraces a wide belt or zone on either slope of the Sierra, including the summit itself, and for a distance along the range of hundreds of miles. Years ago there was a wild rush to Meadow Lake, located a few miles north of the Central Pacific Railroad, in the very heart of the Sierra. Through ignorance of a method that would successfully extract the metal from the ores, it is believed, the place was almost a suddenly abandoned. Farther south, in Alpine County, another attempt was made, followed by want of success. Going much farther south, in Inyo County, where the mountains reach their loftiest altitudes, and still another partial success followed in what is known as Kearsarge District. From all accounts, pro and con, there was no lack of ore at any point, and ore rich in silver more especially. These things tended very materially to create a deep if not lasting prejudice against the main range, especially all that portion lying above the so-called "mother lode," which played so significant a part in the early history of the State. For years no one would touch, taste or think of "handling" a property presented from all that immense region of country. Bodie, with its millions "in sight," was abandoned for the time as well. By and by this district came to the front and with it hundreds and thousands more men than were wanted there, and who from necessity began to scatter out and explore the country in every direction where there was a stain of mineral to be seen. Lake District led to a succession of new districts, the latest in favor being Homer, nearest to Bodie. Here in Mill Creek cañon, whose walls are scarcely less vertical and towering than Yosemite itself, there is a most interesting field for the prospector and capitalist. The ledges almost jut out from either wall and are prospected, so to speak, to a depth of from 1,500 to 3,000 feet. If development prove them rich and free in gold, as they show in the surface, and continuous as to strength, Homer will play a very interesting part in the bullion production of the State. There is abundant water power to run machinery, or fuel for steam purposes. As a rule, hoisting works will not be required; tunnels and tramways doing the work of extracting and transporting the ores. Unlike the western slope of the Sierra, the eastern possesses no foot-hills, but presents a uniformly bold and precipitous wall from north of the Central Pacific road down toward the Southern, with a natural railroad route connecting along its base. This eastern wall is broken into at regular intervals the entire distance, by deep cañons carrying healthy streams of water, dashing down from perpetual snow. The streams, mountain sides and summits are usually well wooded. The climate is quite healthful, and seldom extreme as to heat or cold. When once fairly inaugurated, work can be carried on at all seasons even pleasantly. On the immediate western slope, these features and outlines are generally more satisfactory, except that longer roads will be required to reach the summit. Before closing this already too lengthy article, we would call attention to Mineral King District, situated 11,000 feet above the sea, 60 miles east of Visalia and on the western slope of the Sierra. The large quantities of silver ores, of the roasting order, known to exist there, has already attracted some of our heaviest mining operators. A costly wagon road was built last Summer, connecting the mines with the railroad at Visalia. Prospectors who claim to have traced it through last Summer assert that there exists a remarkable breadth and strength of gold and silver croppings, extending across from Mineral King in Tulare, to Laurel Hill District in Mono County. Had the Whitney-King surveys baen less devoted to picnicing and more to practical mapping of the State there would be less work for the poor prospector to do, no doubt. It is to be hoped, now that a new departure has been made by the State, that the Mining Bureau will not be too much given to stuffed owls and humming birds, but as often as possible afford the public useful information concerning the immense mining resources of California.—*S. F. Stock Report.*

REPRESENTATIVE Alexander H. Stephens, who is in Philadelphia on committee business, told a reporter of the Philadelphia *Press* that this Congress "will go down to posterity as the do-nothing Congress; perhaps the most indolent and listless in the history of the Government."

THE Galena Congressional District in which Gen. Grant lives, went against him in choosing delegates to the Illinois State Convention, by 15 for, and 26 against him. "A prophet is not without honor" etc., is here illustrated.

HONEY extracted before the bees have capped it over is unfit to use and soon spoils.

ALL SORTS.

The crops of Merced county have been seriously damaged by blight.

The Coroner's jury in the case of the recent Santa Cruz railroad accident rendered a verdict exonerating the railroad company from all blame in the matter.

The recent prize fight between Ryan and Goss was won by the former in 86 rounds.

The new American Stock Exchange in New York was formally opened on the 1st instant.

The public debt was decreased during May $15,928,033 87.

Eight persons were wounded at Texarkana, Arkansas, in an attempt, Monday last, to take a prisoner from jail to lynch him.

In Western Persia, 40,000 persons are stricken with famine.

William M. Neilson has commenced suit against Pickering, of the San Francisco *Call*, for libel, and, in turn, Neilson is under arrest for libeling Kalloch.

The Commencement exercises at the Berkeley University were held on the 2d instant.

The Alameda Republicans will claim the right to nominate the candidate for Congressional Representative for the 2d District—which lets Page out.

The new roadway at Long Wharf, Oakland, will soon be completed.

Next to New York, more immigrants land at Baltimore than any other port in the Union. Until recently, New Orleans stood next to New York in this regard.

It is stated that Gen. Grant has presented the Emperor of Japan with a number of fine American horses.

The Jan José Republicans are getting ready for a grand ratification blow-out for the Chicago nominee, no matter who he may be. Must be that some would-be Federal office holders shape things down that way.

The much talked-of Skagit region of gold mines is now denounced as a fraud of the first water, and a death trap for prospectors.

In Arkansas, a pretty actress settled her advertising bill with a Little Rock newspaper by kissing the editor. Arkansas editors don't get very rich, but they have heaps of fun.

It is reported that the Chinese have driven the Russians back to the Kuldja frontiers, capturing many villages.

They got from St. Louis a bald-headed old belle, who sported a wall eye and a game leg, to go to Deadwood to see if she couldn't run a school two weeks before some one wanted to marry her. But the third day a tramp from Yankton came along and broke 'em up on it.

A delegation of Arizona Indians have gone to San Francisco to participate in the grand six-day pedestrian tournament which is to commence in that city on the 23d of this month.

A city paper has discovered this: At this time of the year, by one of those strange dispensations of Providence which are past finding out, it is upon the same afternoons that the baseball games take place that the tired clerk is called away from his labors by sudden illness.

The melting snows are producing a flood in the San Joaquin and Kings rivers. The headgates of one of the large canals just above Kingston has been washed out, and the waters are flooding a large territory in the Mussel Slough country, ruining an immense quantity of grain.

There are now in course of erection over twenty-five buildings in Globe, the latest Arizona city, and more than double that number are contemplated. Lots are in demand; those that could not be sold for from $10 to $25 less than a year ago, are now selling at from $500 to $1,000.

The international rifle match between Ireland and America will take place at Dublin, June 27th and 28th.

The Ponca Indians have commenced suit in the United States Circuit Court of Nebraska and Dakota to quiet title to their reservations.

At West Berkeley, May 27, Dr. Chas. Chapman committed suicide, because he believed he had fatally injured a woman patient from whom he had removed a tumor.

The Turkish tax collector has nearly ruined Palestine, and its wretched people fear to cultivate the soil. Every eighth egg is taken by the Government; and, as all fruit trees are liable to be taxed, none are planted.

Secretary Schurz thinks it won't be long till Indians will be classed as American citizens.

G. A. BOTSFORD, late Deputy Assessor under Donnell, was indicted by the Grand Jury for forgery. In fact, two indictments were found against him. On Tuesday last he was placed on trial for one of the offenses in the Superior Court, the District Attorney and Col. Flournoy appearing for the people, and Mr. Atwell, of Visalia, and Messrs. Arick and Gregg, for the defendant. The offense consists in marking the word "paid" against certain names on the assessment roll after it had passed out of the hands of the Assessor, and which it was claimed by the prosecution constituted the crime of forgery. Mr. Botsford claimed that what he did was authorized by the Board of Supervisors, to prevent certain names appearing on the delinquent list whose taxes had been paid. The case occupied two days, and finally the jury disagreed, there being nine for conviction and three for acquittal. A new jury was empanneled and the second trial of the case commenced yesterday.—*Bakersfield Gazette, June 5.*

ROCHEFORT, the famous fire-eating journalist of France, who is always hunting a duel, has at last met his match in the person of a party named Keechlin, who recently prodded him in the stomach with a small sword. The wound is stated to be serious and there is a possibility of the *Lanterne* receiving its final snuffing out.

QUEEN VICTORIA, whose sixty-first birth-day has just been celebrated, has reigned forty-two years.

BORN.

At Independence, Inyo County, Cal., June 9, 1880, to the wife of P. A. CHALFANT, a daughter.

TAKEN UP.

BY THE UNDERSIGNED, ON THE 10TH of May, 1880, one Black Mare, about four years old, scarred and branded with an oval on the left hip. Also, her bay colt. The owner is hereby not fied to prove property, pay expenses and take the animals away.

JAMES HINDS,
n521tl* Black Rock.

ASSESSMENT NOTICE.

KEARSARGE MILL AND MINING COMPANY.

Location of Principal Place of Business, San Francisco, California.

Location of Works, Kearsarge Mining District, Inyo County, California.

Notice is hereby given, that at a meeting of the Board of Trustees, held on the Seventh day of June, 1880, an assessment (No. 5) of Fifteen Cents per share was levied upon the capital stock of the corporation, payable immediately in United States gold coin, to John Calvert, the Secretary, at the office of the Company, northwest corner of Fourth and Howard streets, San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the TWELFTH day of JULY, 1880, will be delinquent, and advertised for sale at public auction, and unless payment is made before will be sold on MONDAY, the NINTH day of AUGUST, 1880, to pay the delinquent assessment, together with costs of advertising and expenses of sale.

JOHN CALVERT, Secretary.

OFFICE—Northwest corner Fourth and Howard Streets, San Francisco, California. n521td

INYO INDEPENDENT.

INDEPENDENCE, CAL.:

SATURDAY, JUNE 12.....1880

BEVERIDGE DISTRICT.—J. R. Hughes and party left Cerro Gordo on the 9th instant for the purpose of starting up for the season the steam arastras of Hunter, Hughes & Co., at Beveridge District. This company has big gold mines, each opened by shafts more than 100 feet in depth. The extraordinarily rich, small strata worked by the Mexicans of the district produce from $1,000 to $2,500 per month, gold—the exact yield of bullion, and where it all goes to, being a sealed book to outsiders. The yield from Taylor's works will show a handsome aggregate during the season. Notwithstanding the most unfortunate location of these new gold fields (being in Inyo County), the day is not far off when the mountains will be filled with prospectors and the mines opened up by the intelligent use of capital.

GOLD ORE.—We have been favored with some samples of ore from a new discovery by Joseph Kelley and John R. Hughes, in Cove Cañon, Beveridge District. The pieces are not represented as choice specimens, but average samples, "good enough for newspaper men." An inspection will satisfy any one that they are good enough for anybody. The ore is of a solid, mineral character, stained slightly with iron and copper. Upon breaking open a piece the whole interior is spangled with fine and coarse gold. An ounce and a half, put through the ordinary horn-spooning test, produced an almost incredible display of yellow gold. We are assured that it came from a fine vein, well-formed, and traceable for a considerable distance on the surface.

TO CELEBRATE.—The citizens of Mammoth are perfecting arrangements for an old-fashioned Fourth of July celebration, on the shore of Lake Mary. The chosen officers of the day are: Orator—Geo. M. Gill, Esq.; Reader, Ben. M. Maddox; Poet, R. D. Enright; Grand Marshal, I. B. Giles. A cordial invitation to participate is extended to the residents of Bishop Creek, Round Valley, Long Valley, Benton, Bodie, Homer and of Mono and Inyo Counties generally, with a view of "joining the citizens of Mammoth in one grand celebration of our country's birthday."

ON THE SICK ROLL.—Judge John A. Hannah has been confined to his home for a week or more, suffering from an attack of rheumatism. He is able to navigate with the aid of crutches and we trust will soon be around again. Uncle Gid. Whiteman, the noted pioneer and prospector, was brought in from Deep Spring several days ago, afflicted with partial paralysis. He is at the Blaney House, under the care of Dr. George, slowly improving and out of danger.

GOLD PRODUCT.—On the authority of Ross Moore, a veteran prospector who has lately been investigating the gold belt in the Sierra west of Big Pine, we have it that the old mine now being worked by John Kelley is turning out quite rich. The arastra is being kept at work with the labor of one man in the mine, and is turning out some $500 per month in gold.

PERSONALS. — Dr. F. T. Bicknell passed through town on Thursday, on his way home from Los Angeles.... Louis Fromm and family set out with their household goods a day or two ago, bound for some point on the new railroad.... P. P. Dow, an old time Independence growler, is in town, on a trip from his present home in Benton.

SCHOOL CHILDREN.—As shown by School Census Marshal Thos. Parker's report, Independence school district contains 81 children, of which 45 are of school age, and 39 of which attended school during the past year. Last census we had but 37 school children—so we are waxing richer in that way if no other.

THE ALABAMA HILLS.—Jas. W Sharp and others are quietly hammering away on their gold leads in the Alabama Hills, doing very well, yet without making any strikes of special importance. They hammer out enough with a hand mortar to keep up expenses.

PALMETTO DISTRICT.—We observe in a New York exchange that an effort is being made to resume operations in the old Palmetto District, located between Piper's Ranch and Lida Valley. We believe the property to possess real merit, beyond ordinary.

THE DIFFERENCE.—The weather during the past few weeks has been warm to an extraordinary degree tthroughout the Eastern States. Here, where it is usually so warm, it has been during the the same period, extraordinarily cool—quite cold, in fact.

LEFT US.—Mr. M. G. Foster, who for fourteen months past has stood day in and day out at a case in this office, departed Tuesday last for his home in Eureka, Nevada, and with him takes the warm friendship and regards of his every acquaintance.

WHO HE WAS.—The unknown man whose death at the Shepherd place we mentioned two weeks since, we now learn, was of the name of H. H. Hickman, a native of the State of Florida, and latterly a resident of Visalia in this State.

CRYSOPOLIS.—Under orders from the New York owners, work is to be resumed upon the Phillips mines at Crysopolis shortly. The return of their chief promoter, Mr. G. H. Phillips, is expected next week.

FOR LIDA.—An extensive pack train set out for Lida Valley yesterday, heavily loaded with goods from Harris & Rhine's.

ASSESSMENT.—The Kearsarge Mill and Mining Company has levied assessment No 5, of fifteen cents per share.

THE TIMES.—For three or four years past, dull times in Inyo county have, year by year, grown steadily duller, notwithstanding apparently well founded hopes each year that the next would bring wonderful changes for the better. These remarks apply to the middle and southern portion of the county only, though applicable to the entire county when confined to mining matters within its own lines proper. Nowhere in the county has there occurred anything like a brilliant or permanent mining success; on the contrary, failures, more or less "brilliant" are reported so often as to induce a belief that this is a field for failures only. In consequence of the extent of this belief, Inyo is credited with an eye so badly blacked as to cast a dark shadow over every thing associated with it, however remotely. This shadow has thinned our population, depressed everything. Calmly reviewing the situation in the midst of this shadow, we say it is a shadow of its own production. We say that Inyo county is credited with failures, scarcely one of which ever took place in fact—that is, a failure or petering out of the mine itself. Operators and operations have failed in numerous instances; in the way of actual mining, they all, almost without exception, failed before they had made half a beginning. In most instances, our mines have been in the hands of men of limited means; these means would be more than used up in preparing reduction works; they had to have bullion and plenty of it right from the grass roots or be shut down by creditors; all such operators failed without exception, and, without exception, all failed without having determined anything satisfactory whatever as to the actual capabilities of their mines; no man to this day can say that any of these cannot be made to pay reasonably well if opened as mines should be opened, and as they would have been opened, had they been located in the vicinity of any dividend paying mine, one of which effects such wonders in strengthening the credit and backbone of every prospecting company all around about. One such is all this country needs to produce a general activity in mining operations here that will forever squelch this black eye business. Capital will not then be so mistrustful as to stand ready to jump into its hole and pull the hole in after it, all because "bullion" is not sent down before the mine is deep enough to need to be worked by candle light. We say it as our firm conviction of reasonable probabilities that Inyo county will, sooner or later, produce more bullion and from a greater number of mines than any other county in this State. Let no Inyoite, with a home and a business that will yield him bread and butter, get demoralized at this black eye trouble, and think to better himself by rushing off to some or any other mining region. If there is nothing for him to hope for in this as a mining country he may well consider his chances on that basis as hopeless in any other.

THE TOWNS.—It would be a sensible move on the part of the property owners of the town of Bishop Creek to have their lots and lands surveyed and laid off according to a regular town plat, with streets and alleys designated here and there as the future demands of the place will require. At present there is one north and south street, from about the center of which is a county road leading west. To the east, and on the opposite side of the section line running east and west, is an avenue left open from the main street, but which is individual property and might be closed at any time the owner should see fit. As they stand, it would take a first-class Lone Pine earthquake to line up and set opposite those cross streets. If for no other reason, an official plat of the town should be filed for the convenience of the Assessor's office, in describing the property. Our nearer neighbor, the present settlement and future town of Big Pine, can at present be expanded no more than a "pent up Utica." The existing houses and lots are crowded together by the corners of four ranches, out of which it is impracticable to get building lots. If these farm owners would see their settlement flourish and property values improve they would segregate a portion of their corners into town lots—else a rival place may spring up somewhere and leave them out in the cold.

PASTURAGE.—People who used to buy goods of Wm. Barrows during a term of years when he merchandised in Cerro Gordo wouldn't think that he is now one of our hardest working granger men; but he is, and seems to like it. Moreover, he has 2,000 acres of excellent pasture lands, well enclosed, upon which all desiring can have stock pastured at the most reasonable rates. See notice to that effect in another column.

THE FOURTH.—As it now lacks but twenty days until the "ever glorious" Fourth of July, and there has been no talk of a celebration anywhere in the county, we conclude that Inyo is about to give the great natal day a clean go by. It will be something extraordinary if Bishop or Round Valley do not celebrate. For this place it might be in order to charter the Court House for a dance, anyway.

APPOINTED.—Wm. Crapo has been appointed Postmaster at Cerro Gordo, succeeding W. R. Johnson. He will make a thoroughly competent officer.

PATENTS.—United States patents have been granted for the Rex Montis, Boomerang and Arctic mines, Kearsarge District.

THE little screw propeller *Rocket*, now plying the waters of Mono Lake, is proving to be a great convenience to excursionists as well as to lumber dealers and others living along the shores of the Dead Sea of the Sierra. She is a staunch little craft, and rides the rough waters of the lake like a duck. The steamer was brought from San Francisco, and while on the bay of that name she drew forty-one inches of water, she draws only thirty-six inches on Mono Lake, owing to the greater density of the water of the lake. Commodore E. H. Langley of the *Rocket* is proud of his vessel and is always obliging and affable to passengers.—*Bodie Standard.*

CARP.—Mr. L. Davis, of Forrestville, Sonoma County, in a letter to the Kern County Industrial Aid Association, says:

The European pond carp holes or houses up in the Winter. They excavate a hole in the mud and will collect there in groups of fifty to a hundred or more, with their heads all together and their tails standing out. In this position they pass the Winter in a state of torpidity or sleep, neither taking any food nor leaving their retreat during the season. When the rays of the spring sun have thoroughly warmed the water they begin to move about, seeking food. The eggs are considerably developed in March, and, if good warm weather prevails, the fish will commence spawning in May (the eggs hatching in twelve to twenty days), and will continue through June and July and sometimes even into August. The spawning of an individual fish does not take place all at once. Should the weather happen to be rainy or blustering it will discontinue until finer weather returns. Thus it often takes weeks and months for a single fish to deposit the last egg to the care of nature. The quantity of eggs in the carp is very great; it is this fact which explains its enormous increase. A fish weighing from four to five pounds contains, on an average, 400,000 to 500,000 eggs. Some fish raisers estimate it still higher.

The Kern County Association referred to has ordered a number of carp for stocking the waters of that region. In our own Valley and winding about among the foot-hills are situated some of the finest streams in the world, suitable in every particular for the raising of half a dozen varieties of game fish. The wonder is that either private or associated enterprise has not already gone into the business, at some point in the beautiful streams of Round Valley or Bishop. The streams from Big Pine down to Independence have nearly all been stocked with mountain trout, but during the low water of the past two or three years they have been ruthlessly slaughtered by Indian murderers, or white vandals infinitely worse. This season the fish are better protected by the high water, and will vastly multiply. Several catfish have been seen in the river, showing that the plant of last season has proved successful; but several parties below here have lately seen the native suckers of these waters floating down the stream dead or dying, and it is believed that giant-powder is being used for their destruction. The sympathy which would be excited by the blowing off of a few arms or legs in this operation would not amount to much. Speaking of carp, however, the Black Rock Slough, heading with a spring carrying from three to four thousand inches of water, would form one of the best natural fish ponds in the world, and with a little capital and experience hatcheries could be established there which in a few years would return immense profits The flow is always of the same strong volume; the water pure and of equal, cool temperature throughout the year. The large spring is filled with native fish, for which the game fellows would make it interesting. State Fish Commissioner Redding will furnish spawn or fish to any person or association who pay for transportation and guarantee their protection. The enterprise would be more of a safe investment than an experiment, and can not be undertaken too soon. What a fine pleasure-ground those springs could be made!

CANDELARIA.—A letter from Candelaria states that the town is growing very fast, and that business men and money are coming into the camp. E. J. Baldwin contemplates investing a large amount of money, and will do some extensive prospecting. A new two-story lodging house of twenty rooms is being erected, and private residences are going up very fast. More men will be at work during tha present month than at any time since the camp was discovered. Last month the Northern Belle mine turned out over $80,000, and during June the output will not fall below those figures. The Mt. Diablo is being worked to good advantage, and it is confidently expected that dividends will be in order shortly. Altogether the outlook is better than is generally reported. At present the supply of labor is greater than the demand, and it is not to the advantage of men out of employment to go to that section in search of work.

MINING CLAIMS.— Congressman Daggett, of Nevada, gives the followin interpretation of the law recently enacted relating to the annual assessment work on mining locations. He says: "After consulting with the Land Commissioner, I find that he has formally decided that the work on a claim may be done any time within the twelve months beginning with the first of January after the location has been made. Consequently locators have an entire year, together with the fraction of a year preceding the first of January following the date of location, to do their first annual work. Hence, a claim located now (May 15, 1880) would hold without work until January 1, 1882, but some time between January 1, 1881, and January 1, 1882, the work must be done. This is the interpretation given by the Attorney General, and may be accepted as the law."

JOSH BILLINGS says: "An editor iz a male, whoze bizness is to investigate nuse papers. He writes out editorials, grinds out poetry, inserts deths and weddins, sorts manuscrips, keeps a waist basket, blows up the 'devil', steels matter, fites other people's battles, sels hiz paper fur too dollars a year, takes white beens fur pay when he can, razes a larg family, works 19 hours out of 24, noz no Sunday, gets damned by everybody, livs poor, dize middle aged, leaves no munny, is rewarded fur a life of toil bi a short but free obituary puff in the nuse papers."

YOU may say what you please about it, but there is luck in horse-shoes. A woman nailed one up against a woodshed a month ago, and last week her husband eloped with the hired girl. The man had not earned a cent for more than two years.—*Norristown Herald.*

Direct Trade with Eastern Manufacturers in Harvesting Machines.

We have with much interest observed this year's contest for the mastery among the rival hay and grain cutting machines on this coast. Our hay and grain is exceedingly heavy this year, and difficult to handle, consequently the machines that go through solid will be popular for many years to come. While there are many good machines for sale and in use among our friends, whose interests we would not interfere with, yet justice to the general public demands some expression from us in an extraordinary year like this. It appears that the new strong improved machines made by D. M. Osborne & Co., of Albany, N. Y., especially for their San Francisco Branch House, have carried off the palm—fully seventy-five per cent. of all sold on the coast thus far this year being of this kind. Their new combined binder and header is a marvel in its way, being purely Californian, and is doing splendid work. We were shown large numbers of letters and telegrams from Southern California, where these machines are now in operation, all of them most satisfactory to the firm. We are glad to note the result, because it will stimulate other Eastern manufacturers to come to our coast and do likewise. *What we need is a hundred more just such enterprising firms out here.—San Francisco Farmer and Dealer.*

It will be seen from the above that the heavy houses of the East are beginning to see the importance of doing their own business on this coast. By so doing they can get their goods out by water freights at a half a cent a pound from New York to San Francisco, and with the many other advantages to be gained by being located among us, they can put down goods at much lower prices than by the old "sole agent system." The above named firm is one of the largest in the world in its line. Its factories cover about fifteen acres of ground, at Auburn, N. Y. They have appointed Mr. J. H. Smith, of Bishop Creek, in this county, as an agent, with full powers to canvass the county and take such orders as our farmers care to offer. The *Farmer and Dealer* is right, "we need more just such firms out here," and the more patronage this one gets the more encourgaement for others to come. Mr. Smith has on hand samples of their mowers, reapers, self-binders and combined binders and headers. He was formerly a resident of Auburn and, of course, knows whereof he speaks when he guarantees good machines and liberal fair dealing. He is selling quite fast. Give him a call or drop him a line at Bishop Creek.

THERE is nothing speculative in well-established newspaper property. A newspaper is hard to build up, but it is proportionately difficult to pull down. It is an aggregation of atoms, and its segregating, under the most favorable circumstances, takes years and years. The fact that it depends on thousands of customers for success is its protection. No two groups of men think alike, and what displeases one set pleases another. Even imprudent management cannot seriously injure a paper so long as it does not tread upon the toes of too many of its readers at the same time. Where it loses in one direcion, it gains in another. There is, indeed, only one way in which a newspaper can effectually destroy itself, and that is by disappointing and continuing to disappoint the general expectations of its readers as a whole. These readers expect the newspaper to keep within certain lines, and the newspaper that deliberately goes outside, and camps there, will starve to death as as soon as its readers have found a newspaper that suits them.—*Charlestown (S. C.) News.*

MURDER TRIALS.—The trial of F. J. Hoin, for the murder of his wife, has been set for Saturday, and that of Dr. Samuel P. Chalfant, for the murder of J. D. Bacon, at the Baldwin Hotel, for Saturday a week. Sam'l Green was on trial yesterday before Judge Bowers and a jury, for the murder of Patrick F. Higgins, on the 11th of June, 1879. The men were partners in the cooperage business at Nos. 9 and 14 Main street. A quarrel arose about a bill, during which Green struck Higgins with an adze inflicting a wound on the left side of the head, from which the man died a fortnight afterward. The theory of the defence is that Higgins assaulted Green with a knife, and the latter acted in self-defence.—*S. F. Call, June 4th.*

THE news of the death of old General Heintzleman brings up to memory the face of that brave old Pennsylvania Dutchman and the story one of the Michigan officers in his corps used to tell of him. The doughty old fighter rode up to Joe. Hooker in a momentary lull of the hot fight at Williamsburg, in the peninsular campaign, and holding out his whisky canteen to Fighting Joe, whined out in his peculiar voice, "Come Joe, let's take another drink and then go at 'em." He didn't have to ask Joe Hooker twice, either to drink or "go at 'em," for that gallant soldier was always ready for either of these occupations.—*Hartford Letter.*

WHY didn't Mayor Kalloch inform the Baptist Convention, when in session at Sacramento, as to the manner in which he passed his time—day and night— in that city, when he visited the Legislature in order to defeat the McClure charter, and when he visited Sacramento at the Governor's reception? Or would he like us to do it. If he will invite us to do so, we will give it in full with pleasure; but he is *so* eloquent we think he would prefer to be his own spokesman. The columns of this paper are at his disposal. We think the *resume* would rather astonish the brethern, and utterly dumbfound the sisters.—*Spirit of the Times.*

THE Philadelphia *Chronicle* says if you bring up your children in the way they should go, but few of them will go for twenty-four hours without a thrashing.

R. R. DONNELL, ex-Assessor of Kern county, has been found guilty of peculations in office as charged, and will go to the State Prison.

GEN. BURNSIDE has been re-elected Senator from Rhode Island.

SATURDAY, JUNE 12.....1880

IT is stated to us for a fact that within two months a ten-stamp mill will be commenced here, and, if reality accords with report, its capacity will be increased indefinitely. There is good rock enough to keep a dozen 10-stamp mills employed, if our miners will go to work in dead earnest and put their claims in condition for the regular extraction of ore, instead of puttering about like an old maid at a christening, waiting for a quarz boom. A hole in the ground is not a mine, and unless something substantial can be shown, a location can never be sold, even though the intending purchaser be as ignorant of what constitutes a mine as the ordinary "expert." A mine will sell for what it can show, and no more.—*Aurora Herald.*

"THE circus is coming," remarked Mrs. Goodington, laying down the paper, "with no end of trained horses and caramels, hypothenuses and other bedizens of the forest and jingle. How well I remember the first time Daniel took me to the circus. As we entered the tainted enclosure, I said to him, 'How terribly the wild animulses growl, don't they?' I was eenamost frightened to death till Daniel told me it was only the vendoos of peanuts and prize packages playing their rogation."—*Boston Transcript.*

MESSRS. RAYMOND & ELY, the well-mining operators, says the Nevada City *Transcript* of May 26th, have purchased for the sum of $12,000 the Plambago quartz claim, situated on the opposite side of the Yuba on Moore's Flat. The mine was formerly worked by tunnels, and yielded well. There is a mill on the ground. The purchasers announce that they will immediately recommence the developmet of the ledge.

WILLIAM HUNTLEY, a pupil of George Stephenson, has just died in England, at the age of 82. He erected the first locomotive that ever drew a passenger train under Stephenson's personal superintendence, and had the honor of working it with him on the memorable 27th of September, 1825, the first day that a train passed over the Stockton and Darlington Railway.

THE House has adopted the Agricultural Appropriation bill appropriating $20,000 for the sinking of artesian wells in the West. An experimental well will be sunk in Colorado. We hope Nevada will get some of the appropriation and that wells will be sunk in the deserts of that State. If the experiment prove successful it will make Nevada a great agricultural State.

ANY discharged soldier of the United States who has not made application for pension on account of wounds or disability received while in the service, must do so before July 1st, 1880. After that time pensions will date only from the time of application. The same is true regarding additonal bounty not yet claimed by many soldiers.

IT is said that the Big Blue mine, near Kernville, Kern county, having gone into a new company of capitalists, is about to start up with a force of 100 experienced miners. There is an 80-stamp gold and silver mill on the mine, and running low-grade ore. The new company expect to develop rich rock soon.

AN enthusiastic New Mexican says: More gold dust was taken from Hillsboro placers in 1879 than from any other gold camp, hydraulic washings excepted, in New Mexico or Arizona. One claim alone hauled five loads of dirt per day four miles to water, and averaged over $70 for each six days, or for the year over $37,000.

DIVIDENDS were paid by local incorporations in San Francisco during the month of May to the amount of $500-866, against $949,433 in the same month last year. The decrease is chiefly due to the mining companies, which in May, 1879, paid $759,300, and in May, 1880, only $332,950.

A MAN in Washoe County, Nev., has applied for a divorce simply because his wife, who bigger than he is thrashes him over the head with a skillet, and makes him do the washing and ironing. Some men never know when they are well off.

THE year 1880 sees more activity in mining than was ever known before. There is no boom in stocks, as yet, but the market already displays what may fittingly be termed preliminary sensitiveness.

DR. TALMAGE suggests that soap and water are means of grace. People who have never given them a fair trial may be sure that they never will be cheaper than now.

THE *Stockton Mail* is earnestly urging the citizens of that place to interest themselves in the project of a narrow guage road to Nevada to compete with the Central Pacific.

LEGAL.

NOTICE OF CO-PARTNERSHIP.

STATE OF CALIFORNIA, }
County of Inyo. }

WE, THE UNDERSIGNED, DO HEREBY certify that we are partners transacting business in this State, at Bishop Creek, Inyo county, under the firm name and style of Elkeles & Lasky; that the names in full of all the members of such partnership are Jacob Elkeles and Levi Lasky, and that the places of our respective residences are set opposite our respective names hereunto subscribed

In witness whereof we have hereunto set our hands this 22nd day of May, A. D. 1880

JACOB ELKELES, Bishop Creek.
LEVI LASKY, Lone Pine.

STATE OF CALIFORNIA, }
County of Inyo. } ss.

On the 22nd day of May, 1880, before me, Seth G. Sneden, a Notary Public, in and for said county, residing therein, duly commissioned and sworn, personally appeared, Jacob Elkeles and Levi Lasky, known to me to be the persons described in, whose names are subscribed to and who executed, the within instrument, and they duly acknowledged to me that they executed the same

in witness whereof, I have hereunto set my hand and affixed my official seal, at my office in the county of Inyo, the day and year first above written.

[SEAL] SETH G. SNEDEN, Notary Public.

CONSTABLE'S SALE.

BY VIRTUE OF AN EXECUTION ISSUED out of Justice Sneden's Court, of the 4th Township, county of Inyo state of California, dated the 27th day of May, 1880, in a certain action wherein S. D. I. Plaintiff, recovered judgment against J. A. Seehorn, as defendant, for $101 56 100 damages and $19 50 100 costs on the 27th day of May, 1880, I have levied upon the following described property, to wit:

All the right, title and interest of Defendant J. A. Seehorn in and to that certain water ditch located on the east side of Owens river, in the 4th Township, Inyo county, California, and known as the "Edson and Hughes' Ditch," being the same property as heretofore conveyed by A. J. Walter to J. A. Seehorn by deed and of record in Book K of Deeds, page 35, Records of Inyo county.

Notice is hereby given that on MONDAY, the TWENTY-FIRST day of JUNE, 1880, at 12 o'clock M. of that day, in front of Sneden's office, in the town of Bishop Creek, county of Inyo I will sell all the right, title and interest of said J. A. Seehorn in and to the above described property, at public auction, to cash, to the highest and best bidder, to satisfy said execution and all costs.

Dated at Bishop Creek, the 27th day of May, 1880.

WILLIAM GOODMAN, Constable.

OFFICIAL.

PROPOSAL TO CHANGE SCHOOL TEXT BOOKS.

PUBLIC NOTICE IS HEREBY GIVEN by the County Board of Education of Inyo county, this 17th day of May, 1880, that it is proposed to change the following text books now and heretofore in use in the public schools of this county.

Reading,
Spelling,
Writing (copy books),
Arithmetic,
Geography,
Grammar,
Language Lessons,
History of the United States,
Industrial Drawing,
Physiology,
Music, and
Algebra.

Sealed bids or proposals will be received by this Board for furnishing books to replace them. Separate bids or proposals for supplying any part of this list will be received

Said sealed bids or proposals will be opened at Independence, the county seat of Inyo County, at 10 o'clock A. M.,

On Monday, June 28, 1880.

The Board reserves the right to reject any or all bids or proposals.

Said bids or proposals must be accompanied with sample copies of the books proposed to be furnished, together with a statement of the wholesale and retail price at which the publisher agrees to furnish each book at Independence, in this county of Inyo, during the full time for which said books are to be adopted.

The publisher or publishers, whose proposals shall be accepted, must enter into a written contract with this Board of Education, and shall give a good and sufficient bond in the sum of $500 for Readers, $400 each for Geography and Arithmetic, and $100 each for the remainder of the said list of text books.

By order of the Board of Education of Inyo county.

J. W. SYMMES,
n519td Secretary.

TEACHERS' CERTIFICATES.

PUBLIC NOTICE IS HEREBY GIVEN that the semi-annual examination of persons desiring to teach school in the county of Inyo, will be held by the Board of Education of said county at the District School House, in the town of Independence, commencing at 10 o'clock A. M., on

Tuesday, June 29, 1880.

All applications for examination must be filed with the members of the Board on or before June 28, 1880

Section 1772 of the Amended School Law provides that applicants for second grade County Certificates shall be required to pass a satisfactory examination in Arithmetic, Grammar, Geography, Composition, History of the United States, Orthography, Defining, Penmanship, Reading and Method of Teaching

Applicants for first-grade County Certificates will be required to pass a satisfactory examination in all of the foregoing studies, and also in such other studies as the Board may determine upon

Sections 1772 and 1775 require that all teachers must hold certificates from the County Board of Education, notwithstanding they may hold either a Life Diploma, State Educational Diploma, Normal School Diploma, State University Diploma or State and County Certificates granted prior to the first day of January, 1880.

By order of the Board of Education of Inyo county.

J. W. SYMMES, Secretary.

The Dark Horse—How Susan Was Deceived.

Probably the meanest piece of cold-blooded deception ever practiced upon a woman occurred out in our Western Addition the other day. It seems that the belle of that important suburb of our municipality is a Miss Susan Smiffey, and whom a vigorous rumor, kept in circulation by her less favored sisterhood, credited with being a desperate flirt—in fact, what Billy Rice, the minstrel, used to call a "false-hearted crokay." At all events, her affections were of a sufficiently indefinite quality to cause her two most favored visitors to look upon each other with the most vindictive feelings common to hated rivals. These gentlemen—who were respectively a City Hall clerk, with eye-glasses and freckles, named Piff, and a red-headed dry goods manipulator called Diggs—occupied the intervals devoted to gloomily sitting each other out three evenings a week to fruitless attempts to discover which of the two was really the coming man in the matrimonial race, so to speak.

Last Thursday morning Miss Smiffey, in response to a business-like ring, admitted a middle-aged party with a black beard, and wearing blue goggles and a long-tailed ulster.

"I am taking the sensus, mum," he said, opening a flat book on the piano and getting out some blanks, "just look sharp, please, and answer the necessary questions."

Miss Smiffey trembled a little, as women always do for some reason when talking to a government official, and said she'd try.

"Lem'me see, your name's Smiffey, I believe—first name?"

"Susan."

"Middle name?"

"Haven't got any, sir."

"Come now, young woman, no prevarication. Are you sure you haven't got a middle name somewhere, and are trying to conceal it?"

"No, sir; indeed I haven't;" said the young lady, turning very pale; "I wouldn't deceive you."

"You'd better not, mum. The penalty is twenty-five years at hard labor or both."

"Gracious me!"

"Fact, mum. Now then, let's see what's next. Ah, yes—how often married?"

"Not once yet."

"Ahum! Going to be, I s'pose? Been asked, eh?"

"Oh, yes, sir; several times."

"Call it six times," said the census man, making an entry. "What's next? Ah, yes—is your back hair false?"

"M—m—must I answer that?"

"Of course you must. Don't trifle with the United States Government, mum. Come now—"

"Well, it's sorter—that is, kinder—"

"That'll do. We'll call it mixed. Teeth sound?"

"Yes, sir," with much emphasis.

"Don't get excited. Let's see—I'll put your age down as twenty-five. The United States never allows us to take a woman's age on oath. They will lie; can't help it, I guess."

"I'm just eighteen. I don't care whether the government believes it or not," said the citizeness snappishly.

"Of course, of course—they all say that. Pay attention, please: What size corset?"

"Eh?"

"Must answer, mum. Remember the penalty. How many inches around the waist?"

"Well, if you must know—sixteen. But I think it's just a shame—"

"No remarks, if you please. Ahem! We'll call it nineteen. They generally throw off about three inches, I find. Size of shoe?"

"Two—but I can wear one and a—"

"I'll return you as No. 3. That's about what a 'threer' always says. Any beaux?"

"W-w-wh-at?"

"I say, any beaux?—and be very careful about your answer, mum. The Washington authorities are very particular on this point. Has everything to do with the next census, you see. Now, how many sweethearts?"

"Well,—of course—there are some gentlemen coming here—and—"

"Of course there are; I've got you you down in the 'Good Looks' space as 'A. A. I. I. handsome.' So, of course, you have plenty of admirers. All the government requires, however, is the principal ones."

"Well," said the young lady, somewhat mollified, "there's Jimmy Piff and Tom Diggs, and—"

"Hold up, right there! Which of 'em do you intend to marry?" said the enumerator of population, earnestly.

"Oh! neither of *them*. There's—there's a splendid gentleman named Scudberry—*Charlie* Scudberry—perhaps you know him? He has big, brown eyes and beautiful curly hair, and—"

"And do these other gentlemen—Piff and Diggs—know of the existence of this—this fellow, Scudberry?"

"Oh, no! I'm too smart for that. I just tag them along to buy cream and caramels, and take me to the theatre. It's the biggest fun! Charlie knows all about it, and he calls himself the—the—oh, yes! the *dark horse!*"

"Oh, he does, does he?" roared the census man, jerking off his wig and goggles revealing the enraged features of Mr. Thomas Diggs. "I wish him joy of his bargain, and I'll give him just six months to get a divorce from the most two-faced little cat on the Pacific coast!" And he banged the door like a pile-driver behind time as he stalked out.

And as Susan confided to Scudberry's left lappel that evening, she had never felt so utterly what-you-call-it in the whole course of her thing-um-bob.—*S. F. Post.*

Saved by His Skates.

An old Lake Superior trapper, named Thomas Judson, was once suddenly surrounded by a band of fierce Indians from whom he expected no good. While making free with his outfit, they found a pair of skates among his other trappings, and were immensely puzzled to know what to make of them.

A funny thought seemed to occur to the hunter as he saw their curiosity, for his gray eyes twinkled merrily.

"Ice moccasin," he said, putting a skate to his foot, and then with his hands he made the gliding motion that the feet take in skating.

"Ugh!" grunted the Indian chief, pointing to the narrow blade of the skate, and shaking his head. As they were near the ice, Thomas proposed to fasten them on a young brave for trial.

The Indians welcomed the plan with glee, for, though savages, they were great lovers of sport. Selecting the bravest and swiftest young fellow, the chief bade him stick out his feet, which he did rather suspiciously.

The skates were soon strapped on, and the young buck helped to his feet. The ice was like glass, and as he started to move you know what happened. His feet flew from under him and down he came with a crack. Such shouts of laughter as the rest set up! The young fellow was gritty and scrambled up to try it again, but with the same result.

The chief now signalled the hunter to show them how the things worked. Thomas put the skates on with great care, picked up his rifle and used it as a cane, pretending to support himself.

He moved awkwardly, fell down, got up and stumbled around, the Indians all the time laughing and capering at the sport.

Gradually Thomas stumbled a little further away, whirling about, and making believe it was very hard work to keep his balance, until he was near the point where the smooth lake ice stretched miles and miles away.

Suddenly gathering himself up, he grasped his rifle firmly, gave a war-whoop as wild as the Indian's own, and dashed up the lake like an arrow, skating as he had never skated before. If he had disappeared in the air, the Indians couldn't have been more astonished. Of course they couldn't hope to catch him, over the glassy ice, as they stood gaping after him, wondering more and more at the magic "ice moccasins."

Nothing pleased old Thomas more in after years than to tell how he "fooled the redskins."—*Golden Rule.*

WHEN the nomination of Garfield was made known in the House of Representatives, an adjournment was moved, and then the House resolved itself into an informal sort of a ratification meeting in which both parties participated. The Democrats were nothing loth to join in the congratulations over the honor paid to a member of the House, and they even went so far as to unite with their opponents in giving three cheers for Garfield. The strength of the nomination was admitted by the Democratic members, who could not but recognize the ability and force of General Garfield, and his high place in the estimation of both parties was very significantly demonstrated by this impromptu ovation.—*Record-Union.*

THE Santa Rosa *Republican* says that Mayor Kalloch's son, only 16 years old, is drawing a salary of $250,000 per month out of the city treasury as Secretary or Mayor's clerk. Pretty rough on the old adage of "figures never lie."

THE first steam sawmill on Puget Sound was built by Mr. Yesler in 1853 at Seattle, W. T. A portion of this ancient mill is still standing, concealed from the street by a cluster of houses in the business part of the city.

ARIZONA.—It is assumed by most writers on Arizona that it is none other than the famous "Arazuma" of the Spaniard. Mr. R. A. Wilson, in one of his works on Mexico, says: "We have the following record in evidence of the masses of silver extracted in Arazuma: Don Domingo Asmendl paid duties on a piece of virgin silver which weighed 275 pounds. The king's attorney (fiscal) brought suit for the duties on several other pieces which together weighed 4,033 pounds. Also for the recovery, as a curiosity, and therefore the property of the king, of a certain piece of silver of the weight of 2,700 pounds. This is probably the largest piece of *pure* silver ever found in the world." Ward, the British minister to Mexico, says in his report that he saw the correspondence in regard to these masses of virgin silver; that he obtained a certified copy of the decrees, and that its authenticity was unquestionable. The aggregate weight of those nuggets amounted to 6,908 pounds, which, at a valuation of $17.60 per pound gives the sum of $121,580.80. Silver nuggets have been picked up of late years in many parts of the Territory, and veins containing the precious metal in an almost pure state have been discovered.—*Conservative.*

BUFFALO BILL'S COGNOMEN.—In a stage conversation the origin of Buffalo Bill's cognomen was related. William had hunted and scouted with no remarkable success or astonishing adventure till one day in hunting buffalo he wounded a large bull which showed fight. The maddened animal rushed at him and gored his horse, dismounting our hero, to whom the buffalo now turned his attention. On the open plain it looked gloomy for William, but his presence of mind did not desert him, and taking an opportunity he got behind the buffalo and seized his tail. Holding on for life despite the plunging of the astonished beast, he drew a knife and succeded in hamstringing his adversary and bringing him to the ground. This adventure procured Cody the name and fame which have been so advantageous to him.—*Corr. Philadelphia Bulletin.*

CHEAP CONCENTRATION.—It appears that the low-grade ores of the Freeland mine in Colorado are concentrated at the rate of 50 cents per ton. This information was given to the *Enterprise* by Mr. Osbiston, a well-known Comstock mining expert, and now manager of the Freeland. The Freeland machinery is driven by water power, and it is suggested that the mines of the Comstock, several of which contain thousands of tons of a low-grade ore, could also use water-power by running their ores through the Sutro tunnel to Carson river. It is evident that the time is coming when the poor ores of the Comstock will be utilized and made profitable by simple and cheap concentration.—*Scientific Press.*

THE Democracy of Illinois held its State Convention June 11th and nominated the following ticket: Lyman Trumbull was nominated for Governor; Lieutenant Governor, Lewis B. Parsons; Secretary of State, John H. Oberly; Auditor, Louis Stark; Treasurer, Thomas Butterworth; Attorney General, Lawrence Hamon. Seymour is the favorite for President.

A DISPATCH from Milwaukee dated June 11th says: One hundred and fifty thousand strangers are in the city from all parts of the country. This morning there was a grand parade in which 9000 veterans and 700 inmates of the National Soldiers' Home were in line, and the veterans of the Mexican war were reviewed by Generals Grant and Sheridan.

FROM all the mining counties of the State the reports of extended work and valuable developments are highly encouraging, and tend to the assurance that the product, both from placer and quartz claims, will be largely increased this year. Equally cheering news comes from all the outlying mining regions of the coast.—*Scientific Press.*

THE Black Hills men have built a dam below Crook City, Dakota. The dam is three-quarters of a mile across its its face, and already contains between two and three hundred thousand tons of tailings, rich with gold. The owners propose to accumulate one million tons of the pulp and then have one grand clean-up.

IT is estimated that there are 3,000,000 unmarried men and 4,000,000 unmarried women in the country. It will be seen that if all the men should marry there would be a surplus of 1,000,000 old maids from which to draw for second wives. This is a great country for man.

THE all-absorbing topic of conversation on our streets is the Owens murder trial. The testimony on the part of the State is all in and witnesses for the defense are now being examined. The case will probably go to the jury the first of next week.—*Aurora Herald, June 12th.*

ABOUT 500 Shoshone Indians, we are informed, says the *Times-Review*, are at present living on the Duck Valley Reservation, most of whom are engaged in farming. They are planting a larger acreage than ever before and their growing crop is looking finely.

THE emigration from the Comstock to Colorado is just now at its hight. The fact that Comstock miners are readily given the preference at Leadville and $4 per day, is inducing many out of work here to start for that camp.—*Gold Hill News.*

HOTELS.

THE BLANEY HOUSE,
Independence, - Cal.,
V. G. THOMPSON, Prop'r.
THE PROPRIETOR OF THE "BLANEY" respectfully announces to his friends and the traveling public that the house will be conducted as a
First Class Country Hotel,
In a manner to meet the approbation of all regular and transient guests. The Table will be supplied with all the market affords, and the rooms, single or en suite, are furnished in the best style. n347tf

CHALFANT & PARKER.

J. E. PARKER. P. A. CHALFANT.

INDEPENDENCE, CAL.:

SATURDAY, JUNE 19.....1880

ANOTHER tornado swept through a portion of Potawatomie county, Iowa, on Wednesday last, killing twenty persons and wounding a large number of others. The track of the storm was about a half mile in width, and it swept every thing before it, demolishing farmhouses, barns and other buildings, and carrying some of them bodily for hundreds of feet, and then dashing them to the ground in pieces. The scene after the storm had spent its fury is described as heartrending in the extreme. Not a house in the track of the tornado was left standing, and boards were ground to tinder. The storm did not last fifteen minutes and was not accompanied by rain. On the same day a hurricane occurred in Minnesota, accompanied by a heavy fall of rain. The water fell in sheets. Paul Vadrofski was killed by by lightning in a lumber yard. At Winona houses were unroofed and other damage was done. Trains were suspended and delayed. A washout occurred between Homer and Lemoille, also at Minnesota City and Weaver. The storm was very severe between Rochester and Winona, and caused a total suspension of trains. The village of Stockton was inundated.

UP to the 14th all the States had chosen delegates to the Cincinnati Convention, making 694 out of the 738 delegates composing the Convention. As none of them are absolutely instructed for any candidate, it is impossible to make a calculation of the strength of various aspirants which will be more than approximately accurate. Enough is known of the preference of delegates, however, to make it apparent that the Convention will be strongly against the renomination of Tilden. Giving him the New York delegates solid, and the votes of all other delegates which he has even a prospect of securing, and his total vote is only 93, while the combined vote of all rivals and delegates uncommitted now is 254. Hancock has 39 votes; Bayard 50; Thurman 32; Field 33; Seymour 29; Hendricks 17, and 54 votes are uncommitted.

THE New York *Scientific and Mining Press* has the following regarding the lead market: The market is very quiet and firm at 4⅛c@4⅝c, with St. Louis at 4¼c, and freight at 40c, equal to 4.65c. The outlook is better, with stocks light, as well as demand. The stock of foreign in the market is mostly absorbed, and the consumption is keeping even pace with the supply. Sales are very light, not over 150 tons in lots.

THE brave Miss Ida Lewis, who keeps the light house at Newport, was seized with diptheria last Winter during a gale. There could be no communication with the land, and she knew that the disease required prompt treatment. She had read that kerosene was a remedy, and in her desperate situation she administered a sharp dose of the oil. It made her violently ill, but the diptheria was cured.

THE steamers *Narragansett* and *Stonington* collided during a fog on Long Island Sound on the night of the 11th; both were badly damaged, the first mentioned so badly that she went down in twenty minutes, every inch of her upper works being afire at the moment. Many passengers lost their lives.

W. C. TAGUE, known as "Fat Jack," and recently released from jail, on Sunday morning shot and seriously wounded a Mexican in Aurora. Tague claims to have shot the man by mistake, and the citizens thought of hanging Tague on purpose. Better counsels prevailed, however.

THE business men of Watsonville have objected to paying a county license, on the ground that the new Constitution debarred county authorities from intruding on municipal rights. An association will be formed to co-operate with similar organizations in other towns.

HARRY NORTON, formerly editor of the *Lyon County Times*, and afterwards proprietor of the *Silver City Reporter*, died in Leadville on Saturday. The disease which carried him off was pneumonia.

OREGON went Republican about 1,200 on Congressman and State officers, and 23 or more majority on joint ballot in the Legislature. The exact figures are not yet known.

THE Sacramento Republicans are talking of nominating Creed Haymond for Congress. Sacramento is in Page's district.

GREEK pirates continue to ravage the coast of Asia Minor. They have sacked the town of Atkeil.

THE GREENBACKERS.

Just at the present time the two national parties—which, of course, are the Democratic and Republican—are sorely troubled to find a distinctive issue upon which to make war upon each other—finding none, both will stand to their mud batteries on general principles. But the Greenbackers are happy in the melancholy belief that they have the biggest kind of an issue or grievance with which to go to war, not only against both the old parties but against common sense. Their great mission in life is to so fix things that every moneyless man, woman and child in these United States shall each have a pocket full of veritable greenbacks; also, particularly, to bring every holder of U. S. bonds to poverty: in fact, this last seems to be quite as much an object of their existence as the other.

Their Presidential nominee is General Weaver, of Iowa, with whose portrait every reader of Harper's *Weekly* is quite familiar, it having appeared in that journal, drawn in Nast's life-like style, a number of times during the past Winter; these portraits represent the General, always with the head and intellectual expression of a full blown jackass, mouth open, and the favorite attitude on the floor of the House that he assumed at every opportunity for many weary weeks in the hope to catch Speaker Randall's eye so he could introduce the famous greenback resolution which was killing him. His persistence, so well indicated by the shape of his head, finally wore the Speaker out, the resolution was intreduced, and the General still lives.

The General's resolution provides for the issuance of one billion more greenbacks, with which all the outstanding bonds are to be immediately taken up, thereby wiping out the public debt at once, and just as easily as falling off a log. The resolution does not say what is to be done with the bloated bondholders in case they refuse to surrender interest bearing bonds for the non-interest bearing, irredeemable new currency; but, presumably, the General, finding that soft words will not bring them to terms, will see what virtue there is in coercive measures—that is, when he gets to be President. If those bloats won't take two dollars of the new issue for one dollar of their bonds, then they can have three, or even four—the General isn't particular about a dollar or so in greenbacks in a trade like that, but, as a statesman, feels that he must draw the line somewhere, and so if he finds those people stickling for more than four dollars of his bright, new greenbacks for one dollar of their old bonds, right there he will lay back his ears for war—repudiation or confiscation, no matter which: anyway to get the country out of debt, and give the poor workingman a chance to rest. The reason why he would fix a limit of the proposed exchange is the fear that some people might think that to give four for one in paying off the debt and stopping interest, might actually be making the debt three times larger; that is, he fears some ignorant voters might figure it out that way, but he, himself, and Ben Butler and the "immortial Dinis," and all the rest of the great fiat money lights well know it would make no material difference if the rate of exchange was double that; it would cost a little more for the blank paper and the printing and freight on the money, but that would be about all. In case the griping bondholders can be compelled to disgorge, as the General intends they shall whether they like it or not, the Government will be entirely out of debt so far as bonds are concerned, and can hold up its head once more like any other rich bankrupt. This is obvious from the simple fact that the "money" with which this bonded and all other indebtedness is to be paid is to be issued without any conditions of redemption or interest whatever. So, of course, the public debt would soon be a thing of the past, if the General and his coidiots can have things their way; and then, they feel, it will be no trick at all for farmers to get numerous dollars per bushel for wheat—there might be a little advance in tea and coffee and the like; but that's nothing: every man will have money (greenbacks) to sell, and the buyer can name the figure if he will come down with the real cash.

And, without exaggeration, the foregoing is just what these crazy Greenbackers are trying to do. Nast made no mistake in the shape of the General's head.

WE, this week, received our first copy, being its second issue, of the *True Fissure*, Candelaria's new paper, J. M. Dormer, late of the Aurora *Herald*, being its editor and proprietor. In get-up as well as in matter the new paper is unexceptionably a good one, and we warmly hope it may prove a true fissure indeed, with "pay grit" down to the melting point.

EX-SENATOR James A. Bayard, of Deleware, and father of the present Senator, is dead.

A LODGE of Good Templars has been organized at Aurora.

The Gunnison Country.

The Leadville *Chronicle* gives a seven-column descriptive article with diagrams concerning the Gunnison country. As but little is generally known about that much-talked-of region, the following from the article in question will be read with interest by many:

Gunnison City, via Saguach, is 193 miles from Leadville, and is reached by roads of every conceivable character leading over mountains and valleys innumerable. The altitude of the place is 8,500 feet.

The name, Gunnison City, is given to two towns, the old and new, probably a mile apart, and both laid off—wide streets and regular squares and blocks. In all, about 120 houses have been erected, all small buildings, very poorly constructed, and almost all unfinished. Lumber is an article nearly impossible to obtain. The only sawmill in the country is 20 miles up Lumber creek, and that has a capacity of but 3,000 feet per day. House logs are equally as far away, and green. Sunburned bricks or adobes are used to some extent. The Red Lion, a two-story building, is built of them, partitions and all. Tents are used to poor advantage on account of the winds, which hardly ever cease to blow a gale, cold and chilly from the immense fields of snow on either side. Along the banks of the Gunnison not less than 2,000 people are camped in tents, awaiting the melting away of the snow above.

Up to the time of the writer's departure there was but one game—keno—running, but he met two four-horse loads of gambling fixtures out from Buena Vista, under the proprietorship of Charley Utter, who met his Waterloo at the Black Hills Club House, Buena Vista. Gunnison has a city government, a gentleman named Kubler wearing the Mayor's robes. Ruby Camp, the mention of which strikes a chill to one who has been there, is 32 miles from Gunnison, up the river to the confluence of Ohio creek and up Ohio creek to its very source, which is but three miles from Ruby. All merchandise going into Ruby breaks bulk at King's, and is transferred to backs of men, who pack it across the snow for seven cents a pound. About twenty of the fellows are constantly employed. A road has been built into Ruby, but from five to thirty feet of snow will hold it down until at least the first of June. There are three town sites, Ruby City, Irwin and Ruby Camp. At the first named not so mnch as a cabin yet gladdens the eye. On paper the streets are broad and straight, with a broad plaza in the center of the town. You are told by the men interested that one block facing the plaza is reserved for Macpherson's bank, that a portion of another will be used by Mr. Langrishe for an opera house. The snow levels the entire country.

About four hundred locations have been made upon the mountain side flanking the town and around the lake. The same complications of claims exist as in any other place, and the same amount of litigation will be necessary to untangle them. The writer was unable to find but one man at work, and he in a tunnel about 20 feet and thus far but a prospect. The Forest Queen is the most talked-about claim in the district. It is situated to the right of the lower town, and is opened by a tunnel and shaft, both filled with snow and ice. Something like 40 tons of ore was sacked and stowed away in a tent, from which a piece was taken at random, and assayed at random with the following result: Fifty-five and a half ounces of silver, valued at $71.64. The ore was of the galena species, with white spar attached in several places.

Good prospects have been found in all the districts, but nothing to raise more than a ripple of enthusiasm. The journey through the Gunnison suggests an idea that will do for the unitiated to note, but may not please the class to which it refers, and that is a class of adventerous, smart fellows, rustlers they are called, who push into new territory, locate a townsite, get up an elaborate map, and by everlasting chinning, secure a form for their town, sell lots, give away lots, swap whole blocks for a stack of reds—anyway to make a raise. Hundreds are fooled, a few hedge and get out, but those least able to stand the loss are the dupes.

The Defiance District is at the headwaters of Roaring Fork, about 20 miles below the Ute Reservation. The principal camp is known as Defiance City, at the confluence of Roaring Fork and Grand river.

The Roaring Fork mining district comprises that portion of the Silurian or carbonate belt that cuts the Roaring Fork river in the vicinity of Maroon Castle, Hunter and Woody creeks. The entire district, up to the present date, is but an enormous prospect camp. Ten feet is the average depth of shaft right through all the claims. It is not therefore strange that these surface assays should be on the average low.

The principal towns of the district are Highland, Roaring Fork City, Aspen and Ute City. Merchants have located at each place and large stocks of merchandise are being freighted in.

ARTICLES of incorporation of the Nevada and Oregon Railroad Company were filed at Reno on Saturday. The road runs from Aurora on the south to the Oregon boundary line on the north. Reno will be the headquarters. Surveys will be made at once, and the construction will be pushed ahead. Following are Directors: Ex-Governor Woods, John T. Davis, Mr. Moore, Mr. McMeachan, Colonel Ellis, T. Coffin and J. C. McTarnahan, the last named being residents of Nevada.

THE introduction into this country of the Australian acacia is deprecated by Prof. Dwinelle, who says the handsome foliage and sweet flowers of the acacia will prove to be expensive luxuries. Those planted at San Rafael have been nursuries for the breeding of a large, white "mealy bug," or "scale," which has spread to orchards and gardens, and is proving a great plague.

NEWS ITEMS.

The President, on the 15th, vetoed the Deputy Marshal's Bill.

P. A. Payne, a stockman living near Hollister, was, on the 13th instant, brutally murdered by a Portuguese sheep-herder.

A tornado did great damage in Clinton County, Indiana, on the 14th instant. Four persons and numbers of live stock were killed outright, and many buildings destroyed.

The Washington *Star* estimates now that Bayard "has more positive support than any man yet proposed" for the Democratic nomination at Cincinnati.

Washington rumors report a coolness between Sam Randall and Sam Tilden, the cause being Tilden's reported preference for Payne as his successor to the honors of 1876.

The thermometer marked 104° in the shade at Tucson, Arizona, on June 9th.

Mining matters in Maine do not boom as they did some time ago. The Boston *Herald* asserts that the bottom seems to have fallen out.

On the 24th of May a committee from the Miners' Union of Bodie waited upon the superintendents of mines where non-members of the Union were employed and requested the discharge of such. The committee was courteously received and the request complied with.

Eugene Sullivan has been confirmed as Collector at San Francisco. The President, to the surprise of Congressmen, has again nominated John M. Morton as Surveyor of Customs in the same port. Whether he will be confirmed or not remains to be seen; if not, the President will appoint him after adjournment of Congress.

THE prefects of the department in Paris in which Jesuit establishments are situated have been instructed by the Minister of the Interior respecting the decrees against unauthorized religious ceremonies. The prefects must make a clear distinction against unauthorized Orders. The Jesuits are not to be invited like others, to have themselves authorized, but are ordered to dissolve, and on the 30th of June the company of Jesuits must evacuate the establishments it now occupies. For teaching establishments, however, the respite is prolonged until the 31st of August. Authorized Orders will receive before the 30th instant an official summons to declare whether they intend submitting to the decrees. Several prefects have expressed their conviction that but few of the Orders would hand in their statutes, and one of the Ministers said he was of the same opinion, but he believed there would be exceptions.

A COUPLE of boss road agents are doing a railroad business between Bodie and Carson. On the 8th instant they stood up a whole stage full of passengers, and made collections of all their valuables. On the 13th they repeated the operation on another load, and at identically the same spot. Meantime a party of Piute scouts had been running them around over a long trail in form representing a huge italic *S*, as the *Standard* informs us. As the officers now know about how long it takes the bosses to make a run ready for another clean up, they might venture out with some cannons to the regular place of business and try and scare them off next time.

THE jury in the case of Mike Owen, indicted for the murder of P. L. Traver, on the 16th brought in a verdict of not guilty, as we learn by papers received this morning. Mr. Reddy was his counsel, while there were four attorneys for the prosecution. We shall look for a report of the evidence adduced with interest, for it must differ vastly from the circumstances of the killing as given in public report immediately after the occurrence; had those reports been sustained even his invincible counsel couldn't have saved him, nor is it likely he would have taken the case.

CAPTAIN DAVE of Wadsworth has been elected Chief of the Piutes in place of Nachez, who has resigned the position. He was chosen by the leading men of his tribe at a fandango recently held on the Truckee, which was attended by Captains from all parts of the Piute nation. He is opposed to going to Malheur Reservation, and says that none of his tribe want to leave Nevada.

THE mail-carrier from Clover Valley to Shoal Creek, Nev., tried to drive some cattle; he tied the mail-bag on the horse and drove him along also, and after getting out a short ways the horse started off, carrying Uncle Sam's mail-bag over the desert. Although several days have been spent searching for the animal, yet at last accounts he had not been found.

THIRTY years ago the common sheep of Germany are said to have had only 5,000 or 5,500 wool fibres to the square inch of surface. Through improvement in breeds, the common grades of sheep now have 27,000, and pure bred merinos have from 40,000 to 48,000.

AT noon on the 16th, both Houses of Congress adjourned *sine die*. The President approved the Sundry Civil Appropriation bill. All the regular annual appropriation bills became laws.

CONRAD WIEGAND, the well known assayer of Virginia City, committed suicide at that place last Monday. Cause unknown. He hanged himself with an old woolen comforter.

P. REDDY, Esq., makes his closing argument this afternoon, at Aurora, in the case of Mike Owens, on trial for the murder of Traver. He will probably return to Bodie this evening or early to-morrow.—*Bodie Standard, June 12th.*

MARRIED.

At Bishop Creek, Inyo County, Cal., June 13, 1880, by Rev. L. Case, LEVI GERRISH to Mrs. RILLA CLARK, all of Bishop Creek.

THE INDEPENDENT cheerily acknowledges the receipt of bridal-cake compliments. If, as alleged, "matches are made in heaven," this matrimonial union is of that order.

DIED.

At Round Valley, Inyo County, Cal., June 14, 1880, JOHN ROWLANDS, aged 25 years, 1 month and 1 day.

NEW ADVERTISEMENTS.

F. T. BICKNELL, M. D.,
Graduate of Rush Medical College, Ills.

H. H. HOWELL, M. D.,
Graduate of the Medical Department of the State University of Cal

Bishop Creek, Cal.

HAVING ASSOCIATED OURSELVES TOGETHER for the practice of Medicine and Surgery, tender our professional services to the citizens of Bishop Creek and vicinity.

SATURDAY, JUNE 19.....1880

WATER WORKS.—Surveyor Seeley, now at Lone Pine, is expected here tomorrow to survey out a line for a water pipe which will prove of great advantage and convenience to the owners, as well as a most valuable protection in case of fire. This is a purely private enterprise, but one which should have been undertaken by our townspeople, as a whole, long ago. Messrs. Harris & Rhine and J. C. Irwin intend laying four-inch iron pipe up along Market street, connecting with a tank or reservoir on the creek about 2,000 feet above, or at sufficient distance to give a pressure equal to throwing an inch stream 50 feet high. Small pipes will lead into their respective business places and residences. At a point about Harris & Rhine's warehouse E. Robinson proposes to join on and continue the same on down to his farm and residence—an obvious advantage all around, inasmuch as the water would have a regular flow and for that distance a great loss by seepage or sinking saved. A fire-plug at his place would be invaluable as a protection, while to make those in town available at any time it would only be necessary to put in a well-gate or valve at about the warehouse. The closing of this (gradually, in order to prevent bursting the pipe), would throw the entire pressure back on to Edwards street. A standard hydrant, or fire plug, is to be placed at the corner of each building represented in this enterprise. Now, if it were possible to wake our citizens up to the importance of doing something on this fire question, we can outline a plan which will in every instance save the whole town from going to destruction by fire, and nine times out of ten confine it to the building where it may originate. First, complete this work as stated and connect a pipe running 300 feet south to the corner of Kearsarge street, with a fire plug at the end of it. On the north side of Market street Mr. Fernbach has a four inch pipe laid for 500 feet, leading into the brewery, raising the water ten feet. This much is already down, and can be used in making a line of pipe precisely the same as the proposed one on the opposite side. Turning at a hydrant on Mairs' or Wood's corner, the pipe should be laid 380 feet to the north side of Center street, with three or four hydrants. This arrangement would give the town four ⅞th streams. These side pipes would remain dead, and divert no water from where it belongs except in case of fire or drill. A cart, with 500 or 600 feet of regulation fire hose, would constitute a fire protection at once complete, effective and cheap. With all the natural advantages that a town could ask for it is passing strange that nothing has been done to save it from destruction. When a fire starts it's a pitiable thing to see men stand by utterly helpless to save their property. Since this question was agitated eight years ago the losses by fire would cover the cost of three such vorks, saying nothing of the exhorbitant rates paid for insurance. Furthermore, the loss of the town now *may* mean that it will never be rebuilt. It will do no harm to organize a committee of citizens to ascertain what can be done about the matter, anyway.

BULLION.—Messrs. McEvoy and Taylor, of the Freeborn Cañon works, Beveridge District, came in on Thursday, with 63½ ounces of fine gold. This is the result of an experimental run on a new mine, the ore of which does not appear to have worked more than $30 per ton, although only a partial clean-up was made. Much work has been done in the way of building trails and laying in wood and supplies. During this season a 5-stamp battery and probably a concentrator will be added to the steam arastras. The institution is solidly backed up and is bound to prove a success.

ASSESSMENT ROLL.—So far as gone, the assessment roll of Inyo County for the present year foots up, in round numbers, to $950,000. Cerro Gordo, Resting Springs and other small localities are to be added, which may bring it up to about the total of last year—$1,030,000. The Assessor has been granted by the State Board of Equalization time up to the third Monday in July in which to complete his work.

HARVESTERS.—This morning there passed through town one of the C. G. F. Co.'s big teams, with one wagon loaded with D. M. Osborne & Co.'s celebrated harvesting machines, consigned to J. H. Smith, agent at Bishop Creek. An article concerning this strong firm will be found in another column, and we ask our farmer readers to give their machinery the closest examination.

CROPS.—The promise for big crops of all kinds throughout the valley, fruit, in some localities excepted, was never so promising as now, notwithstanding some set-backs from late cold weather.

SALES.—On the 3d instant E. L. Wigglesworth sold to F. M. and B. G. Smith the Carolina mine and one-half interest in the Cottonwood mine, Deep Spring Valley, the consideration being $600.

A NEW FIRM.—See the joint professional card of Drs. Bicknell & Howell, of Bishop Creek, who are too well and favorably known to need any encomiums from us.

LOOKS BETTER.—Johnny Irwin's popular Corner Saloon, with a new porch and other substantial outside improvements, looks better.

PREACHING.—Rev. Mr. Willis will hold the usual services in this place tomorrow evening, and at the Post on Tuesday evening.

MEETING.—The stated meeting for June of Inyo Lodge No. 221, F. & A. M., will be held at the hall to-night.

LOST.—If whoever picked up a small steel postoffice key will return it to this office he will greatly oblige.

THE HIRSCH MINE.—Such is the name of the south extension of the Brown Monster, or old Eclipse gold ledge, situated across the valley, about twelve miles southeast from this point. It is the property of Nathan Rhine, Esq., who has been carrying on prospecting work for some months past. The mine is situated about 1,200 feet above the valley and consequently over 5,000 feet above sea level. It is a four-foot ledge, carrying three feet of varied description of ore, and lies in a general formation of slate and lime, with occasional granite striations. Under the superintendence of Capt. Eudey the ledge has been opened in two places, in one to the depth of about twenty feet. Several tons of ore have been extracted, and we had yesterday the pleasure of examining a number of sacks of it at the store of Harris & Rhine, from whence it will be shipped to San Francisco, for a working test of its commercial value. From a small streak on the west wall of the ledge comes a heavy, black ore carrying lead, copper and silver. In the center is a gray quartz, bearing both gold and silver. The bulk of the ledge, however, is a heavy, red oxide of copper, in the seams of which are found flakes and chunks of native copper—the whole body of ore probably averaging 65 per cent. of this metal. In all the large pieces can be seen flecks of gold. So far as we know no assays of this curious combination of metals have been made, but Mr. Rhine's object in taking some twenty sacks of it with him to San Francisco is to determine its proportionate and total value.

MOVEMENTS OF MINING MEN.—Last week the noted Wm. A. Raymond and D. Sanderson were in town, having paid a visit of inspection to the Ygnacio and other properties of Cerro Gordo; but Uncle Billy backed out from a proposed trip to Deep Spring, on learning that it involved a sixty mile ride and back....J. D. Hudgin and W. S. Woodhull (formerly at the Rex Montis and brother of S. D.) are in town, bent on Deep Spring operations as soon as Mr. Greenly returns from Monache. ....Messrs. Wm. A. Roberts, the widely known expert, and —— Holland, have arrived at Lone Pine, and will visit the Swansea, Beveridge and Cerro Gordo mines, probably in company with John Ely....Messrs. Thompson and Tishner, the latter a son of the inventor of the much-talked-of lead-bath process, are taking a general look around. They are reported as being much pleased with the Belmont, Crowning Glory, Whittekind, Oceola and the Dr. Gould mine especially....A. Wingard was in from Deep Springs, and reports prospecting going on at a favorable rate.

WANTS TO GO.—Mr. A. Reinhardt, recently of Big Pine, is now in the county jail, and seems anxious to set out for a few years sojourn at San Quentin, where there may be less temptation to appropriate other people's live stock. Some time since Mr. Reinhardt arrived from Montana with a real or purported order from A. Montgomery to gather up a remnant of his band of horses. He got about ten and sold some of them to different parties. On the 12th instant he picked up one of McMurry's horses in the lane above the house, and at Hessian's place absorbed a saddle and bridle. He then went a mile or two above town and undertook to sell the outfit to Turner and Smith, one of whom recognized the property and notified Deputy Sheriff Steve Gregg. The officer soon had his man and Justice Campbell was not long in committing him to the county jail. He will be allowed to plead before Judge Hannah as soon as his honor is able to hold court.

CUT WORMS.—A new species of worms are playing sad havoc with all kinds of growing produce in the gardens from Bishop Creek down to Camp Independence. In some instances it is reported that even alfalfa fields have been badly injured. Wonder, in this connection, if the general absence of birds has anything to do with it? Usually at this time of the year thousands of the welcome little nuisances make themselves decidedly at home around the house, and especially among the fruit trees. This season, however, they have been conspicuously absent—it is only now and then that a lonely meadow-lark sings out the fact that he's around.

A DOUBLE CROP.—Among the new sage lands to the eastward of Bishop Creek, brought under cultivation this year, is a vast field of ripening wheat, level as a floor. Underneath the grain is coming up a thick growth of alfalfa, which will of course monopolize the ground next year. A handsome yield of grain will result, while the straw and alfalfa mixed will suffice to keep cattle fat during the Winter. The property is one of the several places belonging to one of Bishop Creek's boss rustlers —Wm. O. Harrell.

DIED.—John Rowlands, the young man who accidentally shot himself in the knee, last February, died at Round Valley last Monday. He was a most estimable young man, and bore with manly fortitude the most intense suffering for over four months. All that could be done by mortals to alleviate his pain was cheerfully done, but all of no avail—death at last relieved him.

PLAIN SAILING.—This, and other of our school districts in debt, and, up to date, not knowing how to get out of debt, can rest easy now. An apportionment just made, and the last for this school year, gives each district one dollar and eighty-nine cents with which to pay off their liabilities. This makes it plain sailing for the trustees.

TO THE OTHER SIDE.—John R. Westerville started last week for Tulare county, there to run his thrasher a few weeks, after which he will return in time for his usual season's thrashing in this valley. He took with him all his thrashing outfit except the old separator, which is to be replaced by a brand-new one of the latest style.

TO MONTANA.—Mrs. Judge Bowen and son, late of Cerro Gordo, left here on Thursday for Helena, Montana.

IN MEMORIAM.

To the W. C. T., Officers and Members of Oasis Lodge, No. 352, I.O.G.T.:

We, the Committee appointed to draft resolutions expressive of the feelings of Oasis Lodge at the death of our beloved Bro. Gilbert C. Gracy, would respectfully submit the following:

WHEREAS, The Almighty has been pleased that Bro. Gilbert C. Gracy might depart this life, therefore be it

Resolved, that we, the members of Oasis Lodge, unite in a feeling of sincere sorrow for his sudden departure from among us.

Resolved, that Bro. Gracy was a good citizen, a kind neighbor, a consistent member of our Lodge, and a warm friend of Temperance generally.

Resolved, that we extend our heartfelt sympathy to the relatives and friends of our deceased Brother.

Resolved, that, in token of respect to his memory, the charter of this Lodge be draped in mourning for a period of four weeks.

Resolved, that these resolutions be spread upon the minutes of the Lodge, and copies sent to THE INYO INDEPENDENT and *Rescue* for publication.

Submitted in Faith, Hope and Charity.

FRANK R. PARKER,
PETER W. FORBES,
WM. GOODMAN,
Committee.

Bishop Creek, Inyo County, Cal., June 20, 1880.

Another Blaze at Cerro Gordo—Hughes' Hall and Hoff's Store Burned.

About 10 o'clock last Saturday night a fire broke out at the store of V. Hoff & Son, Cerro Gordo, and in an almost incredibly short time entirely consumed the store and contents and the large saloon and store-room of Hughes & Williams. The buildings destroyed were large frame structures and occupied the very center of the town, on the east side of the main street. The incendiary fire of March 15th last, it will be remembered, swept away all of the line of buildings on the same side of the street next above where the present fire started. At that time the steep streets were filled with snow, furnishing the citizens something with which to save the Hoff and Hughes property. At this time the few men remaining in town were totally helpless, and barely succeeded in removing a trunk from the store and Dan's clothing from the rear part of the saloon. No one was in the store when the fire started, Mark Hoff having closed it, extinguished all the lights, and was sitting in the saloon. When discovered, the flames were bursting out of the rear of the store and in a short time the doomed property lay in coals and ashes. The origin of the fire seems a complete mystery. As near as we can learn, the Hoff building was not insured, but the stock was to the amount of $8,000; also the Hughes building for about $4,000, certainly less than one-fourth of its cost. This calamity puts an additional pall of gloom upon the present dull condition of affairs at Cerro Gordo, and it seems likely that what is left of the upper town will be pretty nigh abandoned for a time.

PRECAUTIONARY.—At the conclusion of each marriage ceremony performed by Justice Sneden, of Bishop, he informs the happy couple that they have been legally made man and wife, under the laws of the State of California, but as a measure of precaution, he would adjure them to beware of Independence, "as the —— lawyers down there might habeas corpus you out of it." When the Justice sends a man to jail, or ties him up in matrimony, he likes to have it stick.

RETURNED.—Judge Conklin returned from his Bodie trip on Tuesday last. He found the senior of his firm, Mr. Reddy, with more law business on his hands than any two average lawyers can well attend to. In a business point of view, Bodie, the Judge opines, lays over this locality a peg or two. They are a litigious set up there, and that stirs things. Mrs. Reddy is trying the Casa Diablo hot springs in hopes of benefitting her health.

A QUESTION OF TIME.—It is hard to tell how near we are to the inevitable era of enterprise which will make Cerro Gordo again the scene of business life and a mining boom. It is a huge "mineral blossom" second to none on the Pacific Coast, and where one mine has produced so many millions it is fair to presume that the many others there equally as promising will soon gain the capital necessary to open and work them.

THAT GOLD ORE.—The samples of Beveridge District ore, referred to in our last issue, have been assayed by Mr. Woodhull, and the result shows a tolerable fair amount of the precious metals in each ton of it: Gold, $2,561 95; silver, $37 86; total, $2,599 81. The ledge is from one foot to eighteen inches in width, and lies in a favorable formation. Messrs. Hughes & Kelley are the lucky finders.

ARRIVED.—Mr. T. F. A. Connelly, recently engaged upon contract work at Keeler City, arrived home last night, and reports that Keeler City is the same identical Keeler City—or words equally comprehensive. However much he may tell what he don't know, this time Mr. C. won't say what he does know.

OUT AGAIN.—Judge John A. Hannah put in an appearance on the street this morning, having almost recovered from his rheumatic attack. He will call court on Monday.

FREIGHT.—John Clark's team, with 27,000 pounds of merchandise for J. H. Stoutenborough, passed through on Thursday, bound for Bishop.

FOR BODIE.—Twelve or fourteen of W. L. Hunter's pack mules were driven through town the other day en route to Bodie.

THE Crown Prince of Denmark never makes a speech. He rises, bows, and says: "I don't to-day feel well," and sits down amidst long-continued applause.

BISHOP CREEK HEARD FROM.

Suicide of G. C. Gracey—General and Personal Notes.

BISHOP CREEK, June 16.

MESSRS. EDITORS—On Saturday, the 12th inst., the body of Gilbert C. Gracey was found on the ranch of F. G. Powers, by James Enloe. A double-barreled shot-gun was found lying on the body, and with the ghastly wound in the side of the neck told the sad tale. For nearly two months he had been laboring under a depression of spirits, which was noticed by his friends, but who supposed it temporary and thought it would soon wear off. He was born in Canada, and had reached the age of 65 years. He has a family there, who lived near Montreal, but has not heard from them for the past ten years. His remains were taken in charge by the Good Templars, and on Sunday were consigned to the grave. A Coroner's inquest was held before Justice Sneden and the jury rendered a verdict of death by his own hands.

MINING:

Johnny Stoutenborough, on his return from San Francisco, became quite elated on learning that a lead was struck on his desert land claim. Experts say there is no telling where it will lead to.

Brother Case is prospecting on the Rock of Ages; says he is still in rebellious matter, but if he had his way would soon reduce it.

RELIGIOUS.

John Clark will soon deliver a course of lectures in reply to Ingersoll's "What Shall I Do to be Saved?" When it comes to Scripture, John is a Gatling.

EDUCATIONAL.

The School Trustees are trying to secure the services of Mr. L. Munzinger as teacher in the English department. Professor Munzinger has made irrigation a study. He has now a large class who are learning the adaptation of beer as applied to alfalfa culture. Frank Shaw—he of the Adobe Meadows—is a heavy alfalfa grower, and head of the class. He tells me he has a big sett and that James is light.

PERSONAL.

District Attorney Laird was here a few days on business. He met with a hearty reception and has a host of friends. He left us with regret, but "when duty calls," etc. Good bye, John.

John Blair and J. H. Stoutenborough have returned from San Francisco.

Mrs. William Adams (nee Anna Yaney), with her daughter, has been paying her parents a visit.

Put. Yaney, of Nevada, is amalgamating around.

J. M. Horton, of Candelaria, is in town, stopping with Mrs. Horton. Also, Pete Swearingen, who is booked at the Bishop Creek Hotel, where he carries his Candelaria at all hours of night.

Pap Kingsley, our weather prophet, says we will have good weather. Garfield will knock the spots off the Sun.

NOT CREDITED.

The rumor that Tom Hutchison will support Garfield is not credited....Or that our Supervisor is too old for re-election....Or that McCrosky will vote against Tilden....Or that parties will stop making water ditches out of the public highways....Or that Dan Ashley is superintendent of a Sunday-school....Or that the State and county taxes will be reduced....Or that Ben Alverson is studying for the ministry. ....Or that Judge Hannah, during his confinement, was attended by Sheriff Smith....Or that old man Glover wishes to sell his black mares for $100. ....Or that parties have stopped selling whisky to Indians....Or that every one at Bishop Creek subscribes for THE INYO INDEPENDENT.

IN LIQUID-ATION.

Denny Hessian runs Horton's saloon. Horton runs Kingsley.

Gabriel toots his horn at Hutch's, and Bill's friends take—several.

Larry's Mull Hollands—a new drink.

Munzinger, Phillippay & Co. have excellent lager on draft between here and Candelaria.

REGULUS.

G-Ology.

Our reporter was met on the street yesterday by an enthusiastic Republican, claiming that he was from old "Missou." He took us to task for our editorial strictures upon James A. Garfield, and then furnished the following alphabetical key, as proof positive that the man who has a "G" in his name is sure to be President. It may be proper to say that he had been sitting up all night, and was somewhat enthused. First, he named G. Washington; second, Gohn Adams; third, T. Gefferson; fourth, Geems Madison; fifth, Geems Monroe; sixth, Gohn Q. Adams; seventh, Geems K. Polk; eighth, Geems Buchanan; ninth, Andrew Gohnson; tenth, U. S. Grant, and the eleventh will be Geems A. Garfield. He furthermore told us, that unless the Democracy had a trotting horse whose name commenced with a G we had better give up the fight. We assured him we would try and find a candidate on the Democratic side who had a G in his'n and left him perfectly happy. —*Eureka Sentinel.*

THE examination of F. W. Craig, on the charge of forgery, was commenced before Justice Wilkinson on Friday last, but came to a very sudden and very surprising termination. After the evidence on the part of the prosecution was closed, the counsel for the accused moved to discharge him on the ground that none of the offenses charged against him were committed within three years from the commencement of the action. The District Attorney, finding that the latest offense was three years and twenty-nine days old, did not oppose the motion, and the defendant was discharged. We are sorry for Mr. Craig's sake that he plead the statute of limitations. People will take his refuge behind this legal barrier as an acknowledgment of his guilt, and it will be impossible to make them think otherwise.—*Kern Co. Gazette.*

ALL the Jesuit establishments in the French Republic are to be permanently closed to-day by order of the Government. The event is an important one. —*S. F. Chronicle, June 14th.*

LETTER FROM RESTING SPRINGS.

RESTING SPRINGS, INYO CO., CAL., June 3, 1880.

MESSRS. EDITORS: We have been receiving a mail, via Ivanpah, twice a week up to last week, when it stopped coming. We sent a man over to see what the matter was; heard that the mail contractor had found that we could get along with two mails a week, though he was paid to give us three; that he had now concluded one was enough.

This camp has not been worth speaking about for the past three months, but lately it has been galvanized into new life by the arrival of C. E. Luckhardt, M. E., from San Francisco, and who has full authority from the company to do as he pleases. He says he is going to make a camp of it.

The mill is running day shifts only, but to-morrow will begin to run day and night. Most of our people had got tired of waiting, and have struck out for newer and better camps.

Luckhardt is hiring all the men that come along. It has been a long, dry spell between drinks for me, but I will stick to it awhile longer. I will, after awhile, write you a particular account of the camp, etc., from which you may, if you choose, cull something that may interest your readers.

Tecopa is, at present, the proper Postoffice address for this place, but notwithstanding that and the Postmaster General's order, most of the mail matter comes addressed to Resting Springs, where there is no Postoffice.

H. R. GREGORY.

Direct Trade with Eastern Manufacturers in Harvesting Machines.

We have with much interest observed this year's contest for the mastery among the rival hay and grain cutting machines on this coast. Our hay and grain is exceedingly heavy this year, and difficult to handle, consequently the machines that go through solid will be popular for many years to come. While there are many good machines for sale and in use among our friends, whose interests we would not interfere with, yet justice to the general public demands some expression from us in an extraordinary year like this. It appears that the new strong improved machines made by D. M. Osborne & Co., of Albany, N. Y., especially for their San Francisco Branch House, have carried off the palm—fully seventy-five per cent. of all sold on the coast thus far this year being of this kind. Their new combined binder and header is a marvel in its way, being purely Californian, and is doing splendid work. We were shown large numbers of letters and telegrams from Southern California, where these machines are now in operation, all of them most satisfactory to the firm. We are glad to note the result, because it will stimulate other Eastern manufacturers to come to our coast and do likewise. *What we need is a hundred more just such enterprising firms out here.—San Francisco Farmer and Dealer.*

It will be seen from the above that the heavy houses of the East are beginning to see the importance of doing their own business on this coast. By so doing they can get their goods out by water freights at a half a cent a pound from New York to San Francisco, and with the many other advantages to be gained by being located among us, they can put down goods at much lower prices than by the old "sole agent system." The above named firm is one of the largest in the world in its line. Its factories cover about fifteen acres of ground, at Auburn, N. Y. They have appointed Mr. J. H. Smith, of Bishop Creek, in this county, as an agent, with full powers to canvass the county and take such orders as our farmers care to offer. The *Farmer and Dealer* is right, "we need more just such firms out here," and the more patronage this one gets the more encourgaement for others to come. Mr. Smith has on hand samples of their mowers, reapers, self-binders and combined binders and headers. He was formerly a resident of Auburn and, of course, knows whereof he speaks when he guarantees good machines and liberal fair dealing. He is selling quite fast. Give him a call or drop him a line at Bishop Creek.

THE certificate of the incorporation of the Western Nevada Railroad Company has been filed in the office of the Secretary of State of Nevada. The road is to be of narrow guage, with a capital stock of 5000 shares of the par value of $100 each. Amount already subscribed and paid in is made up as follows: A. J Rhodes, $40,000; John T. Davis, $10-000; James McMehan, $5,000; Charles Hadsill, $100; George Corydon, $100; E. M. Holmes, $10,000; George L. Woods, $10,000; John Neale, $10,000; George W. McBride, $100; George W. Smiley, $100; George H. Strong, $100. It will be run from a point at or near the town of Wadsworth, through the counties of Lyon, Churchill and Esmeralda to Walker Lake. Length, with branches, 55 miles; number Directors, 5—John T. Davis E. M. Holmes, James McMehan, George L. Woods and A. J. Rhodes. Principal place of business, Wadsworth.

THERE is every reason to believe that the crops in this county will be finer and larger than ever before known. We hear of no drawbacks, but on the contrary the reports from this valley are uniformly favorable. On South Fork the prospect is not quite so good, but there will be a fair crop; while in the Tehachipa country the crops are backward, but promising. They need more rain, however, to make them secure.—*Kern County Gazette, June 12th.*

THE postmaster here has received instructions from the Department at Washington that a tri-weekly mail service has been establishied between this point and Austin, service beginning on the 13th of June. Frank Clugage is the contractor, and the time of contract extends from June, 1880, to June, 1881. The new route will increase Candelaria's mail facilities and add a little more labor to the government hireling here.—*True Fissure.*

THE new railroad is to be completed to Walker Lake by November next.

Legal Facts Worth Knowing.

A note obtained by fraud, or even from one intoxicated, cannot be collected.

If a note is stolen, it does not release the maker—he must pay it.

A note by a minor is void.

Notes bear interest only when so stated.

Principals are responsible for their agents.

Each individual in partnership is responsible for the whole amount of the debts of the firm.

Ignorance of the law excuses no one.

It is a fraud to conceal a fraud.

An agreement without consideration is void.

Signatures in lead pencil are good in law.

The acts of one partner binds all the others.

Contracts made on Sunday cannot be enforced.

A SUBSCRIBER asks how to get rid of the apple-borer. According to a writer on horticultural and agricultural subjects, when borers have once gained possession of a tree the only way to get rid of them is to hunt for them carefully with a knife or wire and destroy them. The eggs of the parent beetle are deposited during nights in June, and are placed in the bark of the tree at the surface of the ground, or whatever may surround the tree. These eggs hatch in our latitude during September, and it is soon after this that the young grub may be easily removed without anything more than the point of a penknife. A few minutes spent in this way about the first of October each Fall will keep the tree free of the pest. —*Scientific American.*

GIDEON COOK, a preacher, was very eccentric in speech, even in his last moments. A few hours previous to his death his brother, also a preacher, came to his bedside and inquired: "Do you think you are dying, Gideon?" And the reply, quick and short, came: "Can't tell; never died before."

ASSESSMENT NOTICE.

KEARSARGE MILL AND MINING COMPANY.

Location of Principal Place of Business, San Francisco, California.

Location of Works, Kearsarge Mining District, Inyo County, California.

Notice is hereby given, that at a meeting of the Board of Trustees, held on the Seventh day of June, 1880, an assessment (No. 5) of Fifteen Cents per share was levied upon the capital stock of the corporation, payable immediately in United States gold coin, to John Calvert, the Secretary, at the office of the Company, northwest corner of Fourth and Howard streets, San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the TWELFTH day of JULY, 1880, will be delinquent, and advertised for sale at public auction, and unless payment is made before will be sold on MONDAY, the NINTH day of AUGUST, 1880, to pay the delinquent assessment, together with costs of advertising and expenses of sale.

JOHN CALVERT, Secretary.

OFFICE—Northwest corner Fourth and Howard Streets, San Francisco, California. n521td

NOTICE OF FORFEITURE.

TO HENRY DUNLAP, CO-OWNER:

You are hereby notified that the undersigned have expended the sum of Six Hundred Dollars in labor and improvements upon the Trade Dollar mine, situate in the Pine Mountain District, County of Inyo, State of California, being the amount of expenditures required to be made and done for the year 1879, in order to hold said mine under the provisions of Section 2324, Revised Statutes of the United States. And if within ninety days after the expiration of the publication of this notice, you shall fail or refuse to contribute and pay your legal proportion of such expenditure as co-owner, your interest in said mine or claim will be forfeited and become the property of the undersigned, as provided for under Section 2324 of the Revised Statutes of the United States.

CONSTABLE'S SALE.

BY VIRTUE OF AN EXECUTION ISSUED out of Justice Seth G. Sneden's Court, of the 4th Township, county of Inyo, State of California, dated the 27th day of May, 1880, in a certain action wherein A. Doll, as Plaintiff, recovered judgment against J. A. Seehorn, as Defendant, for $101 56 100 damages and $19 50 100 costs on the 27th day of May, 1880, I have levied upon the following described property, to wit:

All the right, title and interest of Defendant J. A. Seehorn in and to that certain water ditch, located on the east side of Owens river, in the 4th Township, Inyo county, California, and known as the "Edson and Hughes' Ditch," being the same property as heretofore conveyed by A. J. Walter to J. A. Seehorn by deed and of record in Book K of Deeds, page 35, Records of Inyo county.

Notice is hereby given that on MONDAY, the TWENTY-FIRST day of JUNE, 1880, at 12 o'clock M. of that day, in front of Sneden's office, in the town of Bishop Creek, county of Inyo, I will sell all the right, title and interest of said J. A. Seehorn in and to the above described property, at public auction, for cash, to the highest and best bidder, to satisfy said execution and all costs.

Dated at Bishop Creek, the 27th day of May, 1880.

WILLIAM GOODMAN, Constable.

OFFICIAL.

PROPOSAL TO CHANGE SCHOOL TEXT BOOKS.

PUBLIC NOTICE IS HEREBY GIVEN by the County Board of Education of Inyo county, this 17th day of May, 1880, that it is proposed to change the following text books now and heretofore in use in the public schools of this county.

Reading,
Spelling,
Writing (copy books),
Arithmetic,
Geography,
Grammar,
Language Lessons,
History of the United States,
Industrial Drawing,
Physiology,
Music, and
Algebra.

Sealed bids or proposals will be received by this Board for furnishing books to replace them. Separate bids or proposals for supplying any part of this list will be received.

Said sealed bids or proposals will be opened at Independence, the county seat of Inyo County, at 10 o'clock A. M.,

On Monday, June 28, 1880.

The Board reserves the right to reject any or all bids or proposals.

Said bids or proposals must be accompanied with sample copies of the books proposed to be furnished, together with a statement of the wholesale and retail price at which the publisher agrees to furnish each book at Independence, in this county of Inyo, during the full time for which said books are to be adopted.

The publisher or publishers, whose proposals shall be accepted, must enter into a written contract with this Board of Education, and shall give a good and sufficient bond in the sum of $500 for Readers, $400 each for Geography and Arithmetic, and $100 each for the remainder of the said list of text books.

By order of the Board of Education of Inyo county. J. W. SYMMES,
n519td Secretary.

TEACHERS' CERTIFICATES.

PUBLIC NOTICE IS HEREBY GIVEN that the semi-annual examination of persons desiring to teach school in the county of Inyo, will be held by the Board of Education of said county at the District School House, in the town of Independence, commencing at 10 o'clock A. M., on

Tuesday, June 29, 1880.

All applications for examination must be filed with the members of the Board on or before June 28, 1880.

Section 1772 of the Amended School Law provides that applicants for second-grade County Certificates shall be required to pass a satisfactory examination in Arithmetic, Grammar, Geography, Composition, History of the United States, Orthography, Defining, Penmanship, Reading and Method of Teaching.

Applicants for first-grade County Certificates will be required to pass a satisfactory examination in all of the foregoing studies, and also in such other studies as the Board may determine upon.

Sections 1772 and 1775 require that all teachers must hold certificates from the County Board of Education, notwithstanding they may hold either a Life Diploma, State Educational Diploma, Normal School Diploma, State University Diploma or State and County Certificates granted prior to the first day of January, 1880.

By order of the Board of Education of Inyo county. J. W. SYMMES, Secretary.
n519td

THE BEST PAPER. TRY IT!

BEAUTIFULLY ILLUSTRATED.

35th YEAR.

The Scientific American.

THE "SCIENTIFIC AMERICAN" IS A large, First-Class Weekly Newspaper of Sixteen Pages, printed in the most beautiful style, *profusely illustrated with splendid engravings*, representing the newest inventions and the most recent advances in the Arts and Sciences; including New and Interesting Facts in Agriculture, Horticulture, the Home, Health, Medical Progress, Social Science, Natural History, Geology, Astronomy. The most valuable practical papers, by eminent writers in all departments of Science, will be found in the Scientific American.

Terms, $3 20 per year; $1.60 half year, which includes postage. Discount to Agents. Single copies, ten cents. Sold by all Newsdealers. Remit by postal order to MUNN & CO., Publishers, 47 Park Row, New York.

PATENTS. In connection with the SCIENTIFIC AMERICAN, Messrs. MUNN & Co. are Solicitors of American and Foreign Patents; have had 35 years experience, and now have the largest establishment in the world. Patents are obtained on the best terms. A special notice is made in the SCIENTIFIC AMERICAN of all inventions patented through this Agency, with the name and residence of the Patentee. By the immense circulation thus given, public attention is directed to the merits of the new patent, and sales or introduction often easily effected.

Any person who has made a new discovery or invention, can ascertain, *free of charge*, whether a patent can probably be obtained, by writing to MUNN & Co. We also send *free* our Hand Book about the Patent Laws, Patents, Caveats, Trade-Marks, their costs, and how procured, with hints for procuring advances on inventions. Address for the Paper, or concerning Patents,

THE ENGINEERING and MINING JOURNAL.

PUBLISHED WEEKLY.

DEVOTED TO

Mining, Metallurgy, Engineering and Science.

RICHARD P. ROTHWELL, C.E., M.E., ROSSITER W. RAYMOND, Ph.D., } Editors. WILLIAM H. WAHL, Ph.D., Department of Progress in Science and the Arts.

IT IS AN ACCEPTED AUTHORITY ON ALL questions relating to the great mining industries of the country. It is the oldest publication of its class in America, thoroughly independent; being of the trade and not in it, occupies a just and impartial position, which enables it to advise and teach without fear or favor. It devotes much space to questions bearing upon economical management of mines, and from time to time illustrates the more important improvements in mining machinery and engineering methods. Special attention is given to reliable mining news from all parts of the country, which is gathered by an efficicient corps of correspondents in every section, and from an extended exchange list. The metal and ore markets, and gold, silver and miscellaneous stocks are reported and commented upon weekly by experienced financiers, who are unbiased by private interests, and upon these matters it is accepted as a reliable guide and unfailing instructor. Gives statistics of production of coal and iron, and of our great gold, silver and other mines. Its scientific notes are an epitome of the latest researches, its trade reports full, and its editorials sagacious and comprehensive. It enjoys the widest circulation and greatest influence of any journal of its class in the world; its patrons and readers comprising the most select and intelligent men in every quarter.

Subscription, $4 per year, in advance; 10c., single copy.

Advertising rates on application.

Address, THE SCIENTIFIC PUBLISHING CO., 27 Park Place, New York. P. O. Box, 4404. n511t4eow

WEST POINT.

An Inside Glimpse at the Life of a West Point Cadet—The Course of Study—The Famous Whittaker and Other Facts of Interest.

We find the following in the Jackson (Michigan), *Daily Citizen*, being a letter addressed to Mr. A. M. Bannister of that city, written by Sergeant John Mills, a West Point cadet. The first mentioned is a brother of Mrs. Charles Johnson, of Lone Pine; the writer was one of her old school-mates, and a young man worthy of implicit confidence in all his assertions of facts, therefore his statements relative to the now famous "Whittaker case" become all the more interesting, and those regarding the immense amount of work required of a "suckling sojer" will do for school boys generally to ponder over.

WEST POINT, N. Y., May 2, 1880.

DEAR SIR: Your favor of April 28 is at hand. You are correct in supposing that my leisure time is confined mostly to Sundays. We are at present engaged with "general review:" that is, a review of that portion of the course studied since January last, preparatory to the coming June examination, and study, drills and recitations require our whole attention. We have just finished our Spring course of artillery drill and practice in military telegraphy. Infantry battalion drill begins to-morrow. Cavalry drill for our class is finished for this year. We have been having drill at the siege, sea-coast and mortar batteries. The first consists of six Parrot siege guns mounted on heavy carriages. In the mortar battery there are three eight-inch and three ten-inch mortars. The sea-coast battery contains three eight-inch rifled cannon, one two-hundred pound Parrot gun (eight-inch), a large eighteen-inch mortar, and the big fifteen-inch gun. This is the largest piece of ordinance we have, and is a powerful gun. With all those batteries the targets are about eleven hundred yards away. At our last drill I was gunner at the Parrott, and we put one shot dangerously near the bull's eye. This gun carries a long projectile. The large mortar throws a shell to the top of "Crow Nest," the highest of the highlands on this side of the river. Our drill at the light (horse) battery was completed last year, so far as handling the guns is concerned. Next year we act as officers at this battery. It consists of six three-inch rifled guns and six caissons, each drawn by four horses. We have been having drill by signalling, both by flags and torches. Next Summer we have practice in putting up and operating field telegraph lines.

The course this year comprises mechanics, acoustics, optics, chemistry, electricity and magnetism, mineralogy, geology, astronomy, drawing and tactics. This is is the third year's course. Our course in pure mathematics was completed last year. It includes algebra, geometry, trigonometry, descriptive and analytical geometry, differential and integral calculus, and surveying. The courses in English and French are also completed in the first two years. In surveying we had the use of the theodolite, transit compass, plane table, etc., with some practice in the field and platting. I well recollect the prismoidal formula, as I have it to demonstrate at the June examinations. Our course in military and civil engineering is taken up next year. Also the course in law. The course in drawing leans rather to the practical than the artistic, though the latter is developed to a considerable extent. The first year we have topographical and map drawing in ink and colors, and mathematical drawing, which includes shades, shadows and perspective. In the first part of the next year we use only a pencil and the eye, and make pencil drawings, both in outline and with shade and shadow of blocks, geometrical figures, etc. From this we pass to drawings in pencil and charcoal, of figures in plaster, heads, busts, etc., and some take landscapes. After January of the second year we have machine drawing in ink and colors, and water-color painting. I have been painting a view in Westminister Abbey, and am now at work on a perspective view of a mortar.

The course in astronomy is very thorough. We have the use of the various astronomical instruments in the observattory to learn their adjustments, methods for taking observations for and computing latitude, longitude, predicting and making calculations for eclipses, determining the true time, etc., etc.

The entire course in philosophy is very interesting, especially the lectures, as the department is supplied with one of the best collections of apparatus of all kinds in the country. In the department of mineralogy and geology, there are very large collections of minerals, fossils, etc., and they are constantly being increased by contributions from officers stationed in the West, and from the collection made in the Government surveys, etc.

The Court of Inquiry in the case of Mr. Whittaker is still hard at work. It is composed of the most efficient officers that could be selected from those on duty here, and they give their whole time to the case, being temporarily relieved from duty for that purpose. Mr. Whittaker has been in my class since a year ago last January, when he was turned back from the class above, having failed at examination. This is sometimes done when it is thought a man does not deserve to be discharged for deficiency. He stands very low in the class, and is losing ground all the time. His room is on the floor above mine, and I saw him on the morning after the assault, just as he was found, only his hands had been untied. They were waiting for the Superintendent and Commandant to see him before he was disturbed. He lay upon some bedding on the floor, his feet tied to the bedstead. His hair had been cut so that his head was covered with bare patches. One of his ears had been slightly cut on the lobe, and a very small piece of skin clipped from the other. There were two or three cuts on the feet, and a scratch on one hand. The pillow under his head was bloody, and there were a few drops of blood on his shirt and on the floor. The hair was scattered about the floor, and a broken looking glass lay near him. The newspaper accounts of the affair were greatly exaggerated, and his injuries were very slight. He missed one recitation, and was excused from drill and marching for a few days, but otherwise has been able to attend to all duty. No noise of any kind was heard during the night, neither by myself or others rooming in the vicinity. No evidence has yet been brought out which indicates that it was the work of cadets. Everyone here is well satisfied that either Mr. W. did it himself to excite sympathy and get another "turn-back," should he fail to pass next June, or that it was done by outside parties to make political stock, and secure the colored vote at the coming Presidential election. Everything is being done that is possible to sift the matter. New York detectives have been here for sometime dressed in soldiers' uniform. The note of warning, which Mr. W. produced after the affair happened, and which he claimed to have received some time before, has been carefully examined by experts and compared with the handwriting of every cadet in the corps. Their report has not yet been published, but it was rumored yesterday that they found a close resemblance between the note and Mr. W's writing. This affair has brought the general treatment of negroes by the white cadets to notice, and I hear a great deal of discussion on the subject. The first negro that came here (Smith, or "Nigger Jim,") did see some rough times, but the treatment of negroes has changed entirely. They are let entirely alone, and their initiation is much more agreeable than that of a white man. It is true that Mr. Whittaker was no associated with, but it is held that this is purely a personal matter, since every man chooses his associates. If Mr. Whittaker's society was not agreeable to the white men, he could not force it upon them; and so long as he was unmolested, his rights not interfered with, and he was allowed to pursue his studies, and profit by all the advantages the institution affords, he had no right to complain. As he himself admits, he was treated exactly like the white cadets by all the officers and instructors.

The cadets were very indignant when the outrage was first made known, and have asked General Schofield to allow them to offer a reward of $1,000 for the apprehension of the perpetrators.

We have fifty-seven in our class. We started with one-hundred and one. There are about two hundred and forty or two hundred and fifty in the entire corps.

AN inventive genius filled a small tarleton sack with a spoonful of cayenne pepper, and tacked it over the rat-hole. When the rat bounced out, his eyes were peppered by the sifting from the shaken sack. He squealed like a pig, and escaped. The whole tribe have since migrated.

A DISASTROUS fire-damp explosion is reported from a coal mine at Dartmund, Germany.

THE Mormon agent of immigration reports that Mormonism is largely on the increase.

Wives of Our Statesmen.

The following personal mention is from a recent Washington letter. It was penned before the nomination of General Garfield at Chicago, and pertains to the wives of gentlemen on both the Republican and Democratic sides, whom gossip had selected as possible Presidential candidates:

Mrs. Washburne, a lady of French descent, is petite, dark-eyed, emotional, a fine conversationalist, an enthusiastic, warm hearted friend. As mistress of a household she was alert, a faithful mother of numerous children, yet ever ready to entertain on short notice Mr. Washburne's constituents, and not only so, but to enter with zeal into their plans.

Mrs. Speaker Randall is a woman who comes from an excellent family, and has a fine education. She is rosy and stout, and in manner quiet and self-poised. She pursues the high aim of rendering her home thoroughly comfortable for her husband and his many callers. How well she fulfills this holy endeavor may be divined by the tender word by which Mr. Randall always addresses her,—"Mother," as if her gentle influence reminded him of a mother's love.

Mrs. Blaine is fair-haired, tall, rather stout, with a distinguished carriage and a manner earnest and practical. Sincerely conscientious, Mrs. Blaine seems to belong to a class of New England women not to be always met with, even among the rugged hills, and are rarely seen elsewhere. Already are her sons in business and popular in society, and Miss Alice, the eldest daughter, a beautiful girl of eighteen, stands beside her mother like a younger sister.

Mrs. Senator Windom is one of those sprightly women whose brilliancy attracts. Tall and graceful, with an animated face that lights up in conversation; an easy, affable, engaging manner—the unstudied expression of a warm heart—it is no marvel that callers at Senator Windom's tarry long, thus virtually crowning the hostess queen. The school where Mrs. Windom educates her children is in their own home and she herself is their teacher.

Mrs. General Garfield is of delicate form, in rosy health; a domestic, devoted mother; fitting her four young Generals for college or for active life; a lady of sunny spirit, and of a very quiet, dignified bearing.

Mrs. Senator Bayard is a graceful, polished, attractive, dark eyed lady; too busy with her many children to devote much time to society. It is understood that Mrs. Bayard inherited great wealth. The two elder daughters are in society, graceful and accomplished young ladies.

Mrs. Thurman is a matured woman, to whom the "brains side of the Senate," as Thurman is styled, seems to be still the tender lover, both being quite stooped, are jogging down life's hill together.

Mrs. Sherman, the tallest of these expectant ladies, is lithe, well formed; with the frank simplicity and sincerity of sweet seventeen. Kindly and cordial and equable, her nearest friends note not the slightest elevation of soul since good fortune has raised this amiable lady to almost the pinnacle of American society. Now, as ever, she seems sweet, and happy, and gentle, and benevolent. She is the daughter of Mr. Jas. Stewart.

JOSEPH WIDMER, seven feet in hight, and the tallest man in Missouri, died a short time since. The St. Louis *Republican* says that he served in the war in Col. Fred. Hecker's regiment, and at the time of the first parade of his company, Col. Hecker, noticing that he stood a head and shoulders above all others, yelled out, "You rascal, get down from that stump!" When the enraged Colonel drew near to learn why his order was not obeyed, he saw what he afterwards said was the longest bean pole he ever beheld.

THE mother's love is a true and absorbing delight, blunting all other sensibilities; it is an expansion of existence: it enlarges the imagined range for self to move in. But in after years it can continue to be joy only on the same terms as other long-lived love—that is, by much suppression of self and power of living in the experience of another.

BY a singular coincidence in the history of Mr. Blaine he polled on the first ballot at Chicago exactly the same number of votes he opened with at Cincinnai 1876—285.

A TORNADO, with heavy rain and lightning, passed over New York city and vicinity June 14th. Many trees were prostrated. The thermometer fell from 85 to 66.

A VERMONT Town Board wrestled with the word "Dangerous," to be used as a sign on a bridge, for over an hour, and finally settled on "Danjurus.

THE MULE PUZZLE—Draw a circle fifteen feet in diameter, place a mule in the center, and walk around him without getting out of the circle.

GOVERNOR PERKINS has appointed as Drainage Commissioners, W. F. Knox, of Sacramento; W. H. Parks, of Yuba, and Niles Searles, of Nevada.

BEWARE of overwork in harvest time. Beware of cold drafts—both of air and liquids—when perspiring freely. Work steadily and sleep well.

A CHINAMAN was sentenced at Yreka, Cal., June 8th, to 45 years imprisonment in the penitentiary.

INYO INDEPENDENT.

PUBLISHED EVERY SATURDAY, BY

CHALFANT & PARKER.

J. E. PARKER. P. A. CHALFANT.

INDEPENDENCE, CAL.:

SATURDAY, JUNE 26.....1880

VOLUME XI.

With the present issue THE INYO INDEPENDENT enters upon its eleventh annual volume.

It has no cause of complaint except the general one of dull times. Over the mining horizon, however, gleams of light seem breaking which indicate the early dawn of prosperity.

Having battled manfully for ten years, THE INYO don't propose to give up the ship at this stage of the fight. But it will be necessary for our patrons to furnish some of the munitions of war—*i. e.:* to promptly pay up what they owe.

WE have been patiently waiting for a chirp from the mining papers of this Land District concerning the royal manifesto of Land Commissioner J. A. Williamson, dated April 19, relative to newpaper charges for publishing mining notices. In it, by virtue of Section 2334 Revised U. S. Statutes, the highly distinguished Commissioner "directs that the maximum charges for publication of notices of application for patents to mineral lands shall not exceed fifteen (15) dollars; and for publications of citations or hearings involving the character of lands ten (10) dollars." This order is made "with reluctance," and mainly because "it has from time to time been represented [to him] by credible parties, and through official sources, that the rates charged by various newspapers for the publication of notices of application for patents to mineral lands have been and are, in many instances, excessive." Hence, he proposes to fix "the said rates at precisely the figures which for several years last past have controlled like publications in the Stockton and Sacramento land districts in California." All Receivers and Registers are instructed to report any violation of this ukase, for in such a soul-harrowing event he will "be compelled to * * designate some one newspaper in each land district, where such excessive charges are made, for the publication of all mining notices, and fix the rates to be charged by such paper"—this latter proposition undoubtedly comprising the animus and gist of the whole thing. It would be a "fat" thing, in districts where much of the business was going on. Now, will the Bodie *Free Press* kindly inform us whether the "notices of applications for patents to mineral *lands*" applies in any way to applications for quartz mines and ledges? If so we shall claim the floor for a little speech on the subject.

THE interest which is so rapidly awakening all over the Union relative to the mining and agricultural capabilities of this and surrounding counties presages an influx of both capital and population. That means the development and working of many of our almost innumerable mines, those known and those silently awaiting the genius of Discovery. It means the reclamation of a vast extent of rich land, furnishing homes and competencies. It is a duty our people owe to themselves to answer this spirit of inquiry on the part of Eastern people by furnishing them with every fact of interest and point of information obtainable. For this county the means is at hand—subscribe for one or several copies of THE INYO INDEPENDENT, and have them regularly sent to your relatives and friends. Every copy is passed around and scanned by a number of interested people, every interesting statement of fact being noted and commented upon. There will be a volume of such points collated and presented in this paper during the coming year. We commend the idea to our patrons, one and all—subscribe for THE INYO and send it to your friends.

IF you don't like to vote for Garfield, or the Cincinnati nominee, whoever he may be, or General Weaver, leader of the Gibbering Greenback Idiots, you can have another choice in the person of Neal Dow, of Maine, whom the National Prohibition Convention have duly and truly nominated for President of these United States, with A. H. Thompson, of Ohio (of course), for Vice President. This Convention met in Cleveland on the 17th instant.

ONE of the "signs of the times"—or rather of times to come—is the receipt of several prominent New York mining papers, applying to THE INYO INDEPENDENT for an exchange.

JAMES ANDERSON'S new paper, the Ruby Hill (Nev.) *Mining News*, comes to hand and we give it a hearty welcome. It is quite a large weekly, and a fine paper in all respects.

THE MUSSEL SLOUGH TROUBLES.

A Committee of the Mussel Slough settlers, selected for the purpose, have prepared a history of the land troubles in Tulare and Fresno counties, which is published in pamphlet form. The Los Angeles *Express* gives the main points of the settlers' side of the story, and which we deem worth reproduction, as the matter at issue is of more than local interest.

The pamphlet asserts that the patents of the Railroad Company were obtained through fraud; that the settlers are not trespassers, but are there by invitation both of the Government and the Railroad Company; that the claim of the Company to the lands is based upon the filing of their map in the Land Office, January 3d, 1867, but that repeated decisions of the Interior Department, from that of Secretary Browning in 1868 to that of Secretary Schurz in 1878, including the opinion of Attorney General Devens, declare the lands to be public lands. It is also shown that the Railroad Company have not complied with the law which required the completion of the road by July 4, 1878, but over one hundred miles of the road still remain to be built to even connect the road with the S. P. R. R. proper at Soledad. The fact is then set forth that the Railroad, by circulars, invited settlement on their lands, promising to sell at the value of the land without improvements, and stated that the timber land would be held at $5 per acre and pine timber at $10, but most of the land would be sold at $2.50 to $5 per acre. As there was no timber on the Mussel Slough land, the settlers expected to purchase at $2.50 to $5, but when the Railroad had secured their patent, they sent notice to each settler, stating that the land occupied by him was for sale to *any one* at —— dollars per acre, the blanks being filled with rates varying from $5 to $45 per acre. A Land League was then formed by the settlers, and various steps taken by the League are given, including petitions to Congress, correspondence with the Railroad Company, etc. In their appeal to Congress they represent they found the lands a sandy plain, not worth $2.50 an acre; that the present value of the land is due to the irrigating ditches, and were they destroyed and the railroad to remain, the land would not sell at $2.50 per acre.

Last March Leland Stanford visited the Mussel Slough country, and spent a day in riding thirty or forty miles with a committee of the settlers; and the principle was admitted that in valuing the lands the cost of the irrigating ditches, estimated at $400,000. should be deducted, making a difference of $5 per acre, which the settlers believed would be deducted from former prices as graded by the Company, and that on other grounds there would also be a considerable reduction in the rates before demanded. The grader for the Company was directed to re-grade the lands, but meantime suits were commenced in the United States Court, and in April executions were ordered in twenty cases. Mr. Stanford, when applied to, denied knowing anything of the executions, and stated that in March the attorneys of the Company had had orders to stay proceedings, but that the action of the settlers in filing bonds on appeal justified the Company in proceeding to execution. The Company sent a man to the settlement instructed to lease the lands, an act which the settlers also considered a breach of faith, only ten days' time being given them to lease or purchase, and as in re-grading many tracts had been raised instead of reduced in value, it became evident that the company had no intention of dealing fairly with the settlers. In answer to a letter asking a reduction of fifty per cent., Stanford replied that the graded prices were already fifty per cent. below the actual value of the land.

In conclusion, the settlers appeal to the public for sympathy and aid, and denounce the action of the Railroad Company as cruel and tyrannical. As suits have been appealed in three cases to the U. S. Supreme Court, it is claimed that until these test cases have been decided, it is unjust in the Company to demand possession or rent, and the settlers declare that if their homes are taken from them under such circumstances, very serious troubles will result, and they call upon the Government to at once make an investigation of the cases and thus prevent a terrible calamity.

Who can blame these settlers should they resort to the most desperate measures to maintain their rights to their homes, their all? There is hardly a doubt but that Stanford and his gang got title to that large area of the poor man's inheritance only by the sharpest kind of sharp practice, not having done the work for which as a subsidy it was to be made theirs. But supposing their title to have been fairly and honestly obtained, why, if they don't wish to be considered liars and veritable robbers both, should they so often falsify their own valuations of their property to the end that they may openly steal the hard earned value given it in good faith by these poor settlers? Unless the details come to us greatly misrepresented, the course pursued by the Railroad Company is without justification, and those settlers are entitled to all the sympathy and support they ask for.

DON'T WANT IT STRONG.

That conglomeration of Socialists, Communists, Greenbackers and what not, known as the National Greenback Labor Party, or the Gibbering Idiots, promulgated an immense platform as the result of their Convention held at Chicago the other day, which Convention, so-called, nominated Weaver, the General, for President. This platform quite vigorously denounces "a strong government," and everything tending to produce such. Then, with beautiful consistency, it asserts the right of the Government to "make and issue money" and "make it a full legal tender for all debts, public and private;" that it shall make eight hours a day's labor; protect labor, and "*equalize* the burdens and insure a just distribution of its results." "Compel wages to be paid in cash." To have power to make a dollar out of eighty-five cents' worth of silver. Government to assume and exercise the power to stop immigration. Regulate inter-State commerce, bring all lines of communication and transportation under legislative control. Secure moderate, fair and uniform rates for passenger and freight traffic. Abolish convict labor contracts. Forbid the employment of children under fourteen years of years. Inspect and control factories, etc., for sanitary reasons, and so on, and so forth.

Some of these things are well enough in intent, no doubt; but as a whole it is a demand for more governmental machinery, more agents and with more arbitrary powers in relation to the private affairs of individuals and corporations, than has ever yet pertained to a free government, and in some particulars, goes quite up to the arrogations of the most despotic: instance—that the right of naming conditions is on the side of employés only; that a printed bit of irredeemable paper *shall* be accepted at its face as money in fact; that eighty-five cents' worth of stamped silver shall be the equivalent of one hundred cents' worth of gold; in effect, that the Government, not the requirements of trade, shall establish fixed prices of every marketable thing, and at the same time, look after its manufacture, and transportation—in short, maintain a general supervision of business in general, down to the veriest details in that of corporations and quasi-public institutions, and private too, regarding the relative value of labor and its pay.

Still, the Gibbering Idiots won't have a "strong government" and a consequent "weak people" no how!

FOR some time past the Stockton people have been earnestly contemplating the feasibility of building a narrow-gauge railroad direct from that city to Bodie. The business men appear to be thoroughly alive to the importance of the project. At a meeting held on the 11th instant, $43,000 of the $100,000 necessary to incorporate was subscribed. Mr. Davis, a representative of the Oregon and Nevada road, made a long statement, in which he said the proposed road would pay thirty or forty per cent. on the investment, and would connect with the Atchison, Topeka and San Francisco narrow-gauge, as well as other roads in contemplation. That if the Stockton people did not undertake this work, Eastern capital certainly would—a result that probably would not distress the Stockton people but very little.

INSTRUCTIONS have been sent from the Interior Department to the District Land offices in California, Oregon and Nevada, to the effect that hereafter claimants for public timber land must make their proofs and payments within ninety days after application, and they are prohibited from removing timber until such proofs and payments have been made, under penalty of being prosecuteed as timber trespassers.

HOMER DISTRICT, Mono county, now has a very neat little paper of its own, called the *Homer Mining Index*, J. E. Baker and John J. Curry, publishers and proprietors. It denounces the blood-letting spirit prevailing there, and those who encourage it by making heroes of the cut-throats, in such terms as do its moral leanings ample credit, and to show that it will be of some use in the community.

THE Ute Indians are not pleased with the offer of $50,000 per annum from the Government, on condition that they will cede to it the Gunnison country. In anticipation of a disturbance, Gen. McKenzie, with twenty companies of soldiers, is about to establish a military post twenty-five miles from Gunnison City.

AN exchange states that the impression is becoming general on the Comstock that there will be a lively stock market this Fall, and that good ore bodies will be uncovered in the Belcher and north-end mines during the Summer.

THE CINCINNATI CONVENTION.

The Cincinnati Convention began its troubles in due form on Tuesday last. The attendance of regular delegates (738 in number), is full, and more than full, counting in the Tammany and one or two other contesting delegations, while of press representatives, candidates and outsiders and brass bands, there is a superabundance. A temporary organization was effected by the election of Judge Hoadley, of Cincinnati, and a pronounced Tilden man, to the Chair, but in the permanent organization on the following day, ex-Governor Stevenson, of Kentucky, was chosen Chairman, the only change made from the temporary organization. The two principal candidates, Tilden and Seymour, each sent in letters of withdrawal, and this put everbody at sea without chart or compass. But there were still left twelve or fifteen less prominent but more ambitious candidates, not one of whom but believed that the streak of nominating lightning when it did come, was just as likely to hit his lightning rod as anybody else's, so, straightway, Cincinnati had twelve or fifteen more lightning rods stuck up ready for business than she ever had before, saying nothing about hopeful dark horses, a la Garfield, ready saddled at every principal hostelry. These things surcharged everyone with hopeful enthusiasm, but uncertain in what direction to fire it off to produce the biggest effect. So the matter on the evening stood about this way: In the lightning rod brigade, the rods of Field, Payne and Bayard are the highest, that of Bayard rather the tallest, being sustained by 200 promised votes, Payne close behind; but the dark horse *cavallada* are not in the least dismayed. Back of all this is a proposed combination, not unlikely to be carried into effect, which will blank the hopes of all these gentlemen. This is to let the delegations of the four doubtful States, New York, Indiana, Connecticut and New Jersey, bring out a candidate. In case this should be done, it will be one or the other of the balky old wheelhorses, Tilden or Seymour; if the latter, the Convention will nominate him by acclamation; if the former, the fight will go on.

The Convention fired out John Kelly and his Tammany delegation without ceremony. The two-thirds rule was again established, so if the balloting should be confined to a choice from the twelve or fifteen, there is no guessing when it will end. The first ballot was to be taken on Wednesday evening, the result of which will hardly reach us in time for this issue.

LATER.—In the Bodie *Free Press*, of the 24th, received this A. M., we have the following as the result of the first ballot:

Field	65
Morrison	62
Thurman	68½
Payne	85
Loveland	5
McClellan	2
English	1
Lathrop	8
Parker	1
Bayard	163½
Hancock	49¼
McDonald	3
Seymour	8
Jewett	1
Randall	5
Tilden	38
Black	1

So there is nothing in this to show where the electrical fluid is going to light.

A TELEGRAM states that there is no doubt that a formidable band of American filibusters has been organized for the purpose of invading Sonora and wresting that rich State from Mexico. It is to be hoped that the Federal government will lose no time in taking every precaution to prevent such an outrage being attempted on our sister republic. It is also to be hoped that if these filibusters do succeed in escaping the vigilance of the United States authorities, the citizens of Sonora will make it particulary warm and interesting for the adventurers who undertake to rob them of their homes and Mexican citizenship. Every one of the filibusters who escapes death by the sword or bullet should die at the end a rope.

THE religious sect called the Dunkards is now holding a great convention at Lanark, Ill. Fully thirty thousand people are in attendance. Great barracks have been built for the three days' meeting, and the scene at the camp resembles an army encampment or a great fair.

MINING reports from Patagonia, Tombstone, Dragon, Arivica, and Santa Catalina, are encouraging. The amount of travel to the districts of Altar and Sonorita in Sonora, is increasing, on account of reported discoveries in these districts.

IT will cost $1,000 to clean up the Palmer House as it was before the Convention. Some of the bedroom carpets were entirely spoiled, and nearly all were damaged by beer and liquor stains.

BECAUSE Wilhelmj hawks his j about the country does that make him a j-hawk?—*Musical Review.*

ALL SORTS.

Twelve Algerian convicts, escaped from Cayenne, have arrived at Boston.

The departure of an expedition from Arizona to take possesion of the State of Sonora, Mexico, is to be prevented by the military authorities.

The census of Chicago indicates that the population of that city is about 475,000.

Samuel Garratt was seriously injured at Chiles Valley, Napa County, lately, by the explosion of a rifle cartridge.

The population of Brooklyn, N. Y, is stated at 555,000.

William Thomas Thornton, the English author, is dead.

The Supreme Court of Indiana has decided that an October election must be held in that State.

John McGuire, a State Prison convict, was sentenced to death at San Rafael, on the 18th, for the murder of another convict named Andrews.

The citizens of Silver City, N. M., are on the brink of starvation, no provisions being obtainable for love or money.

At Tucson, on the 16th, the thermometer marked 130° in the shade, and 125° on the 18th.

Quiet has been completely restored at Leadville and all the militia except one company has been mustered out.

The local option resolution was adopted in the English House of Commons by 229 to 203.

Ex-Treasurer Otto has been found guilty of embezzlement at Santa Cruz.

The walking craze has reached Arizona.

The population at Salt Lake is 20,857—an increase of 8,000 since 1870.

Senator Ben Hill has been acquitted of the charge of seducing Jessie Raymond.

The Irish team won the Challenge Cup at Dollymount, Saturday.

David L. Shank murdered Mrs. Lane, a widow 64 years old, with a fence rail, on the 16th, at Jefferson, O.

Mrs. Cully, the mother of 17 children recently poisoned her husband near East Portland, Or.

It is thought that the census will give four more Congressmen to Nebraska.

The trial of the Broomfield murderers has been postponed at Walla Walla, W. T., until December.

Work is progressing rapidly on the Mexican Central Railway.

The Jesuits expelled from France have located at Prague.

Great indignation is felt in Texas at the acquittal of Currie, the murderer of the actor Porter.

There were 145 prisoners in the Carson (Nev.) penitentiary on the 15th instant.

Mrs. Frua was fined $7 in Tucson for refusing to give her age to the census taker.

The Twelve-mile House, one of the eating houses on the Carson and Bodie stage road, was destroyed by fire on Thursday of last week.

The Bodie *Standard* says the sales of "Central Consolidated" stock is a pure swindle, as there is no such mine in that district.

Captain McGowan, Paymaster, U. S. A., is spending the Summer at Paso Robles. We presume that this is our former commandant here at the Post.

Gen. B. F. Butler went East from Reno on the overland train of June 19th, after a visit to the Virginia City mines.

President Hayes has been elected Vice-President of the American Bible Society. He came in as the dark horse.

Helena, Montana, is rapidly being built up, and a large number of emigrants have gone into that Territory during the past two months.

There are over 1,000 prospectors in the Wood river country, Idaho.

It is stated that an offer of $700,000 was recently made for the Providence quartz mining property, on Deer Creek, Grass Valley, and was refused.

Old Pokebury, Blood Sucker, Grand Turk, Scud, Old Hat, and Squedunk are names of mines in Arizona.

During the past Winter 300 inches of snow fell at Truckee.

Experts believe that Bingham, U. T. shows the biggest outcrop of mineral of any spot in the United States.

THE Aurora *Herald* gives an extended review of the recent trial of Mike Owens, for the murder of P. L. Traver. It does not give the evidence adduced, but in referring to the argument for the defense says:

Mr. P. Reddy opened for the defense on the convening of the Court at 1 o'clock. The room was packed at least twenty minutes before that hour, and many had to be turned away for the want of seats, no one being allowed to stand. Mr. Reddy is an able lawyer and an eloquent speaker, and held the undivided attention of the Court, jury and spectators for four hours. The killing was admitted by the defense, but it was claimed that the act was done in self-defense. The credibility of witnesses for the State was one of the main points of the argument, counsel claiming that a partisan feeling existed.

Upon the following day, after the jury had been out two hours, a verdict of "not guilty" was rendered, as to which the *Herald* remarks:

The general feeling of citizens here is that the verdict of the jury is anything but what was expected.

THE reports from the Sacramento Valley and the San Joaquin, as far up as Fresno, represent that the drying north winds that prevailed for a week or more have injured the wheat crop very materially, the damage varying from very little to three-fourths of the crop. The winds seem to have been more severe in Tehama, Colusa and other northern counties of the Sacramento Valley. The loss sustained amounts to millions of bushels.

NEW ADVERTISEMENTS.

☞This space is reserved for the advertisement of Briggs' New Store, at Bishop Creek.

INYO INDEPENDENT.

INDEPENDENCE, CAL.:

SATURDAY, JUNE 26.....1880

PERSONAL NOTES.—Victor Hoff, the well-known Cerro Gordo merchant, passed through from Candelaria to his old location (what there is left of it) the other day. He will build an office on the site of the store, and expresses unswerving faith in the future success of Cerro Gordo....John Broder and W. A. Greenly returned from Monache Valley a few days ago—the former to return again while the latter goes to Deep Spring....O. L. Tichenor and J. T. Thompson were at the Blaney House on the 23d instant. These gentlemen are studying up this county as a field for reduction works on the Tichenor-lead-bath projection....Mr. J. H. Holt, of the new works at the lake, was registered at the hotel yesterday; we were not accorded an interview to find out whether he knew anything or not. ....J. P. Taylor, the stage boss, was in town regulating things around.... Mr. W. P. Thomas, insurance adjuster, is in town, having been to Cerro Gordo. ....Capt. Keeler has gone to San Francisco.

AN OLD TIMER.—We were pleased with a call this morning from Wm. Witherill, Esq., a well-known and old-time mining operator of Benton, and at present Chairman of the Board of Supervisors of Mono County. He is looking decidedly well, notwithstanding his tough experience of late years in the Comanche, Diana and other properties. The old placer gold mines near the head of Mono Lake are now being opened and investigated under his energy and enterprise. He goes to Darwin to examine some mines and to meet his brother, Clayton Witherill.

RETURNED.—Dan. Crough arrived on Thursday last, after a pleasant trip to San Francisco, old Tuolumne, San José and elsewhere. He delivered Mr. Gonzales to his comfortable quarters at San Quentin, and reports an interview with Mike Welch and Tessier. The former is still feigning insanity, and had some directions to give concerning his mythical $11,000 in the hands of Harris & Rhine. Dan took in the Turn Verein pic nic at San José, but couldn't ring in as a Dutchman sufficient to compete for the racing prize. Dan is a failure as a Deutschlander.

DOUBTFUL.—The Board of Supervisors, on adjournment of the May session, adjourned to meet on the 6th of July, that meeting to be a continuation of the last, in order that certain unfinished business might be taken up and disposed of, as well as the tax equalization business for which the July meeting is usually held. The unfinished business comprised the salary bill, a fence law, some unpaid bills, etc. The probabilities now are, we are told, that no meeting will be held prior to the regular August term.

FOR DEEP SPRING.—Messrs. W. S. and S. D. Woodhull will leave to-morrow or the day following for Deep Spring. Their work in hand is to push down a 100-foot shaft on one of the principal mines of the district—an enterprise which should receive a warm and practical support by all our business men. Mr. S. D. will return soon and continue his assaying business here as usual, leaving the Deep Spring work under the immediate supervision of his brother.

GONE BELOW.—At 10 o'clock on Monday last, in the Superior Court, A. Reinhardt was arraigned and plead guilty to the charge of grand larceny, in having stslen a horse in about the manner described in these columns last week. He seemed anxious to avoid any delay in the proceedings, and received a sentence of two years at San Quentin, for which destination he started on Wednesday morning, in charge of Under Sheriff J. J. Moore.

TO MEET.—The County Board of Education meets on Monday to begin the transaction of its advertised business: namely, selections of text books and examining applicants for teachers' certificates. So far as yet appears, there will not be enough of these applicants to supply every district with a teacher, even if all the said applicants are successful. However, there is no telling how many there may be.

SCHOOL TRUSTEES.—It will, by default of election, devolve upon County Superintendent Symmes to appoint a full Board of School Trustees for this district, to begin their duties with the commencement of the new school year, July 1. It will be far more satisfactory to all concerned if the citizens will make their wishes in this matter known by petition.

FOR ARIZONA.—The old Cerro Gordo population has been steadily transfering itself to Arizona. J. L. Porter is at Phœnix, Maricopa county. Bill Ritchie, Nat. Randall and others are down there somewhere. Frank Drake has gone, and Dan Williams proposes to follow the Cerro Gordo exodus in that direction.

BEVERIDGE.—Juan Mesa, in town today from Lone Pine, informs us of the near consummation of important sales of gold mines at Beveridge District—those recently bonded to Dr. Gelcich. We shall soon have some definite information to give in the matter.

THE HAWLEY MILL.—The grading and foundation for the new mill on the west side of Owens Lake is completed. Some 20,000 pounds of the new machinery, including battery frame, pans, settlers, etc., is on the ground.

ONE WEEK.—One week from to-morrow comes the one hundred and fourth anniversary of the original Fourth of July, or something to that effect; but coin is too scarce to make much of a fuss about it.

THE BOSS.—About this time the boss racket for our farmers would be a brood of turkeys, to rid gardens of the pestiferous worms.

BISHOP CREEK RACKETS.

Regulus' Random Ratiocinations.

MESSRS. EDITORS—Drunken Indians were last week on the war path, south and east of town. One followed Mrs. Van Vleet with a knife, threatening to use it, and she only escaped by wading a slough, the Indian being too drunk to follow her. Another with a knife chased a mahala several times around the house of Mr. Epherson, to the great terror of his wife and children. The Indians say they get their liquor from a white woman about six miles from town. The people say to man or wowan: "Beware! You will not be tried in Sneden's Conrt, or have an opportunity of spending a quiet time at Independence."

A NEW MAIL ROUTE,

Tri-weekly, has been established between Bishop Creek and Mammoth. Pease is the contractor. It is feared that the six-horse stock and Concord coaches on the Independence and Benton line will be transferred to the new route.

THE FOURTH.

There are no efforts being made to celebrate here. Many will go to Round Valley, where preparations are being made towards having a good time at the ranch of Tom Jones.

I would suggest that an effort be made and all contribute towards the expenses of

JOHNNY ROWLAND'S

Last sickness. Young folks of Bishop and Round Valley, he was one of you; your companion, friend. In entrusting this business to you I do so knowing full well that my appeal will not be made in vain.

IMPROVEMENTS.

Munzinger, Phillippay & Co. have built a fine porch on the south and west of their building.

Mr. McVickers is fitting up a room in Bulpit's building, where he will repair watches and clocks. He is on time and tick, which pleaseth the Bishop Creeker. If his terms are not correctly stated he can rectify it by advertising in THE INYO.

F. M. Randolph is erecting a new building, intended for a furniture store and cabinet work.

Briggs' store is completed, and the best in the county. Al. is now filling up the street on the east and north sides—a great and needed improvement.

A TRADE THAT DID NOT COME OFF.

An every day occurrence is that of families passing through here from the southern counties in quest of a New Jerusalem. In conversation with one of such parties—a she—she inquired of me if I did not think prices astonishingly high at Bishop. She said in Los Angeles county she could take three eggs to a store and with them buy a week's supply for her family. I saved three eggs; went to Jake Elkeles' (Jake keeps everything); he received me cordially and asked what he could do for me. (They don't say that in other stores—it's a new thing.) I showed Jake my collateral, and told him I wanted in exchange coffee, sugar, tea, one pair of child's shoes and a calico dress. Jake looked at the eggs, then at me; said in an undertone something like I was addled (he meant the eggs, I presume), and finally said to me: "My friend, I take eggs in exchange for goods, but I am not in the wholesale business."

I shall not be governed by any Los Angeles suggestions hereafter. I shall keep my eggs until they ripen, and dispose of them to the Professor as a new and rare breed, which I am introducing as the Limburgers.

THE ALFALFA CLUB

Will not meet again until the return of Chairman Shaw. Very little business was transacted at the last meeting. The subject of irrigation was taken up a number of times and as often put down by the Chairman. The only question settled was as to the best stand; the committee reported in favor of James. After much discussion and no little feeling the report was adopted and the Club resumed irrigation and continued the same until another meeting. In one of your late issues you mention a former Cerro Gorro merchant, now a heavy ranch operator near your locality, and who grows alfalfa on a large scale. The Professor, on reading it, said by way of advice, "tell him to raise lots of Barrows; there's money in it." I grunted acquiescence. As there is a Bill connected with this advice, you collect.

WORMS AND THEIR FEED.

While passing through Big Pine I was told by Mr. Hessian that the army worm had destroyed nearly all his corn, and that his neighbors were being treated in the same way. At Bishop I learn that Mr. Garretson is suffering from them. Poor fellow, he has been complaining for a long time.

MINING.

Sullivan is working the Piute successfully. Has a number of men employed; Johnny Williams is at the head of the jackass department.

Jim Birchim says he has a big thing in a mine called the Sheep Herder, located in the sheep range west of Round Valley. John White has the extension, the "Tail End," 12 miles south. Says he will never look at $100,000 for his interest; no, never. Brother Case will conduct their reduction works. His private opinion is that it will be a slim assay from those two.

Smith, one of the locators of the Alpha at Mammoth, is prospecting near here, with expectations of striking the Omega.

ETCETERA.

Stoutenborough has quantities of new goods. Question—Where will he put them all? Ans.—A month's trade like the past week and the cry will be for more.

Professor Munzinger declined the offer of the School Trustees; tells me his leisure hours will be devoted to the learning of the German.

Mr. Blair, of the Bishop Creek Mills, regretted his inability to attend the Millers' Convention at Cincinnati. He will probably hold one of his own when we meet again.

PERSONAL.

Bill Grant is in town, supporting himself, if not his family, by crutches. Says while at Candelaria, Thatcher and himself ran away with a team. Bill had his leg broke....Messrs. Thompson and Eibeshutz, of Independence, Cal., were in town. Thompson's visit was, I presume, professionally. In interviewing Eibeshutz I could learn nothing; he never says anything.... Another from Independence—a young man frequently seen escorting young ladies around town. They tell me his name is Harris. So Isaac *pere* did when he was young....Mr. Crittenden and Curt Ober, of Mammoth, were here....Also, Gus Baker and family and Miss Mary Hessian of Big Pine.... I will announce the arrival of the first stray individual from Benton as Captain, Colonel or General So-and-So; they make them there....With access to the stage way-bill I could mention many prominent individuals who do not stop here.

REGULUS.

PERSONS intending to become naturalized should not forget that unless they do so on or before the third day of August, they cannot vote at the Presidential election. The constitution requires that naturalized citizens shall become such ninety days prior to any election, and every citizen to be entitled to vote must have been a resident of the State one year next preceding the election, of the county in which he claims his vote ninety days, and of the precinct thirty days,

---

THE preliminary survey of the Wadsworth and Columbus railroad has been completed, and the engineers report the route one of the most feasible in the entire country. The grades are in no instance exceeding twenty-five feet to the mile. The route followed was through Churchill Canyon, Mason's Valley, east side of Walker Lake, Soda Springs, Rhodes' Marsh, Candelaria and Columbus. The country in many places can be built over as rapidly as on the prairies of Illinois.

IN the matter of the Kern County peculations, etc., Expert W. E. Robinson now comes forward and says that the former expert, W. K. Solts, made a report concerning the books, which "report is not only filled with errors of a most glaring nature, but shows something which looks very much like deliberate connivance with the embezzlement of the former Assessor." This is a pretty serious charge for Mr. Solts to stand under.

ACCORDING to the report of the School Census Marshal, of Mammoth City, as given in the *Herald*, that snowy locality has a total of 92 children, of which 54 are of school age—yet they have no public school there. The total population of the place and its environs is 554 persons of all ages and conditions.

IN the District of Lauban, near Breslau, Prussia, June 22d, a rain tornado killed 56 persons and destroyed 105 houses.

THERE are now six trains running between here and Arizona, two new ones having been put on yesterday. This makes a departure every day of three trains from each end of the road. The Company is pushing on the work of extending the road with increased energy, and say that as soon as they pass the mountains the other side of San Pedro they will reach a country where they will be able to lay three miles of track every day. They are impelled to this great energy in their work by the rapid movement westward of the Atchison and Topeka road. This road is now so far advanced that Arizona merchants can get goods cheaper by it from the East than they can by way of San Francisco. It looks as though the days of competition among the great corporations was approaching.—*Los Angeles Express, June 18.*

GOVERNOR WOODS and J. C. McTarnahan, Directors of the proposed Northern Narrow-Guage railroad, are in Reno, and have been in conference with the leading men of that place. John T. Davis is expected to arrive there today, and assurances are given of the speedy beginning of active operations. —*Virginia Chronicle.*

THE army worm has made its appearance in different localities and is doing much damage. Mr. J. A. Clark informs us that they made their appearance on his place last week and were destroying everything in the line of march. Mr. Gardett also says that they are doing much mischief in the neighborhood of Granite Station.—*Kern County Gazette.*

THE new mining law, requiring financial statements to be posted every month, we are informed is being totally disregarded by some companies. Those whose business it is to look after the delinquents will do well to give the law a practical application in these cases.—*S. F. Bulletin.*

THE Dick Turpin mine at Mill Creek has been bonded to the Cook Brothers and parties associated with them for the modest sum of $240,000. They have the privilege of prospecting the mine at their own expense. Wm. Irwin went up to work on it.—*Bodie Free Press.*

Tilden's letter declining to be renominated at Cincinnati, is much after the fashion of the girl who said, "You can't hug me unless you are stronger than I am, and the Lord knows you are."

DESCRIBING the last vote of the Chicago Convention, the New York *Sun* says: "Crown Point Jones jumped into the Nevada corral and collared two votes for Grant."

Our choice for President in 1884 is Mr. ————, of Ohio. 'Rah for ————!—*Carson Appeal.*

P. B. TULLY, of Gilroy, is an aspirant for the Democratic nomination for Congress from this district.

Two goat heads are butter than one.

Direct Trade with Eastern Manufacturers in Harvesting Machines.

We have with much interest observed this year's contest for the mastery among the rival hay and grain cutting machines on this coast. Our hay and grain is exceedingly heavy this year, and difficult to handle, consequently the machines that go through solid will be popular for many years to come. While there are many good machines for sale and in use among our friends, whose interests we would not interfere with, yet justice to the general public demands some expression from us in an extraordinary year like this. It appears that the new strong improved machines made by D. M. Osborne & Co., of Albany, N. Y., especially for their San Francisco Branch House, have carried off the palm—fully seventy-five per cent. of all sold on the coast thus far this year being of this kind. Their new combined binder and header is a marvel in its way, being purely Californian, and is doing splendid work. We were shown large numbers of letters and telegrams from Southern California, where these machines are now in operation, all of them most satisfactory to the firm. We are glad to note the result, because it will stimulate other Eastern manufacturers to come to our coast and do likewise. *What we need is a hundred more just such enterprising firms out here.—San Francisco Farmer and Dealer.*

It will be seen from the above that the heavy houses of the East are beginning to see the importance of doing their own business on this coast. By so doing they can get their goods out by water freights at a half a cent a pound from New York to San Francisco, and with the many other advantages to be gained by being located among us, they can put down goods at much lower prices than by the old "sole agent system." The above named firm is one of the largest in the world in its line. Its factories cover about fifteen acres of ground, at Auburn, N. Y. They have appointed Mr. J. H. Smith, of Bishop Creek, in this county, as an agent, with full powers to canvass the county and take such orders as our farmers care to offer. The *Farmer and Dealer* is right, "we need more just such firms out here," and the more patronage this one gets the more encourgaement for others to come. Mr. Smith has on hand samples of their mowers, reapers, self-binders and combined binders and headers. He was formerly a resident of Auburn and, of course, knows whereof he speaks when he guarantees good machines and liberal fair dealing. He is selling quite fast. Give him a call or drop him a line at Bishop Creek.

A CARD.

EDITORS INDEPENDENT—I desire a brief space in your columns to express my heartfelt gratitude to the many friends and relatives who so kindly and generously administered, for over four months, to the wants of my unfortunate son, John Rowlands.

By night and by day, during these long months of intense suffering, did those noble souls watch over him—soothed his feverish brow, dressed his wounds, nursed his feeble frame, endeavoring by all means attainable to alleviate his excrutiating pain.

However, the once healthy, robust young man gradually declined—assumed an emaciated form, and, despite all exertions and cherished hopes, death ultimately closed my beloved son's eyes forever!

There are many names (names that are indelibly carved in my breast) of those tender, loving souls whose *constant* attentions to my son's bedside were unremitting, which I should like to publicly mention—printed, yes printed in letters of gold—still, where so many kind-hearted people of Round Valley and Bishop Creek voluntarily tendered their services, I feel constrained not to specify individual names, as a partial list might be considered objectionable. The grave question of remunerating those noble, sympathetic friends augments my anguish; retaliation is impossible. Gold I have none; words are inadequate; an aching, sorrowful heart, with outbursts of bitter tears avail nothing—no recompense to a generous community for kindness and attention bestowed upon my dear, departed Johnny!

Still, I derive some consolation from the conviction that these magnanimous souls are imbued with that heavenly principle: "It is more blessed to give than to receive."

May Heaven shower its blessings upon all, is the fervent prayer of a bereaved mother, MARY ROWLANDS.

Round Valley, Inyo Co., Cal., June 21.

CANDELARIA is not a good place for shows to visit, and especially if they are shows of but little merit. The ordinary snide traveling show had better give it the go-by, in fact, for its citizens are an unappreciative set when it comes to tough shows. The "Frolics" played here one night to a good house, but for some reason didn't draw for the second time. Thereupon all parties concerned got into a plug muss, and the company dissolved. Part of it will remain here, and the balance of it take up its line of march for some other unfortunate place. Again the warning is given: Candelaria is not a good place for one-horse shows to visit.—*True Fissure.*

AT the Blue Jacket mine there were four or five assays made of the rock, and the lowest went a little over $40 to the ton and the highest $2,200, at a depth of five feet, and now at a depth of fourteen feet, it assays $4,000 to the ton. The ledge is four feet wide, with one foot clear of pay rock. It is silver, with enough copper in it to pay for working. The ore is said to be silver glance, and is easily crushed. It is situated six miles north of the crossing of the Mohave river at Roger's Station, where there is an abundance of good wood and plenty of water.—*Corr. Colton Semi-Tropic.*

THE week just closed has been one of activity from the extreme ends of the district to the center. Work in all the mines has been pushed as rapidly as the means and circumstances would allow, and the developments have kept pace with the anticipations of the miner. The feeling is therefore correspondingly jubilant, and every one is conscious that here is the district which is destined to make itself felt in the mining world.—*Candelaria True Fissure, June 19.*

ANOTHER duel was fought on the Belgian frontier, June 9th, between French journalists

Stories About Animals, Birds, Etc.

Luther Wertz, of Hollidaysburg, Pa., killed a snake that had two bodies and only one head and tail.

The ibex from the herd of the King of Italy, which were turned out some time ago in the Rhœtian Alps, have disapeared. As they were regularly fed during the Winter, and were seen only about three weeks since, it is supposed that they have been destroyed by an avalanche.

Some buffaloes are to be taken to East Africa for employment there as beasts of burden, in the hope that they may be able to resist the attacks of the tsetse fly, whose bite is so fatal to so many creatures.

Bisset, the animal trainer of Perth, taught an ourang to wait upon the table and perform other household duties belonging to servants. A female chimpanzee in the London Zoological Gardens could lock and unlock a door or drawer, and thread any needle. In taking her meals she used knife, fork, spoon and drinking cup with the same ease as a human being. The chacma baboon has been taught to blow bellows and to drive teams of wagon horses.

"Jim" was a crow, with a crippled wing, that was found in a marsh near Cooper's Point, Pa. After recovering from his injuries he attended his benefactor on his sailing excursions, and his favorite roost was either at the masthead or on one of the men's shoulders. Jim always gave orders to tack when approaching the shore. One day when the wind was ahead short tacks were a necessity, but the skiff was soon ashore on its centerboard. With a shrill derisive cry, the crow struck its owner in the face with both wings, and flew away, evidently disgusted.

A trio of puppies kept up such a barking that the neighbors threatened to have the owner arrested for causing a nuisance. He took a club, and when one of them barked he chastised the one he thought made the noise. But he soon hit on the plan of making the trio responsible for one another, and on hearing a bark he chastised all. The mother was with them, and finally the bark was followed by a squeal; the mother had one of the pups by the neck. The master went out and patted her, signifying that she had done well. She wagged her tail in satisfaction, and the dogs never barked again, except on the most provoking occasions.

A farmer in Preston, Conn., who was troubled by rats, purchased a cat with a reputation as a mouser, and rats were soon among the things that were. But on going into the cellar one day he saw rats sharing the noonday meal of the cat. The cat appeared to be charmed by them. The farmer allowed the strange friendship to continue for several days, the rats coming regularly to partake of meals with the cat. Finally the farmer decided to put an end to the singular friendship, and taking a gun, he went to the cellar. No sooner had had fired at a rat and missed, than the cat jumped upon it and killed it. Now the farmer wants to know why the cat did not kill the rat before.

A writer on animal intelligence in the *Westminster Review* mentions as proof that dogs really comprehend the meaning of language, the fact that a dog brought up in one country does not understand the language of another country, but if transferred, say from England to France, has slowly to learn to understand French just as a child would do. This view is opposed to the idea which we have often heard advanced, that dogs do not actually know their own names, but only recognize that they are spoken to from the action of the speaker.

THE tenacity of impressions received in child-hood is a factor that should be held most important in every scheme of education. Some of the sweetest associations with nature date back from that period, and we may often trace their quaint ring in the matured poetry of the man or woman.

A MERCHANT was asked the other day how many chidren he had, and he replied: "Five boys, and each boy has two sisters." This may be called the new puzzle of fifteen for those who think he had an unusually large family.

LIME has never been found in a native state; it is always united to an acid and to the carbonic in chalk. By subjecting chalk or limestone to a red heat it is freed from the acid, and the lime is left in a state of purity.

THE plump, nice-looking spring chickens that are allowed to roam about the lawns in the vicinity of seaside hotels are merely walking advertisements. They are not intended for table use.

MINING.

ASSESSMENT NOTICE.

KEARSARGE MILL AND MINING COMPANY.

Location of Principal Place of Business, San Francisco, California.

Location of Works, Kearsarge Mining District, Inyo County, California.

Notice is hereby given, that at a meeting of the Board of Trustees, held on the Seventh day of June, 1880, an assessment (No. 5) of Fifteen Cents per share was levied upon the capital stock of the corporation, payable immediately in United States gold coin, to John Calvert, the Secretary, at the office of the Company, northwest corner of Fourth and Howard streets, San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the TWELFTH day of JULY, 1880, will be delinquent, and advertised for sale at public auction, and unless payment is made before will be sold on MONDAY, the NINTH day of AUGUST, 1880, to pay the delinquent assessment, together with costs of advertising and expenses of sale.

JOHN CALVERT, Secretary.

OFFICE—Northwest corner Fourth and Howard Streets, San Francisco, California. n521td

NOTICE OF FORFEITURE.

TO HENRY DUNLAP, CO-OWNER:

You are hereby notified that the undersigned have expended the sum of Six Hundred Dollars in labor and improvements upon the Trade Dollar mine, situate in the Pine Mountain District, County of Inyo, State of California, being the amount of expenditures required to be made and done for the year 1879, in order to hold said mine under the provisions of Section 2324 Revised Statutes of the United States. And if within ninety days after the expiration of the publication of this notice, you shall fail or refuse to contribute and pay your legal proportion of such expenditure as co-owner, your interest in said mine or claim will be forfeited and become the property of the undersigned, as provided for under Section 2324 of the Revised Statutes of the United States.

PROPOSAL TO CHANGE SCHOOL TEXT BOOKS.

PUBLIC NOTICE IS HEREBY GIVEN by the County Board of Education of Inyo county, this 17th day of May, 1880, that it is proposed to change the following text books now and heretofore in use in the public schools of this county.

Reading,
Spelling,
Writing (copy books),
Arithmetic,
Geography,
Grammar,
Language Lessons,
History of the United States,
Industrial Drawing,
Physiology,
Music, and
Algebra.

Sealed bids or proposals will be received by this Board for furnishing books to replace them. Separate bids or proposals for supplying any part of this list will be received.

Said sealed bids or proposals will be opened at Independence, the county seat of Inyo County, at 10 o'clock A. M.,

On Monday, June 28, 1880.

The Board reserves the right to reject any or all bids or proposals.

Said bids or proposals must be accompanied with sample copies of the books proposed to be furnished, together with a statement of the wholesale and retail price at which the publisher agrees to furnish each book at Independence, in this county of Inyo, during the full time for which said books are to be adopted.

The publisher or publishers, whose proposals shall be accepted, must enter into a written contract with this Board of Education, and shall give a good and sufficient bond in the sum of $500 for Readers, $400 each for Geography and Arithmetic, and $100 each for the remainder of the said list of text books.

By order of the Board of Education of Inyo county.

J. W. SYMMES,
n519td Secretary.

TEACHERS' CERTIFICATES.

PUBLIC NOTICE IS HEREBY GIVEN that the semi-annual examination of persons desiring to teach school in the county of Inyo, will be held by the Board of Education of said county at the District School House, in the town of Independence, commencing at 10 o'clock A. M., on

Tuesday, June 29, 1880.

All applications for examination must be filed with the members of the Board on or before June 28, 1880.

Section 1772 of the Amended School Law provides that applicants for second-grade County Certificates shall be required to pass a satisfactory examination in Arithmetic, Grammar, Geography, Composition, History of the United States, Orthography, Defining, Penmanship, Reading and Method of Teaching.

Applicants for first-grade County Certificates will be required to pass a satisfactory examination in all of the foregoing studies, and also in such other studies as the Board may determine upon.

Sections 1772 and 1775 require that all teachers must hold certificates from the County Board of Education, notwithstanding they may hold either a Life Diploma, State Educational Diploma, Normal School Diploma, State University Diploma or State and County Certificates granted prior to the first day of January, 1880.

By order of the Board of Education of Inyo county.

J. W. SYMMES, Secretary.
n519td

SCHOOL ELECTION NOTICE.

NOTICE IS HEREBY GIVEN TO THE qualified electors of Bishop Creek School District, County of Inyo, State of California, that an election will be held on the TWENTY-EIGHTH day of JUNE, 1880, at which will be submitted the question of voting a tax to pay balance due teacher on last year and building addition to school house.

It will be necessary to raise for this purpose the sum of $600 00.

The polls will be open between the hours of 1 and 7 o'clock P. M.

M. H. WHITE,
CYRUS POWERS,
W. G. M. CROSBY,
District School Trustees.

PATENTS. In connection with the SCIENTIFIC AMERICAN, Messrs. Munn & Co. are Solicitors of American and Foreign Patents; have had 35 years' experience, and now have the largest establishment in the world. Patents are obtained on the best terms. A special notice is made in the SCIENTIFIC AMERICAN of all inventions patented through this Agency, with the name and residence of the Patentee. By the immense circulation thus given, public attention is directed to the merits of the new patent, and sales or introduction often easily effected.

Any person who has made a new discovery or invention, can ascertain, *free of charge*, whether a patent can probably be obtained, by writing to Munn & Co. We also send *free* our Hand Book about the Patent Laws, Patents, Caveats, Trade-Marks, their costs, and how procured, with hints for procuring advances on inventions. Address for the Paper, or concerning Patents,

THE ENGINEERING and MINING JOURNAL.

PUBLISHED WEEKLY.

DEVOTED TO

Mining, Metallurgy, Engineering and Science.

RICHARD P. RICHARDS, C.E., M.E.
ROSSITER W. RAYMOND, Ph.D. } Editors.
WILLIAM H. WAHL, Ph.D., Department of Progress in Science and the Arts.

IT IS AN ACCEPTED AUTHORITY ON ALL questions relating to the great mining industries of the country. It is the oldest publication of its class in America, thoroughly independent; being of the world and not in it, occupies a just and impartial position, which enables it to advise and teach without fear or favor. It devotes much space to questions bearing upon economical management of mines, and from time to time illustrates the more important improvements in mining machinery and engineering methods. Special attention is given to reliable mining news from all parts of the country, which is gathered by an efficient corps of correspondents in every section, and from an extended exchange list. The metal and ore markets and gold, silver and miscellaneous stocks are reported and commented upon weekly by experienced financiers, who are unbiased by private interests, and upon these matters it is accepted as a reliable guide and unfailing instructor. Gives statistics of production of coal and iron, and of our great gold, silver and other mines. Its scientific notes are an epitome of the latest researches, its trade reports full, and its editorials sagacious and comprehensive. It enjoys the widest circulation and greatest influence of any journal of its class in the world; its patrons and readers comprising the most select and intelligent men in every quarter.

Subscription, $4 per year, in advance; 10c., single copy.

THE Philadelphia *Record* deserves great credit for the work it has undertaken and partially accomplished, of bringing to justice the men engaged in the criminal practice of selling medical diplomas. It has already exposed five bogus medical colleges, and secured the arrest of the men purporting to be the "Faculty" of institutions authorized to license men to practice medicine. In the course of its crusade the *Record* has secured for one of its reporters no less than eight diplomas, all for $225, each of which declares that the holder has gone through a thorough course of study in medicine and surgery, and passed an examination in both. The reporter himself declares that he doesn't know the difference between gentian root and soothing syrup. The *Record* has been determined and enterprising in its crusade, and has landed a large number of diploma-sellers behind prison bars. The paper is now publishing fac-similes of the various diplomas with which its reporter has been decorated. In the "American University of Philadelphia," the reporter and the police captured half a ton of blank certificates, filled out and only needing the name of a prospective buyer to turn loose another "M. D." upon the world. Among the correspondence secured was a copy of a circular to country editors offering a perpetual scholarship in the American University of Philadelphia in return for the insertion of an advertisement for a stated period. Unfortunately the *Record* does not publish the names of the editors thus made doctors.

THE MINERALOGICAL CABINETS.—Assemblyman Wasson of Mono County was in the city yesterday. He leaves for Bodie to-day. Ever since the adjournment of the Legislature he has been constantly assisting State Mineralogist Hanks at San Francisco in arranging the museum of his office, and in getting details of the new law under which Mr. Hanks holds office into working order. He says the museum is already very attractive. The old State Geological Society has contributed its collection of minerals, and Mr. Hanks has secured also the cabinets exhibited at the Paris Exposition. He prophesies that the new office will be very useful to the State, and says that all over the country the people are aiding Mr. Hanks in his work.—*Sacramento Record-Union.*

THE Nevada and California Telegraph Company have received the wire, insulators, etc., necessary for the construction of a line from Aurora to Candelaria. J. W. Haines, President of the Company, with James Bell, superintendent of construction, left last Monday for the purpose of locating the exact route, and to contract for placing the material on the ground. We congratulate Candelarians upon being speedily placed in telegraphic communication with the balance of the world.—*Genoa News.*

INTELLIGENCE has been received from Hongkong that the Chinese Government has concluded a contract with the Remington Arms Manufacturing Company, of Illion, New York, for 50,000 repeating rifles of the most improved pattern. The terms of the contract call for the speedy completion and delivery of the arms to the agents of the Chinese Government in this city.—*S. F. Call.*

UNDER the present Constitution of this State no naturalized citizen can vote at the next election unless his naturalization papers are issued on or before the 3d day of August next, and no man can vote unless he has been a resident of this State one year before election, ninety days in the county and thirty days in the precinct.

WINFIELD S. HANCOCK.—The nominee of the Democratic party for President was born in Montgomery county, Pennsylvania, on the 14th of February, 1824, and is, therefore, in the fifty-seventh year of his age. He graduated at West Point in 1844, and served on the frontier until the commencement of the Mexican war, in which he participated, and was created first lieutenant for gallant and meritorious conduct in the battles of Contreras and Cherubusco. From 1848 to 1855 he was again employed in frontier duty, and from 1855 to 1861 was quarter-master of the Southern District of California. He was recalled to Washington and took part in nearly all the battles of northern Virginia during the rebellion. The name of every great battle in that department is inscribed on Hancock's flag. After the close of the war he was placed successively in command of the middle department, the department of Missouri, of Louisiana and Texas, of Dakotah and of the department of the East. He has his headquarters on Governor's Island, New York. In the Democratic National Convention of 1868 he received 144¼ votes for the Presidential nomination, and in the Convention of 1876 he received 75 votes. He has uniformly maintained the doctrine that the military power should in time of peace be subordinate to the civil power. Gen. Hancock is a man of handsome presence and most agreeable manners. He is perfectly straight, a blonde with a rich skin and blue eyes and light hair, now turning gray; and in his address is both courtly and simple.—*Frank Leslie's Illustrated.*

AS ALCOHOLIC drinks have happily long been driven from the harvest fields, there have been various drinks beside water substituted, but scarcely any of them meeting fully the conditions sought for in the way of a wholesome, satisfying beverage. Water, even in all its purity, does not seem to quench the thirst and stimulate the body, as it produces additional perspiration and passes through the pores almost like passing through a colander, leaving the system exhausted and weak; besides, a drink of cold water, when suffering under a great degree of heat, is dangerous, even at times producing sudden death. Latterly, in England and elsewhere, a drink is prepared by mixing oatmeal with water, in the proportion of three or four ounces to a gallon of water. This is found not only to satisfy the thirst better than water, or molasses and water, even when tempered with vinegar or other acid, but to produce additional strength of body. Oatmeal possesses a peculiar aroma, and acts as a stimulant to the surface of the skin as to cause complete digestion of the liquid. Men employed in an atmosphere of the intensest heat are much comforted with it, and become very fond of it. Hence it is in a measure "victuals and drink," possessing only virtues and without any drawbacks whatever. Give it a trial and report results.

A ROUGH COUNTRY.—We believe the country about us is the roughest under the sun. There is no region to which we can compare it. The roughest neighborhood of Virginia City is a race track in comparison. The hills surrounding us rise to an altitude of 2,000 feet above the town, and in many places their sides are perpendicular for several hundred feet, and in not a few instances the summit projects beyond the base. There is no mountain about here so sloping that a man can climb straight up its side. To scale the easiest of them a prospector needs claws like a jaybird and a grip like a nutcracker. A view of Lake Cañon from the summit at its head suggests that the Creator made a great chasm by splitting a mountain in twain, and then turned it inside out, like a sock. The atmosphere is so clear that one is wofully deceived in distances. You start to climb a hill that looks like a modest knoll, and after two or three hours desperate struggling you are tempted to swear that the hill grows faster than you can climb, and that its top is crawling away from you. But this is the place for tunnels and dumps. If the Sutro tunnel had been run into these hills it would not now have a dump big enough to land a wheelbarrow on.—*Homer Index.*

THERE appears to be some confusion in the reports of Col. Pixley's famous metaphor. Our Eastern exchanges come to us illuminated and decorated with all sorts of remarks about tasseled electors and nodding Sierra. The Colonel himself informs us that what he really did say was that "the pine knots shall elect tasseled votes." This is good authority, yet we have great confidence in our own short-hand reporter, who was on the spot and still survives, and who gives the sentence as follows: "The nodding electors shall vote their tassels to the Sierra forests." The words as given by a Grant delegate, who knew the Colonel as Mr. Dixley, from Calaveras, and who therefore may be depended upon as an impartial listener, are these: "We pine to tree the electoral tassels of the Sierra voters."—*Stock Report.*

J. S. CHILDS is now the Superintendent of the Modock Consolidated mine of Inyo County. All the old indebtedness has been settled. Under the new management has been developed a better condition at the mine. An ore body has recently been opened, the extent of which is not known.—*S. F. Stock Report.*

A PATENT has been issued at Washington for the two tracts of land constituting that portion of the Rancho Agua Caliente, confirmed to Mariano G. Vallejo. The survey as patented contains 1,864 acres, in Sonoma County.

IT appears that the German Government has taken the matter of smoking seriously in hand, the practice being carried to so great an excess by the youth of that nation that it has been considered to have damaged their constitutions and incapacitated them for the defense of their country. In certain towns of Germany, therefore, the police have had orders to forbid all lads under sixteen years of age to smoke in the streets, and to punish the offense by fine and imprisonment. Moreover, a Belgian physician has ascertained, during a journey of observation and inquiry made at the request of the Belgian Government, that the very general and excessive use of tobacco is the main cause of color blindness, an affection which has occasioned very considerable anxiety, both in Belgium and Germany, from its influence upon the railroad and other accidents, and also from the military point of view.

PUBLISHED EVERY SATURDAY, BY

CHALFANT & PARKER.

J. E. PARKER. P. A. CHALFANT.

INDEPENDENCE, CAL.:

SATURDAY, JULY 3.....1880

A SALT LAKE dispatch of June 29th says: The stage from Challis, Idaho, was robbed Saturday night by six convicts who had escaped from the Idaho Penitentiary. There were seven passengers in the coach, five men and two women. They were robbed of all their valuables, amounting to a few hundred dollars, and stripped of all their clothing, being left absolutely naked. In that condition they traveled several miles to the next station, where sheets and blankets were obtained for covering until they reached the Utah Northern Railroad Sunday evening. Some of them arrived here this morning.

A CENSUS enumerator in this city, says the Oakland *Tribune*, was placed in a delicate situation the other day. He is a handsome young man about 22. He called at a house where he found it necessary to go up stairs. The family consisted of an old lady of 70, her daughter and several children. The daughter was sick, and it being desirable not to converse in her presence, the enumerator was taken out into the entry. It was rather dark. Before he commenced his questions the old lady looked around and said: "Isn't this a rather delicate position for us to be placed in?"

A CORRESPONENT of the San Francisco *Chronicle* writing from Washington under date of June 20th, says: "If some Californians of the male gender failed in respect to the sentiments of our people in doing honor to the remains of General Sutter, the State is represented by a lady—Mrs. General Bidwell of Butte County—who alone of her sex followed the remains to the place of departure for interment, after adorning the casket with suitable floral tributes. She will visit Mrs. Sutter at Litiz Lancaster County, Penn., in condolence.

A NEW YORK dispatch, dated June 29th., says: The steamer *Seawanhaka*, the packet between New York and Glen Cove, Long Island, was burned on the sound yesterday afternoon. The fire was caused by an explosion in the engine room. Some forty or fifty people were burned to death or drowned. Many of them were children. Thirty bodies have been recovered. Captain Smith staid at his post until he was fatally burned. He, however, succeeded in beaching the boat, thus saving about four hundred and fifty lives.

THE Candelaria (Nev.) *True Fissur* gives notice that a movement will be made to form a new county out of part of what is now Esmeralda county lying east and south of Whisky Flat, and embracing all the territory in which the towns of Marietta, Belleville, Candelaria, Metallic City and Columbus are situated, and also the mining camps of New Boston, Lone Mountain, Silver Peak, Montezuma, Lida Valley, Palmetto and Fish Lake Valley.

WE suspect it won't be news to much of a multitude to now publish the fact that Gen. Hancock, of Pennsylvania, and Wm. H. English, of Indiana, were duly nominated by the Cincinnati Convention as the Democratic candidates for President and Vice President, but such is the fact, and this our first opportunity to put it on record since the news came to hand.

THE Board of Health of Virginia City, Nevada, after a thorough investigation, has concluded that lettuce, cabbage, and other vegetables that grow above the ground, are rendered unfit for food by sewage irrigation, and that their sale should be prevented, but that roots and tubers are not seriously affected by sewer irrigation.

INTELLIGENCE from Buenos Ayres represents that a battle was fought on the 22d ultimo between the National and the Provincial troops. The latter were routed. The National troops, however, were repulsed in an assault on the city of Buenos Ayres on the 24th ultimo.

A CANTON, Ohio, dispatch of June 25 says: The three boy murderers were hanged here to-day together—G. A. Ohr, George W. Mann and John Lammet. There was no incident of importance connected with the execution. Death was almost instantaneous.

THERE is a rumor afloat that Gen. Ord will take a year's furlough and then go on the retired list, being succeeded by General Schofield, who is now commanding at West Point.

EMORY A. STORRS of Chicago and B. H. Brewster of Philadelphia have volunteered their services as counsel for Cadet Whittaker in case he asks for a court-martial.

BEVERIDGE DISTRICT.

One of the most promising mining districts in the county, if not of the State, is Beveridge, situated on the eastern slope of the Inyo range, easterly, and only some twenty-five miles distant from this place, and about the same from Lone Pine, sixteen miles south of us. The western slope of the range opposite Beveridge, and which slope faces this valley all along here in front of us, viewed from a ten- or fifteen-mile stand point, is a smooth, inoffensive sort of a mountain; and so it is when compared to the opposite face, which comprises Beveridge District. Before speaking of this district in particular, a word in reference to the general topography of this portion of the Inyo Range, and its mineralogical characteristics, may interest mining people.

Directly opposite this town of Independence, in full view and less than twenty miles distant, the Inyo Range is cut down to an altitude above sea level of about 7,500 feet, or 3,000 feet above the level of this valley. On the crest of the mountain, quite near its lowest point of depression, looms up a pinnacle of rock, almost square in outlines, some 40 feet in diameter and a little more than double that in hight; this is a notable landmark known as the "Piute Monument," or "Winnedumeh," and with it are connected various aboriginal legends. It stands very nearly on the 36° 52″ parallel, and 118° west meridian. The trend of the range is pretty nearly northwest-southeast. On either side of this gap the mountains rise to about 10,000 feet. Going southerly four prominent peaks are encountered, and known in the order of occurrence as the New York, Hahn, Freeborn, and Hunter's Peaks, respectively. From the Monument over these peaks, air-line route, it is about 25 miles to Cerro Gordo, at which place the range flattens down to the same altitude as at the Monument, and a few miles further south, ends as a continuous range.

Until recently the prospecting and mining operations proper of the district represented by these peaks, has been confined mostly to the southern flank in and about Cerro Gordo, and along the western slope northerly up to and in Monument Gap, and in the latter section especially, at altitudes not exceeding 1,000 feet above Owens river, coursing south directly at the western base; but now the prospector has received new revelations, and climbing higher and over, finds it more encouraging in so doing than did the luckiest of his predecessors, years ago, even in their hopes. That is to say, wherever he goes on these mountains, whether on their northern and southern flanks, western or eastern sides, he never goes amiss for some one or more of these four leading metals: namely, lead, copper, silver and gold—and the whole list in fairly uniform quantities, high up and low down, in every subdivision of the area covered by these peaks.

For general descriptive purposes, it is enough to say that Cerro Gordo and Swansea districts cover the southern slope of these peaks, the Eclipse the western and northwestern, and Beveridge the whole of the eastern. As mentioned at the outset, this western slope is comparatively smooth; the opposite, which is Beveridge, is made up of four or five lateral cañons, some fifteen miles in length and debouching into Saline Valley, which valley lies more than 1,000 feet lower than this on this side. At its lowest point there is area of full 1,200 acres covered over a foot deep with excellent salt.

Some idea of the ruggedness of this locality may be derived from the following, for which notes we are indebted to Capt. H. H. Buckles, Census Enumerator, who lately visited the district:

From Cerro Gordo, northerly on summit 12 miles to head of Hunter's Cañon, thence down south side of cañon 7 miles to Hughes, Hunter & Co's steam arastras; thence back westerly, rising 3,000 feet, to one of their extraordinarily rich free gold ledges. Thence, in a straight line north it is but two miles across the ridge to the Mexican camp; but, to get there, it is necessary to go down the cañon 12 miles to get into the Mexican Cañon, thence up that the same distance.

From the Mexican camp to Chris Cron's in the next cañon north the distance is six miles across, with a practicable trail over the intervening ridge. But from there to Taylor, McEvoy & Co's arastras, the distances and conditions of travel are almost identical with those between the two camps first named. As a rule the mountain faces on all sides rise above the bottoms of the cañons from 1,000 to 2,000 feet, and so nearly vertical in most places as to be inaccessible to anything without wings.

But they are seamed almost everywhere with exceedingly rich veins, chiefly of free gold. In the four camps mentioned about forty locations have been more or less opened, and, by arastra process, proven to be of unusual richness, with every indication of absolute permanence. There are beyond doubt many more paying ledges yet to be located all through that district, as well as elsewhere on every side of the four peaks constituting the Inyos south of the Monument. Some day full ten thousand men will delve within the shadows of those peaks, for, therein everywhere, mineral of some sort is now to be seen, and some time, if not now, it will all pay to take out.

LETTER FROM MR. WASSON.

The Debris and Drainage Questions—A New Railroad Projected.

BODIE, Cal., June 29.

MESSRS. EDITORS—On my way here I stopped at Sacramento a few hours, where I met State Engineer Hall, who gave me the inclosed report concerning the organization of the first district under the act entitled "An Act to Promote Drainage." You will remember the wrangle over the so-called "Debris Bill," which all who were not directly interested or benefitted considered as a very bitter pill; especially were the members in the Legislature from south of the Sacramento Valley unhappy over the success of the measure. As one from the mining counties, my sympathies were naturally with those engaged in that pursuit, from whatever part of the State they might hail; besides, to have opposed the proposition would have left me without any particular support from any direction. But the fact is, I believed in some such measure in advance, on general principles. You will find Mr. Hall's report extremely interesting and suggestive, although he does not more than hint at all the "Act to Promote Drainage" implies, and that is the utilization of the streams and rivers of the State to the end that the rich soils can be made the most of. As it is, farming is a more precarious business than mining, especially in the San Joaquin Valley. Even now the people of the Sacramento Valley are agonizing over the "north winds" that have prevailed for weeks past, so that they may have yet to fall back on the "Act to Promote Drainage," under which, too, there will sooner or later be redeemed to the State vast areas of the richest soil now overflowed. The bill is a most comprehensive one, and I look upon it as the entering wedge to a system of industrial development only second to those characteristic of northern Italy, southern Ssain and in India, where the people set about helping themselves and providing support for ages untold. Little Holland is a greater example of what a people believing in themselves and the future can accomplish without grumbling. California is a composition of jarring communities, interests and climates, and yet the sooner they settle down to the fact that "the wheel won't turn with the water that's past," and put their united shoulders to the wheel and push it accordingly, the better they will all be off, and their posterity all the better off. I so reasoned with members from the southern counties, doing all I could to impress them with the belief that "their turn would come next." Instead of attempting to repeal the "Act to Promote Drainage," rather strengthen it, and at the same time give a Roland for an Oliver. There is an abundance of water in the mountains for converting the great San Joaquin Valley into the garden spot of the State—a rival to the rich plains of Lombardy. There is water going to waste whereby

OWENS VALLEY

Could be made to support 100,000 people in a very few years to come. Mono County is also destined to feel the "debris question," to some extent, with respect to the Big Meadows and the placer grounds contiguous to Virginia Creek. So, you see, the act to promote drainage is a far-reaching one, and now that all parts of the State are taxed more or less to carry it out, it behooves those less benefitted for the time to ask that some of the water be diverted to their wheel. This would be sound statesmanship, instead of reopening the wounds received at the hands of the majority last Winter. Let the southern counties consider these things in the spirit of give and take, which governs all well-regulated communities the world over, and that they will be met half way there is no doubt. Get all that can be got out of the general government, but cease to depend upon it any time. Self-help is always best, its fruits most enjoyed and enduring.

The report of Surveyor Seeley, on the irrigable lands of Inyo County, reached me a month too late to get into Engineer Hall's regular report to the Legislature, but he took copies thereof for future use. The original map and notes of Mr. Seeley are left with Mr. Hanks, of the State Mining Bureau, where they will be preserved and where any one wishing to obtain information can easily do so.

I have heard it more than hinted that there is a

NARROW-GAUGE RAILROAD

Enterprise evolving from the brains of certain capitalists and influential men, which may be of special interest to Inyo and Mono Counties. It is announced that J B. Haggin, the extensive land owner in Kern County, contemplates the construction of a road from tide water at Antioch to connect with his 300,000-acre farm. In that connection, it is expected that a system of narrow-gauge roads will follow. Leaving the Antioch and Kern line, a road will cross the Sierras either by the Sonora Pass or by way of the north fork of the San Joaquin, entering the head of Owens Valley by the Lake District Pass. Here a branch would extend south, the other extending toward Bodie, Aurora, Austin, Eureka, and eventually to connect with the Utah Southern, thus creating a new overland railroad of great importance to all concerned, as it would directly compete with the Central Pacific. The wood, lumber and timber interests comprehended would be of equal interest to the people of the San Joaquin Valley as to the mining interests to the eastward of the Sierras. It is unnecessary to detail to you the great advantages this enterprise would vouchsafe to the people of Inyo and Mono, California, and Esmeralda, Nevada. Those who contemplate the construction of it claim that the altitude and snow of the Sierras need be no serious obstacle; that the policy would be to follow the highest ridges and avoid snow and land slides, roofing the track where otherwise required. Such an enterprise would enable a hundred mines to be worked where one is now on the eastern side of the main range, and build up farms and homes in proportion.

Truly, etc. JOS. WASSON.

The Other Side of the Story.

It is with regret that we say that the bulk of the testimony we have collected does not warrant any extensive emigration from Leadville to Gunnison.

Our information is confined to three districts, the Gunnison-Pitkin country, the Hillerton-Virginia country, and the Roaring Forks-Aspen country, and it is of these alone we can speak.

Of the first, the country around Gunnison City and Pitkin, we have a few vague statements of mineral finds, but the great mass of testimony is to the effect that there is nothing of any great value in that neighborhood—nothing, at least, which has yet been discovered.

Of the second, the country immedtately west of Alpine, in which are included the towns of Virginia and Hillerton, which were all the rage last year, it must be said that there are the Tin Cup group of mines, now belonging to the Bald Mountain Mining Co., of New York. These mines shipped last year small quantities of ore which ran over 100 oz. of silver to the ton. Whether there was enough of this ore to pay expenses we cannot tell. Whether the other mines adjacent to the Tin Cup group shipped any pay ore we are not informed. But from the exodus from Hillerton and Virginia to camps further west we are inclined to fear that the mines in that section offer but slight show of immediate pay.

The main rush now is to the Roaring Fork-Aspen district, and, from all we can learn, this is mainly promoted by speculators in town lots. There is undoubtedly plenty of mineral on the banks of the Roaring Fork. But how does it run? On that point we can obtain no satisfactory information. Specimens running high in silver have been produced and assayed. But a specimen is not a mine. And an ore which would be valuable at Leadville may be absolutely worthless at Roaring Fork where no smelters are in blast, or where, if they blow in, they will have to charge for working more than twice the Leadville price.

On the whole judging from present appearances—which may be altered any day by new developments and new evidences of facts—we judge that it will be time enough to go prospecting in the Gunnison next year. Meantime, the northern part of the Ute Reservation seems a more profitable gamble.—*Leadville Circular.*

ONE of the natural peculiarites of this country is an alkali grass which takes all the hair off of an animal. It is found on Steamboat creek south of Mrs. Gates' ranch. A horse or cow that runs there a month or so loses every bit of its coat. An old horse that has been running there has haunted the Virginia road in the vicinity of Brown's station a week or so. He is not naked yet, but soon will be. A little hair sticks on the side of his neck, a few stragglers around the root of his tail, a half a dozen in one ear, and a few other spots remain. His stumpy tail is as bare as a billiard ball, and looks like the butt end of a leather whip. The mane is all gone and the heavy skin stands up a corrugated ridge. The skin is brown and looks like that of an elephant. A hairless horse is a funny looking beast.—*Reno Gazette.*

THE Treasury authorities are in the cave of gloom because the only original cheap money people, the counterfeiters, are producing in large numbers greenbackacks and national bank notes which defy detection. Indeed, the sole difference between the bogus and genuine is that the former are more artistic, and, in many respects, better specimens of the engraver's skill. The $100 counterfeits now in circulation are so perfect that many experts have been deceived by them, and they have been floated so adroitly that the Secret Service officers have not been able to obtain the slightest clue as to their authors. It is proposed to call in all the $100 bills, and to ask Congress, next Winter, to authorize a new issue of bank and treasury notes.—*Chicago Times.*

THIS pumping on the Comstock is a costly business. A good rod of Oregon pine 16x16 inches, strapped as some of them in use are, with wrought iron straps 14 inches wide, and from half to an inch thick, placed on two sides and bolted every foot, will cost over $1,000 per 100 feet. All this expensiveness is a strong argument in favor of hydraulic pumps which will operate without rods, and with less machinery and fuel. —*Gold Hill News.*

OUT of the 900 miles of gold fields in the Black Hills, it is claimed by the *Pioneer* that the developments have been almost entirely within an area of three or four square miles, near Deadwood at the northern extremity of the field. This small section, within the the third year of its systematic operation, shows a monthly yield of some $500,000.

A WISCONSIN clergyman preached on the sin of transacting money matters on Sunday, and when the deacon passed the contribution plate not a person would put a cent in it. And somehow the preacher didn't feel flattered at the effect his sermon had.

IT is the easiest thing in the world for the man who goes on foot to have and to hold a spite against the man who rides in a carriage. They never think of his back aches, horse shoeing and carriage repairs.

A PROMINENT writer on rhetoric says: "A new word learned and correctly used is an acquirement to be proud of." The usufruct of this bioplasm lies in the differentation thereof.

THE Atlantis (Montana) smelting works shipped, June 1st., 184,000 pounds of bullion.

A PLEASANT reflection—a pretty girl's face in a glass.

ALL SORTS.

Two Moonshiners were killed in Georgia, a few days since, while resisting revenue officers,

During the twelve months ending May 31st the excess of exports over imports in the United States was $80,162,183,693.

The funeral of Gen. Sutter at Litiz, Pa., June 24, was a very imposing affair, and largely attended.

The Texas Greenbackers have nominated W. H. Hannon for Governor.

The English House of Lords has rejected the bill legalizing marriage with a deceased wife's sister.

Rev. De Witt Talmage is coming to California this month.

Six thousand of the Communists transported in 1871 have returned to France.

A Milwaukee physician has begun the trial of fasting forty consecutive days, under the supervision of a committee of physicians.

A portion of Portland, Or., is flooded and the river rising rapidly.

The internal revenue receipts for the year ending June 30th, will be $123,000,000—an increase over last year of $10,000,000.

Upwards of forty thousand depositors are concerned in the dividends about to be declared by the savings banks of California for the term ending June 30th, 1880.

The trosseau for Miss Jennie Flood, who is to be married early in November, has been ordered from Paris.

On the 13th and 14th of July will occur the annual meetings of most of the railroad companies operating in this State. Fifteen distinct organizations are to hold their election on these days.

There are 38 Masonic Lodges in Washington Territory, representing something over 1,000 members, St. John's of Seattle being the largest, it having 80 members.

A spear, two feet long, used by ancient Mexicans, and made of steel, gold, silver and copper, was found by L. Huff, near Wheatland, Yuba County, recently, who plowed it out of the ground.

The Chinese of Nevada City seem determined to rebuild their quarters right on the ashes of the burnt district. To this action the City Trustees and citizens seriously object.

The ladies' brass band of Albany, Or., is composed of twelve members, the foremost young ladies in the city in social standing and intelligence. The instruments used by this band cost $350.

The Western Union Telegraph Company have finished the work of stringing a new wire from Los Angeles to Tucson, A. T. The distance of 500 miles has been put up in the exceedingly short time of a little over 50 working days.

The San Leandro *Reporter* tells of a Chinaman who proposed to a white girl at that place, and the female smiled on the oblique eyed sinner just affectionately enough to get sundry small presents out of him, and then gave him the sack.

In Harshaw, A. T., one of the curiosities of the camp is a California Indian who is doing some extensive contracting for building, and, in addition to making a good deal of money, is showing himself to be intelligent, industrious, shrewd and in every way capable of competing with the paleface.

THE Gilboa (N. Y.) *Monitor* makes the following sensible remarks for the benefit of young people who are working their way: A young man "that works for his board," no matter what honest work he does, has no reason for shame. A young man who eats the bread of idleness, no matter how much he has, is disgraced. All men starting in life ought to aim, first of all to find a place in which they can earn their bread and butter, with hoe, axe, spade, wheelbarrow, currycomb, blacking-brush—no matter how. Independence first. The bread and butter settled, let him perform his duty so faithfully as to attract attention, and let him constantly keep his eye open for a chance to do better.

About half the poor, proud young men, and two thirds of the poor, discouraged young men, are always out of work. The young man who pockets his pride and carries a stiff upper lip, need not starve, and he stands a chance to become rich, if he cares to.

THE sugarie now being erected near Florence by Messrs. Nadeau & Gennert will soon be ready to be set in operation. The supply of beets is ample to keep it running several months, and the saccharine quality of our beets has been ascertained by analysis to be above the general average elsewhere. Those who have paid close attention to all the various stages of this new industry here, are thoroughly convinced that it will prove very remunerative and successful. The twelve hundred acres of sugar beets grown in this county this year will swell to twelve thousand next.—*Los Angeles Express.*

A TERRIBLE accident occurred near Hanford a few days ago. A little girl in her fouth year, only child of the late M. C. Hart, who was killed during the recent Mussel Slough troubles, was very badly if not fatally burned. It appears she had matches in her pocket and was swinging, and it is supposed the friction of the rope ignited the matches. Her clothing was light, and burned upon her. There is no hope of her recovery.

SOME Chinamen, mining at Texas Bar, a short distance above Chile Bar bridge, Placer county, a few days since struck an old tunnel in which they found the bones of a man long since dead. They gathered up the bones and threw them into the river. Near the spot where they lay, however, they took out some $500 worth of gold dust.

LANDLORD (who, rubbing his hands together gleefully, comes up to his guest at breakfast)—"Well, sir, how do you like your sausage?" "It is dog-gone fine," said the guest. "Dog-gone fine!" said the landlord, slowly. Then his face sobered down and turned several colors before he exploded.

Cullings.

Its never too hot for billiard balls to freeze.

GUARDIANS' SALE OF REAL ESTATE.

NOTICE IS HEREBY GIVEN, THAT IN pursuance of an order of the Superior Court of the County of Inyo, State of California, made on the Thirteenth day of June, 1880, in the matter of the Estate of William Lewis and Timothy D. Lewis, minors, the undersigned, Guardian of the person and estate of William Lewis and Timothy D. Lewis, will sell at private sale, to the highest bidder, for cash, U. S. gold coin, and subject to confirmation by said Superior Court, on THURSDAY, the TWENTY SECOND day of JULY, 1880, at 10 o'clock P. M., all the right, title and interest of the said minors in and to all those certain lots, pieces or parcels of land situate, lying and being in the said county of Inyo, State of California, and bounded and described as follows, to wit:

An undivided one-half interest in and to the southwest quarter section number twelve (12), and the north half of the northwest quarter of section number thirteen (13), all in Township No. seven (7) South, of Range No. Thirty-two (32) East, Base and Meridian Mount Diablo.

Terms and Conditions of Sale: Cash, U. S. gold coin. Deed at expense of purchaser. Bids and offers may be made at any time after the first publication of this notice, and before making of the sale. All bids or offers must be in writing and left at the office of Messrs. Reddy & Conklin, Independence, Inyo County, California.

GEORGE L. LEWIS,
Guardian of the Persons and Estates of William Lewis and Timothy D. Lewis, minors.

INYO INDEPENDENT.

INDEPENDENCE, CAL.:

SATURDAY, JULY 3.....1880

SURPRISE PARTY.—A Lone Pine correspondent says: "Miss Eva Shepherd was the recipient of a farewell surprise party on the night of Friday last; the party arriving at the residence of Mr. Shepherd at about 9:30 in the evening. All was dark—but as the air was filled with song and laughter, it was manifest that the arrivals constituted a surprise party. Soon the house was lighted up, and after the teams were put away, dancing was indulged in until 12 o'clock, when there was a fine supper in waiting for the party; after which Miss Eva Shepherd favored with some selections on the piano accompanied by Mr. Edward Shepherd on the violin. Then dancing was resumed and kept up until after daylight in the morning, when the party took their leave. The following named persons were present: Mr. and Mrs. Shepherd, Mr. and Mrs. Harvey, Mrs. Stuart, Mrs. W. L. Hunter, Mrs. Wimple, Eva Shepherd, Luella and May Shepherd, Louisa Joslin, Minnie Lasky Ida McCall, Addie Frasier, Lilla Holland, Emma Duval, Edward Shepherd, Manley Conkrite, Henry Mack, Ed. Steers, Mike Lasky, Geo. Gregory, F. M. Drake and Mark Hoff."

SUNDAY SCHOOL REPORT.—Mrs. F. M. Willis, Superintendent, furnishes us the following encouraging report of the Independence Sunday School, the most flourishing strictly moral institution we have yet had—a fact due more to the peculiar fitness and unselfish zeal and persistence of its Superintendent than to any other one person, though, as stated below, others have rendered valuable aid. For the three months' term ending June 27, the total attendance amounted to 496, giving an average of 36 for each Sabbath; largest attendance at any one time, 46; smallest (June 25th), 25. The average for the five months since the school was organized is 26; whole number of names enrolled, 59. Mrs. Willis concludes her report as follows: "Thanks are due Mrs. M. Q. Parker and Miss Maggie Graham for strict attendance and faithful teaching."

TEACHERS' CERTIFICATES.—As there is not a sufficient number of legally qualified teachers now in the county to supply all the districts, we may remind Trustees and all concerned, that under the law and by order of the County Board of Education, the County Superintendent is empowered to grant temporary certificates to the holder of any certificate in force, State or County, granted within this State, and upon such other certificates or diplomas as entitle the holder to a certificate without examination; but such temporary certificate holds good no longer than till the next succeeding regular meeting of the Board, which will be in November next.

A BIG GLIM AT LONE PINE.—About 10 o'clock last Sunday evening the large livery stable belonging to J. G. Dodge, located on one of the principal corners of our neighboring town of Lone Pine, was discovered to be in flames, which soon enveloped and entirely consumed the building and connecting fences. It was only by the most strenuous exertions that the buggies and vehicles were saved. The buildings on the opposite side of the street had a close call, and were only left standing by a liberal application of wet blankets. The property was uninsured and the loss falls severely on Mr. Dodge.

FOURTH OF JULY DANCE.—In default of any more elaborate Fourth of July observances, arrangements have been made for a ball to take place in the Court House next Monday evening. Responsible parties are in charge, and will do all their power to make it a most agreeable affair. The assessments will be $1 50 per share of the capital stock—that is, we mean per couple, or so much thereof—of the $1 50, not the couples—as may be necessary to satisfy the demands of three good musicians, that and nothing more. A cordial invitation to everyone to attend.

A SALE.—Dr. Cottrell, who paid a visit of mine inspection to this county some six months ago, has effected a sale in New York of some mining property in Swansea District, belonging to Reub. Speers, Ed. Steers and others of Lone Pine, for the sum of $3,000. The new owners are expected along shortly.

PREACHING.—Rev. F. M. Willis will hold divine services in this place tomorrow evening as usual, and at the Post on Tuesday evening. He also desires to give notice that he will preach at Bishop Creek on Sunday evening, July 11.

LIST OF LETTERS.—Following is a list of unclaimed letters remaining in the Post Office at Independence, July 1st, 1880: G. S. Gilbert, Sen., Thomas Johnson, John Martin, C. Margra, Wm. W. Penman, Lolo Sefton.

SAD.—On this anniversary of the murder of Inyo's beloved Sheriff, Wm. L. Moore, it is sad to think that one of his most trusted officers at that time to-day lies in a new-made grave at Darwin. Death by violence!

CROWDED OUT.—Quite a number of Bishop Creek and Deep Spring Valley notes, received too late for this issue, are necessarily left over for next week.

DEMOCRATS of Independence and vicinity are requested to assemble at the Court House on Wednesday, July 7th, 1880. See adv.

JEWELER.—See elsewhere the advertisement of C. McVicar, jeweler and watchmaker at Bishop Creek, which speaks for itself.

New P. M.—Sam'l W. Cowles has received the appointment of Postmaster at Cerro Gordo.

REBUILDING.—V. Hoff & Son will immediately rebuild their store at Cerro Gordo.

Proceedings of the County Board of Education—First Semi-Annual Session.

Pursuant to order of meeting of organization, held May 17, the County Board of Education met in first semi-annual session on Monday, June 28.

Present—S. W. Blaisdell, Daniel Crough, P. A. Chalfant and County Superintendent J. W. Symmes. A. R. Conklin, Chairman, being absent, Chalfant was elected Chairman, pro tem.

Report of Committee on Rules of Examination considered and adopted as read.

On motion, the consideration of the text-book question, the appointed order of business, was postponed to 8 o'clock A. M. of the following day.

Crough and Blaisdell were appointed a Committee to prepare test questions for applicants for certificates. Adjourned till 8, A. M., Tuesday, at which time Board again met, all the members present, Conklin in the Chair.

Minutes of preceding meetings read and approved.

Committees appointed: Symmes, Conklin and Chalfant on Certificates and Diplomas; Blaisdell and Crough to conduct Examinations of Applicants; the Board as a whole on Text-Books.

The Secretary, as a Special Committee, appointed at the original meeting, to procure official seal, stationery, etc., reported the required articles ordered in due time but not yet received.

A full set of questions were submitted, considered in detail, and approved as read. In accordance with this, it was ordered that no applicant should be granted a certificate who fell short of 60 per cent. of correct answers in any or either of these three studies: namely, spelling, arithmetic and grammar.

Also, that the minimum of the same for the whole course, as hereinafter specified, should be—for a second grade certificate, 80 per cent.: first grade, 85 per cent.

Questions, credits, etc.—Spelling, 25 words, 4 credits each: grammar and arithmetic, each 10 questions of 10 credits each; geography, composition, reading, theory and practice, penmanship, word analysis, history and reading, each of 10 questions of 5 credits each; mental arithmetic and oral grammar, each 10 questions of 2½ credits each, comprising the second grade list.

Algebra, Music, Drawing, Natural Philosphy, Physiology, School Law, Book-keeping and National and State Constitutions, added to the above, constituted the first grade list, but no examinations were asked for in these.

Daniel Crough and S. W. Blaisdell each submitted State Diplomas, and upon favorable report of the Committee, first grade certificates were awarded to both applicants.

At 10 o'clock the examination of applicants was taken up. The candidates present were: Miss J. Viola Howell and J. H. Shannon for first grade, and Edward Shepherd and Henry C. Rittgers for second grade.

Following are the exercises as submitted, in which a minimum was fixed:

25 TEST WORDS IN SPELLING—4 CREDITS EACH.

Separate, mortgage, paralelled, acoustics, subpœna, Cincinnati, plaguing, privilege, moneys, benefited, hygiene, aggregate, tattoo, indelible, sulphurous, militia, exaggerate, preparation, assassinate, San Joaquin, villainy, ecstasy, auxiliary, prejudice.

GRAMMAR—10 QUESTIONS, 10 CREDITS EACH.

1. Name and define the divisions of English grammar.

2. Decline the following: Thou, who, which, that, I, it, boys, George.

3. (a). Write the present tense, past tense and past participle of the following verbs: Ride, catch, eat, ring, dive, sit, work, dig. (b). Name and define the different kinds of participles.

4. Write three important rules of orthography, and give words to illustrate each.

5. (a). Analyze the following sentence: "To dig potatoes *is* not the *work of* an *imbecile*." (b). Parse the italicized words.

6. (a). Write the feminine of the following: Man-servant, stag, Abbot, hero, bachelor, administrator. (b). Write the plural of the following: Vortex, calf, folio, wharf, child, brother, die, louse.

7. Correct the following and state reasons: "It was him that said it." "Is there any bears where you live?" "Hand me them tongs." "I can jump twenty foot."

8. (a). Give three ways in which a noun or a pronoun may be in the nominative case, and illustrate. (b). Define an adverb, a preposition, a collective noun, and a compound adjective.

9. (a). Give a synopsis of the verb "lie" (to recline), interrogative form, third person singular, indicative mood. (b). Define mood and tense.

10. (a). What is punctuation, figure, a simile? (b). What is scanning, a poetic foot, and how many kinds of feet are there commonly used in poetry?

ARITHMETIC—10 QUESTIONS, 10 CREDITS EACH.

No. 1.—Invested $3600 in Inyo County Warrants at 90 per cent. What is my total gain and what per cent. do I make on the investment if said warrants bear 7 per cent. interest and are paid in one year?

No. 2.—Write the general principles of Division. Illustrate by an example.

No. 3.—Define factors, power, root, ratio, common denominator; the difference between a common fraction and a decimal.

No. 4.—Two vessels sail from the same port, one going due south 360 miles and the other due east 250 miles. How far apart are they?

No. 5.—Reduce 3 qts. 1 pt. 3 gills to the fraction of a gallon. *B.*—Reduce 1.0055 tons to pounds. *C.*—Reduce 3 qts. 1 pt. 1 gill to the decimal of a gallon.

No. 6.—What must be the hight of a pile of wood 28 feet long and 14 feet wide to contain 49 cords?

No. 7.—Bought peaches at the rate of 3 for 4 cents and sold them at the rate of 2 for 3 cents; if I gain 50 cents how many peaches did I sell? *B.*—What per cent. is made on the investment?

No. 8.—If by selling an article at a profit of 10 per cent. I gain $15 at what price must it be sold to gain 25 per cent.?

No. 9.—What will be the cost of fencing a quarter section of land in the form of a square with a 4 board fence, the boards being respectively 10, 8, 6 and 4 inches in width (no allowance for posts), at $40 per M.?

No. 10.—Sold 2 cows for $96; on one I lost 25 per cent., and on the other I gained 25 per cent. Did I gain or lose on both, and how much?

The foregoing occupied the time until 6 o'clock P. M., when a recess was taken until 7:30, same evening, at which time the Board reassembled, and took up the text-book matter.

Bids from quite a number of different book dealers and publishing houses were received, but some were not considered for the reason that they did not meet advertised conditions of specific rates of wholesale and retail prices in this county.

No changes were made in the algebra and arithmetic (Robinson's) now in use, neither were they adopted for the ensuing term. The following list was adopted;

Hutchinson's Physiology, Swinton's Word-book, Reed & Kellogg's Language Series, Pacific Coast Readers, Harper's Geography, Model Copy Books, Krusi's Analytical and Sythetical Drawing, Ridpath's History, and the Silver Carol singing book.

In the matter of prices, every school in the county is to be once supplied with readers by even exchange, and such children as have no reader to exchange to have one new one each without cost; thereafter the retail charges are to be; 1st reader, 20 cents, 2d, 35, 3d, 50, 4th, 55, and 5th, 90, with wholesale rates in proportion. Introductory geography—exchange, 30 cents; introductory, 45; retail, 75. School geography—exchange, 60 cents; introductory, 94; retail, $1 50. Silver Carol—40 and 50 cents. History—70 and 80 cents and $1. Physiology—65 and 90 cents, and $1 50. Copy books—9 and 12½ cents. Drawing books—9 and 12½ cents.

Messrs. Shepherd and Rittgers, having fallen short of the minimum percentage in grammar, though standing well in the other studies so limited, withdrew after the Board convened Wednesday morning. At noon on Thursday, the two remaining applicants, having finished second grade course, in which both had attained a margin on the required percentage for that grade, decided not to go on in the first grade exercises, whereupon the examination was closed.

Second grade certificates were granted to Miss Howell and Mr. Shannon.

The third Wednesdays in May and November respectively were fixed upon as the dates for convening in regular semi-annual sessions.

At 4 P. M. the Board adjourned to Wednesday, November 17, of the present year.

ANOTHER SLAUGHTERING.

Wm. F. Welch Killed by Dan. Harkins, at Darwin.

About 7 o'clock last Tuesday evening, the 29th instant, at the town of Darwin in this county, ex-Deputy Sheriff Wm. F. Welch received at the hands of one Daniel Harkins two horrible knife wounds, from which death ensued on the following morning. In the absence so far of any official papers in the case we can only give such details of the affair as learned from Under Sheriff Moore, who came through Darwin the day following the occurrence, and from Deputy Sheriff Martin Mee, who was there at the time and who last evening brought the slayer in and lodged him in the county jail. The prisoner Harkins, it seems, has been a resident of Darwin some six or eight months, having arrived there from Bodie or Lake District shortly after the death of his sister's husband, one Morrissey. Since then Harkins has acted as bar-keeper and general assistant to Mrs. Morrisey in her restaurant and saloon. Some time during the day of and previous to the fatal encounter Welch heard an angry altercation going on in the house between Harkins and his sister, and stepped in to interfere. The woman placed herself between the two men and gave Welch to understand that they could settle their own affairs, whereupon Welch walked away. About sundown, as Harkins was sitting on a low step in front of the house, Welch came up and either struck or slapped him on the side of the head. Harkins must have instantly used his knife—a heavy, seven-inch blade—striking upward and inflicting two terrible gashes across and down Welch's abdomen. Further details as to the immediate occurrence cannot be given in this issue. Harkins declines to be interviewed until after obtaining counsel. Harkins was immediately taken into custody. A statement was obtained from the dying man, and after he had passed away on the following morning, Justice C. H. Lander held a

CORONER'S INQUEST,

Which resulted in a verdict that the deceased came to his death at the hands of Daniel H. Harkins, and the opinion of the jury was that the homocide was justifiable. The prisoner was set at liberty, but was soon re-arrested by Deputy Sheriff Mee, upon a complaint sworn out by Frank Welch—brother of deceased—charging him with the crime of murder. Harkins was taken before Justice Lander again, and, waiving examination, was committed to the county jail without bail.

WILLIAM FRANCIS WELCH,

The murdered man, was a native of New York, and at the time of his death 39 years of age. He was set down as a moulder by trade, but for many years in California he has best known and distinguished as a peace officer—policeman, Constable and Sheriff. He was a man of no bad habits, utterly and absolutely fearless, of great personal prowess and perfect contempt for any kind of danger. He was a stannch friend and a bitter enemy, going to the fullest length in exercising the functions of either. He was a leading peace officer in the flush and troublous times of Darwin, where he incurred the deadly enmity of a certain class—the prediction having been often made that at some time he would there meet with violent death. Whether or not a trial of Harkins will show that his deed was justifiable under the immediate circumstances, the bad blood between the parties originated some other time. In his official career at this place, with Sheriff J. J. Moore, "Billy" Welch, as he was familiarly called by everybody, enjoyed the confidence and strong endorsement of our leading citizens and every friend of law and order, upon whom the sad news fell with shocking force. The deceased leaves a number of relatives on the coast, including two brothers and a sister, Mrs. Geo. H. McCallum, now residing in San Francisco.

CASES SET.—Henry M. Isaacs vs. Nathan Rhine and Henry M. Isaacs vs. Isaac Harris were set for trial on Monday, September 6th, 1880.

CANDELARIA ITEMS.—Messrs. Haines and Bell were in town last Wednesday viewing the ground and possibilities of extending their telegraphic line from Aurora to this point and Columbus. The citizens contributed liberally toward the enterprise and the promoters assure them that inside of sixty days the line will be in working order to this place. This will be good news to many of the business men and mines of this district, and will facilitate business with the outside world and bring the people of Candelaria within reach of the stock and other markets with which they have dealings, and place them in position to operate with rapidity and profit.

THE steam wagon has finally arrived at Columbus. It came early this week. As a huge, unwieldy piece of machinery it is a success. What its speed or power on the road amounts to are matters of conjecture. Arrangements are on foot for securing the steam wagon to take part in the Fourth of July procession in this town. If they are successful, it will be quite a novelty and feature of the celebration.—*The True Fissure.*

POURING IN.—Prospectors, visitors, mining experts and capitalists are pouring in upon us like a snow-slide. There is a continuous procession of buggies, wagons, horsemen, pack-mules and pedestrians coming up the cañon, and every secluded nook and dell adjacent to the creek is a camping-place of new arrivals. A man with a "biled" shirt on is at once set down as a bloated capitalist from Bodie, and an "expert" is generally known by his brassy stare and general aspect of imbecility. Lundy in the evening looks like the camping ground of an army. Fires twinkle and glimmer among the grand old pines, while the weary prospector wrestles with gutta-percha hog-meat and windy beans, or deftly flips the toothsome slapjack. Tents and brush shelters signify that their occupants have been decently reared; the middle class bivouac on the lee side of a log, while the real hearty old mountaineer curls himself up on a granite shelf and snores the bull-frogs out of countenance. Nights are just cool enough to render a pair of blankets necessary, so that sleeping in the open air is no hardship. Without fear of contradiction we assert that the climate of Lundy at this season of the year is incomparable. But it's a holy terror in Winter, we should remark.—*Homer Index.*

A SERMON should never be so short that the women will not have time to take fashion notes.

MINING.

ASSESSMENT NOTICE.

KEARSARGE MILL AND MINING COMPANY.

Location of Principal Place of Business, San Francisco, California.

Location of Works, Kearsarge Mining District, Inyo County, California.

Notice is hereby given, that at a meeting of the Board of Trustees, held on the Seventh day of June, 1880, an assessment (No. 5) of Fifteen Cents per share was levied upon the capital stock of the corporation, payable immediately in United States gold coin, to John Calvert, the Secretary, at the office of the Company, northwest corner of Fourth and Howard streets, San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the TWELFTH day of JULY, 1880, will be delinquent, and advertised for sale at public auction, and unless payment is made before will be sold on MONDAY, the NINTH day of AUGUST, 1880, to pay the delinquent assessment, together with costs of advertising and expenses of sale.

JOHN CALVERT, Secretary.

OFFICE—Northwest corner Fourth and Howard Streets, San Francisco, California. n521td

NOTICE OF FORFEITURE.

TO HENRY DUNLAP, CO-OWNER:

You are hereby notified that the undersigned have expended the sum of Six Hundred Dollars in labor and improvements upon the Trade Dollar mine, situate in the Pine Mountain District, County of Inyo, State of California, being the amount of expenditures required to be made and done for the year 1879, in order to hold said mine under the provisions of Section 2324 Revised Statutes of the United States. And if within ninety days after the expiration of the publication of this notice, you shall fail or refuse to contribute and pay your legal proportion of such expenditure as co-owner, your interest in said mine or claim will be forfeited and become the property of the undersigned, as provided for under section 2324 of the Revised Statutes of the United States.

THE BEST PAPER. TRY IT!

BEAUTIFULLY ILLUSTRATED.

35th YEAR.

The Scientific American.

THE "SCIENTIFIC AMERICAN" IS A large, First-Class Weekly Newspaper of Sixteen Pages, printed in the most beautiful style, *profusely illustrated with splendid engravings* representing the newest Inventions and the most recent Advances in the Arts and Sciences; including New and Interesting Facts in Agriculture, Horticulture, the Home, Health, Medical Progress, Social Science, Natural History, Geology, Astronomy. The most valuable practical papers, by eminent writers in all departments of Science, will be found in the Scientific American.

Terms, $3 20 per year; $1 60 half year, which includes postage. Discount to Agents. Single copies, ten cents. Sold by all Newsdealers. Remit by postal order to MUNN & CO., Publishers, 47 Park Row, New York.

PATENTS. In connection with the SCIENTIFIC AMERICAN, Messrs. MUNN & Co. are Solicitors of American and Foreign Patents; have had 35 years experience, and now have the largest establishment in the world. Patents are obtained on the best terms. A special notice is made in the SCIENTIFIC AMERICAN of all inventions patented through this Agency, with the name and residence of the Patentee. By the immense circulation thus given, public attention is directed to the merits of the new patent, and sales or introduction often easily effected.

Any person who has made a new discovery or invention, can ascertain, *free of charge*, whether a patent can probably be obtained, by writing to MUNN & Co. We also send *free* our Hand Book about the Patent Laws, Patents, Caveats, Trade-Marks, their costs, and how procured, with hints for procuring advances on inventions. Address for the Paper, or concerning Patents,

THE ENGINEERING and MINING JOURNAL.

PUBLISHED WEEKLY.

DEVOTED TO

Mining, Metallurgy, Engineering and Science.

RICHARD P. RICHTHWELL, C.E., M.E., ROSSITER W. RAYMOND, Ph.D., } Editors.
WILLIAM H. WAHL, Ph.D., Department of Progress in Science and the Arts.

IT IS AN ACCEPTED AUTHORITY ON ALL questions relating to the great mining industries of the country. It is the oldest publication of its class in America, thoroughly independent; being of the trade and not in it, occupies a just and impartial position, which enables it to advise and teach without fear or favor. It devotes much space to questions bearing upon economical management of mines, and from time to time illustrates the more important improvements in mining machinery and engineering methods. Special attention is given to reliable mining news from all parts of the country, which is gathered by an efficient corps of correspondents in every section, and from an extended exchange list. The metal and ore markets, and gold, silver and miscellaneous stocks are reported and commented upon weekly by experienced financiers, who are unbiased by private interests, and upon these matters it is accepted as a reliable guide and unfailing instructor. Gives statistics of production of coal and iron, and of our great gold, silver and other mines. Its scientific notes are an epitome of the latest researches, its trade reports full, and its editorials sagacious and comprehensive. It enjoys the widest circulation and greatest influence of any journal of its class in the world; its patrons and readers comprising the most select and intelligent men in every quarter.

Subscription, $4 per year, in advance; 10c., single copy.

Trouble Among the F. & A. M's.

A difficulty that has been brewing for the past five years between the Masons of the Grand Lodge of New York State and the Grand Lodge of Connecticut, respecting a question of jurisdiction over members, has recently reached a crisis, culminating in an edict from Jesse B. Anthony, Grand Master of New York, interdicting and forbidding all intercourse with Connecticut Masons, who are to be excluded from New York Lodges.

The origin of this difficulty arose in 1872, when Wm. W. Knight and Ralph K. Woodward, members of Webotuck Lodge, No. 480, in Millerton, Duchess county (N. Y.), petitioned the Connecticut authorities for a new Lodge at Sharon (Conn.), a charter having been granted in 1873. Knight and Woodward became members of the new Lodge, although the latter resided in New York State. In 1874, notices were served upon these members by Webotuck Lodge that they were more than two years in arrears for dues, and it was then first learned that they claimed to be members of the Hamilton Lodge at Sharon, under the jurisdiction of the Grand Lodge of Connecticut, and were by virtue of signing the petition, absolved from allegiance to the Webotuck Lodge. In 1875, the matter was laid before the Grand Lodge of New York, at its annual communication in June. The Connecticut Lodge considered it in January, 1877, and ordered the payment of the dues, but only up to the date of the charter of the Lodge at Sharon, at which time it was decided the membership of the two men in Webotuck Lodge was severed. The effect of this decision was held in New York to amount to a claim "that the Grand Lodge of Connecticut might legally enter the State of New York, and in a manner to be prescribed only by its own will, deprive Lodges working under the Grand Lodge of the State of New York of their members, without their knowledge or consent."

In this shape the question has come up before the New York and Connecticut bodies at their annual communications nearly every year, New York freeing its mind in June, Connecticut responding in January, the representations of neither having any effect to change the position of the other. Grand Master Edmund L. Judson, in his address to the New York Masons in 1879, said there was little hope of any different course on the part of Connecticut, and called upon them to say whether they would allow the matter to drag along as it has been doing, or would take definite action. Nothing was then done; but the Committee on Jurisprudence of the Connecticut Grand Lodge, having, in January last, made an exhaustive report on the case, affirming the complete justice of the course pursued by Connecticut in the premises, Grand Master Charles Roome, in his address to the New York Lodge this month, just before he retired from office, made a final communication on the subject suspending official intercourse with Connecticut. A Committee was appointed, which reported resolutions approving his action, and recommending the interdiction of all intercourse between members. In accordance with this action the edict referred to was issued June 10th by the new Grand Master, Jesse B. Anthony, of Troy.—*New York Herald.*

QUITE a novelty in metallurgy is reported to be one of the features of a new chlorination process, and consists in the separation of the gold by filtration through, or agitation with charcoal (or bone black). The gold is thereby reduced from its solution and precipitated in its metallic state on the surface of the charcoal, coating the fragments with a brilliant film of gold. This singular phenomenon seems to be a physical and not a chemical action.

Origin of the "Dark Horse."

Many years "befo de wah" there lived in Tennessee an old chap named Sam Flynn, who traded in horses, and generally contrived to own a speedy nag or two which he used for racing purposes whenever he could pick up a "soft match" during his travels. The best of his flyers was a coal-black stallion, named Dusky Pete, who was almost a thoroughbred, and able to go in the best of company. Flynn was accustomed to saddle Pete when approaching a town, and ride him into it to give the impression that the animal was merely a "likely hoss," and not a flyer. One day he came to a town where a country race meeting was being held, and he entered Pete among the contestants. The people of the town, not knowing anything of his antecedents, and not being overly impressed by his appearance, backed two or three local favorites heavily against him. Flynn moved quietly among the crowd, and took all the bets that were offered against his nag. Just as the "flyers" were being saddled for the race, old Judge McMinamee, who was the turf oracle of that part of the State, arrived on the course, and was made one of the judges. As he took his place in the stand he was told how the betting ran, and of the folly of the strange entry in backing his "plug" so heavily. Running his eye over the track, the Judge instantly recognized Pete, and he said:

"Gentlemen, there's a dark horse in this race that will make some of you smell brimstone before supper."

The Judge was right. Pete, the "dark horse," laid back until the three-quarter pole was reached, when he went to the front with a rush, and won the purse and Flynn's bets with the greatest ease. Ever after that the horsemen of the vicinity fought shy of "dark horses," and it would be well if political parties would do likewise.—*Cincinnati Enquirer.*

IN a recent case in the Superior Court of Nevada County, involving the question as to whether a Chinaman can convey title to mining ground, Judge Caldwell decided that under the Revised Statutes of the United States an alien cannot hold, by occupation or purchase, mineral land previous to patenting. If this decision should be sustained by the higher Courts, it will disturb the possessory title to many mining claims, where held by aliens in personal possession, or by foreign companies who are owning and working mines that have not been patented. The decision is based on Section 2319 which reads as follows: "All valuable mineral deposits in lands belonging to the United States, both surveyed and unsurveyed, are hereby declared to be free and open to exploration and purchase by citizens of the United States, and those who have declared their intention to become such, under regulations prescribed by law, and according to the local customs or rules of miners in the several mining districts, so far as the same are applicable and not inconsistent with the laws of the United States."

THERE is at present a gap of 300 miles between the advance construction party on the Southern Pacific Railroad and that of the Atchison, Topeka & Santa Fe Company. This gap of 300 miles, at the present rate of building by the two companies will be closed up by the end of January, 1881. This means a new route to the East, the one by the Southern Pacific and Atchison, Topeka & Santa Fe, running through Arizona, New Mexico and Colorado. The Atchison road is at present completed to Socarra, a point fifty-seven miles south of Albuquerque. This road passes diagonally from northwest to southeast through the vast and rich region of mineral country embraced in the limits of Kansas, Colorado and New Mexico. The Southern Pacific will connect with the Atchison beyond the western border of Arizona. These Territories are rapidly filling up, and the railroad will enable our merchants to contend on even terms for the trade to the extent at least of the Southern Pacific road.

STEPHEN ALLEN was so ill at Jacksonport, Miss., that he could hardly stir in in bed, when he was told that Henry Melville was on his way there to kill him. Melville was known to be desperate and vindictive, and there was good reason to fear that he would carry out his threat. Allen told his young son to stand at the door and endeavor to dissuade Melville from his purpose. The boy begged the assassin not to murder a defenceless invalid; but he forced his way in, drew a knife, seized the sick man by the throat, and raised his weapon to strike. Just then Allen feebly protruded a pistol from under the bedclothes and shot his assailant dead.

WHAT with dams and other obstructions, complains the Truckee *Republican*, and a few more fish-traps, the Truckee river will soon be cleared of fish entirely. The *Republican* might have mentioned giant powder cartridges in the same connection. We suppose that very soon the regular annual request for the re-stocking of the Truckee river will be laid before the Fish Commission.

YOUNG lady art student: "Look! There is our drawing master's picture, Rose. What do you think of it?" Cynical party: "Why, it surpasses everything we have yet seen." Young lady art student: "In what do you think it chiefly excels?" Cynical party: "Imbecility. It surely surpasses anything we have looked at in that quality."—*Fun.*

BEWARE of the man who always smiles when he talks politics. A genuine, whole-souled politician gets mad and says things that wouldn't look well on paper.

THEY have an improved style of a boy down in Tennessee—that is, a boy with an improved backbone. The improvement consists of a sort of hinge in the backbone which enables the boy to place his head and feet to the floor all at the same time, without the least inconvenience, by bending backward or forward. But one of the improved boys has been brought out yet, but no doubt there will be a demand for thousands of boys with hinges in their backs so they can pick up chips, weed the garden, and the like.

WE learn from Mr. Doherty and Mr. Rumford, that since the late thunder storm their bees have made no honey, but are devouring what had already been made. They were busy at work up to that time but stopped short and have done nothing since. This is a remarkable circumstance, that we cannot account for.—*Kern Co. Gazette.*

PUBLISHED EVERY SATURDAY, BY

CHALFANT & PARKER.

J. E. PARKER. P. A. CHALFANT.

INDEPENDENCE, CAL.:

SATURDAY, JULY 10.....1880

A DISPATCH from Santa Fe says: News received from El Paso states that between the 21st and 23d of June Victorio's Apaches attacked San Lorenzo, and Governor Louis Terrassas of Chihuahua, stealing over 100 horses. From San Lorenzo they went thirty miles west to Santa Clara, where they captured another 100 head of horses, killing several Mexicans at each place. Governor Terrassas, with about 200 Mexican soldiers and a large body of volunteers, is on their trail. Victorio's band, being remounted, may be expected back in New Mexico at any moment. The troops are being rapidly moved forward, and within a few days every exposed point in Grant, Doña ana, Lincoln and Socarro counties will have detachments for protection. The Mescalero Indian Agency has been placed under military control, and two companies of cavalry and one of infantry have been stationed there. Two companies of cavalry are now marching to Fort Wingate. The Navajo Post being considered unsafe, a new post will be established in La Plata county, Southwestern Colorado, to keep watch over the Southern Utes.

THE Mammoth City Semi-Weekly *Herald* completed its first year and second volume on the 30th of last month, and in remembrance of the fact, we wish to say that we consider the *Herald* a really superior paper in all respects. In its issue of the 3d instant it says: "The mill started up on Thursday morning to its fullest capacity, and the welcome sound of forty falling stamps now makes music in the air after a silence of six months. With plenty of good ore in and the mill in much better running order than ever before, it is reasonable to foretell that a long and successful run will be made. * Our district has a more hopeful outlook than ever before."

THE Government has never expressed a desire to annex Canada. Whatever feeling there is in that direction is among the Canadians themselves. That feeling has never assumed a threatening form but is said to be widely entertained, notwithstanding. This is seemingly made apparent by the large amount of emigration which is coming from Canada. It is stated that no less than 57,000 persons have left Ontario within the past eight months, nearly all of whom have located permanently on this side of the line. Most of the number are farmers and mechanics.

THE Secretary of the Treasury has returned to the Treasury $1,000,000 of the unexpended balance of the appropriation for refunding the national debt, and $2,000,000 of the unexpended balance of the appropriation for collecting revenue from customs for the last year, being the amounts saved by the Treasury Department out of the sums authorized to be expended by law.

WILL the Bodie *Free Press* please reply to our query as to whether Commissioner Williamson's order in regard to newspaper charges for publishing "applications for mineral lands" applies to such patent notices as the two to be seen on this page? Seventeen squares two months, $15. Bah!

A MECHANICSVILLE (N. Y.) farmer protects his hen roost from hawks and thieves by keeping a flock of a dozen guinea fowls. He regards them as better than a watch dog, and says they give instant warning of the approach of a stranger, and that one guards while the others sleep.

SOME of the liberal journals of England are growling about the public observance of the Queen's birthday, on the ground that the illuminations are a waste of gas. They claim that other queens celebrate their birthdays privately and not at the public expense.

IN Massachusetts they have a law that forbids the use of screens, curtains, or ground glass in the doors and windows of liquor saloons. This, it is said, has an excellent effect. In this State we don't think such a law would have very much effect.

THE official vote of Oregon in the recent election gives the following result: Congressman, M. C. George, Republican, 19,578; John Whitaker, Democrat, 18,181; J. K. Sears, Greenback, 301.

LONG PRIMER HALL and Myles F. O'Donnell will publish a Democratic campaign paper in Oakland, to be called the *True Faith*.

A DEADWOOD paper refers to a wedding as a "connubial consolidation and consummation of the troths." This is a nice short way of putting it.

SOME SAMPLES OF THEIR WORK.

Last Tuesday Supervisors Meysan and Olds convened in adjourned meeting, as body-legislative upon whom falls the weighty responsibility of regulating the internal affairs of the County of Inyo—ninth class. Predicated with an elaborate preamble of whereases and wherefores, Mr. Meysan got along swimingly with a series of resolutions by "the chief legislative authority of the county government" until he got sat down on by Mr. Olds. After the formal adoption of ten regularly "Numbered County Government Resolutions," that branch of their labors was suspended. During the session of three days the bills on file were taken up and ordered paid, under the plan governed by:

"RESOLUTION No. 1—*Resolved*, That all salaries and fees of county, township and district officers, and all other bills legally chargeable to the county of Inyo for services rendered, or goods and materials furnished to said county of Inyo previous to and included the 30th day of June, A. D. 1880, shall be examined, audited, allowed and ordered paid to the respective funds in accordance with the laws in existence at the time that such indebtedness was incurred."

Resolutions No. 2 and 3, which follow, prohibit the drawing of any warrants on either the Expense Fund or Road Poll Tax Fund for any purpose after the 1st day of July.

The practical effect of this thing is to make warrants on the Expense Fund, drawn for a service rendered June 30th, worth about fifty cents on the dollar. If done July 1st the warrant, drawn upon the "General Expense Fund" is presumably at par—or will be until this new creation gets into a condition similar to the abolished Expense Fund.

Further on in this remarkable system of county financiering, it is provided that taxes shall be specifically levied and apportioned to pay off outstanding indebtedness on the old General, Road Poll Tax, Road, Expense, Hospital and Special Bridge Funds. Another "Numbered County Government Resolution" creates new funds thusly: 1. Salary Fund, out of which the salaries of all county officers shall be paid. 2. General Expense Fund, out of which the fees of all county, township and district officers shall be paid, and all other contingent expenses legally chargeable to the county, except for hospital, road and school purposes. 3. Annual Hospital Fund, out of which is to be paid all hospital expenses after July 1st, 1880. In addition, a "Numbered County Government Resolution" provides for a tax levy the proceeds of which "shall constitute a Sinking Fund for the redemption of outstanding county warrants"—a regular grab-bag arrangement, out of which hard-up scrip-holders can haul out a small amount of coin once a year, a contrivance where values are unsettled and bona fide dealers swindled.

The rate of taxation on the one hundred dollars of property, together with the numerous nice apportionments necessary to be made, is to "be determined by the Board of Supervisors" at some future meeting in the sweet by and by. Taxes for all current expenses are limited to $1 80 on the hundred—the big dollar of which will go to the Salary Fund. Add to this 50 cents for the State and we have a balance of 70 cents on the $100 (presuming the levy to be fixed at $3, as heretofore) with which to pay an indebtedness of $70,939.23—interest not included, and including a bonded debt of $28,500. The assessment roll will foot up about $1,025,000.

In IV of the series of "Numbered County Government Resolutions," Mr. Meysan, with a real consideration and kindness which ought to be appreciated, actually permits *a part* of an act passed by the Legislature (approved March 12, 1872) to remain in full force and effect. It is the law upon which is based the contract whereby Inyo Conty realized upon $40,000 in bonds and applied the proceeds toward building Court House and bridges. Section 8 of the Act requires the Treasurer to give annual notice by publication of the amount of funds on hand for the redemption of bonds. That section is a part of an Act which from its very nature is specifically continued in force by the new Constitution, yet Mr. Meysan repeals it all the same. We fancy that the Treasurer will not be able to see the matter in the same light as this honorable Board. We have no objection as to the desirability of this action if it could be done, but even Mr. Rhine's affidavit to the effect that he knows exactly who holds the bonds, etc., does not empower the Board with authority to abrogate State laws in any jot or tittle.

We have not, as customary during these long years, this week given the usual "Proceedings of the Board of Supervisors" in detail. The *law* has always contemplated that a local paper should be paid for doing that sort of thing, yet the subject has never been broached by the publishers of this journal. Section 25 of the new County Government Act says:

25. The Board *shall cause to be published* in the newspaper to which has been awarded the contract for county printing, a semi-annual statement of the financial condition of the county, and *after each session of the Board, a fair statement of all the proceedings thereat.*

The idea of keeping the public posted as to what is being done in the Board may be distasteful to Mr. Meysan, as none of his multifarious "Numbered County Government Resolutions" even hinted at a printing contract. Had the same been proffered, the publication of all regular proceedings could have been secured for the nominal sum of one dollar. The other members of the Board, at least, know that we have frequently expressed such a willingness. The question is now under a reconsideration. However, as the author of "Numbered County Government Resolutions" informed the Clerk, "They are on ze minutes and I think zat is sufficient." Perhaps.

RELATING TO MINERALS.

The process of getting rich by means of quarz ledges is generally made a business for three men or classes. First; the man who spends his days in the hardest of toil hunting up and locating ledges. Second; the man who then hunts up the prospector, bonds his mine, and goes to Pine and Wall streets to sell it. Third; the moneyed man who buys and works it.

In the early days these processes worked successfully together; the two first men sometimes got rich without much labor other than that of the chin of the middle man; but the third, or moneyed man, often got cinched for his part of the process, so the plan as whole don't work well these days.

It depends on the prospector whether it will work or not.

If he digs a very deep hole or a far reaching tunnel, and at the extremes and elsewhere along, exposes a good showing of mineral substances, then it is possible, nay, a certainty, that the middle man can steer the moneyed man in there to some purpose.

In such cases the combined processes never fail to work to the eminent satisfaction of all three. It is a dead shot.

The prospector that sticks up a notice, digs a hole waist deep, then stops for fear he will knock the bottom of his "mine," and sits down to rest while the middle man navigates the moneyed man into and around and about it, and expatiates on contact formations—that prospecter will grow more and more gray headed every day, more and more sour visaged from hope deferred, but the man of money won't invest. This is a deader shot than the other.

Time was when even a borrowed specimen would rope in the man-with-the-cash.

Now days, a good *surface* prospect, a No. 1 middle man, and reports from two or more of the most imbecile "experts" all combined, can't induce the man-with-the-money to go and take even a second look at this waist-deep prospect hole. He has seen too many of that sort. He *may* be induced to negotiate for a hole in the ground, provided it is deep and dark enough for him to get down into and "salt" for the benefit of a confiding public, and provided further, that it is not situated in a country suffering with a black eye, but he will not give two bits for the prettiest *place* for a hole in the State—not even where there is a boom raging. He don't do business that way any more. He's mortally afraid of getting cinched some more, especially as he has to pay an "able and efficient" superintendent to tell how much better the hole is getting every week.

The prospector and his partner who has time to sit over a waist-deep hole six months, waiting for the middle man to corral the man-with-the-cash, is fooling away his time wretchedly.

In that time he and his partner could dig a very deep hole, and be out nothing extra for grub.

If it was a mine in fact he would begin to know it for certain, and the man-with-the-cash would know it, and the middle man could see enough to dilate on to some purpose.

Where there are so many promising ledges to fall back on, it is silly for a locator to hammer gingerly for months on croppings fearing he may knock the bottom out, and the "mine" won't sell. The man-with-the-money is even more afraid of that than the locator.

NEWS has been received of the total destruction by fire of the Cowlitz Catholic Mission in Washington Territory, June 30th. This Mission was built in 1839. The fire caught from sparks falling on the roof.

THE census figures show the population of Marysville to be 4,340, including 1,030 Chinese, Marysville township, just outside the city limit, has 689 population.

There are 800 patients in the Napa Insane Asylum. It is said that only about one-third are natives of the United States. The other two-thirds are mostly Europeans.

THE San Diego census-taker claims to have found an Indian who helped to build the "old Mission" 105 years ago.

CENSUS SHOWINGS.

Some of the Western States, and a good many of the towns and cities in all the States, are falling lamentably short of the expectations of the more sanguine of their respective habitants in the matter of noses—they do not pan out near as well as was hoped for. The disappointment on this account is causing much suffering in St. Louis. That city is quite positive that the Enumerator is a fraud. She has strenuously contended for years past that she had a larger population than her despised rival, Chicago; also, that as a rule, they were a better kind of people. Chicago said all the time that any man lied who even thought so, and prayed for the census man to come and prove it. Well, the census man has carefully looked into the matter, and finds that Chicago has it by about 50,000 majority—the exact figures have not yet been made known. So St. Louis is greatly incensed at the census man, thinking the fault was his. What aggravates her distress is this: Chicago has always asserted that the St. Louis belles had feet like a dough-tray, and that was what crowded the narrow streets so, not actual numbers, and thus it came that the St. Louis editors had over estimated the census roll. The census man indirectly confirms the Ohicago view of this matter, and on that account St. Louis wants to go behind the returns, notwithstanding that Chicago is candid enough to admit that the St. Louis population would greatly outnumber her own, provided this pedal material had been apportioned on the ordinary basis, and to a sufficient number of new local residents to take up the surplus. Living so far away we, of course, can't say which is right, but it does look (if the Chicago assertion is true) as if St. Louis would "foot up" bigger than Chicago, the census man to the contrary notwithstanding.

In this State, enough returns have been reported to indicate an aggregate increase of near 250,000 souls; (for convenience sake, members of corporations are included, although it is a well known fact that corporations have no souls). Oakland, San Jose and Sacramento each shows material gains, while Stockton, Marysville and San Francisco fall short, the latter about 50,000 on the directory estimates. The 50,000 or 60,000 Chinamen supposed to be in that city have dwindled down by actual count to something less than 25,000: possibly the others went away so Denis wouldn't fret himself to death. It should be borne in mind, however, that in San Francisco, as well as most of the other cities named, there is a considerable increase of population in general since the last census, the reported falling off having reference to directory and other estimates. And it is likely, from showings so far made, that the total population of the United States will not amount to near so many millions as have been counted upon.

DR. GLENN has something over 47,000 acres of wheat to cut this season and this will be the largest crop he ever had. Two hundred Chinamen were mustered in last Sunday to commence work in the harvest field the next morning.

THE census returns from portions of the interior counties of the older Western States of Ohio, Indiana, Michigan, Illinois and Wisconsin, show a decrease of population as compared with the census of 1870.

THE public debt of Canada is over $150,000,000, and is still inreasing. The Canadians must wipe out this enormous incumbrance before they form a union with our American States.

THE INYO INDEPENDENT entered upon its eleventh volume last Saturday. It is one of the best local papers on our exchange list, and we hope the gleam of future prosperity it sees near by will develop into real shining diamonds. Though times are and have been a little dull, the paper has no idea of giving up, and says: "THE INDEPENDENT don't propose to give up the ship at this stage of the fight. But it will be necessary for our patrons to furnish some of the munitions of war—i. e.: to promptly pay what they owe.—*Esmeralda Herald.*

THE INYO INDEPENDENT, a neat and spicy exchange, published at Independence, over the mountains in the adjoining county of Inyo, has commenced the 11th year of its existence under flattering circumstances. We are pleased to see it prosper, as it is worthy of a generous support—*Fresno Expositor.*

THE INYO INDEPENDENT has entered upon its eleventh volume, and says it has nothing to complain of except the general dull times. THE INDEPENDENT is a splendid local paper, and the people of Inyo county owe it a great deal. We wish it the sucsess it so richly deserves.—*Homer Mining Index.*

THE INYO INDEPENDENT has entered upon its eleventh year of publication, and is jubilant over the prospects of continued prosperity in the future.—*S. F. Chronicle.*

THE INYO INDEPENDENT, one of the old reliable weeklies of the State has reached another milestone. May its success increase with age.—*Bodie Free Press.*

SPEAKING of Niagara, waterfall was there, my countrymen.

Lida Valley.

Len Martin, writing from Lida Valley, says a marked activity in mining is apparent there. Both of the mills are being put in running order. James Andrews, late of Candelaria, recently purchased the Gold Mountain mill, and will start it up as soon as a supply of wood can be delivered. The energy displayed by Mr. Andrews merits success, and I have but little doubt it will reward his efforts. R. H. Stewart will start up the Lida Valley mill about the 10th of July. At Tule Cañon, within the past few weeks a "dry washing machine" for placer mining has been introduced, and is highly spoken of. It was brought from the lower country, and bought by Piper, Parker & Co., who have made a thorough test of its merits, and are gratified at the result. The reported sale of the Centennial, and the bonding of the Fortunatus have as yet resulted in no good to the camp, both Palm & Teighen, venders of the former, have returned from San Francisco, after a two months' stay, and are not able to say when the work will be commenced by the purchasers (?); on the latter work has been suspended indefinitely.—*Esmeralda Herald.*

JOHN TOMLITSON, a laborer working near Treadway's ranch, dug up an old tin can day before yesterday which contained seven old-fashioned $50 slugs and a small bar of gold valued at $80. It must have lain a long time, as the can was very rusty. He was digging post holes at the time in order to make enough money to go to San Francisco on. On finding the gold he immediately threw up the job and said he was going to the bay at once. Later in the day he struck a poker game and inside of two hours he was broke. He went back to the postholes again, and is now digging away as industriously as before. If he should happen to strike another can of gold he will doubtless know how to hold on to its contents better. Perhaps, however, he will not find another and the lesson he has learned will be of comparatively little value.—*Carson Appeal, June 27th.*

THE low prices now being offered for wheat is causing the farmers more loss than the shrinkage caused by the north winds. First grade wheat only brings $1 55 in San Francisco, and ordinary shipping grades range from $1 40 to $1 50. Most of the wheat will be graded at $1 40. This is very low and will be severely felt by the farmers. Last year, at this time, the prices ranged from $1 55 to $1 7e½. The reason assigned for these rates is the scarcity of ships to transfer it to market.—*Fresno Expositor.*

A WOMAN isn't fit to have a baby who doesn't know how to hold it; and this is as true of a tongue as a baby.

BORN.

At Bishop Creek, Inyo County, Cal., July 3, 1880, to the wife of Joseph Shelly, a son.

NEW ADVERTISEMENTS.

Democratic Club Meeting.

MEMBERS OF THE INYO HANCOCK & ENGLISH CLUB, and all voters favoring their election, are hereby notified that a meeting will be held at the Court House on TUESDAY the THIRTEENTH day of JULY, 1880, at 8 o'clock P. M., for the transaction of important general business. By order,

S. P. MOFFAT, President

HENRY M. ISAACS, Secretary. n525t1

NOTICE.

I WISH TO SAY TO THE PEOPLE OF INYO county and vicinity that I am not a partner of A. K. Briggs, nor never had an interest in any way with him in his business at Bishop Creek.

V. G. THOMPSON

Independence, Cal., July 10. n525t3

MINING APPLICATION NO 161,

....TO THE ...

OCCIDENT MINE.

U. S. LAND OFFICE,
Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred linear feet of the "Occident Mine" or vein, bearing silver and gold, with surface ground three hundred feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 37, in Township ——, Range —— of —— Meridian, said Lot No. 37 being described in field notes of survey as follows, to-wit:

SURVEY OF EXTERIOR BOUNDARIES:

Began at a post on the southwest corner of claim: marked the post "Post 1 Occident Mine." Said post is 2x3 inches square by 30 inches long and set in a mound of earth 20 inches high From which var. 15 deg 55 min E., a pine stump 8 inches diameter bears N. 28 deg 50 min W 11 links A pine stump 6 inches diameter bears N 85 deg 1 min W. 45 links. A pine stump 20 inches diameter bears S. 33 deg 5 min W 76 links A pine tree 7 feet high x6 inches diameter bears S 39 deg 51 min E. 82 links. A pine bush 2 feet high x3 inches diameter bears N. 69 deg 10 min E. 67 links. From said Post the "Armagh U. S Mineral Monument" by calculation bears N 20 degs 48 min W 17.17 chains. Thence with a var 15 deg 55 min E. 1st course—N 11 deg W 3.03 chains, ascending to point of hill at bottom of old prospecting cut 6.49 chains. End of slope —6.88 chains. On level line—commence descending 7.64 chains, old prospecting tunnel 8.42 chains. Old prospecting cut 12.47 chains. Old dump of prospecting cut 14.13 chains. Middle of Ygnacio Ravine—Ravine bears N 65 degs W 15.21 chains. Trail on ridge dividing Ygnacio Ravine from Cerro Gordo Cañon Ridge bears W 16 07 chains. Rocky ridge—commence descending 17 19 chains. Middle of Cerro Gordo Cañon—commence ascending 21.85 chains. Wagon road—Citizens grade 22 72 chains. To post on N W cor of claim Said post is 30 inches long, 2x3 inches square and is set in a mound of rocks 2 feet high, marked the post "Post 2 Occident Mine." At foot of post is a cactus burr 20 inches in diameter growing in the rock From said post a pine stump 2½ feet in diameter standing 8 feet below the wagon road. Citizen's grade, bears S 38 deg E 1.54 chains. No other suitable natural object within measuring distance. Thence with a var 15 deg 55 min E, 2d Course—N 79 deg E 2.27 chains, ascending rocky slope to "Post 3 Occident Mine" on north end of line of lode 3.42 chains. Rocky ridge bears south 4.54 chains To a post on N E cor of claim. Said post is 30 inches long, 2x3 inches square, and is set in a mound of rocks 20 inches high, marked the post "Post 4 Occident Mine" From which a pine stump 20 inches in diameter bears N 40 deg 35 min E 1.01 chains. The top of a blue slate reef 10 links high bears S 43 min E 15 links Thence with a var 15 deg 55 min E. 3d Course—S 11 deg E 97 chains. Wagon road—descending 3.03 chains An old stone cabin. A tall pine tree stands 15 links to East of line, 3.42 chains. Middle of Cerro Gordo Cañon—bears S W Commence ascending on steep, rocky ridge, 8.48 chains. Trail on ridge dividing Cerro Gordo Cañon from Ygnacio Ravine 11.77 chains. Open cut 30 feet west of mouth of an old prospecting tunnel in blue slate, 12.98 chains Old trail—runs N 65 deg W 13 69 chains Summit of ridge at old trail 14.34 chains. Summit of ridge commence descending 15.38 chains Crossing of Belshaw toll road 22.72 chains. Post on S E cor of claim Said post is 36 inches long, 3x3 inches square and is set in a mound of earth 25 inches high, marked the post "Post 5 Occident Mine," from which a red iron boulder 2½x3¾ feet square and standing 26 inches high bears S 84 deg 40 min E 85 links. A pine tree 9 links high standing 6 ft west of bottom of a gulch—gulch bears S, bears N 35 deg 11 min E 1 06 chains. The middle of the Belshaw toll road bears S 79 deg W 18 links. Thence with a var 15 deg 55 min E, 4th course—South 79 deg W 18 chains. Road—commence ascending, 2.06 chains. Quartzite ridge bears N—S 2.27 chains. Post marked "Post 6 Occident Mine" on south end of line of lode—commence descending 2.87 chains. Trail—runs N W and S E 4.54 chains. To place of beginning, "Post 1 Occident Mine," containing 10 32-100 acres. From the Armagh U. S. Mineral Monument as herein described the mouth or entrance to the "Armagh Tunnel" as noted under the head of "Report" bears S 76 deg 55 min W 9.24 chains. The course of said Tunnel is S 58 deg 55 min E. Length 350 feet on the 27th of March, 1880.

ARMAGH U. S. MINERAL MONUMENT.

The "Armagh U. S. Mineral Monument" is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon, and very precisely on the W. B. line of the Ygnacio mine (as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Dep. Min. Sur.) and distant 17.51 chains from the S W cor stake of the Ygnacio mine.

At the point above given I drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter x16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high x5 feet in diameter at its base. Marked the top of post "U. S. Mineral Monument. Erected January 31, A. D. 1880, by Wm. Crapo, U. S. Deputy Mineral Surveyor—under authority of the U. S. Surveyor General for California." From said post in mineral monument, with a variation of 15 deg 55 min E, the extreme end of the bluff on which the monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face of rock 7½ feet high bears N 60 degs E .07 links. The N E cor of an old adobe *raso* chimney bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The N W cor of Rafael Diaz' house bears S 28 deg 33 min E 1.58 chains An old well 30 feet deep on north side of Cerro Gordo Cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE.

Commence at "Post 1 Occident mine," thence with a var 15 deg 55 min E, S 79 deg W 3 03 chains to Post on S W cor of Ygnacio mine as surveyed for a patent N 11 deg W 17 51 chains. To U S. Mineral Monument which when computed gives for a closing line from "Post 1 Occident Mine" to U S. Mineral Monument N 20 deg 48 min W 17.77 chains.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 147 of locations.

The adjoining claimants are, on the west the San Francisco mine, on the south the Moter mine and on the east the Tachyte Flat mine.

Any and all persons claiming adversely any portion of said Occident mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

JAMES E GOODALL, Register.

n525t60

MINING APPLICATION NO. 162,

...TO THE....

ARMAGH MINE.

U. S. LAND OFFICE,
Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred (1 500) linear feet of the "Armagh Mine" or vein bearing gold and silver, with surface ground six hundred (600) feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 38, in Township ——, Range ——, of Mount Diablo Meridian, said Lot No. 38 being described in field notes of survey as follows, to-wit:

Commenced at "Post 1 Armagh Mine," on S E corner of claim Said post is 30 inches long 2x3 inches square and is set in a rock mound 2 feet high, from which with a var 15 deg 55 min E a pine stump 18 inches high by 10 inches in diameter bears S 15¾ deg E 77 links. A pine stump 15 inches diameter bears S 3¾ deg 30 min W 91 links. A red ferrugeno s quartz reef standing 4 feet high bears N 24 links. A pine stump 12 inches high x5 inches in diameter bears N 49 deg 30 min E 15 links. Thence with a var 15 deg 55 min E, N 11 deg W 3.20 chains. Ascending to summit of ridge commence ascending, 5 98 chains; dump of old prospecting cut, 10 80 chains; Belshaw toll road, 13 16 chains; Belshaw toll road in middle of Cerro Gordo Cañon, commence ascending 14 25 chains; road running to Potosi house, 21 66 chains; wagon road—Citizens' grade—22.72 chains; post on the N E corner of claim Said post is 30 inches long, 2x3 inches square, and is set in a mound of earth 20 inches high. Sage brush slope, sloping S W, no natural object for witness mark in vicinity Marked post "Post 2 Armagh Mine." Thence with a var 15 deg 55 min E, S 79 deg W .07 chains Trail runs N S; commence ascending—2.20 chains; wagon road, Citizen's grade—4 54 chains; post on north end of line of lode, marked the post "Post 3 Armagh Mine"—8 43 chains. Trail runs N S—9.09 chains. To post on N W corner of claim, situated on sage brush slope, sloping to S W. Said post is 3 feet long 2x3 inches in diameter and is set in a mound of earth 2 feet high; marked the post "Post 4 Armagh Mine" No suitable natural object within measuring distance. Thence Thence with a var 15 deg 55 min E, S 11 deg E, commence ascending—1.75 chains; commence ascending—3 97 chains, crossing of foot trail runs W S—8 27 chains; toll road in middle of cañon, commence ascending, 18.45 chains; summit of ridge bears west, commence descending, 19 74 chains; south end of "Silver Wedge" claim, 22.72 chains, to post on S W corner of claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of earth 20 inches high; marked the post "Post 5 Armagh Mine," from which a pine bush 2 feet high bears N 76 deg W 19 links The chimney of an old deserted vaso bears N 22 deg 30 min E 24 links. Thence with a var 15 deg 55 min E, N 79 deg E 63 chains. Descending into bottom of gulch—gulch bears south, commence ascending—4.55 chains. "Post 6 Armagh Mine," or south end of line of lode, 3.99 chains; crossing of toll road, 9.09 chains; "Post 1 Armagh Mine," place of beginning From which post the Armagh U S. Mineral Monument bears N 4 deg 10 min W 12.67 chains, by calculation, containing 20 64 100 acres.

Location of the Armagh Tunnel.—From the "Armagh U. S. Mineral Monument" the mouth of the Armagh tunnel bears S 76 deg 55 min W 9.24 chains. The course of said tunnel is S 58 deg 55 min E Length, 350 feet.

ARMAGH U. S. MINERAL MONUMENT—DESCRIPTION THEREOF:

There not being any lines of the U S. public land surveys within 100 chains of the Armagh mine, I built a Mineral Monument and connected therewith. Said Mineral Monument is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon and very precisely on the west boundary line of, and distant 17.51 chains from the southwest corner stake of the Ygnacio mine, as surveyed for a patent in the year 1875 by Joseph Seeley, U S. Deputy Mineral Surveyor. At this point drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter by 16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high by 5 feet in diameter at its base. Marked the top of the post "U S. Mineral Monument. Erected January 31, 1880, by Wm. Crapo, U. S Deputy Mineral Surveyor, under authority of the U S. Surveyor General for California." From said post in Mineral Monument, with a variation 15 deg 55 min E, the extreme end of the rocky bluff on which the Mineral Monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face 7½ feet high bears N 60 deg E .07 links. The northeast corner of an old adobe vaso chimney, a Mexican furnace for smelting silver and lead ores, bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The northwest corner of Rafael Diaz' house bears S 38 deg 23 min E 1.58 chains. An old well 20 feet deep on north side of cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE

Commence at "Post 1 Armagh Mine," thence with a var 15 deg 55 min E N 79 deg E 1.51 chains to west boundary line of Ygnacio mine, and at a point 325 feet—4 92 chains from the southwest corner stake of the Ygnacio mine; thence with a var 15 deg 55 min E, N 11 deg W 12.59 chains to U S Mineral Monument.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 146, of locations. The adjoining claimants are, on the East, the Greenly mine

Any and all persons claiming adversely any portion of said Armagh mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, in the State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

JAMES E GOODALL, Register.

n535t60

INYO INDEPENDENT.

INDEPENDENCE, CAL.:

SATURDAY, JULY 10.....1880

HANCOCK AND ENGLISH CLUB.—Pursuant to call a Democratic meeting was held at the Court House on Tuesday evening, July 7, for the purpose of organizing a Hancock and English Club. The meeting was called to order by S. P. Moffat, Chairman of the Democratic County Central Committee, and a temporary organization effected by the election of H. H. Buckles Chairman, and Henry M. Isaacs Secretary. Upon motion a committee of three, consisting of J. W. P. Laird, J. E. Parker and S. P. Moffat, was appointed to prepare a paper for the signature of those proposing to become members. Said Committee reported the following, which was unanimously adopted and signed by some twenty-five persons:

"INYO HANCOCK AND ENGLISH CLUB."

"We, the undersigned, Democratic electors of Independence precinct, Inyo County, California, pledging ourselves to the earnest support of Hancock and English, do hereby join in an organization to be known as the 'Inyo Hancock and English Club,' and agree to conform to such general political requirements as it may hereafter elect, to the end of political triumph at the ensuing National, Congressional and County election."

Permanent organization was then effected by the election of the following officers: President, S. P. Moffat; Vice Presidents, J. A. Lank, A. N. Bell, E. Robinson; Secretary, H. M. Isaacs; Assistant Secretary, John Crough; Treasurer, J. C. Irwin. The following were appointed as a Committee on Resolutions and for the purpose of drafting a Constitution and By-Laws, to report at the next meeting: J. E. Parker, John Alexander, J. W. P. Laird, Dan'l Crough and J. D. Mairs. On motion, it was decided that the Club meet again at 8 o'clock P. M. on Tuesday, July 13, and that the proceedings of the meeting and a notice of the next one be published in THE INYO INDEPENDENT.

INSANE.—On Thursday last J. F. Epperson, of Bishop Creek, filed an affidavit with Justice of the Peace Parker, setting forth that one John R. Crawford was of unsound mind and praying for an order of arrest directing him to be brought before the Superior Judge for examination. Accordingly, on the 3d instant, an examination was held before Judge Hannah and Drs. George and Colleau. Crawford was found insane, as alleged, but was returned to the County Hospital instead of being sent below. The unfortunate man is some 70 years old and paralyzed, and has been a county charge for some time. He is deemed unable to stand a trip below to the Asylum. We have heard several expressions to the effect that Epperson, the old man's son-in-law, ought to take care of him himself, and that the County Hospital shouldn't kick on account of an occasional troublesome patient.

ANOTHER SUNDAY SCHOOL REPORT. Mrs. Emma Willis, Superintendent of our Sunday school, writes us as follows: "We are grateful for your kindly notice last week, but through an error, the average attendance was made to appear much less than it really was. That our young people may have the credit their persevering attendance deserves, I beg space in your valuable paper for the following: The school has been in operation for eight months. The average attendance per Sabbath for the first five months was 36; for the last three months, the average was 38 per Sabbath, and a fraction over. The average for the eight months through foots up to 37."

THE MODOCK.—This, the most prominent and solid incorporation of this county, is pushing work ahead in the mine with a force of thirty men, under the active superintendence of J. S. Childs and foremanship of F. S. Wallace. The mine is looking well at all points, the main body of fine ore, however, being in the stope of the West Lookout, 300-level. Wood and coal hauling will commence in a few days, and the furnaces will be fired up about the 10th of August.

LOOKOUT.—Constable Frank Fitzgerald was in town yesterday from Lookout, on business connected with his duties as Census Enumerator. He reports encouraging prospects for the Modock and Lookout generally. Geo. Turner, formerly of the Cerro Gordo Freighting Company, is running the store and boarding house. Pete Niver, formerly of Independence and an old-time printer, is successfully engineering an underground locomotive, by man power.

DARWIN.—The residents of Darwin assembled on the Fourth and organized a celebration impromptu, as it were. After the reading of the Declaration by Mr. J. C. White, the company listened with wrapt attention to a most appropriate and eloquent address from C. F. O'Brion, Esq. It was quite lengthy and complete. We sincerely regret that a lack of space and typographical force prevents its publication in full, as requested by our Darwin readers.

COME AND GONE.—Capt. Keeler has returned from his visit to the city.... Miss Eva Shepherd and Master Joe. Harris have gone below to attend high school.... Mrs. Jos. Schalten and Mrs. Dr. Blair departed by stage this morning for a visit to their liege lords at Candelaria.... A party of young men left this morning for King's river, to see if the gnats and trout will bite.

WATER WORKS.—Some of the leading citizens of Lone Pine have undertaken the very important work of supplying the town with water works, which will be capable of throwing a stream 150 feet in the center of town. They have recently purchased from Peter Taylor a mile of 4-inch iron pipe, through which the water will be conducted to fire-plugs at various points.

THE FOURTH IN ROUND VALLEY.

MESSRS. EDS—There had been no announcement of a celebration here. A few friends merely suggested a social gathering on Saturday, the 3d.

Quite a crowd came up from Bishop Creek; also most of the Round Valley folks turned out, and a very enjoyable time was the result. Exercises, oral and otherwise, were in order. Mr. John Clark, a revered Taboose Eater, was installed President of the Day; C. Wannicott, Vice President, P. Forbes, Reader of the Declaration; Randolph, Orator; Nicholls, Poet. Musicians—Vaughn, Gunter, Cairnes and Mary Ann Rowlands. Vocalists—Miss May Sherwin, Miss Ettie Horton, Miss Lottie Jones and Miss Rowlands, assisted by Mrs. Wildasinn, who rendered beautiful music on the organ. The aforesaid acquitted themselves nobly, and were highly applauded. The keen appetites of a large crowd suggested refreshments. White linen soon covered the rough, log tables—the latter, of course, "groaned," as usual, under the multifarious dishes of nice, sweet and pretty things. It's immaterial what were the efficiencies or deficiencies of Mother Eve (even she was liberal with apples), those good ladies never forget to prepare the very best part of the programme for a Third, Fourth or any other occasion.

Speaking of the ladies, we wish to return thanks to Mrs. S. G. Sneden for beautiful boquets presented last Saturday, all of which were sold on the ground and brought in several dollars. This kind lady has, on more than one occasion, gently scattered floral decorations over the caskets of departed friends. Long may she bloom.

Messrs. Clark, Wannicott, Munzinger, Zimmerman, Munson, Dugan, Burns, Olds, Baker, Evans, Hiltons and many others suggested the propriety of "killing two birds with one stone" on this occasion, to wit: first, recreation; second, collecting funds for the purpose of defraying a portion of the heavy expenses incurred during the long sufferings of Johnny Rowlands.

From all sources—the sale of ice-cream, candy, boquets, and tickets to the dance—the sum of $150 was collected, most of which was next day transfered to the doctor, whose bill for services rendered our deceased young friend, Rowlands, should be $1,220, as the gentleman claims, but which was reduced to $700. Nurses' fees, doctor bill, store bills and many other incidental expenses will swell up the total to a large amount. Indebtedness contracted during John Rowland's illness is assured payment by J. E. and T. E. Jones, brothers, to whom the bills should be presented.

We gratefully acknowledge aid from several true and noble friends in this case.

N. B.—We wish to correct an erroneous statement which is now being circulated: namely, that $500, coin, was collected here during Saturday's proceedings. All bosh! The next morning all the proceeds were counted in the presence of several parties, and which amounted, as above stated, to $150, a sum we considered magnificent. Of course, out of this amount some money had to be paid for candies, lemons, sugar, extracts, etc. The five-hundred dollar fabricator should again try his wits.

More anon, on serious matters.

IRREGULUS.

LETTER FROM DEEP SPRING VALLEY.

COTTONWOOD CREEK, DEEP SPRING VALLEY, INYO COUNTY, CAL., June 25, 1880.

MESSRS. EDITORS—I have been somewhat long in redeeming my promise to write you, but I have been taking time to see what was in this district before doing so.

What I have found is this: That this district is the best I have found in Inyo county for a working man. There are ledges innumerable here that will pay for working, provided there were means for crushing—and that is the principal point. When I tell you there is one ledge here that will assay thousands of dollars per ton, I am only stating a fact I can prove when called upon. The ledges are not wide—running all the way from six inches to three feet in width—but all the ore in the district will average $150 per ton. There is some talk of Mr. Smith, of Teel's Marsh, putting up a five-stamp mill here this Summer, and I think he will do it; but whether he does or not, does not alter the fact that it gives better inducements for such investment by any man or company than any other place in this county. Hiskey & Walker built a mill here on credit and paid off their indebtedness in little over a year with its earnings. The facilities are all that could be desired: abundance of water free, with wood in unlimited quantities, to cost not to exceed $5 per cord. It will take but a visit of inspection to satisfy any one of the substantial truth of every statement here made.

A. F. JENKS.

MATTERS AT KEELER.—A competent millwright arrived a few days ago to take immediate charge of the work of putting in the machinery in the mill at Keeler. Mr. Holt, Chief of Construction, says that this will be the most complete mill, in the way of the latest improvements particularly, in the State. Among other material improvements is a new house, occupied by Mr. Holt as a dwelling, mill and assay office, etc., and is pronounced a "palace" as compared to the old quarters. Another valuable improvement is a good bath house on the lake shore. The detergent qualities of the Owens Lake waters are wonderful to experience, and no better idea of their powers can be given without nice instrumental calculation than to say that they reduce a Cerro Gordoite of average toughness to a passable condition of cleanliness in two minutes by the watch. Taking this as the unit of power, it will be seen that thirty second's soaking in these waters will "deterge" the ordinary valley snipe so effectually that his mother will hardly acknowledge him for three days thereafter.

RELATING TO BEVERIDGE DISTRICT, ETC.

LONE PINE, INYO CO., CAL., July 8, 1880.

MESSRS. EDITORS — Juan Mesa informs me of your desire to learn something of my operations in the very promising mines of Beveridge District.

Last November I began the hard task of writing up, in private correspondence, the vast mineral resources of our county, its unparalleled climatology, agricultural facilities, mining possibilities, etc. That this was a task is proven by the pile of correspondence received, a large portion of which was of a most discouraging nature on account of the bad reputation of this county in the metropolis and elsewhere. Still, my courage was unfailing, and I kept up the charge, directing my batteries to other forts, and finally succeeded in inducing a distinguished party to send up Mr. W. A. Roberts, one of the most competent experts in the State, and who, together with Mr. Holland, a practical miner and expert, under my escort thoroughly examined Beveridge District. They were highly pleased with what they saw, and satisfied that my reports were fully sustained; and with an endorsement of my plans, etc., promised prompt action on their part in carrying out the same.

They also visited Cerro Gordo, and were completely satisfied that it was a locality of immense mineral resources. They very much regretted that they had not the time to devote at least two months in examining our entire range, which, in their honest opinion, is more promising than any of the many mining countries known to them.

All things considered, the above facts not being the least, I have plusible reasons to hope for prosperous times in the near future; still, "it's not safe to reckon without your host." But I truly hope to be able to give you some definite and satisfactory results at no distant day. Yours truly,

P. G. GELCICH.

TOUGH.—They have a mighty tough cart-horse, and a still tougher driver, down at Keeler. The driver was told to use care, and not back the horse and cart into the mill excavation. The day was warm, and the driver understood the order right the other way, and actually did back horse, cart and all but himself, over the face of the excavation where it was sixteen feet perpendicularly to the bottom! And the strangest part is, that the horse was not injured in the least, except mentally, by the tumble, and the cart but slightly. Telegraph orders may be expected any day to place the driver in the direct line of promotion.

THE HARKINS-WELCH CASE. — The examination of Daniel Harkins for killing Wm. F. Welch, at Darwin, began yesterday before Judge Hannah, of the Superior Court, and is not yet concluded. A writ of habeas corpus was argued on Tuesday and denied, his Honor deciding that the right was vested in the higher Court to hold such examinations in cases of this kind where certain formalities were lacking in the original commitment. We shall give a synopsis of evidence and proceedings next issue. Judge Conklin appears for the defense, District Attorney Laird for the People.

RUNNING.—Two Mexican *vaso* furnaces have been running at Cerro Gordo, producing silver bullion from the abundance of rich ores of that district. These are primitive affairs, the blast being produced by blacksmith's bellows, but they are so manipulated as to yield up considerable bullion all the same.

SCHOOL.—Mr. Daniel Crough will begin teaching the public school at the Post next Monday, July 12. It is yet undetermined when the school in this place will begin— probably not for about three months.

IT is to be deplored that Americans should demand so many foreign manufactured articles; yet there is a pleasant phase to the fashion, for it serves to reduce the public debt at a prodigous speed. At the present rate of importations custom revenues will be larger this year than last by $30,000,000. This implies an enormous flow of exchange in favor of Europe, but our grain shipments next Fall and Winter will bring it all back; they did more than that last year.

IT appears that New Orleans is in a very filthy condition and that it may expect an attack of yellow fever this year. New Orleans seems to be a place where local government is a failure. The people play all Winter at carnivals and similar nonsense, and spend over them time and money that ought to be devoted to digging sewers and abating nuisances. The whole Mississipi Valley has a grievance against New Orleans.

IT is no more than right that alcohol and tobacco should pay a goodly share of the nation's expense for the harm which results from their use, or rather their abuse. During the last fiscal year the revenues of the country were $3,000,000 more than the estimates, and $10,000,000 above those of the preceding year. The first figures indicate an increase in the duties on rum and tobacco.

AN eminent scientist claims that a volcano is caused by the coming together in the bowels of the earth of material similar that of which seidlitz powders are made. The man who has drank a seidlitz powder mixed in separate glasses and allowed the effervescing to occur inside of him will readily accept this theory.

LIGHT-MINDED young thing, in a bathing suit: "Surely, Aunt Margaret, you are not going to wear your spectacles in the water?" Aunt M.: "Indeed I am; nothing shall induce me to take off another thing."

THE man who lost his balance was out of his weigh.

YOU cannot hear a finger ring, no matter how loud it is.

The Miners' Union.

This organization has decided to let the Fourth of July pass without their countenance or presence, because the Grand Marshal of the Day, Capt. I. G. Messec, does not suit them. Under such rulings our Democratic fellow citizens might decline taking part in celebrating the Day so dear to Americans, because the President, Judge Wiggin, is a Republican; and the Republicans might get their backs up on account of Capt. Messec and Gen. Kittrell—who is to deliver the oration—being Democrats. On such occasions Americans drop all sectional, party and personal feelings, but our adopted citizens of the Union are not so disposed, and wish to bulldoze our citizens. The action of the Union is an insult to the American people, and a disgrace to an institution that has been respected and encouraged by the citizens of Bodie. It is true that all the members of the Union do not approve of the action of the majority, but the odium attaches to all. The procession will move on as patriotically as if the Miners' Union had never been thought of. One class of our adopted citizens fail to appreciate the blessings guaranteed to them by our too liberal-minded forefathers, while there is a better class—and in the Miners' Union, too—that fully appreciates them; and this class will be in the procession on Monday, and will thank God for being allowed to become citizens of our great country, instead of expecting thanks from our people for honoring our country with their august presence.—*Bodie Chronicle, July 3.*

MR. *Chronicle*, don't growl; you ought to be thankful in the extreme that the Mollies allowed any one to parade without a written permit from them.

Benton Items.

A force of men was again put to work last week in the Sultan Hill vicinity.

The impression prevails in Benton among those who are the oldest inhabitants, or the relatives of the oldest inhabitants, that the Winter has gone.

It comes officially that very important changes and improvements are contemptated in the workings of the Diana mill. The new steam hoisting works are now in operation at the mine.

Russell & Hoskins mill, which has heretofore contributed so much to the prosperity of Benton, is having a new pan put in and other improvements made. It is expected that it will soon again be shipping bullion again as regularly as of old.

Lone Mountain, in Nye County, Nevada, where recently some valuable mineral discoveries have been made, proves to have been an old location. Harry Long and his party while prospecting out there this Spring, discovered, half a mile north of the Wide West, one of the series which the party located, an ancient hole in the ground. Although this remarkable shaft was only three feet in depth, still it was a bona fide location. In the hole was found a pick and shovel—that is, what the elements had left of them—and a notice of location was discovered near by securely protected between two flat rocks. This notice is dated October, 1860—nearly twenty years ago. It is ninety to a hundred miles from Benton, and was promptly re-located. The original location had been made by Mexicans. —*Bentonian, July 5.*

A PHYSICIAN has given four rules which it would be well to accept and act upon. 1. Do not drink cold water immediately after exercising. 2. Eat something before drinking. 3. Drink in small swallows. 4. Do not drink much at once.

THE San Francisco charter is completed and the contract for publishing the same has been awarded to the *Chronicle* for $6,750 and to the *Examiner* at $2,249. The charter election will be held on the 8th of next September.

"IN God we trust" when we pass a genuine silver dollar; but when we pass a trade dollar for 100 cents we trust in cheek.

SOMEBODY has discovered that cats can't live at a greater elevation than 13,000 feet, therefore back sheds should be built 13,500.

MINING.

ASSESSMENT NOTICE.

KEARSARGE MILL AND MINING COMPANY.

Location of Principal Place of Business, San Francisco, California.

Location of Works, Kearsarge Mining District, Inyo County, California.

Notice is hereby given, that at a meeting of the Board of Trustees, held on the Seventh day of June, 1880, an assessment (No. 5) of Fifteen Cents per share was levied upon the capital stock of the corporation, payable immediately in United States gold coin, to John Calvert, the Secretary, at the office of the Company, northwest corner of Fourth and Howard streets, San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the TWELFTH day of JULY, 1880, will be delinquent, and advertised for sale at public auction, and unless payment is made before will be sold on MONDAY, the NINTH day of AUGUST, 1880, to pay the delinquent assessment, together with costs of advertising and expenses of sale.

JOHN CALVERT, Secretary.

OFFICE—Northwest corner Fourth and Howard Streets, San Francisco, California. n521td

LEGAL.

GUARDIANS' SALE OF REAL ESTATE.

NOTICE IS HEREBY GIVEN, THAT IN pursuance of an order of the Superior Court of the County of Inyo, State of California, made on the Thirteenth day of June, 1880, in the matter of the Estate of William Lewis and Timothy D. Lewis, minors, the undersigned, Guardian of the person and estate of William Lewis and Timothy D. Lewis, will sell at private sale, to the highest bidder, for cash, U. S. gold coin, and subject to confirmation by said Superior Court, on THURSDAY, the TWENTY-SECOND day of JULY, 1880, at 1 o'clock P. M., all the right, title and interest of the said minors in and to all those certain lots, pieces or parcels of land situate, lying and being in the said county of Inyo, State of California, and bounded and described as follows, to wit:

An undivided one-half interest in and to the southwest quarter section number twelve (12), and the north half of the northwest quarter of section number thirteen (13), all in Township No. Seven (7) South, of Range No. Thirty-two (32) East, Base and Meridian Mount Diablo.

Terms and Conditions of Sale: Cash, U. S. gold coin. Deed at expense of purchaser. Bids and offers may be made at any time after the first publication of this notice, and before making of the sale. All bids or offers must be in writing and left at the office of Messrs. Reddy & Conklin, Independence, Inyo County, California.

THE BEST PAPER. TRY IT!

BEAUTIFULLY ILLUSTRATED.

35th YEAR.

The Scientific American.

THE "SCIENTIFIC AMERICAN" IS A large, First-Class Weekly Newspaper of Sixteen Pages, printed in the most beautiful style, *profusely illustrated with splendid engravings* representing the newest inventions and the most recent advances in the Arts and Sciences; including New and Interesting Facts in Agriculture, Horticulture, the Home, Health, Medical Progress, Social Science, Natural History, Geology, Astronomy. The most valuable practical papers, by eminent writers in all departments of Science, will be found in the Scientific American.

Terms, $3 20 per year; $1 60 half year, which includes postage. Discount to Agents. Single copies, ten cents. Sold by all Newsdealers. Remit by postal order to MUNN & CO., Publishers, 37 Park Row, New York.

PATENTS. In connection with the SCIENTIFIC AMERICAN, Messrs. MUNN & Co. are Solicitors of American and Foreign Patents; have had 35 years' experience, and now have the largest establishment in the world. Patents are obtained on the best terms. A special notice is made in the SCIENTIFIC AMERICAN of all inventions patented through this Agency, with the name and residence of the Patentee. By the immense circulation thus given, public attention is directed to the merits of the new patent, and sales or introduction often easily effected.

Any person who has made a new discovery or invention, can ascertain, *free of charge*, whether a patent can probably be obtained, by writing to MUNN & CO. We also send *free* our Hand Book about the Patent Laws, Patents, Caveats, Trade Marks, their costs, and how procured, with hints for procuring advances on inventions. Address for the Paper, or concerning Patents,

THE ENGINEERING and MINING JOURNAL.

PUBLISHED WEEKLY.

DEVOTED TO

Mining, Metallurgy, Engineering and Science.

RICHARD P. RICHTHWELL, C.E., M.E., ROSSITER W. RAYMOND, Ph.D., } Editors.
WILLIAM H. WAHL, Ph.D., Department of Progress in Science and the Arts.

IT IS AN ACCEPTED AUTHORITY ON ALL questions relating to the great mining industries of the country. It is the oldest publication of its class in America, thoroughly independent; being of the trade and not in it, occupies a just and impartial position, which enables it to advise and teach without fear or favor. It devotes much space to questions bearing upon economical management of mines, and from time to time illustrates the more important improvements in mining machinery and engineering methods. Special attention is given to reliable mining news from all parts of the country, which is gathered by an efficient corps of correspondents in every section, and from an extended exchange list. The metal and ore markets, and gold, silver and miscellaneous stocks are reported and commented upon weekly by experienced financiers, who are unbiased by private interests, and upon these matters it is accepted as a reliable guide and unfailing instructor. Gives statistics of production of coal and iron, and of our great gold, silver and other mines. Its scientific notes are an epitome of the latest researches, its trade reports full, and its editorials sagacious and comprehensive. It enjoys the widest circulation and greatest influence of any journal of its class in the world; its patrons and readers comprising the most select and intelligent men in every quarter.

Subscription, $4 per year, in advance; 10c., single copy.

THE CARP AND ITS CULTURE.

Three years ago the national carp ponds were established at Washington, in the old swamp and canal near the monument, and many thousand young fish have since been distributed for stocking suitable waters in Kansas, Nebraska, Missouri, Ohio, Indiana, Illinois, Pennsylvania, Maryland, Virginia, North Carolina, South Carolina, Georgia, Alabama, Louisiana, Texas, Kentucky, Tennessee and New York. Persons desiring them for such purpose can be supplied on application to Prof. S. F. Baird, U. S. Fish Commissioner, Washington, D. C.

In a recent communication Prof. Baird expresses great faith in the future of this new fish. He is quite well satisfied that within ten years it will constitute a very prominent portion of the animal food of the country. Although scarcely known in the United States, and but little more, as an article of extended application, in England and France, the carp is in Germany and Austria cultivated to the highest degree, so as to constitute a notable article of the market supply.

The fish itself is probably of Asiatic origin, and has been domesticated in China for thousands of years. It has, however, been so extensively distributed in Europe so as to become, in a measure, a native fish, occurring in public waters as well as private enclosures. It is, Prof. Baird remarks, emphatically a farmers fish; and may safely be claimed to be, among fishes, what chickens are among birds, and pigs and ruminants are among mammals. Its special merits lie in its sluggishness and the ease with which it is kept in limited inclosures, it being a vegetable feeder, and its general inoffensiveness. Trout and black bass require abundant water and a supply of animal food for their sustenance and growth; the carp thrive in shallow ponds, and while not disdaining flies, worms, larvæ, etc., live on the succulent roots and leaves of acquatic plants, seeds as they fall into the water, and other similar substances, and may be fed on corn, grain, bread, root crops, raw or boiled, and indeed any kind of vegetable refuse.

Their rate of growth, too, is something marvelous, and as observed so far in the specimens introduced in the United States, is even more remarkable here than in Europe. Among the original fish imported by the Fish Commission from Europe, and which are now only about three and a half years old, are some from twenty-five to thirty inches long, weighing from four to eight or nine pounds.

The carp thrives best in natural or artificial ponds having muddy bottoms, and such as abound in vegetation. In large ponds it may not be necessary to furnish special food, but in restricted enclosures, as, for instance, those of a fraction of an acre, they may be fed with the refuse of the kitchen garden, cabbage leaves, lettuce, leeks, etc., hominy or other substances. Grain of any kind is generally boiled before being fed to the fishes, but this is probably not absolutely necessary. The refuse of malt from breweries makes excellent food for them.

The Washington ponds are so arranged that they can be drawn off at will, leaving all the fish collected in a small basin near the outlet. This is for convenience in assorting the fish, and for selecting such as may be needed for other purposes.

It is a prime necessity that there be no predacious fish in the same pond with carp. Of course, the larger fish will be measurably secure against the attacks of carnivorous species of about the same size, but the eggs and young will become a prey to the rapacity of such associates. As a general rule the fish will thrive best when they are the sole occupants of particular waters, although the association of suckers and chubs would be less objectionable than that of sunfish, perch, or black bass.

The carp spawn in the spring, in May and June, and indeed, under some circumstances, all Summer. The Fish Commission have young fish that spawned from May to September. They are very prolific, yielding from 400 000 to 500,000 eggs according to size. The eggs adhere tenaciously to whatever they touch, and for that reason it is very important that a new pond should be provided with floating weeds for such attachment. The eggs hatch out in a few days, and the young grow very rapidly. They feed voraciously upon the so-called frog spittle, the green alga scum so common in frog ponds. Consequently such waters are especially adapted to carp.

Whenever the water becomes chilled down to perhaps 40°, and especially when frozen over at the top, the fish bury themselves in the mud, aggregating in lots of from fifty to a hundred, frequently with their tails projecting, and constituting what is called in Germany, kettles or roses. It is very important that they should not be disturbed under these circumstances. Of course while hibernating in this way they are not feeding, although they are said not to lose appreciably in weight. In more southern regions, where the waters do not freeze, they will probably feed throughout the year, and make a more rapid growth.

So far, Prof. Baird says, no waters have proved too warm for carp; they are said to thrive especially well in reservoirs receiving the condensed waters of low-pressure steam engines, in Germany, of over 100° temperature.

As regards the best plants for a carp pond, Prof. Baird mentions the ordinary pond weeds (*Pontederia* and *Sagittaria*), splatter dock or pond lily, and indeed, any of the kinds which grow in the water, with leaves floating on the surface, duckweed among the number. Those which produce seed, like the wild rice, are especially desirable, as the fish feed voraciously upon them.

The great merit of the carp for cultivation, next to its excellent table quality, lies in its adaptation to warm and shallow ponds unsuited for ordinary fish. The country is full of such waters that are now useless, which might be made exceedingly productive; and there are thousands of swamps in every State, which might be flooded and stocked at small cost in money or trouble. In Germany many villages maintain at common cost for the public benefit carp ponds of a hundred acres or more. —*Scientific American.*

Give the Cheese a Chance.

The man swaggered into a tidy lunch house over the Rhine, flopped into a chair, slapped his feet upon the table, shoved his hat on the back of his head, and called for beer, bread and Limburger. The proprietor bustled around and filled the order himself.

The man picked up a bit of the cheese and smelled of it derisively.

"Take that away," he said, "and bring me some decent cheese. Its Limburger I want—this is no good."

"Vat's de matter mit dot gheese, mine friende? Vas id doo sdrong? I haf zoom dot vas fresher," said the German, anxious to please.

"Strong! Naw! that's what I want. This cheese is no 'count at all. I want something I can smell clear across the room. Trot it out and be lively. This don't stink a bit—fetch in the rankest you've got. I've got a Dutch stomach if I was born in America," and the man smelled at the cheese again and threw it down indisgust.

The proprietor bowed over the table, and also sniffed a few times. He then turned an injured look on the captious customer and persuasively said:

"Dot vas not, fair mine friend; dook down dem boots off der dable and gif der gheese a fair chance."

THE men employed on the Bodie Extension railroad have been dissatisfied with the pay—$1 a day and board—for some time, and on Thursday afternoon they struck for an increase of 50 cents. The strike was proposed by a few who were intending to quit work anyway, and they insisted upon striking at once, although some of the cooler headed men wanted to await the return of the Roadmaster, and endeavor to obtain the increase of pay by argument before resorting to other methods. The strikers went to the several camps along the line and compelled all hands to quit work, taking the handles out of the picks and unharnessing all the horses along the grade. About 250 men in all joined the strikers. Superintendent Yerington was notified of the state of affairs, and proceeded at once to the scene. He refused to raise the pay and told the men they had acted foolishly in striking at this time. He informed them that they could resume work at the old rate if they desired, but only 80 or 90 accepted the offer. The balance of the number were paid what wages were due them, and were given passes over the railroad to Virgina City.—*Sutro Independent, July 5.*

FOR the year ending May 31st the exports of the United States exceeded the imports to the extent of more than $162,000,000, which is a most gratifying exhibit. A few years of such prosperity will make the nation rich.

DURING the week ending June 6th, the shipment from the Utah mines amounted to $104,609, including $36,145 from the Ontario and $8,450 from the Leeds.

THE population of Oregon is shown by the census to be about 150,000. Portland has about 20,000, including 4,000 Chinese.

The Little Folks.

"What makes the sea salt?" asked the teacher, and Young America shouted: "The codfish that are in it."

When a boy has a gold watch presented to him he will cheerfully travel two miles to regulate it in the presence of his enemies.

"Sit down!" said a nervous old gentleman to his son, who was making too much noise. "I won't do it," was the impudent answer. "Well, then stand up. I will be obeyed."

The little girl was disappointed because her name could not be found in the Bible, and said: "Never mind. I will be such a good girl that if ever another Bible is written, my name shall go into it."

Some of the schools have a rule punishing a boy who is tardy without an excuse. We wouldn't give much for a boy who couldn't give an excuse for being tardy. He ought to be punished.

Little Aleck is very fond of ice-cream. Asking for more as usual the other evening, he added: "Can't you hotten it a little?"

Sunday School scholar (to teacher)—"Did you say the hairs in my head were numbered?" Teacher—"Yes, my dear." Sunday School scholar—"Well, then" (pulling out a hair and presenting it) "what's the number of that one?"

A small boy of Bath, Maine, had just gone to bed, the other night, when he began to dream about cows. Some slight noise woke him up, and he said, "Mama, I saw some cows." "Where?" she asked. "Up there," he said, pointing to the ceiling. His mother remarked that that was a singular place to see cows, and the little fellow got slightly angry, and said, "Well, I guess they could be angel cows, couldn't they?"

The Brooklyn Bridge.

On being re-elected President of the Board of Trustees of the Brooklyn Bridge, lately, Mr. Henry C. Murphy promised that the bridge would be ready to open for use by the Fourth of July, 1881. A large body of men are at work upon the approaches to the bridge on both sides of the river. It is thought that a couple of months will suffice to complete the stone and brickwork on this side, after the purchase of certain properties has been made. The Brooklyn approach is shorter and much nearer completion.

The machinery for putting up the superstructure of the bridge is ready in the towers; but the work has been delayed owing to the necessity of constructing special machinery to cut the steel for the chords of the bridge. The largest size of steel hitherto made at the Cambria Iron Works, the most extensive in the country, measured 7 inches by 7 inches. The bars for the bridge are 7 inches by 8¼ inches, and to cut them, enormous shears had to be made and put in position. This caused great delay in the preparation of the first 500 tons of steel. The second lot of 500 tons, it is expected, will be delivered in advance of the time specified in the contract.—*Scientific American.*

GEORGE was after a fine male tiger. He was following up fast, but coming to a broad nullah full of water, he suddenly lost sight of his game. He looked up and down the bank, but could see no trace of the tiger. Looking down in the pool he saw what he thought was a large bullfrog. There was not a ripple on the placid, stagnant surface of the water. He marvelled much, and just then his mahout pointed to the supposed bullfrog, and implored him to fire. A keen look convinced George it really was the tiger. It was totally immersed, all but the face, and lying so perfectly still that not the faintest motion or ripple was perceptible. He fired and inflicted a terrible wound. The tiger bounded madly forward, and George gave it its quietus through the spine. A nearly similar case occured to old Mr. C. A tiger bolted toward a small tank or pond, and though the line followed up in hot pursuit the brute disappeared. Old C., keener than the others, was loth to give up the pursuit, and presently discovered a yellowish reflection on the water. Peering more intently, he could discover the yellowish, tawny outline of the cunning animal, totally immersed in the water, save its ears, eyes and nose. He shot the tiger dead, and it sank to the bottom like a stone. So perfectly had it concealed itself that the other sportsmen could not for the life of them imagine what old C. had fired at till his mahout got down and began to haul the dead animal out of the water.—*Sport and Work.*

ON the last day of June the Commissioner of the General Land Office, with the approval of Secretary Schurz, made apportionment of the sum of $300,000 appropriated by Congress for surveys of the public lands during the fiscal year which began July 1st: To Arizona, $10,000; California, $35,000; Colorado, $30,000; Dakota, $30,000; Florida, $8,000; Idaho, $12,000; Louisiana, $12,000; Minnesota, $16,000; Montana, $15,000; Nebraska and Iowa, $15,000; Nevada, $12,000; New Mexico, $12,000; Oregon, $15,000; Wyoming, $10,000; leaving $39,000 to be used according to the exigencies of the service during the fiscal year.

A CAREFUL writer comes to the conclusion that the cost of living in England is less now than it was a century ago. House rent in London has increased, but less money is spent in carriages and horses. Mens' clothes are far cheaper than in the days of doublet and hose, rich cloaks and costly laces; and womens' robes are not dearer than formerly. Meat is more costly than it once was, but bread, vegetables and fish are cheaper.

THE STATE FAIR.

The twenty-seventh annual California State Fair begins in Sacramento on the 20th of September next, ending on the 25th of the same. No less a sum than $20,000 is to to be distributed in premiums, for productions in every branch of industry, art and science. This Fair is the first to be held under the direct auspices, control and management of the State, which fact invests its proceedings with an official character, therefore of greater dignity and weight. The speed programme is designed to give all grades of fast horses a chance, and to be unusually attractive throughout.

An Act of the late Legislature, approved April 15, 1880, divides the State into Agricultural Districts by counties, and by this Inyo is placed in District No. 6, composed of the counties of Los Angeles, San Diego, San Bernardino, Santa Barbara, Ventura and Inyo. It is much to be hoped that some of our enterprising citizens will take it upon themselves to see that our county is represented at this great Fair in some of its productions—mineral and agricultural if not in manufactures.

The Central Pacific Railroad Company will carry all articles and animals exhibited at the Fair, over its respective routes, free of charge, under the following rules:

Charges will be collected for the transportation to the Fair. After exhibition, the articles, if consigned direct to original shipping point, and the ownership has not changed, will be returned free, and the charges paid for transportation to the Fair will be refunded by the Railroad Agent at destination, upon presentation of the Secretary's certificate of exhibition and surrender of Expense Bill for freight charges paid at Sacramento.

The same company will issue excursion tickets to parties going to the Fair and returning, at about half price.

THE *Inter-Ocean's* Washington special says: Land Commisioner Williamson is in trouble. An ingenious Californian has entered a slate quarry and commenced to burn lime. Now he demands a patent under the universal land act. He has presented a heavy document full of legal and scientific opinions going to show that limestone lands, granite lands, and, in fact, almost any lands, are mineral and can be entered under the terms of the act. Gen. Williams does not know but he will have to decide that, according to the working of the law, there is nothing but mineral land in the country.

AN army officer stationed at Fort Keogh, now in Chicago, gives an account of a buffalo hunt which recently took place on and in the Yellowstone. Crow Indians, getting short of meat, went in quest of bison, and finding a herd of 4,000, attacked it. The animals started in a panic for the river, followed by the redskins. Soon there was an indistinguishable mass of Indians, buffalo and ponies in the stream, and the current being strong, many of each were drowned. Thirty savages went down, and ponies and buffalo almosi innumerable met a similar fate.

THERE are now three Hebrews in Congress—Messrs. Jonas, Morse and Einstein. In the House there are six German Representatives, among whom are Heilman of Indiana, Poehler of Minnesota, Muller of New York. and Deuster of Wisconsin.

THE Carson *Appeal* quietly announces the marriage of Sam'l P. Davis, the brilliant editor of the paper, to Mrs. Nellie V. Mighels, the proprietress thereof. THE INDEPENDENT extends its most sincere congratulations to the high contracting parties.

A RECENT earthquake on the Island St. George, one of the Azores group, resulted in the formation of another island six hundred yards distant and about eighteen hundred square yards in extent.

ON the night of the 12th instant Tom McLaughlin, at Belleville, was shot dead from his horse, presumably by Brophy, a brother to the man that McLaughlin killed some months ago.

AT a meeting of the trustees of the Duchess of Marlborough's Irish Relief Fund, very encouraging reports of the improved coudition of West Ireland were given.

THE Weekly *Bentonian* calls loudly for the erection of a 10-stamp custom mill at Benton.

CENSUS returns give the population of San Francisco at 233,066, including 20,549 Chinese.

OUR POPULATION.

The returns of the U. S. Census Enumerators for this county are now complete, except the Resting Springs District, which may not be received, if received at all, for two weeks yet. The total white population of that district will quite surely not exceed 100, if so much. As will be seen by figures in detail below, the total population of Inyo county, whites, Indians, Chinamen and all colors included, foots up to 2,874; to this is to be added that of Resting Spring District, whatever it may be.

By districts the figures are as follows: Fifteenth District, comprising Bishop Creek, Round Valley, Big Pine and Deep Spring Valley, S. W. Blaisdell, Enumerator, has a total population of 1,588, divided and sub-divided as follows: Whites, 1,117; Indians, 461; Chinese, 10. Of these, 610 are females and 878 males, giving the latter a majority of 268.

Fourteenth District (A) comprising Independence, George's Creek, and Lone Pine, J. F. Dillon, Enumerator, has a total of 889, of which 93 are Indians, and 24 Chinamen, and 336 are females and 553 are males, showing that the lords of creation have a clear majority of 217.

Fourteenth Distrlct (B) comprising Cerro Gordo, Beveridge and that region, H. H. Buckles, Enumerator, has 152 males and 38 females, or a total of 190, of which 14 are Chinamen and 11 aborigines.

Thirteenth District, comprising Darwin, Lookout, Panamint, Owen's Lake, etc., has 181 males and but 26 females, making a total of 207, of which 8 are Indians and 32 Celesials. Frank Fitzgerald, Enumerator.

In enumerating Indians, the instructions were to count only such as have local habitations, in the employ of whites, and so forth—in other words, as cattle men would put it, to take only those that have been rodeoed and branded, but none of the wild ones ranging at will over the mountains and plains. This accounts for the poor showing in the numbers of that class of our population.

In recapitulation we have the totals:

Whites	2,231
Indians	573
Chinese	70
Total population	2,874
Males	1,864
Females	1,010
Majority of males	754

Add, say 100 whites for Resting Springs, and about 400 wild Indians, and the total population of the county, including all colors and sizes, may be placed at very nearly 3,374.

A DR. TANNER, of New York, has started in to prove that he can go forty days and nights consecutively without taking anything into his stomach whatever, except water. So long as the doctors try such hygienic experiments on their own persons, it is all right—in that way they will find out how it is themselves, and other people may live longer and happier. At last accounts the doctor had put in fifteen and a half days of the forty, and, though greatly weakened, expressed confidence that he would complete his undertaking. If he does and lives, it will be some encouragement to country newspaper people, but outside of that, we can see no good to come of it whatever.

A NEW YORK dispatch of the 9th says: "The heat still continues intense. One hundred and thirty-one deaths were reported to the Board of Health, including sixty-five children, who died from the effects of heat within the twenty-four hours ending at noon yesterday."

HAD Col. Shannon, of South Carolina been firm enough to persist in his refusal to take part in a duel, he would have suffered no loss of respect among people whose respect is worth having, and his family would not now be left desolate by an appeal to the barbarous code.

AN earthquake on the 4th instant was one of the most severe and widespread that has been known in Switzerland for several years. Two persons were killed. Several meters of the summit of Schunsbelderg, near Quarten, fell, overwhelming a large wood.

LADY ANNE ISABELLA BLUNT, granddaughter of Lord Byron, and sister of Baron Wentworth, has been converted to Roman Catholicism. Should Baron Wentworth not marry, the barony will pass to Lady Anne in case she survives him.

GEN. HANCOCK'S grandson, aged four months, died of cholera infantum on the morning of the 13th. This depressed the General so that the visit of the committee to tender him the Democratic Presidential nomination was purely formal.

A METEOR as large as a barrel fell in Georgia recently, and the black people, as well as many whites, thought the last day had come, so they fell to praying with extraordinary fervency.

THE HARKINS–WELCH CASE.

Synopsis of the Evidence Adduced in the Examination of Daniel Harkins for Killing Wm. F. Welch.

As mentioned last issue, the examination of Daniel H. Harkins for killing Wm. F. Welch at Darwin, this county, June 29, took place last week before Judge Hannah of the Superior Court. The evidence was closed on Saturday evening, and the case submitted without argument. As all the sworn testimony tended directly to show that Harkins acted in self-defense, the Court on Monday morning ordered the prisoner discharged. Following is the sum total of all the light thrown on this bloody deed by the evidence brought out:

C. H. Lander, Justice of the Peace at Darwin, testified that at the moment of the affray, he was seated at the supper table in a house just across the street; heard a groan and exclamation of distress, and, accompanied by Deputy Sheriff Martin Mee, crossed to the scene as rapidly as possible; found Welch lying on the ground, bleeding; ordered the arrest of Harkins; Harkins offered no resistance, but said: "I have evidence." Deceased had a wound in the breast, and another in the abdomen, through which the bowels protruded; they were cut in several places; was not with deceased when he died; saw him lying dead next morning, June 30th; was with deceased twice—once on the ground where the stabbing took place, and another time in his room; on the latter occasion, found deceased very weak, in great suffering, but in his right mind; at request of parties present, took Welch's dying statement; had to revive him with stimulants while he was making his statement; he made his statement voluntarily; said he was on his dying bed.

The statement of deceased was here offered in evidence by District Attorney Laird, to which JudgeConklin, counsel for defendant, objects on the grounds: (1). It is not shown that it was made under a belief of impending dissolution. (2). It was not signed by deceased. (3). It was not read to him. (4). Not being identified as his statement.

It was subsequently identified by witness, and the objection was overruled.

Following is a copy of William F. Welch's

DYING STATEMENT.

DARWIN, June 29, 1880.

Deposition of William F. Welch.

I was sitting in front of Harmon's store, all alone. Then Dan. Harkins came out of his saloon and he says, "Some people make themselves officious." I said, "You dirty loafer, you allude your conversation to me." I got up and went towards him. I said, "If you do not stop it, I will make you." He says, "What on?" I says, "I will show you if you make any more allusions."

With that he put his hand inside his vest, and I saw him grasp the handle of a knife; then, knowing he intended to use it, I struck at him with my naked fist—my left hand; then he stabbed me once, upon which I reached for my knuckles with my right hand; I fell back and he knifed me twice more, and I fell down when he commenced kicking me. This is a true statement, so help me God, and I believing I am upon my dying bed.

[In lieu of signature, endorsed]: Witnessed by C. H. Lander, Justice of the Peace.

Martin Doyle sworn—Between 6 and 7 o'clock on the evening of June 29, heard some words between Welch and Harkins; Welch went from Harmon's store, 150 feet distant, toward Harkins, who was sitting on the porch of his saloon; saw Welch place his hand behind him as if to draw a weapon; saw him strike at Mr. Harkins, then I walked away; can't say that Welch had or had not a weapon; afterwards saw Welch packed up the street.

Philip Pirman heard the talk and scuffling, but saw nothing of the affray until Welch was on the ground, and Harkins was kicking him.

At this stage of the proceedings, counsel for defense moved that defendant be discharged on the grounds that the prosecution had failed to make out a case against him, etc., etc. Denied.

Thomas Johns sworn—Was on Mrs. Morrissey's porch, talking with Doyle; Harkins was sitting on the edge of the porch; heard the talk between him and Welch, but couldn't give the words of the first remarks: "Then Welch came toward the saloon; said something like, 'Dry up,' or 'Shut up;' Harkins said, 'I will not stop talking;' Welch kept approaching; by this time Harkins sat down on the stoop at the edge of the post; Welch was then three or four steps away; both made remarks I don't remember what; Welch kept approaching all the time, and I saw him, before he got to Harkins, put his hand to his back pocket three or four times—three times, I'm certain of; he had then got up to Harkins; Harkins made a remark that 'he din't want to have trouble with him,' or 'interfere with him;' Welch said something about him talking too much; he struck Harkins with something; I don't know what it was, and don't know yet; knocked him over on his side or back; Harkins got up and and made some lick at Welch and knocked Welch down on the ground; he kicked him three or four times, and then Martin Mee came up and arrested Harkins." This witness was cross-examined at length, during which he said he stood 8 or 10 feet from Harkins, who was nearer to him than Welch; could see Harkins' hand, but could see no knife in it; he struck Welch first as he (Harkins) was in a stooping position, rising from the ground; struck Welch two or three times—with his hand; saw something in Welch's hand, like a piece of iron, about the size of an egg; it had a string to it; saw no knife at any time." Witness went away in another direction when Harkins was arrested.

Logan Wicks sworn—Was at the supper table in Mrs Morrissey's restaurant; heard the loud talking between the two men; Welch said: "If you ain't careful, I'll kick the head off of you, you big, dirty loafer." Harkins said: "I hardly think you can." Saw Welch pass the window, approach Harkins, who was sitting down, catch him by the throat with his left hand and strike him in the face several times with his right hand; Harkins' hands were going in front of his breast as if defending himself; at that instant Welch said: "Don't you draw any weapons, you dirty loafer!" Two or three seconds later, Welch fell, Harkins jumped to his feet and began kicking him. At the beginning of thee trouble, heard Harkins speak first, saying: "Some people seem to have great official authority."

Jesse Roy sworn—Was on the porch, heard all the talk; when Welch began choking Harkins, witness ran into the dining room to tell Mrs. Morrissey, that she might come and separate them; she opened Welch's fingers from Harkins' throat.

Mrs. Grace T. Morrissey (defendant's sister) sworn—Keeps a saloon and restaurant; Harkins was her bartender; was attending to the supper table when Roy called to her to come and separate the men; found Harkins on his back, Welch on top choking him; Harkins' eyes were bulged out, and his mouth open; took all her strength to loosen Welch's fingers from Harkins' throat. "Some one caught me by the shoulders and told me to get out of the way, or I might get hurt. I then went back into the dining room."

Cross examination—After I had separated them and straightened up, Welch struck Harkins, and he rolled on his side; was too much excited to notice what Welch struck him with.

It should be stated that all the eye witnesses testified that Harkins did not make the first demonstration.

This closed the testimony in this examination. The following

ADDITIONAL FACTS

are important to a clear understanding of the case:

In the Coroner's Inquiry, Dr. P. G. Gelcich, who attended the wounded man, testified that death was caused by two incised wounds, either one mortal. The upper one, in the breast having an opening of four and a half inches; the other, to the left of the stomach, was the immediate cause of death, through the effusion of fœcal matter into the peritoneum; from this wound the bowels, cut in many places, protruded in a mass, and it seems from other information, were in that condition before the second wound was inflicted, and of course during the time the slayer was kicking the prostrate man in such a beastly manner. The doctor also found several contusions on the face.

Logan Weeks testified that he, with others named, were in the Morrissey saloon playing cards; that a dispute arose between Mrs. Morrissey and her brother, Daniel Harkins; Welch came in, and following other remarks, told Harkins he was a dirty cur to use such language to his sister; Mrs. Morrissey told Welch it was none of his business; to leave; she was not afraid of Daniel Harkins. Welch went away. This occurred two or three hours prior to the fatal affray. This witness picked up a knife on the ground after the affray, concealed it till inquired for by Deputy Sheriff Mee, to whom he delivered it. This witness stated to the Coroner's Jury, that to the best of his knowledge and belief the wounds on Wm. Welch's person were inflicted by Daniel Harkins.

Before the same jury, Deputy Sheriff Mee testified that while he had Harkins under arrest, he (Harkins) admitted that he cut Welch, adding that he did it with a pocket knife which he pulled out, but which showed no trace of blood. This was while on the way to the jail.

The jury found that deceased came to his death from wounds inflicted by persons or a person to them not made known by the evidence.

On complaint of Frank H. Welch, a brother of deceased, Harkins was again placed under arrest, and, waiving an examination before Justice Lander, was by him committed to the county jail.

The knife with which the ghastly wounds were inflicted is a very stout, sharp pointed, keen edged bowie, with a short bone handle and short brass guard, and blade 6½ inches from guard to point. Its rough appearance indicates it to have been of ordinary blacksmith manufacture. It is now in the Sheriff's office.

Welch wore overalls, was in his shirt sleeves, and without arms other than what is known as a "pair of knuckles."

In the foregoing we have the story of the death of a man who, as an officer, never shirked duty or danger; as a citizen, since we have known him here, upright, honest and honorable, chivalrous and kind hearted, moral and gentlemanly, yet quick to resent an insult, and then a man to be feared by an enemy—and enemies he had, yet there few indeed who will not say that William F. Welch was not an exceptionably noble man.

He expressed nor seemed to feel not the slightest fear or regret at the near approach of death, save on his aged mother's account alone. And as his last request he charged his young brother to go to her at once and never leave her while she lived—a fact that accounts for this brother's immediate departure after the elder brother was laid away.

In conclusion, we may add that Harkins gives it as his candid opinion that Welch, since his return to Darwin some two months since, had been laboring under a peculiar morbid, despondent condition of mind by which he had become reckless, if not vengeful, and was really "not himself." And, as a more probable story, Harkins says that he himself had no intelligent consciousness of a single act of his own after the deadly struggle began. If this is not true, he showed himself as cruelly savage-hearted as the tiger of the jungle.

A CARSON dispatch of the 13th says: The State Board of Pardons met to-day and concluded their labors, and adjourned to October 11th. The applications of William Troy, convicted of robbery; Michael Carrigan, assault with intent to kill, and Henry Hickman, assault with intent to commit rape, were denied. A pardon was granted to Walter S. Cocks by a vote of four to one—the innocence of the criminal being clearly shown; also to Fillipo Pirino, convicted of manslaughter, it being shown that he acted in self-defense. All the other applications were continued until next meeting.

FROM MAMMOTH CITY—THE MINES AND THE CELEBRATION.

MAMMOTH CITY, July 6.

MESSRS. EDITORS—I opine that some of your readers would like to have a synopsis of matters and things in general in and around this elevated portion of the Lord's moral and mineral field, and to know whether and how we heathen celebrated the birthday of our national independence; in short, they may wish to know if we 10,000-feet altitudinarians still live, move and have an existence. I would, therefore, just state that the

MINES

Never looked better than at the present. Several properties are being thoroughly prospected; all show good ore, assaying well and comparatively free from base metal. The owners of some of these mines are going to build arastras, and will soon be turning out bullion. The Mammoth mill is running to its fullest capacity, 40 stamps, crushing an average of 80 tons of ore per day. Your correspondent is reliably informed that a handsome shipment of bullion will be made by the last of this month. The Monte Cristo and Headlight joint tunnel will be in an even 900 feet by the 10th, if no break occurs. Both of these enterprises are superintended by Mr. D. Crittenden, whose acts as an able mining superintendent speak for themselves. The mines at Laurel Hill are looking well. An incline being sunk by Hammer & Casey is down about 50 feet, showing a fine vein of very rich gray carbonate ore. They propose to ship a few tons of the ore to the Indian Queen mill, at Hutch's Cañon, to have it tested.

THE CELEBRATION

Of our natal day at this place came off on the 5th. Although according to the last census Mammoth City and vicinity only invoices 560 inhabitants, yet the audience at the exercises was almost the entirety thereof. The people of the valley, Mineral Park, Mill, Mammoth and Pine Cities turned out to a man, woman and child, and proceeded in all manner of vehicles to the eastern shore of Lake Mary, and there embarked our fleet, presenting a scene never before witnessed on the lake. Much happier smiles were upon the faces of those fair and innocent cargoes than were upon Washington's while making that eventful crossing of the Delaware. We were safely landed on the western shore, where everything seemed to be in perfect celebrating order. A large floor, with seats and a commodious stand for the officers of the day had been erected; a swing was in operation, with refreshment stand around. A beautiful green, velvety lawn, with the majestic peaks of the Sieras not far in distance for a background, formed a chromo of nature of the grandest design.

THE EXERCISES

Consisted of the usual introduction, Declaration, the poem and the oration. Judge H. M. Eddy was the presiding officer, whose introduction was a brief oration touching vividly upon some of the most eventful stages of our national history since 1776, and would have been a very creditable effort on such an occasion at any place. The Declaration was then read by Mr. Ben. M. Mattox, who rendered it in a clear and distinct tone, and with a degree of spirit and emphasis which interested the entire audience. Mr. R. D. Enright was then introduced and read a lengthy, original and well written poem—the whole reflecting credit upon him and his recent school career at San Jose. Last, but by no means least in importance and interest, was the event of the day—the oration by Geo. M. Gill, Esq. It was an admirable success as to subject matter and style of delivery, eliciting the heartiest applause and general congratulation, notwithstanding the indifferent report of the Mammoth *Herald*. The Silver Star string band, led by Cart Ober, discoursed sweet music for the dancers until the close of day.

CORRECT.

THE funeral of the late William Tilden Pelton, nephew and Secretary of Ex-Governor Tilden, took place Friday afternoon of last week from Mr. Tilden's residence, No. 15 Gramercy Park. Among those present were Ex-Police Commissioner McLean, Corporation Counsel Whitney, Mayor Cooper, Clarkson N. Potter, Col. John R. Fellow and Andrew H. Green. The following persons acted as pall-bearers: General John M. Corse, Alfred J. and Alonzo B. Dickenson, Francis S. Abell, Smith M. Weed and Edward L. Parris.

THEY do mining cheap enough in one place in Arizona. A correspondent of a San Francisco paper, writing from Tucson, says: At Ogilly ststion, fifteen miles from Tucson, is a quartz mine. The ore is mined in the mountains, three miles away, for 75 cents per ton, hauled to the railroad by 12-mule teams for $1 per ton, and taken to the mill, ten miles by rail, for 50 cents more. So it costs $2 25 per ton to get ore from the mine to the mill, which there produces $30 to the ton, thus paying a very good profit.

Two boys, aged 12 and 11 years, were found murdered in the woods in Mendocino county last Sunday. One was shot through the head, the other through the heart. The scene of the mysterious murder was near Potter's Valley, and the boys were named M. Gardner and H. Fitch, respectively.

A MINING NEWS ASSOCIATION is the latest thing in New York. It is organized for the purpose of receiving the latest and most authentic telegraphic reports of bullion shipments, new strikes and other important matters pertaining to the leading districts and mining centers of the country.

BUT about one-half the usual honey crop is expected in our southern counties this year.

THE Grand Jury now in session at Bridgeport is doing good work. It is making a thorough investigation of all matters coming under its supervision, and its report will be read with interest. So far seven indictments for murder have been found against citizens of this county. Thomas Dillon, who killed Travis some months ago, and was discharged by the Justice, is among the number. He is now in the branch jail at this place, and heavily ironed. It was a great surprise to Dillon, who has been staying about town ever since his discharge. The alleged murderers of Dalzell at Mill Creek are indicted; so is Sam Chung and Baker. There are other shooters who will probably be treated in a like manner. This is the most refreshing news that has sprung up in some days. It is to be hoped that the District Attorney will make a desperate effort to convict those he thinks are guilty.—*Bodie Free Press.*

GENERAL HATCH has been advised by a letter from Stockton that $200,000 will at once be subscribed by capitalists of that city toward the project of the narrow guage railroad in Nevada, which was supposed to have been dropped. General Hatch feels assured that the construction of the road is certain to come about in the near future, and that the road will prove a profitable investment. This is good news, and it is hoped the enterprise will be carried out to a succesful issue. It will bring the great mineral section of Mono into close communication with the agricultural region and open up a section which is now lying idle; a section rich in mineral wealth as any yet discovered.—*Bodie Free Press.*

MARRIED.

At the residence of Richard Eldred, Bishop Creek, Inyo Co., Cal., July 10, 1880, by Seth G. Sneden, Justice of the Peace, JOHN R. ELDRED to SADIE ROBEY, both of Bishop Creek.

INYO INDEPENDENT.

INDEPENDENCE, CAL.:

SATURDAY, JULY 17.....1880

NEW LOCATIONS. — The following named mines and springs have recently been located, and placed on record in the office of the County Recorder: Bull Dozer mine, Williamtic ledge, James River ledge, Sleepy Hollow ledge, Sleepy Hollow spring, Buckeye ledge, Midway ledge, Benedict springs, Pacific ledge, Atlantic ledge, Hartford mine, Little Chief ledge, West Point ledge, Yonkers ledge, Hudson River mine and Fairview mine—all of said property being located by E. L. Benedict, W. A. Irwin, D. E. Jones and S. P. Roberts, save the Hartford, which was located by H. F. Hastings. These locations are situated on the eastern slope of the White Mountains, just this side of the Mono and Inyo line. These records indicate the formation of a new and substantial mining center within our borders.

MINING SALE.—The following mining properties, being the same recently conveyed by John Ely, E. E. Steers, R. C. Spear and James Hanger to Geo. R. Cottrell of San Francisco, have been reconveyed by the last named party to Thomas H. Robbins, Thomas J. McKee, Henry Daily, Jr., Thomas S. Brennan, James R. Robbins, Thomas O'Callahan, Townsend Cox and Jacob Hess, the consideration being at the rate of $3,000 for one-tenth interest, or $30,000 for all of the following: The Sierra Nevada, Michigan, Detroit, Mollie and Evening Shade mines, all of which are situated in Slate Cañon, in the Inyo range, about seven miles east of Lone Pine. The purchasers of these mines are residents of New York, and it is to be presumed that active operations will soon be commenced to develop them.

FISH.—We were a day or two since favored with a—a sight of some magnificent fish caught by parties from town in the lake just across the first summit of the Sierra. Some of these huge trout were three and a half to four pounds in weight. Subsequently another party went up, who is noted for his extraordinary success—when alone—in capturing from the stocked streams hundreds of little minnow trout, but he met with "fisherman's luck"—got one, with a club. However, his horse had a circus; slid down a plane of snow and ice for four miles, at an angle of 80°. Striking bare ground at the bottom it flew three hundred feet in the air, revolving thirty-seven times. This is Judge Hannah's statement, and he got the facts from first hands.

POLITICAL.—A meeting of the Inyo Hancock and English Club was held at the Court House on Tuesday evening. The organization was perfected by the adoption of Constitution and By-Laws and the selection of additional officers and committees. A series of resolutions indorsing the National Democratic platform and the distinguished nominees of the party were introduced and enthusiastically adopted. Action was taken looking toward the organization of various Clubs throughout the county. After some short speeches and cheers for the ticket, the Club adjourned to meet on Saturday evening next, the 24th instant, and weekly thereafter.

OLD COSO.—Robert Stein, a well-known mining operator formerly of Southern Nevada, was in town two or three days during the week. At different times he has made a pretty thorough examination into several Inyo mining properties, and is enthusiastic over the variety of minerals, their extent, richness and easy purchase of mines. He has bought the Orion gold mine and little mill at Old Coso, acquiring both the conflicting titles of Fuentes & Co. and that of P. Reddy. He is putting on a force of men and will soon commence shipping gold, having gone into the business on that proposition solely.

ORE BATTERY.—We have been shown by Peter Taylor drawings from the Pacific Iron Works of the new 5-stamp battery, ordered for the reduction works of McEvoy, Taylor & Co., in Freeborn Cañon, Beveridge District. The drawings and specifications are very accurate and complete. Mr. Taylor has gone over to get out the timbers, and the work will be pushed to the earliest possible completion.

MINING MENTION. — Capt. J. M. Keeler, of the Hawley mill operation at the lake, has returned from the Bay.... Geo. K. Phillips, who has been back for some weeks, is still prosecuting work on his mines at old Crysopolis....A. Wingard, who is working the famous Cinderella mine at Deep Spring, was in town yesterday....Messrs. Thompson and Tichener are exploring the rugged gold fields of Beveridge.

TO OLD TUOLUMNE.—County Clerk John Crough left on Monday last for a visit to his old home in Sonora, going on horseback by way of Bridgeport. His trip was occasioned by a report of the serious illness of his father. Johnny is missed from his place about as much as any one man can be.

LUMBER.—Attention is called to the advertisement of the new Black Rock Saw Mill firm. The boys are reliable workers and thoroughly understand the business. They have a splendid lot of timber and have been shipping some of the best lumber we have seen produced in the county.

A NEW THRASHER.—A splendid new thrashing machine, 36-inch cylinder, has started in at Shepherd's place, for a season's work through the valley. It is the property, we understand, of Phil Keogh and Budd Wells.

NEW CARRIAGE.—O. I. Mairs has added a fine new double-seated carriage to the outfit of the Pioneer Livery Stable—just the trick for family use and for riding around mining "spurts."

TO MEET.—The Board of Supervisors meet as a Board of Equalization on next Monday. See notice elsewhere.

STATISTICAL.—The following figures are from Assessor May's returns, which returns will be turned over to the Board of Equalization on Monday, but at the time these figures were copied, were not complete in some of the minor details, therefore some may require correction hereafter. Total value of all property, real and personal, $1,265,711; total of mortgages against same, $85,242, leaving a net balance for taxation of $1,189,084; cash on hand, $12,424; solvent credits, $53,027; value of personal property, $486,508; value of improvements, $264,665; value of town lots, $19,600; of improvements on same, $88,690; improvements assessed to others than owners of the real estate, $3,475. The total of land claimed is 61,701 acres, of which 11,509 are enclosed, and 5,917 are under cultivation.

Crop reports for 1879 were not tabulated in time for this issue.

CENSUS TAKING.—The experience of some of our Census Enumerators, operating in the desert districts of Inyo, is not of a nature calculated to imbue them with a patriotic, burning desire to repeat the service. "Little Fitz," he of Lookout, rode about 400 miles and counted 207 noses. By riding ten hours a day he could manage to list eight persons. A trip across Panamint Valley to Wild Rose was rewarded by the sight of one Indian. But he nailed him; had to surround him first, and then the sight of the formidable papers struck terror to the aboriginal heart. Fitz pinned him to the earth and sat upon his breast while he propounded a few hundred questions, taken at random from the different blanks. He was going to earn those two cents if it killed the subject. He tackled "Spanish Camp," away down the road somewhere, where some twenty-five big and little Mexicans are running a number of arastras. A knowledge of la lengua de Española is not among Fitz' accomplishments; the Mexicans were suspicious and the outlook for success discouraging. By means of distributing four bits apiece among all the youngsters he made himself "solid" in that quarter; he was bound to earn those several two cents again. Then he worked his way into the good graces of one of the women; she sent for her man, and finally the party was enumerated in the great aggregate population of the United States of America. Some of the questions, though, seemed to cause an uneasiness; and there was trouble on the old man's mind when in a burst of confidence he explained that, although they had several children, no priest or officer had assisted in any marriage ceremony. He was assured, on the solemn word of an officer of the American Government, that there would be no dire consequence to the census on that account, whereupon Fitz was regaled with the finest tortillas and frijoles in the camp.

NO CORRECTIONS.—Census Enumerators Blaisdell, Fitzgerald, Buckles and Dillon all reported at the Clerk's office and awaited the time prescribed by law to make corrections in their returns, should any be demanded, but every body seemed to be satisfied, and none came forward to have numbers altered even in the matter of ages.

QUARTERLY MEETING.—Rev. G. B. Hinkle, Presiding Elder of Bodie District, M. E. Church, is expected to be at Bishop to hold quarterly meeting on the 24th and 25th of this month, and may be expected to pay this section a visit, though necessarily, it can be but a brief one.

PECULIAR.—We have been having rather peculiar weather for several days past—exceedingly warm and sultry, cloudy and rainy at times.

PREACHING.—Rev. F. M. Willis will preach to-morrow evening in the school house, and at the Post on Tuesday evening.

IMPROVING.—Joe Fernbach has been improving the brewery grounds with a handsome new fence.

LODGE.—To-night is the regular meeting of Inyo Lodge No. 221, F. & A. M.

THE last payment, $1,900,000, on the Horn Silver mine of Utah was recently made in New York city, making the total amount for this bonanza, $6,900,000. This amount has been shared equally between Campbell, Cullen, Byram and Ryan, who originally purchased the mine for $25,000.

THE Galveston *News* finds some compensation for the acquittal of Currie in the fact that the entire press of Texas denounces the verdict as an unparalleled outrage.

IN MEMORIAM.

BUSY BEE LODGE NO. 250, I. O. G. T., July 12th, 1880.

WHEREAS: We have learned with profound regret, that it has pleased the Almighty to remove from our midst by death brother Wm. F. Welch, therefore be it

Resolved, That in the death of our deceased brother this Lodge has lost a respected and valued member—the order a faithful and earnest worker—and society a good and meritorious citizen.

Resolved, That in all the relations of life while amongst us, Brother Wm. F. Welch has endeared himself to us by his worth as a private citizen, as well as by his fidelity and courage in the discharge of his duties as a public offier.

Resolved, That these resolutions be spread upon the minutes of this Lodge, and a copy furnished to the INYO INDEPENDENT and *Weekly Rescue* for publication.

S. P. MOFFAT,
A. R. CONKLIN,
F. M. WILLIS,
ANNIE BROWN,
MARY MAY.

BETTER register before the 3d of next month, or your vote don't go this Presidential election.

Garfield's Letter of Acceptance.

General Garfield's letter accepting the Chicago nomination will be found in our telegraphic columns. It is brief and pointed. He refers in a spirit of kindness, but firmness, to the situation at the south, as a denial of the equal civil and political rights of one class, guaranteed by the Constitution and laws, and he declares with emphasis that this is a nation, and that none of its proper authority should be surrendered. He advocates government aid to the States for educational purposes, but is averse to such aid for sectarian schools. On the currency question, he believes in making and maintaining different dollars of equal value, and he supports a tariff for revenue and for the adequate protection of American labor against the competition of the pauper and oppressed labor of foreign countries. He is for all reasonable expenditure in the improvement of our harbors and rivers, and particularly refers to the Mississippi and its great tributaries, as demanding on the part of the Government a systematic attention that will protect the residents in those parts from overflow and aid commercial development by improving inland water transit to and from the sea. In writing this letter Gen. Garfield places himself without reservation on the platform of the Convention and party whose standard-bearer he is. With reference to the Chinese question, while advocating the largest liberty of of immigration from foreign countries to the United States, he thinks this Mongolian influx "too much like an importation to be welcomed without restriction; too much like an invasion to be looked on without solicitude," and that "we cannot consent to any form of servile labor to be introduced among us under the guise of immigration." And if the Commisioners fail to secure a satisfactory modification of the treaty, he is for Congressional action to that end, and to insure peace and "the dignity of American labor."—*S. F. Chronicle.*

A JACKASS' GRIEF.—Newspapers have often told stories about the affection that dogs, horses and other animals had for each other, but we have never heard of a jackass being accused of any such tender sentiments. It is now our duty to record the faithful love one donkey had for a companion who had shared his lot for so long. Last week W. D. Wasson went out to Tioga District on a prospecting expedition, taking two jacks along to pack his blankets, tools and provisions. In coming down the mountain one of the long-eared freight transporters fell over a precipice and broke his neck. The other frightened the birds and the conies in their burrows with the sound of his lamentations. Mr. Wasson tried to coax the grief-stricken mountain barge away, but the donkey only lifted up his voice and wept, and would not be comforted. Then he essayed to drive with sticks and stones the noisy beast from the scene of his lament. But drive he would not. The donkey remembered how he and his beloved companion had foraged together from handy clothes lines; had in friendship masticated fence posts and sections of barb wire; and had contentedly nibbled such tender morsels as old gunny sacks and cast-off overalls, or had assuaged keen hunger with old boots and oyster cans, and could not be induced to leave the spot. Then the cruel master beat him terribly, still his grief nerved him to obstinacy. The master felled two or three large trees on his back, but to no purpose. Finally the master in despair, took the pack off and left him with his dead. The last seen of him he was eating the croppings of a quartz ledge and weeping for his friend.—*Homer Mining Index.*

IN the absence of anything more suitable, the people of Minnesota have decided to celebrate the second centennial of the discovery of the Falls of St. Anthony. The cataract has been in operation more than two centuries, but nobody but Indians knew it.

THE Quakers are decreasing in numbers in Great Britain, for the reason, no doubt, that they are no longer ill-treated on account of their opinions. Nothing builds up a religious sect like abuse and persecution. Bigots should remember that fact.

THE best engraved portrait ever made of the late Governor William Allen, of Ohio, was cut on a saw blade in the Ohio Penitentiary, by Ulrich, the noted counterfeiter.

WE learn that the recent developments in the north end of the Contention are most extensive, and were wholly unexpected. The 312 foot level is now 75 feet in 12 feet wide of rich ore, and a winze sunk 40 feet is still in the ore body.—*Tucson Citizen.*

THE Jerusalem artichoke is being introduced with success in Kern county as feed for hogs. On the Livermore ranch Mr. C. L. Connor has planted some 15 acres this year, and Messrs. Pierpont Bros. & Hall have a tract of nearly the same size. They are also grown on the plains at the Poso ranch. It is said to require but little water in the alluvial soil of the island, and produces abundantly. When the crop is matured hogs are turned in and allowed to do the harvesting. They root out the succulent tubers, leaving the ground in a mellow condition. As they cannot possibly take all the crop, it is only necessary to harrow down the land in the Spring to prepare it for the next season, no further seeding being required. Hogs eat them eagerly and fatten on them. Chufas are also cultivated on the island for the same purpose and are treated in much the same way.—*Kern County Californian.*

THE Census Enumerator, J. F. Norman, of Bodie Township, has completed his labors, and according to his figures the population is 5416. To this may be added ten per cent as an allowance for arrivals, departures and names not secured, which will make the number of persons here about 6000. Three years ago there were less than 400, and when the Bodie "first struck it" there were not more than 2000 people in town. The showing is a good one. The above is based on instructions that no one be enumerated who had not their usual place of abode in Bodie on the first day of June, 1880. Persons arriving here after that date are not enumerated, it being understood that they would be enumerated where they resided on that day.—*Free Press.*

THE INYO INDEPENDENT has commenced its eleventh volume. THE INDEPENDENT is an excellent guardian and exponent of its section, and deserves well of those whose interests it so ably advocates. The *Sentinel* wishes it the greatest success.—*Eureka Sentinel.*

THE INYO INDEPENDENT has turned another corner, having reached its eleventh volume. May continued prosperity attend it, as it is one of the most reliable weeklies in the State, and always a welcome visitor to this office. —*Mammoth City Herald.*

THE bees of the United States earn $14,000,000 annually, but never get a cent of it. Human beings, under such circumstances, would become discouraged.

INDEPENDENCE, CAL.:

SATURDAY, JULY 17.....1880

Two snakes, one a black runner, the other a viper, each about three feet long, were found in the swamp back of the Western Maryland Depot, at Mechanicstown, in the following predicament: The black snake had caught and began swallowing the viper tail first; the viper, had curved around and began to swallow the runner, tail first; and when found each had swallowed the other up to the head, there being nothing but the two heads projecting, each from the mouth of the other.—*Baltimore American.*

A HORSE was driven upstairs into a drawing room at Milton, England, but refused to come down again, and a part the wall had to be taken out and the horse lowered by a steam crane.

THE deficit in the Postoffice Department for the fiscal year of 1879 was $3,407,916, which is less than any year since 1866.

The Supreme Court of Nevada has decided that stock-owners are not responsible for damage done on unfenced lands.

SHAD are being found in larger quantities near the mouth of the Columbia each year, and will no doubt become a staple article.

ONCE again the British House of Lords has rejected the bill legalizing marriage with a deceased wife's sister.

ONE of the Indians lately killed in Grant county, New Mexico, had over $400 in greenbacks on his body.

MINING APPLICATION NO 161,

....TO THE....

OCCIDENT MINE.

U. S. LAND OFFICE,
Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred linear feet of the "Occident Mine" or vein, bearing silver and gold, with surface ground three hundred feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 37, in Township ——, Range —— of —— Meridian, said Lot No. 37 being described in field notes of survey as follows, to-wit:

SURVEY OF EXTERIOR BOUNDARIES:

Began at a post on the southwest cor. of claim; marked the post "Post 1 Occident Mine." Said post is 2x3 inches square by 30 inches long and set in a mound of earth 20 inches high. From which var. 15 deg 55 min E., a pine stump 8 inches diameter bears N. 28 deg 50 min W. 11 links. A pine stump 6 inches diameter bears N. 85 deg 1 min W. 45 links. A pine stump 20 inches diameter bears S. 33 deg 5 min W. 76 links. A pine tree 7 feet high x6 inches diameter bears S 39 deg 51 min E. 82 links. A pine bush 2 feet high x3 inches diameter bears N. 69 deg 10 min E. 67 links. From said Post the "Armagh U. S. Mineral Monument" by calculation bears N 20 degs 48 min W 17.17 chains. Thence with a var 15 deg 55 min E, 1st course—N 11 deg W 3.03 chains, ascending to point of hill at bottom of old prospecting cut 6.49 chains. End of slope —6.88 chains. On level line—commence descending 7.64 chains, old prospecting tunnel 8.42 chains. Old prospecting cut 12.47 chains. Old dump of prospecting cut 14.13 chains. Middle of Ygnacio Ravine—Ravine bears N 65 degs W 15.21 chains. Trail on ridge dividing Ygnacio Ravine from Cerro Gordo Cañon. Ridge bears W 16.07 chains. Rocky ridge—commence descending 17.19 chains. Middle of Cerro Gordo Cañon—commence ascending 21.85 chains. Wagon road—Citizens grade 22.72 chains. To post on N W cor of claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of rocks 2 feet high, marked the post "Post 2 Occident Mine." At foot of post is a cactus burr 20 inches in diameter growing in the rock. From said post a pine stump 2½ feet in diameter standing 8 feet below the wagon road, Citizen's grade, bears S 38 deg E 1.54 chains. No other suitable natural object within measuring distance. Thence with a var 15 deg 55 min E, 2d Course—N 79 deg E 2.27 chains, ascending rocky slope to "Post 3 Occident Mine" on north end of line of lode 3.42 chains. Rocky ridge bears south 4.54 chains To a post on N E cor of claim. Said post is 30 inches long, 2x3 inches square, and is set in a mound of rocks 20 inches high, marked the post "Post 4 Occident Mine" From which a pine stump 20 inches in diameter bears N 40 deg 35 min E 1.01 chains. The top of a blue slate reef 10 links high bears S 43 min E 15 links. Thence with a var 15 deg 55 min E, 3d Course—S 11 deg E .97 chains. Wagon road—descending 3.03 chains. An old stone cabin. A tall pine tree stands 15 links to East of line, 3.42 chains. Middle of Cerro Gordo Cañon—bears S W. Commence ascending on steep, rocky ridge, 8.48 chains. Trail on ridge dividing Cerro Gordo Cañon from Ygnacio Ravine 11.77 chains. Open cut 30 feet west of mouth of an old prospecting tunnel in blue slate, 12.98 chains. Old trail—runs N 65 deg W 13.69 chains. Summit of ridge at old trail 14.34 chains. Summit of ridge commence descending 15.38 chains. Crossing of Belshaw toll road 22.72 chains. Post on S E cor of claim. Said post is 36 inches long, 3x3 inches square and is set in a mound of earth 25 inches high, marked the post "Post 5 Occident Mine," from which a red iron boulder 2½x3¾ feet square and standing 26 inches high bears S 84 deg 40 min E 85 links. A pine tree 9 links high standing 6 ft. west of bottom of a gulch—gulch bears S, bears N 35 deg 11 min E 1.06 chains. The middle of the Belshaw toll road bears S 79 deg W 18 links. Thence with a var 15 deg 55 min E, 4th Course—South 79 deg W 18 chains. Road—commence ascending, 2.04 chains. Quartzite ridge bears N—S 2.27 chains Post marked "Post 6 Occident Mine" on south end of line of lode—commence descending 2.87 chains. Trail—runs N W and S E 4.54 chains To place of beginning, "Post 1 Occident Mine," containing 10.32 100 acres. From the Armagh U. S. Mineral Monument as herein described the mouth or entrance to the "Armagh Tunnel" as noted under the head of "Report" bears S 76 deg 55 min W 9.24 chains. The course of said Tunnel is S 58 deg 55 min E. Length 350 feet on the 27th of March, 1880.

ARMAGH U. S. MINERAL MONUMENT.

The "Armagh U. S. Mineral Monument" is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon, and very precisely on the W. B. line of the Ygnacio mine (as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Dep. Min. Sur.) and distant 17.51 chains from the S W cor stake of the Ygnacio mine.

At the point above given I drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter x16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high x5 feet in diameter at its base. Marked the top of post "U. S. Mineral Monument. Erected January 3d, A. D. 1880, by Wm. Crapo, U. S. Deputy Mineral Surveyor—under authority of the U. S. Surveyor General for California." From said post in mineral monument, with a variation of 15 deg 55 min E, the extreme end of the bluff on which the monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face of rock 7½ feet high bears N 60 degs E .07 links. The N E cor of an old adobe *vaso* chimney bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The N W cor of Rafael Diaz' house bears S 28 deg 33 min E 1.58 chains. An old well 30 feet deep on north side of Cerro Gordo Cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE.

Commence at "Post 1 Occident mine," thence with a var 15 deg 55 min E, S 79 deg W 3.03 chains to Post on S W cor of Ygnacio mine as surveyed for a patent N 11 deg W 17.51 chains. To U. S. Mineral Monument which when computed gives for a closing line from "Post 1 Occident Mine" to U. S. Mineral Monument N 20 deg 48 min W 17.77 chains.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 147 of locations.

The adjoining claimants are, on the west the San Francisco mine, on the south the Moter mine and on the east the Trachyte Flat mine.

Any and all persons claiming adversely any portion of said Occident mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

JAMES E GOODALL, Register.

MINING APPLICATION NO. 162,

...TO THE....

ARMAGH MINE.

U. S. LAND OFFICE,
Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred (1,500) linear feet of the "Armagh Mine" or vein bearing gold and silver, with surface ground six hundred (600) feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 38, in Township ——, Range ——, of Mount Diablo Meridian. Said Lot No. 38 being described in field notes of survey as follows, to-wit:

Commenced at "Post 1 Armagh Mine," on S E corner of claim. Said post is 30 inches long 2x3 inches square and is set in a rock mound 2 feet high, from which with a var 15 deg 55 min E a pine stump 18 inches high by 10 inches in diameter bears S 15¾ deg E 77 links. A pine stump 15 inches diameter bears S ⅔ deg 30 min W 91 links. A red ferrugenous quartz reef standing 4 feet high bears N 24 links. A pine stump 12 inches high x5 inches in diameter bears N 49 deg 30 min E 15 links. Thence with a var 15 deg 55 min E, N 11 deg W 3.20 chains. Ascending to summit of ridge commence descending, 6.98 chains; dump of old prospecting cut, 10.80 chains; Belshaw toll road, 13.16 chains; Belshaw toll road in middle of Cerro Gordo Cañon, commence ascending 14.25 chains; road running to Potosi house, 21.66 chains; wagon road—Citizens' grade—22.72 chains; post on the N E corner of claim. Said post is 30 inches long, 2x3 inches square, and is set in a mound of earth 20 inches high. Sage brush slope, sloping S W; no natural object for witness mark in vicinity. Marked post "Post 2 Armagh Mine." Thence with a var 15 deg 55 min E, S 79 deg W .07 chains. Trail runs N S; commence descending—2.20 chains; wagon road, Citizen's grade—4.54 chains; post on north end of line of lode, marked the post "Post 3 Armagh Mine"—8.43 chains. Trail runs N S—9.09 chains. To post on N W corner of claim, situated on sage brush slope, sloping to S W. Said post is 3 feet long, 2x3 inches in diameter and is set in a mound of earth 2 feet high; marked the post "Post 4 Armagh Mine" No suitable natural object within measuring distance. Thence Thence with a var 15 deg 55 min E, S 11 deg E, commence ascending—1.75 chains; commence ascending—3.97 chains; crossing of foot trail runs west—8.27 chains; toll road in middle of cañon, commence ascending, 18.45 chains; summit of ridge bears west; commence descending, 19.74 chains; south end of "Silver Wedge" claim, 22.72 chains, to post on S W corner of claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of earth 20 inches high; marked the post "Post 5 Armagh Mine," from which a pine bush 2 feet high bears N 76 deg W 19 links. The chimney of an old deserted vaso bears N 22 deg 30 min E 24 links. Thence with a var 15 deg 55 min E, N 79 deg E 63 chains. Descending into bottom of gulch—gulch bears south, commence ascending—4.55 chains. "Post 6 Armagh Mine," or south end of line of lode, 3.99 chains; crossing of toll road, 9.09 chains; "Post 1 Armagh Mine," place of beginning. From which post the Armagh U. S. Mineral Monument bears N 4 deg 10 min W 12.67 chains, by calculation, containing 20.64 100 acres.

Location of the Armagh Tunnel.—From the "Armagh U. S. Mineral Monument" the mouth of the Armagh tunnel bears S 76 deg 55 min W 9.24 chains. The course of said tunnel is S 58 deg 55 min E. Length, 350 feet.

ARMAGH U. S. MINERAL MONUMENT—DESCRIPTION THEREOF:

There not being any lines of the U. S. public land surveys within 100 chains of the Armagh mine, I built a Mineral Monument and connected therewith. Said Mineral Monument is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon and very precisely on the west boundary line of, and distant 17.51 chains from the southwest corner stake of the Ygnacio mine, as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Deputy Mineral Surveyor. At this point drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter by 16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high by 5 feet in diameter at its base. Marked the top of the post "U. S. Mineral Monument. Erected January 3d, 1880, by Wm. Crapo, U. S. Deputy Mineral Surveyor, under authority of the U. S. Surveyor General for California." From said post in Mineral Monument, with a variation 15 deg 55 min E, the extreme end of the rocky bluff on which the Mineral Monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face 7½ feet high bears N 60 deg E .07 links. The northeast corner of an old adobe vaso chimney, a Mexican furnace for smelting silver and lead ores, bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The northwest corner of Rafael Diaz' house bears S 38 deg 23 min E 1.58 chains. An old well 30 feet deep on north side of cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE

Commence at "Post 1 Armagh Mine," thence with a var 15 deg 55 min E N 79 deg E 1.51 chains to west boundary line of Ygnacio mine, and at a point 325 feet—4.92 chains from the southwest corner stake of the Ygnacio mine; thence with a var 15 deg 55 min E, N 11 deg W 12.59 chains to U. S. Mineral Monument.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 146, of locations. The adjoining claimants are, on the East, the Greenly mine.

Any and all persons claiming adversely any portion of said Armagh mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, in the State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

ASSESSMENT NOTICE.

KEARSARGE MILL AND MINING COMPANY.

Location of Principal Place of Business, San Francisco, California.

Location of Works, Kearsarge Mining District, Inyo County, California.

Notice is hereby given, that at a meeting of the Board of Trustees, held on the Seventh day of June, 1880, an assessment (No. 5) of Fifteen Cents per share was levied upon the capital stock of the corporation, payable immediately in United States gold coin, to John Calvert, the Secretary, at the office of the Company, northwest corner of Fourth and Howard streets, San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the TWELFTH day of JULY, 1880, will be delinquent, and advertised for sale at public auction, and unless payment is made before will be sold on MONDAY, the NINTH day of AUGUST, 1880, to pay the delinquent assessment, together with costs of advertising and expenses of sale.

JOHN CALVERT, Secretary.

OFFICE—Northwest corner Fourth and Howard Streets, San Francisco, California. n521td

LEGAL.

GUARDIANS' SALE OF REAL ESTATE.

NOTICE IS HEREBY GIVEN, THAT IN pursuance of an order of the Superior Court of the County of Inyo, State of California, made on the Thirteenth day of June, 1880, in the matter of the Estate of William Lewis and Timothy D. Lewis, minors, the undersigned, Guardian of the person and estate of William Lewis and Timothy D. Lewis, will sell at private sale, to the highest bidder, for cash, U. S. gold coin, and subject to confirmation by said Superior Court, on THURSDAY, the TWENTY SECOND day of JULY, 1880, at 1 o'clock P. M., all the right, title and interest of the said minors in and to all those certain lots, pieces or parcels of land situate, lying and being in the said county of Inyo, State of California, and bounded and described as follows, to wit:

An undivided one half interest in and to the southwest quarter section number twelve (12), and the north half of the northwest quarter of section number thirteen (13), all in Township No. Seven (7) South, of Range No. Thirty-two (32) East, Base and Meridian Mount Diablo.

Terms and Conditions of Sale: Cash, U. S. gold coin. Deed at expense of purchaser. Bids and offers may be made at any time after the first publication of this notice, and before making of the sale. All bids or offers must be in writing and left at the office of Messrs. Reddy & Conklin, Independence, Inyo County, California.

GEORGE L. LEWIS,
Guardian of the Persons and Estates of William Lewis and Timothy D. Lewis, minors.

Wonderful Silver Mines.

The wonderful richness of the silver mines of the State of Chihuahua, Mexico, is not fully known. It is true that the mines of Mexico have been frequently referred to as of great richness, but those who have not visited them, and who measure the value of these mines by the mines of America, have but a faint and imperfect idea of the character of the ore taken from such mines as those found in the region of Batopilas, in the State of Chihuahua, Mexico. I met yesterday Col. F. W. Armstrong, who is interested in the Todos Santos mine in the vicinity of Batopilas. Col. Armstrong was met in the office of the Galveston, Harrisburg and San Antonio Railway, where he was showing a collection of mineral specimens richer and more beautiful than were ever before displayed in this city. These specimens were declared to be but fair pieces of the ore taken from the mine in which Col. Armstrong is interested. Some of them resembled clusters of moss, or tufts of wool, and these were called "hair silver" as a distinguishing term. Other specimens had projectiles, and were distinguished as "nail silver." Said Col. Armstrong: "We can always tell when we reach that kind of silver, even in the dark, for by placing the hand against the wall its points are felt. They project in their purity from the rocks." There were other specimens of almost solid silver that had remained incased in feldspar and other volcanic rocks. The specimens were colored black, and the rocks from which they were taken show unmistakable signs of a great fire at some period in the long ago. There are several rich mines about Batopilas, which is about 300 miles southwest of the city of Chihuahua, and on a direct line little more than the same distance, from the Upper Rio Grande. The mines which are being regularly worked at present and those most valuable are the Todos Santos, in which Col. Armstrong is interested, the San Miguel, owned by J. B. Robinson & Co., and in which Boss Shepherd has taken stock, and the San Domingo mines, owned by a Philadelphia company. These mines, and many others, whose riches haves never been fully developed, are located within three miles from the town of Batopilas.

They are are all w[illegible] in the old Spanish way, [illegible]ithsta[illegible]nding that Americans [illegible] own them. The machinery consists of the most ordinary tools and a few stamps, with mules to do the heavy work. It is impossible to reach Batopilas with heavy machinery, for the mountainous country will admit of the passage of only the small and firm-footed Mexican mule. A weight exceeding 300 pounds cannot be carried over these mountains, and this must be conveyed on the backs of mules. Steam engines and boilers and heavy crushers can never be conveyed to the Batopilas mines. The region is rich beyond calculation. The mine in which Col. Armstrong is interested now turns out an average of $30,000 per week. The whole ground is filled with silver. The best ores run from $16,000 to $20,000 to the ton, and what is called second-class ore from $6,000 to $10,000. Col. Armstrong says that, though this second-class ore is richer than that taken from the Comstock lode, yet they do not use it, but cast it aside in a pile by itself, awaiting the possibility of hard times. The richer ore is so abundant that it would not pay to devote time and money to extracting the silver from this second-class material. There are hundreds of tons of this inferior ore thrown up in piles about the mine. This mine is now only about 150 feet below the surface, and runs into a mountain. For every dollar spent in working the mine, as the record and the accounts show, Col. Armstrong says $10 have been returned. These mines were worked by Spaniards many years ago, but they did not go very deep. After reaching water they would abandon the shaft and strike in at another locality.

There are many evidences of the mines of this country having been extensively worked by the early inhabitants. The mine in which Boss Shepherd is interested was worked by Marquis Bustamente, and, indeed, he won the noble distinction he bore by presenting to his Royal Highness, the King of Spain, a ship load of silver bricks made at this point from ore extracted from this mine. His home on the Batopilas River was one of the most elegant and costly in Mexico. The ways leading to it were paved with silver bricks, and a great arch over the front entrance door was constructed of silver. The house still stands near the mines, where it was built and occupied by Bustamente, but, of course, the silver bricks have been taken away and devoted to more useful purposes. Col. Armstrong thinks the mines about Batopilas are the richest in the world.—*San Antonio Correspondence.*

Monsters of the Deep.

The completion of the *Inflexible*, *Ajax* and *Agamemnon*, which is promised during the present year, will make an important addition to the available strength of the British navy. The *Inflexible*, the largest man-of-war afloat, is a vessel of 11,406 tons displacement; while the *Dandolo* and *Duilio*, her rivals in the Italian navy, ore only 10,570 tons. The armament of the *Inflexible*, consisting of four 80-ton guns, is, it is true, inferior to the Italian ships, each of which carries four 100-ton guns; but, on the other hand, there can be no doubt that the English vessel is of greater strength than the Italian men-of-war. The *Ajax* and *Agamemnon* are sister ships, each of 8,492 tons, so that by the completion of the three vessels 28,554 tons of iron-clad shipping will be added to the immediately available strength of the navy. These two vessels carry only four 38 ton guns, but as these weapons throw a projectile weighing 700 pounds with sufficient velocity to penetrate 14-inch armor, the vessels must be regarded as offensively of considerable power, while they possess great defensive strength.

MANY sheep and lambs have recently been worried on sheep farms in the neighborhood of Dundee, Scotland. An unusual method of sheep worrying was recently perpetrated on the farm of Pickstone, tenanted by Mr. Campbell. One morning a lamb was heard bleating in one of the fields of the farm, and, as no lamb could be seen on a casual inspection, a more careful search was made, when it was found that the bleating proceeded from a lamb that was buried in the land, the only part left exposed being the head. It was at once evident that this had been the work of a dog. The lamb was taken out, and was, strange to say, little the worse of its burial. A diligent watch was instituted with the result that the depredator—a collie dog—was captured in the act of burying another lamb, which was also alive.

THE results of soundings over the bed of the Atlantic have made clear, it is believed, the existence through the middle of the ocean, extending from north to south, of a sunken ridge often less than 1,000 fathoms from the surface, while on either side the water has a depth of from 3,000 to more than 3,450 fathoms; so that the elevation of the ocean's bottom required to make the depths dry land would bring up between them a mountain range from 9,000 to 15,000 feet in hight. The higher points of this sunken ridge now form the island of the Azores.

A LATE number of *Nature* says that milk is especially liable to be affected by the atmosphere about it, whenever it rests in open vessels. In the cleanest pantry or larder, it gathers the effluvia of meat, cheese, onions, bread, fruit and such matters, the result being that it is soured and spoiled. In kitchens, nurseries, living and sleeping rooms, closets, etc., the case is worse. Nature intended that milk should be drunk at once at its source; and it is very likely that exposures and delays impair its power of nutriment. Milk should be kept as much as possible in close vessels.

PROFESSIONAL pomposity is well taken off in the following: Doctor Shields (looking learned and speaking slowly): "Well, mariner, which tooth do you want extracted? Is it the molar or incisor?" Jack (short and sharp): "It's in the upper tier, on the larboard side. Bear a hand, you swab, for it is nippin' my jaw like a lobster."

THERE is a man in Paris who claims to be 112 years old. He has probably never engaged in any more dangerous or unhealthy pursuit than fighting duels. All French physicians agree that there is nothing more conducive to longevity than a life devoted solely to duelling.—*Norristown Herald.*

"HARK! I hear an angel sing," sang a young man in an outside township school exhibition. "No, 't aint," shouted an old farmer, in one of the back seats; "it's only my old mule that's hitched outside!" The young man broke down and quit.

SWEET TOMATO PICKLE. — Seven pounds ripe tomatoes peeled and sliced, three and a half pounds brown sugar, one ounce powdered cinnamon and mace mixed, one ounce powdered cloves, one quart vinegar; mix and stew one hour.

Railroads in Northern Mexico.

The people of Mexico have long opposed every attempt to introduce the railway into their country, believing that its introduction would be followed by an extensive emigration from the United States, and that American occupation would eventually result in annexation. For the same reason they have resisted the innovation of American ideas and capital in the development of their mining and other resources, and by their exclusiveness, have greatly retarded commercial intercourse between the two countries.

Lower California, and a large portion of the mainland of Northwestern Mexico, is almost wholly mountainous, and has long been famous for its mineral wealth. Rich silver mines have been worked there for centuries and still employ the same primitive methods of the times of the *conquistadores*, when the ore was carried out in large bags of rawhide on the backs of peons and broken up by hand before being reduced. The only means for transporting freight being on the backs of mules over rough mountain trails, it is not surprising that no improvement has been made in the manner of working mines and reducing ores.

Two or three railroads from the Pacific States and Territories into Mexico are projected, and the line of one—the "Arizona and Mexico"—has been laid out. The completion of these roads or any one will be the dawn of a new era in Mexico. The increased facilities for transportation would give impetus to mining enterprise, and reinforced by American experience, sagacity, capital and improved machinery, her annual product of gold and silver would soon surpass anything chronicled in her history. The railroad would open up undeveloped mineral territory, of which there is still a large extent in Mexico, and facilitate the development of mines in American territory through which it would pass. The route of the Arizona and Mexico railroad is located for a distance along the base of mountains upon which many of the principal mines of Arizona are situated, including the Tough Nut, Contention, Empire, Grand Central, Head Center, Tranquility, Sulphuret, Cincinnati, Girard, Lucky Cuss, Mamie, Owl's Nest, Minerva, Sultana, Bell, Randolph, Junetta, Sunset, True Blue, Gordon and others, so that each can dump their ores into cars on the track by the use of tramways and have it taken direct to the platforms of the mills along the San Pedro river. An arrangement of this kind, enabling ore to be shipped from the mines at comparatively light expense to mills situated in convenient localities, is what is needed in the wild, inaccessible Mexican Cordilleras.—*Rural Press.*

A TRAVELED SPECIMEN. — Herman Konrad, at Joe Langreth's, has a piece of copper taken from the Lake Superior mines which is a marvel. As a specimen it would be an attraction in any cabinet. It is about the size of a finger, solid native copper, terminating at the smaller end in solid native silver of the size of a bean. Examined through a powerful glass the entire specimen looks like huge mountain cliffs. Besides being a curiosity this piece of copper has a history. Leaving Lake Superior it was carried to Victoria, Vancouver Island. It then found its way overland to San Francisco. It then started on a sea voyage. Went to Honolula; to Hong Kong; to Australia; to New Zealand; to the Samoan Islands; to two or three South American ports; through Peru, over the Andes and across the Pampas to Rio Janeiro; to New York; to London; through Paris and Berlin to St. Petersburg; across the continent to Peking; to Yokahama; to San Francisco; through the mining districts of California and the adjacent States and Territories, finally bringing up in Benton, where it now reposes in a little sack on a shelf in Joe Langreth's. At many of these points this specimen might have been sold for a valuable consideration. Konrad obtained it from a flat-broke miner at Moore's Flat, in this State, for a trifle.—*Bentonian.*

AS THE warm season advances and bathing will form a very desirable recreation and enjoyment to a great many, it may be well to recommend to the recollection of those who have not learned to swim, a few plain directions which may be found advantageous in preserving life. Men are drowned by raising their arms above the water, the unbouyed weight of which depresses the head. Animals have neither motion nor ability to act in a similar manner, and therefore swim naturally. When a man falls into deep water he will rise to the surface and continue there if he does not elevate his hands. If he moves his hands under the water in any way he pleases, his head will raise so high as to allow full liberty to breathe; and if he will use his legs as in the act of walking, or rather of walking up stairs, his shoulders will rise above the water. The weight of the human body and the weight of the water differ so little that the least exertion in the proper direction, and, above all, presence of mind, is sufficient to meet any immediate danger from drowning.

A VICTIM of domestic infelicity should never go to church—that is, if he is in the habit of dreaming when he sleeps in church. A congregation near Quincy, Illinois, was somewhat startled last Sunday when a venerable member excidedly yelled out, "Here, now, drop that skillet, old woman!"

INTELLIGENT servant to caller: "Will ye kape still a minute while I look at ye? No, Misses hain't at home. She tould me if a woman come wid a wart on the end av her nose, to say she wasn't at home; an' there's no mittakin' that wart."

HOTELS.

THE BLANEY HOUSE,
Independence, - Cal.,
V. G. THOMPSON, Prop'r.

THE PROPRIETOR OF THE "BLANEY" respectfully announces to his friends and the traveling public that the house will be conducted as a

INYO INDEPENDENT.

PUBLISHED EVERY SATURDAY, BY

CHALFANT & PARKER.

J. E. PARKER. P. L. CHALFANT.

INDEPENDENCE, CAL.:

SATURDAY, JULY 24.....1880

THE August issue of the *Californian* is a splendid number. Prof. H. G. Hanks, the State Mineralogist, opens with an article on "Casa Grande," the celebrated ruin in Arizona. Prof. Davidson contributes an able paper on the "Abrasions of the Northern Coast." John A. Wright has an excellent article on "Probable Changes in American Government." W. C. Morrow has a short character story entitled, "Rags, Sacks and Bottles," while the most peculiar of all is Helen Wilman's story about "Jack's Boys." Anna Alexander completes her charming serial, "St. Bartholomew." There are many other papers and articles in this number which we have not had the opportunity to even scan, but we will venture to say there is not one but will repay perusal. Every reading family in the State ought to take this magazine; its cost is bu $3 a year; publication office, 202 Sansome street, San Francisco.

A New York dispatch of July 20 says: This morning the steamer *Dessouk*, having the Egyptian Obelisk in her hold, steamed up North River and anchored off Twenty-third street, where she will probably be for the next few days. The programme for unshipping and erecting has not yet been completed, but Masons from all parts of the country have expressed a desire to share in the performance. The unshipping will be accomplished by the same means employed in placing it on board the *Dessouk*. The steamer will first be lowered in a dry dock, and then the obelisk will be slid upon two floats, one under either end. The machinery made at Trenton last fall and used in Alexandria for lowering the column will be employed again for its re-erection. The site selected for the obelisk is in front and to the southwest of the Metropolitan Museum of Art, Central Park.

THERE is considerable in luck, say what you will. Here was Matt. Lynch, who lived in Philadelphia, fought all through the rebellion, never got married, went to New Mexico, discovered the Astec mines, which yielded him $4,000,000 clear at the rate of $60,000 a month, and now here only two or three weeks ago a tree fell on him and broke his neck, by which two brothers and a sister who staid in Philadelphia, suddenly become immensely wealthy, they being the only heirs. How they must have wept at Matt's bad luck!

G. T. DRESSER, a friend of the late Agent Meeker who was so barbarously murdered by the Ute Indians, has recently returned to Cheyenne from a visit to the scene of the butchery. He reinterred the remains of the Agent, his two sons and eight employés, the victims of the massacre. Around Meeker's remains a chain about four feet long yet remained, proving the story only too true that the red brutes had dragged the body about the Agency after the massacre.

THE first State election this year will be in Arkansas, and occurs on the first Monday in September. Next follows Vermont on the first Tuesday of September, then Maine on the second Monday of the same; Colorado holds her State election on the first Tuesday of October, and Ohio, Indiana and West Virginia on the second Tuesday of the same. The Presidential and other State elections all take place on Tuesday, the 2d day of November.

CONGRESS has given the Entomological Commission $22,000 to pay expenses of investigating the Rocky Mountain grasshopper and the cotton worm.

Joined the Silent Majority.

The last number of the Bodie Evening *Standard*, was issued yesterday. Mr. Harris considers the subject of suspension in a very philosophical light, and states that his determination was arrived at more as the result of ill-health than any other cause. The fact is, however, that there have been more newspapers in Bodie than the town could support, and it was merely a question of time when some one of them would have to succumb. The doctrine of the "survival of the fittest" probably controls the destinies of newspapers as it does in all other things, and through a combination of circumstances, the *Standard*, the first paper in Bodie, was evidently the weakest. In contemplating the death of the *Standard*, it must be said the writer regards it with some such sentimental misgivings as one may feel who regards the destruction of a work which to a certain degree his own hands have wrought. The *Standard* was the pioneer paper of Bodie, and nearly all those who were in its earlier days employed in that office are now connected with this journal. The proprietors of this paper have purchased the *Standard* power press, while the *News* carries the subscription and advertising list of our deceased contemporary, and will in the future, we learn, adopt the double head of the *Standard-News*.—*Bodie Free Press, July 21.*

BY WAY OF CHANGE—DEISM AND ATHEISM.

Just now the public mind is almost exclusively absorbed in the advance effort to determine who is to be the next President. That question is probably an important one, but at the same it is not best to become morbid over it. To prevent that, also, by way of change, let us take a look at a still more important question, though one that has been under discussion since man had an intelligent being. That question is: Is there a Creator, a personal God?

Absolute atheism—the denial of the existence of a Supreme Ruler—is literally shocking to all Christians and intelligent religionists of whatever faith. Nevertheless, France, a leading and one of the most learned and refined nations of the earth, stands to-day, both by society and governmantal edicts, in the attitude of pronounced atheism. To that fact is attributed the recent sweeping expulsion of the Jesuits. To the same fact is due the disruption of one of the most ancient and honorable organizations of the world, so far as a faction in that nation could disrupt it by denying its corner stone and sole foundation—the Great Architect of the Universe. And in Christian England a man is elected to Parliament because he is an atheist—but is denied his seat by reason of that fact, or the refusal to take the usual oath. In our country, too, it seems, there are men and woman and young people especially who are trying to persuade themselves that there is no God, consequently that there is to be no future accountability to hamper present action.

These facts make this very old question one among the live issues of the day; one of more importance to the well being of society in general than any other that divides or ever did divide society. Prof. Swing, in a recent sermon in Chicago, says truly enough that it is a question that rises far above the mere superficial problems as to whether there is a Trinity, or an inspired volume, or a Divinity-founded church. "Rationally," he remarks, "atheism is impossible, but practically as a dominant thought casting its influence, its shadow over the life, and thoughts, and feelings, atheism is only too possible in our humble earth." "Upon the side of vice there may become a disbelief in a Creator, but upon the side of reason, such assurances never can come."

Let those who are disposed to sneer at ordinary questions of theology bear in mind that this is not a church question, but a human inquiry—and a question of cold logic, therein differing materially from many questions in differences of faith. The following extract from Prof. Swing is logical, interesting and convincing in its line of reasoning, though of itself but a small part of his learned discourse, all tending to the same conclusion:

In our walks about our world we are met by the feeling that Mind has been here and there, and, as we perceive that it was not man's mind, we must assume that a greater than man exists. The argument being now spread over several thousand years, and having assumed all possible forms, we seem competent at last to select from the mass the most impressive testimony, and that seems to be the fact that there is in our universe an intellectual action, which, in an infinite bulk somewhere we may as well call "God." Pantheism is the assumption that each bird, and fish, and man, is a part of this Mind, just as each ray of light in a cell or each rill of water is a part of the common light or sea. Deism is the assumption that God is one great mind, and that all other life were made by Him as a workman makes a watch. Atheism is the denial of both of these and the assumption that the dust is the parent of bird, and fish, and man. Of these, Deism is the most rational. Pantheism offers no valid reason why an insect should be a part of the Deity. Pantheism stands upon a pardonable and even thoughtful basis compared with atheism, but as compared with deism its claims to our faith seem inferior. Our world is so given to individualizing its life that we seem bound to individualize the Supreme Power and discard pantheism. The consciousness of Lord Bacon was quite distinct from that of Newton or Socrates. You cannot recall my dreams, nor can I know your thoughts. Much less is man identified with his dog or horse. All is separate in our earth. It has no pan-humanism, no pan-animalism, and hence we must deny it a pantheism, and must imagine our Creator to have personality as distinct from you and me as we are distinct from each other. In a universe of individuals God is simply the greatest.

Atheism is the most uninviting of the three theories. It cannot lead us across from matter to mind, and therefore it is compelled to deny the existence of mind and affirm that it is only an accident of matter, and that a bird can fly in the air is only as the dust that can fly in the air, and that between swimming chips and swimming fish there is no essential difference. Atheism is placed in the absurd attitude of confessing life of many grades and then of denying a still higher grade called Divine. It sees in this earth a million species, from a butterfly up to a saint, and then says there may not be one more form of life called Deity.

E. A. BENNY, formerly of this county, is before the people of Mono as a Democratic candidate for Sheriff. We will stand on the proposition that, in the probable event of his election, there will be no foolishness among the roughs while Ned is around.

A GREAT PROBLEM.

CAPT. J. B. EADS, of St. Louis, who has gained a world-wide reputation by his successful system of jetties at the mouth of the Mississippi, is now in San Francisco. He has accepted the position of consulting engineer in the California Drainage and Debris Commission, and in company with State Engineer Hall, will at once inaugurate a system of surveys from which to evolve a solution of what we believe to be the most difficult engineering problem ever presented for practical demonstration in the United States—not that it will cost such an immense sum of money, if it can be satisfactorily done at all, but because its perfect accomplishment involves a unity of conditions which appear to be beyond human means to unify. It is quite within the scope of engineering possibilities to bore a railroad tunnel under the Sierra Nevadas from one side to the other; and it is not impossible to drain an inland sea, and make good farms on its bottom below sea level: but it is a contract indeed to confine water in a given channel and at the same time make it constantly carry along nearly its bulk of heavy debris long miles over ground with scarcely a perceptible grade, then dump where there is no dump, and scatter it around over a level country out of the way, and at the same time provide a system of drainage for this same dump—that is the situation, considered on the extended scale contemplated, and nothing short will be of any material avail. We can see but one way to dispose of the billions of tons of gravel-stones and slickens those hydraulic fellows have started down the rivers, and that is to dig a hole in some suitable place—say at Marysville—and let them run into that. There is no patent on this plan, nor charges for its suggestion, to add to the cost, and it can be scientifically demonstrated that every gravel-stone will by its own specific gravity drop into a hole and stay there if it has a chance; and that very result is the grand solution of the very problem now before those engineers.

DARWIN ITEMS—THE ENCOURAGING PROSPECTS, ETC.

DARWIN, July 21.

MESSRS. EDITORS—Since my last I am happy to state that the future outlook of our camp, in a mining point of view, has decidedly improved.

The late runs made by Gorman & Eddy and the New Coso Company poured into San Francisco about 160 tons or so of bullion, of fair grade and quality, and the manner adopted by the agents of Gorman & Eddy (Messrs. Waterman & Co.) brought competition by calling together all the principal buyers of bullion in the city to see, clip and sample the same. This manner of procedure naturally led to many questions, all of which being answered tended to direct attention to our part of the State. From what I can learn there is gradually growing a better feeling towards us, with evidences of its continuance. We are certainly entitled to more consideration than we are receiving from mining centers, but which we believe will come ere long. True, we cannot disguise the fact of having had quite a number of humbugging enterprises in the past, whereby many lost their coin, but how could it be otherwise when the directors of companies undertook a new departure, in trying to make a horse work a cart by putting the innocent animal behind the vehicle instead of in front?

The period of making furnaces, roads, etc., has passed, and now is dawning the era of actually working and developing the mines first, which distinctly indicates the dawn of good, practical common sense. Following are some facts concerning some of

THE MINES

Of this place and vicinity. Have not visited the Modock for some time, but from all I can learn the general outlook there, under the present management, is very favorable. Some 25 to 30 miners are regularly employed opening up the property under the management of J. S. Cnilds, assisted by F. S. Wallace as Foreman; and it is proposed at no distant day to run the furnaces again at that point.

At the Minnietta, an adjoining mine, mining is stopped temporarily, although the mine is reported as looking tolerably well; but rumor has it that the owners are trying to negotiate the property in New York. At Snow's Cañon, now called the Pinckney Mill and Mining Company, matters are moving on slowly to make a first-class camp at that point. The Collins Brothers have formed a co-partnership with Mr. L. P. Huger (who so kindly paid the road, poll and hospital tax for some 19 poor people last year), who is to have the management of same. The mill well be thoroughly overhauled, store, boarding house, etc., erected, so that prospectors can find every convenience for living and opening up their respective properties. The Company propose to buy and work custom ores, and at the same time develop and open up their own mines.

At Panamint, where so many ups and downs have been chronicled, there still remains some ten or fifteen men, who have unbounded confidence and belief in its ultimately becoming the leading mining camp on this coast. The mill has been running for several days on tailings, but as to real work being done there am not fully advised.

At Old Coso Mr. Robert Steen who lately bonded the Mariposa and sold same in San Francisco to some of its most wealthy capitalists, has commenced work on the mine and will gradually open up the same by timbering and repairing the main shaft and putting a whim on it; also, track for car and other general improvements. We may expect favorable results from that quarter.

About one month ago there arrived in our midst a gentleman from San Francisco by the name of J. C. White. He came up to see and report upon a mine called Eureka No. 2, the property of Dr. W. D. Johnston of San Francisco, who, by the way, is one of the leading assayers in the city. Mr. W. immediately upon his arrival set men to work to do the necessary annual assessments. The main shaft is down over 240 feet, showing ore most of the way down, and recent work has cut fine carbonate ores the width of the shaft, assaying over $100 per ton. He expects parties soon to arrive from the city, when the mine will be worked by a larger force and more convenient methods adopted. Mr. W. is a No. 1 assayer, guarantees his work, a live and practical man, and just the kind the camp requires to help bring it out.

The New Coso Company are doing but little just now. Mr. J. A. McKenzie, one of Inyo's old and trusted stand-bys, has been appointed Superintendent, and any day may receive orders to start up.

The Promontorio, now owned by Sim Reid & Co., has been leased to a party for eight months, who are now engaged in sinking a shaft for working purposes some 100 feet deep. The last time the mine was worked the men received some $2,200 for their three months labor, free of mining costs, which proves the ores taken out to have been of good grade.

It is expected that Messrs. Gorman & Eddy will soon return and resume work on the Custer and other mines. They are now having a few weeks recreation after having made their splendid run in May.

More anon about other mines around here.

VOTERS.

Will some member of your legal fraternity give the people through your columns information in regard to becoming naturalized and registration—who can and who cannot become voters?

Yours, truly, C. F. O'BRION.

OUR ROUND VALLEY LETTER.

MESSRS. EDITORS—Items rather scarce in this locality—nothing much worth mentioning, except grass, which is good; grain promising. Furthermore, Judge Sneden, accompanied by Gen. Garfield White, were here the other day, both of whom pronounced the Hancock buttermilk sold at the Round Valley store *goodnuff*.

THE WEATHER.

No we don't. The old lady says it has been badly mixed, hence we'll keep mum; if we agitate there's no telling what may come—wind, snow or thunderation, sure.

MINES ?

Yes. Besides those existing in the prolific brains of sheep men, it is claimed that an extensive ledge of tin ore, cropping out boldly near the summit of the Sierra and overlooking this valley, is a somewhat late discovery. Still south of this supposed tin mine is another, gold-bearing quartz, said to be wide as the grist mill and exceeding in length and richness our amiable friend, Col. Baker's, mirth-provoking yarns. You may allow us to jest and poke fun indiscriminately, still some of our sober-minded people predict that, in the near future, a roaring mining camp will be a reality in this vicinity. In the meantime we will, with the poet, "Learn to labor and to wait."

POLITICS

Very quiet here. The general opinion is that Hancock, Meysan or any other man will do for President, but it takes a man of parts—muscle, backbone and "git up and git" about him to make a rancher. We are informed than Gen. Hancock's personal appearance is a most magnificent specimen of manhood—handsome, which of course secures him the women vote. You know the dear ones go their little pile on that quality, especially if the subject has been pickled at West Point. However, quite a number of good Democrats and a few Republicans, of the sterner sex, entertain an exalted opinion of the once sturdy canal boy, Garfield, who so gallantly "paddled his own canoe" from boyhood to the present time, and who will continue to vigorously push through to the Presidential chair. 'Rah for—the better man!

Being unable to scare up, just now, a more interesting item, you will allow this cabbage head to abruptly suggest an

OWENS VALLEY AGRICULTURAL FAIR.

What an extensive territory we inhabit, from, say, Owens Lake to Mono Lake, producing thousands of tons of staple articles, and securely fenced in by two grand mineral-bearing ranges of mountains. Why not have an annual Exhibition of our multitudinous products, held at some central point of this isolated country?

Other countries have their interesting fairs annually. Some counties of England have not less than three fairs during the year. Cannot Inyo and Mono inaugurate something of the kind to be held even *once* a year?—We read with pleasure the glowing descriptions of the grand displays annually at the State Fair, Sacramento, but, alas, how often we sigh, as the years roll on, to spend a few days then at the Capital and feast our eyes on the finest product of nature and art. The host of farmers and others throughout these mountain valleys cannot afford pleasure trips to populous places, west of the Sierra—the distance and expense being incompatible with shallow pockets. Lawyers, doctors, merchants, county officials and ye editors (?) can trot out when you feel like it; but oh! the compelled-to-stay-at-home farmer.

This county and its neighbor, Mono, abound in precious products, agricultural, mineral and otherwise. From the various settlements of southern Inyo, through the length and breadth of Owens Valley and as much of Mono as practicable, a vast collection of things great and grand could be exhibited at an annual fair.

Trials of speed should also be a feature, as well as an exhibition of horses, cattle and a diversity of bipeds, quadrupeds, etc.

Farmers and others with their families (in order to break the monotony of life) would roll out gaily and spend a few days pleasantly at the fair. Pleasure and profit will be derived. Not alone men, but women and children would exhibit samples of their handiword—vie with each other, and thus a noble spirit of rivalry engendered.

This scribbler, not wishing to render a lengthy preachment on such a new subject, would, with your permission, respectfully invite others to present their views. RANTER.

IN GENERAL.

One day last week there were fifty locomotives at one time in the round house at Los Angeles.

The apricot trees in the Santa Ana valley are dying of the "gum disease"—whatever that may be.

A writer in the Georgetown, Placer county, *Gazette*, urges the several Pioneer societies to erect a memorial monument on the site of Sutter's mill, where gold was first discovered.

The Woodland *Democrat* states that the glanders in the most virulent form has appeared among horses and mules on the road leading to Merritt Station from the locality immediately east of the Slough. The attention of the Board of Supervisors is called to the fact.

John Sullivan, of Greenwood, El Dorado county, died a few days ago of lockjaw, produced by a wound from a nail which ran through his shoe into his foot.

E. L. Bradley, a lawyer of considerable note, received a bite from a kitten from the effects of which he died last Saturday in San Jose.

Some wheat has been grown in Butte county which is attracting the attention of the local scientists. The heads are destitute of kernels, and from many of the meshes have shot out accessory shoots which resemble small spears of grass. These heads are filled with minute insects, which are doubtless the cause of the abnormal growth.

The Assessor's valuation of the property of Santa Clara county will be from two to four millions less than it was last year.

It is said the demand for labor in New York city is greater now than it has been before for years.

Princess Louise has had enough of Canada, and will go back to her mama.

The Egyptian obelisk has arrived at New York.

Oregon has a total population of 70,000, of which Portland has 22,000.

The Catholic priests in Constantinople refused to sing the Te Deum, on the 14th instant, in honor of France whereupon the Greek priests celebrated the occasion.

A murderer was taken out of the jail at Santa Fe, New Mexico, last Friday, and strung up by a mob.

The new telegraph line to Eureka, Nevada, will be ready for business in a few days.

James Hunt, a restaurant keeper at Carson, absconded with $600 belonging to the Odd Fellows and several thousand dollars in stocks belonging to his wife; this was on the 16th instant.

Chastine Cox, the murderer of Mrs. Hull, was effectually hanged in New York last Friday. He was the colored cutthroat upon whom so much sentimental sympathy was wasted.

Austin, Nevada, is having trouble about her water supply. The wells are all going dry; one, which three weeks previously had eighteen feet of water, had run down to less than a foot.

The beehive has long been an emblem of industry among the Masons, but it remained for Dayton, Nevada, to vivify it into a reality at a Masonic hall. A veritable swarm of bees has located over the door of the lodge-room there, and engaged vigorously in its industrial pursuit of storing sweetness.

The Eastern papers report that the present activity in mining in Utah equals the booming days of the Emma mine, and it is estimated that fully $10,000,000 have been invested there since last Spring by Eastern capitalists.

SMALL MATTERS.

The potato crop in Ireland is very promising.

About 3,000 watches are sold every day in the United States.

The crusade against whisky and the pistol in South Carolina goes bravely on.

California expects to export 700,000 tons of wheat from this harvest.

We read in a New York paper that Delaware expects to ship 3,532,500 baskets of peaches, this crop.

The Chinese have named their war vessels after the letters of the Greek alphabet.

A good many Scotch and English families of means are settling in Manitoba.

A young man in Iowa has become partly demented by his vain efforts to raise a mustache.

To kill currant worms and rose bugs, sprinkle with this solution: two teaspoonsful of carbolic acid in three or four gallons of water.

A Hartford man, while talking through a telephone during a thunder shower, was knocked down by electricity.

A Norwich, Connecticut, man offers to give $25,000 for a translation of the Bible which shall give prominence to baptism by immersion.

There is said to be an apple tree in Washington county, Pa., which bears nine varietes of apples, and which ripen at as many different periods.

So great was the public curiosity to see the negro murderer, Price, hung in Cincinnati, that white women, in order to gain admission, declared themselves negresses and related to the criminal.

THE Democratic Convention for the nomination of a candidate for Congress from this, the 4th, district, will meet at Los Angeles, August 2d. We understand that Senator Satterwaite, Byron Waters and Wallace Leach will be before the Convention, with the chances in favor of the nomination of the latter.

JIM BELL, superintending the construction of the telegraph line between this place and Candelaria, was in town last Monday, and left for Marietta Tuesday morning. Everything is being put in readiness along the line as rapidly as possible. All the necessary building material left Carson the first of the week. The work of putting in poles, etc., will be commenced in about two weeks. Mr. Bell says the line will be working smoothly by the 15th of next month.—*Aurora Herald, July 17.*

"OUR members of Congress ought to be arrested as counterfeiters," exclaimed old Colonel Bullet, as he threw down his paper. "Why so?" meekly asked his wife. "Because they are constantly getting up bad bills and passing 'em."

SARAH BERNHARDT has had three children without having a husband, and Alice Oates has had three husbands without having had any children. This contrast shows the superiority of American actresses.—*Alta.*

THE INYO INDEPENDENT has reached its eleventh volume. A paper so ably managed should run on forever.—*Carson Appeal.*

BORN.

Near Independence, Inyo County, Cal., July 18, 1880, to the wife of J. W. Symmes, a daughter.

DIED.

Near Lone Pine, Inyo County, Cal., July 19, 1880, EDWARD, son of E. A and Mrs. MARGARET REDDY, aged 9 years 7 months and 7 days.

NEW ADVERTISEMENTS.

COMMITTEE MEETING.

A MEETING OF THE REPUBLICAN County Central Committee is hereby called, to take place at 2 o'clock P. M. on SATURDAY, JULY 31. This meeting is called for the purpose of appointing two Delegates to the Republican State Convention, which is to meet in Sacramento on the 11th day of August next, and for the transaction of other business of a character making it especially desirable that every member of the Committee should be present.

T. F. A CONNELLY,
Chhairman Republican Co. Central Com.
Independence, July 24, 1880. n527t1

MAGNOLIA SALOON,

Main Street,

DARWIN, - - CAL.,

Mrs. AGATHA BUNELL, Prop'r.

HAVING PURCHASED THE ABOVE WELL and favorably known property, and having received a complete stock of fine Wines, Cigars and Liquors, the undersigned would respectfully solicit public patronage.

OFFICIAL.

HEADQUARTERS REPUBLICAN STATE CENTRAL COMMITTEE, SAN FRANCISCO, July 14th, 1880.

A REPUBLICAN STATE CONVENTION IS hereby called to assemble at Sacramento City on WEDNESDAY, AUGUST ELEVENTH, in the Assembly Chamber of the State Capitol, at 2 o'clock P. M., for the purpose of nominating SIX (6) Presidential Electors and SIX (6) Alternates, ONE each from each Congressional District and TWO (2) each at large.

The Convention will be composed of Three Hundred and Ninety-four (394) Delegates, appointed as follows:

Alameda	25	Plumas	3
Alpine	1	Sacramento	19
Amador	6	San Benito	2
Butte	8	San Bernardino	3
Calaveras	4	San Diego	4
Colusa	4	San Francisco	101
Contra Costa	6	San Joaquin	11
Del Norte	1	San Luis Obispo	4
El Dorado	7	San Mateo	4
Fresno	2	Santa Barbara	6
Humboldt	8	Santa Clara	17
Inyo	2	Santa Cruz	8
Kern	3	Shasta	3
Lake	2	Sierra	5
Lassen	1	Siskiyou	4
Los Angeles	15	Solano	10
Marin	3	Sonoma	12
Mariposa	2	Stanislaus	4
Mendocino	5	Sutter	3
Merced	3	Tehama	3
Modoc	1	Trinity	2
Mono	1	Tulare	5
Monterey	6	Tuolumne	4
Napa	6	Ventura	3
Nevada	12	Yolo	6
Placer	8	Yuba	6

The Committee recommend that the Delegates to the State Convention from each Congressional District will form the Convention for the nomination of Congressman, such Convention to be held at such time and place as the Congressional Committee may order.

Delegates to be chosen in such manner as the County Central Committees may direct.

Where primaries are held, the Committee recommend the following test for voters at such primaries: "All those who will pledge themselves to vote for the nominees of the Republican Party at the coming Presidential and Congressional elections."

By order of the Committee:

W. W. MORROW, Chairman.
JAMES R. FINLAYSON, Secretary. n527t1

PROBATE NOTICE.

IN THE SUPERIOR COURT OF THE County of Inyo, State of California. In the matter of the Estate of Nancy Williams, deceased. Order to show cause why order of sale of real estate should not be made. It appearing to said Court, by the [illegible] re it this day presented and filed by John [illegible] ministrator of the estate of Nancy [illegible] ed, praying for an order of sale of real estate [illegible] necessary to sell the whole of the real estate to p[illegible] the same from destruction.

It is therefore ordered by the said Court that all persons interested in the estate of said deceased appear before the Superior Court on MONDAY, the SIXTH day of SEPTEMBER, A. D. 1880, at 10 o'clock in the forenoon of said day, at the Court Room of said Court, at the Court House, in the County of Inyo, to show cause why an order should not be granted to the said Administrator to sell the real estate of said deceased as shall be necessary.

And that a copy of this order be published at least four successive weeks in THE INYO INDEPENDENT, a newspaper printed and published in said county. JOHN A. HANNAH, Judge.

Dated July 17, 1880.

OFFICE OF THE COUNTY CLERK } of the County of Inyo. }

I, John Crough, County Clerk of the County of Inyo, State of California, and ex Officio Clerk of the Superior Court in and for said County, do hereby certify the foregoing to be a true, full and correct copy of an order duly made and entered upon the minutes of said Superior Court.

WITNESS, my hand and the Seal of said Superior Court, this Seventeenth day of July, A. D. 1880. JOHN CROUGH, Clerk.

[SEAL]

By DANIEL CROUGH, Deputy Clerk. n527t4

NOTICE TO CREDITORS.

ESTATE OF FELIPE ORTEGA DECEASED. Notice is hereby given by the undersigned, Administrator of the estate of Felipe Ortega, deceased, to the creditors of and all persons having claims against the said decedent, to exhibit them with the necessary vouchers, within four months after the first publication of this notice, to the said Administrator, at the law office of Reddy & Conklin, in the town of Independence, in the county of Inyo.

BENIGNO AGUIRRE,
Administrator of the Estate of Felipe Ortega, deceased.

Dated at Independence, the 24th day of July, 1880. n527t4

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, JULY 24.....1880

Board of Equalization.

The Board of Supervisors of Inyo County met on Monday, July 19, as a Board of Equalization, there being present Charles Meysan and David Olds. In the absence of J. R. Westerville, C. Meysan was chosen Chairman pro tem.

The Board proceeded to examine the assessment roll, which occupied Monday and Tuesday, and during the remainder of the week the following business was transacted:

Assessment of Peter Perrier proposed to be raised from $300 to $1,000 on account of value of liquors; notice ordered.

Application of Fred Mengel for a reduction of $876 95 on account of mortgage; refused.

Application of Ygnacio Mining Company for a reduction of assessment from $8,000 to $1,600. Testimony taken and ordered that J. M. Keeler be subpœnaed by the Sheriff, to give evidence before the Board on Monday, August 2,

Application of Brown Monster Mining Company for reduction from $3,000 to $2,000 on improvements; refused.

From J. S. Rothschild & Co., on real estate and improvements, from $2,300 to $2,000; refused.

From A. Parker, for reduction of $3,875 on account of mortgage against real estate of P. W. Bennett; taken under advisement.

From Harris & Rhine, for a reduction from $28,647 to $19,147; refused.

From Louis Fromm, for reduction from $840 to $250; refused.

The application of A. Parker for reduction of $3,875 on account of mortgage was yesterday rejected.

DEEP SPRING DISTRICT.—Through Mr. S. D. Woodhull, assayer and metallurgist of this place, we learn that work is being vigorously prosecuted on the Horton mine, Deep Spring, under the direction of W. S. Woodhull. Work was started three weeks ago in a tunnel following the foot wall of the ledge. It is now in a distance of 65 feet, and in a few days the work of cross-cutting to prospect the vein will be commenced. The outlook is so encouraging that Mr. Woodhull is confident he is on the right track, and in a short time will show up a valuable property in the Horton. W. A. Greenly is down 20 feet in a shaft on the Whiteman, an adjoining claim on the same ledge as the Horton. Some rich ore is being taken out and a veritable bonanza is looked for in this property. Next week work will be commenced in the Indian Scout, situated about two miles from the Horton. This is a fine, strong looking ledge, the ore from the croppings assaying from $50 to $300.

MINES TRANSFERRED.—The following tranfers of mining properties have been placed upon record in the Recorder's office during the past week: Edward Webb to Thomas P. Malaney, as Trustee, for the sum of $1,000,000 capital stock of the Banner Mining, Milling and Smelting Company, the Banner lode or mine, consisting of 1,500 feet, and situated in the Union Mining District, Inyo range, this county.... Patrick Reddy to J. S. Gorman, for the sum of $5,000, an undivided one-third interest in the Custer mine, Darwin District.... P. Reddy to A. E. Head and Robert Steen, for $4,000, that certain lode situated in Coso Mining District, known as the Mariposa; since reconveyed by Messrs. Head and Steen to J. B. Haggin; consideration, $4,000. .... O. G. Fuentes to J. B. Haggin, for the sum of $3,000, all the right, title and interest of the said Fuentes in and to the Orion mine, Coso District, formerly known as the Mariposa. Also, the Orion mill site.

RELIGIOUS.—Elder Hinkle, of Bodie, arrived on Tuesday on his first pastoral visit to this portion of his charge. He, that evening, preached in the courtroom to an audience composed mostly of our younger people, and to whom he addressed some advice of especial value. Elder Hinkle is undoubtedly a well read man, conscientiously zealous and earnest in his chosen labor, yet in no narrow sense a zealot, therefore capable of accomplishing a great deal of good wherever he goes. On the following day he started on his return, going to Bishop Creek with Rev. Mr. Willis, and at which place they begin quarterly meeting to-day.

THE CUSTER.—Jo[illegible] orked [illegible]man, last Monday, passe[illegible] notwithsta[illegible] town on his way to [illegible]. He been at Bodie, wher[illegible] effected the purchase from P. Reddy of one-third of the Custer mine, paying $5,000, and leased the remainder for nine months. Having explored a great many noted mining districts to his satisfaction, Mr. Gorman is perfectly content to "stay" with Darwin.

WAUCOBA.—A small force of miners are now at work on the Summit mine, one of the Waucoba series, just across the Inyo mountains. This property is owned principally by Alfred Bierstadt, the renowned artist, whose arrival here is expected almost daily. He will be accompanied by Mr. Chapin, the mining man who examined the Waucoba country last Winter.

MINE BONDED.—A. G. McAfee and William Eva have bonded to A. M. Ellsworth and James Cross, in the sum of $75,000, that certain claim and mining property situated in Deep Spring District known as the Neptune Copper Mine. The bond has been transferred by Ellsworth and Cross to W. G. Bixby of New York City.

NEAR DROWNING.—Some days ago Wm. O. Harrell, his wife and two children, came very near drowning while attempting to cross Bishop Creek in a two-horse vehicle. The creek was very high and capsized the carriage; but all, by extraordinary exertions and good fortune, got safely out.

The Regular Killing—H. J. Mohr Shot Dead by W. A. Ellis.

The homocidal mania prevailing upon this slope of the Sierra at the present time does not appear to abate much. It remains to be seen whether, in the present case, the silent dead will be shown to have been the aggressor, as appears to be the unexceptionable rule in the legal outcome. "Dead men tell no tales;" the State is powerless to bring out the facts when arrayed against the legal subtleties of a defense—against the acumen of lawyers, the frequent perjury of witnesses, the bias of jurors and the public's sickly sentimentality when there is any possible danger of a murderer meeting his reward.

At the close of an examination held before Justice Thomas Parker this morning Wm. H. Ellis was committed to the custody of the Sheriff to answer for the crime of murder, in having shot and killed Hans Jacob Mohr, at Westerville's ranch, Fish Springs, on last Thursday morning, the 22d instant.

The prisoner was brought into court, S. P. Moffat, Esq., appearing as his counsel and District Attorney Laird for the prosecution. Defendant offered to waive examination; objected to by the District Attorney, who introduced witnesses and adduced the following general facts:

In the absence of the proprietor, Mohr and Ellis were occupying Westerville's ranch, the two cooking and eating together in the house. The day previous a difficulty sprang up about some trifling joke—arising from Mohr having told Indian Jim that Ellis had "kicked the dog with a cradle," meaning a grain cradle, to which expression Ellis laughingly called the attention of the Indian. Mohr then began abusing Ellis, calling him a —— — ——, etc. Ellis raised a tea-cup to throw it, when Mohr struck at him with a knife. Ellis got a double-barreled shot gun and snapped it twice at Mohr, neither barrel discharging. Mohr brought a hoe into requisition and with these weapons they had a "rough and tumble," Mohr getting into the oat-field and declaring that he was going after a gun with which he would kill his opponent. After a time he returned and while he was standing in the field Ellis approached him with the gun, told him to commence shooting; finding him unarmed, Ellis commanded him to throw up his hands and show him where he had put his (Ellis') blankets. Mohr showed him and again ran away, going to Indian Jim's camp, where he was supplied with blankets for the night. In the morning, at Mohr's request, the Indian accompanied him to the ranch. The Indian went straight toward the door, Mohr going in a roundabout way until he reached it. In the act of pushing it open with hand and foot, Mohr received a shot in the left side of the face and neck which killed him instantly.

The account of the acts of the preceding day is based entirely on the statements made by Ellis to the witness W. M. Dickinson, shortly after the killing. The Indian Jim, an intelligent fellow who gave in his evidence in the most straight-forward and convincing manner, was the only eye-witness. He says positively that Mohr was unarmed.

Ellis sent out notice of the deed. He was arrested by Deputy Sheriff Steve Gregg and brought here yesterday.

An inquest was held upon the body of Mohr by Justice Campbell, and upon the verdict found a warrant was issued for the arrest of Ellis.

Our account is necessarily brief, and will be supplemented next week.

A Sad Affair—Drowning of the Young Son of Edward and Margaret Reddy.

Early last Monday morning Edward, aged nine and one-half years, son of Mrs. Margaret Reddy, residing at Lone Pine, received permission from his mother to go and play with some companions of about his own age until breakfast time. Not returning at the proper timo, Mrs. Reddy started out after him and learned that the boys had gone to the river. She immediately set out for the river bank, a mile and a half distant, riding part of the way on the stage, which happened along. Upon alighting and nearing the mouth of Lone Pine Creek she met two of the lads returning, carrying some clothes, who informed her that her boy was drowned! Who can imagine the emotios of that doting but now almost frantic and grief-stricken mother? She ran into the river and was herself only saved from a watery grave by the providential appearance of a stock driver upon the scene, who by persuasion and force withdrew her from the water.

Upon the alarm reaching town almost every man in the place who could render any possible assistance repaired to the river and undertook a search for the body. In the deep, swift current and vengeful quicksand it was unsafe for any but the bravest swimmers to take to the water, yet there were many who did. This work has been going on all the week without success, cruel fate thus denying the parents even the last sad consolation of affording their unfortunate boy a Christian burial. It is a case exciting the sincerest sympathy of the whole community.

FROM CANDELARIA.—Mrs. Dr. Blair and Mrs. Jos. Schalten have returned from their visit to Candelaria. In a mining point of view, so far as they could learn, it was a place of substantial promise—nothing more certain than that grass will never grow in the streets there by reason of business depression. It is not an attractive place for families to settle—quite the contrary. Dr. Blair finds a paying practice and demand for drngs, and considers himself a fixture. Mr. Sehalten thinks Grantsville better suited for his brewery business, and has gone there with the view of locating, should his expectations be realized.

TO REPUBLICANS.—In this issue will be found two advertisements to which the attention of Republicans is especially called: these are a notice for a meeting of the County Central Committee, to take place next Saturday, and of the State Convention to nominate Presidential Electors and Congressmen, which Convention meets in Sacramento on the 11th of August next.

PERSONAL.—Geo. M. Gill and family are removing from Mammoth to Bodie, where George will become associated with P. W. Bennett in the practice of law and will probably receive the appointment of Deputy District Attorney. Charley Barry, another of Inyo's rising young attorneys, is also in Bodie, at the head of P. Reddy's clerical force.

TO BE SOLD.—It is now regarded as a pretty sure thing that certain well-known mines on the Belmont side, Cerro Gordo, will shortly be sold to some parties in New York.

MAGNOLIA SALOON.—Elsewhere will be noted the advertisement of Mrs. Agatha Bunnell, of the Magnolia Saloon, Darwin, inviting public patronage.

MEETING.—The Hancock and English Club is announced to meet at the Court House to-night.

AN Italian medical paper contains a letter from Dr. R. Rudolph, recording the diccovery of a rapid cure for colds. Being seized wtth a severe coryza, he happened to chew one or two twigs of the eucalyptus, at the same time swallowing the saliva secreted, which had a bitter and aromatic flavor. To his surprise he found that in the course of half an hour the nasal catarrh had disappeared. Some days later he was seized with another attack, from a fresh exposure to cold, when the same treatment was successful.

THERE has been forwarded to the State Treasurer from San Francisco the sum of $1,341 60 on account of the tencent stock certificate tax, to be devoted to the maintenance of the State Mining Bureau, under the Wasson bill. The bulk of the quarterly collections had been made previous to the passage of the Act.

In a lake near Deutsch Eylau, in Prussia, a heavy iron chest has been discovered imbedded in the mud, supposed to be a military chest which, tradition says, was left there by the French during the retreat from Moscow.

THE *Free Press* says: An old-time Bodieite writes from the Skagit country that times are dull and the placers are a failure. There are four thousand men there who have not a cent in the world and almost starved to death.

JEWELER.

C. M'VICAR,
Watchmaker and Jeweler,
BISHOP CREEK,

WOULD RESPECTFULLY ANNOUNCE TO the citizens of Inyo County and vicinity that he has permanently located in Bishop Creek for the purpose of carrying on the

Watch Repairing and Jewelry Business,

In all its branches. All kinds of Clocks, Watches and Jewelry carefully repaired. All work guaranteed to give satisfaction or money refunded. Persons having work in my line of business can inquire of those for whom I have worked whether my work gives satisfaction or not. I will pay express charges one way on all work sent me by express. My charges will be as low as possible. Hoping to receive a share of patronage, I remain, yours, respectfully, C. McVICAR, Watchmaker and Jeweler.

THE
ENGINEERING and MINING JOURNAL.
PUBLISHED WEEKLY.
DEVOTED TO
Mining, Metallurgy, Engineering and Science.

RICHARD P. ROTHWELL, C.E., M.E., ROSSITER W. RAYMOND, Ph.D., } Editors. WILLIAM H. WAHL, Ph. D., Department of Progress in Science and the Arts.

IT IS AN ACCEPTED AUTHORITY ON ALL questions relating to the great mining industries of the country. It is the oldest publication of its class in America, thoroughly independent; being of the trade and not in it, occupies a just and impartial position, which enables it to advise and teach without fear or favor. It devotes much space to questions bearing upon economical management of mines, and from time to time illustrates the more important improvements in mining machinery and engineering methods. Special attention is given to reliable mining news from all parts of the country, which is gathered by an efficicient corps of correspondents in every section, and from an extended exchange list. The metal and ore markets, and gold, silver and miscellaneous stocks are reported and commented upon weekly by experienced financiers, who are unbiased by private interests, and upon these matters it is accepted as a reliable guide and unfailing instructor. Gives statistics of production of coal and iron, and of our great gold, silver and other mines. Its scientific notes are an epitome of the latest researches, its trade reports full, and its editorials sagacious and comprehensive. It enjoys the widest circulation and greatest influence of any journal of its class in the world; its patrons and readers comprising the most select and intelligent men in every quarter.

Subscription, $4 per year, in advance; 10c., single copy

THE BEST PAPER. TRY IT!
BEAUTIFULLY ILLUSTRATED.
35th YEAR.
The Scientific American.

THE "SCIENTIFIC AMERICAN" IS A large, First-Class Weekly Newspaper of Sixteen Pages, printed in the most beautiful style, *profusely illustrated with splendid engravings*, representing the newest Inventions and the most recent Advances in the Arts and Sciences; including New and Interesting Facts in Agriculture, Horticulture, the Home, Health, Medical Progress, Social Science, Natural History, Geology, Astronomy. The most valuable practical papers, by eminent writers in all departments of Science, will be found in the Scientific American.

Terms, $3 20 per year; $1.60 half year, which includes postage. Discount to Agents. Single copies, ten cents. Sold by all Newsdealers. Remit by postal order to MUNN & CO., Publishers, 37 Park Row, New York.

PATENTS. In connection with the SCIENTIFIC AMERICAN, Messrs. Munn & Co. are Solicitors of American and Foreign Patents; have had 35 years experience, and now have the largest establishment in the world. Patents are obtained on the best terms. A special notice is made in the SCIENTIFIC AMERICAN of all inventions patented through this Agency, with the name and residence of the Patentee. By the immense circulation thus given, public attention is directed to the merits of the new patent, and sales or introduction often easily effected.

Any person who has made a new discovery or invention, can ascertain, *free of charge*, whether a patent can probably be obtained, by writing to MUNN & Co. We also send *free* our Hand Book about the Patent Laws, Patents, Caveats, Trade Marks, their costs, and how procured, with hints for procuring advances on inventions. Address for the Papers, or concerning Patents,

INDEPENDENCE, CAL.:

SATURDAY, JULY 24.....1880

A REMARKABLE machine is described in a late French technical journal. It is called a "profilograft," because when in use it traces mechanically on paper the outlines of the ground over which it travels. It is described as a small carriage, mounted on two wheels, drawn by one man, and attended by another who marks the levels at the proper places. Underneath hangs an iron rod, wirh a large ball at its lower end, serving as a pendulum. This pendulum maintains a constant vertical position while the machine inclines in one direction or the other according as it ascends or descends a slope. To the upper end of the rod is fitted a pencil which marks on a sheet of paper the ups and downs ot the country traversed, whether on an open road or across trackless fields. The exact profile is thus recorded to a given scale. At the same time one of the wheels, acting the part of chain-bearer, measures and indicates the distance traveled throughout the survey. For surveyors and others engaged in leveling operations, this machine would appear to be eminently serviceable, and there is talk of its being made use of in a general new survey of France contemplated by the Government.

THE raid on the Indian Territory has commenced and it will not cease until the Indians who now hold the Territory under solemn treaty have been dispossessed and either murdered or scattered. The Government is bound to protect the Indians in the possession of their property, but they will not be protected. Some show of protection will be made. A few troops will be ordered here and there, wherever there may not happen to be any raiders. The land grabbers will hold the wires, at the other end of which will dance Washington officials, and the end of it all will be that, after awhile, there will be so many white men in the Territory and the money interest in the robbery will be so large that the Government and the press will take refuge in the "manifest destiny" business and try to forget as soon as possible that there were ever any treaties or any Indians. After a while we shall be as proud of the Indian Territory as we are now of the Black Hills.—*Stock Report.*

GRACE: "I am going to see Clara today. Have you any message?" Charlotte: "I do wonder how you can visit that dreadful girl. Give her my love."

THERE is no time in a man's life when he is as great as when he cheerfully bows to the necessity of his position and makes the best of it.

MINING APPLICATION NO 161,

....TO THE....

OCCIDENT MINE.

U. S. LAND OFFICE.
Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred linear feet of the "Occident Mine" or vein, bearing silver and gold, with surface ground three hundred feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 37, in Township ——, Range —— of —— Meridian, said Lot No. 37 being described in field notes of survey as follows, to-wit:

SURVEY OF EXTERIOR BOUNDARIES:

Began at a post on the southwest cor. of claim; marked the post "Post 1 Occident Mine." Said post is 2x3 inches square by 30 inches long and set in a mound of earth 20 inches high. From which var. 15 deg 55 min E., a pine stump 8 inches diameter bears N. 28 deg 50 min W. 11 links. A pine stump 6 inches diameter bears N. 85 deg 1 min W. 45 links. A pine stump 20 inches diameter bears S. 33 deg 5 min W. 76 links. A pine tree 7 feet high x6 inches diameter bears S 39 deg 51 min E. 82 links. A pine bush 2 feet high x3 inches diameter bears N. 69 deg 10 min E. 67 links. From said Post the "Armagh U. S. Mineral Monument" by calculation bears N 20 degs 48 min W 17.17 chains. Thence with a var 15 deg 55 min E, 1st course—N 11 deg W 3.03 chains, ascending to point of hill at bottom of old prospecting cut 6.49 chains. End of slope —6.88 chains. On level line—commence descending 7.64 chains, old prospecting tunnel 8.42 chains. Old prospecting cut 12.47 chains. Old dump of prospecting cut 14.13 chains. Middle of Ygnacio Ravine—Ravine bears N 65 degs W 15.21 chains. Trail on ridge dividing Ygnacio Ravine from Cerro Gordo Cañon. Ridge bears W 16.07 chains. Rocky ridge—commence descending 17.19 chains. Middle of Cerro Gordo Cañon—commence ascending 21.85 chains. Wagon road—Citizens grade 22.72 chains. To post on N W cor of claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of rocks 2 feet high, marked the post "Post 2 Occident Mine." At foot of post is a cactus burr 20 inches in diameter growing in the rock. From said post a pine stump 2½ feet in diameter standing 8 feet below the wagon road, Citizen's grade, bears S 38 deg E 1.54 chains. No other suitable natural object within measuring distance. Thence with a var 15 deg 55 min E, 2d Course—N 79 deg E 2.27 chains, ascending rocky slope to "Post 3 Occident Mine" on north end of line of lode 3.42 chains. Rocky ridge bears south 4.54 chains To a post on N E cor of claim. Said post is 30 inches long, 2x3 inches square, and is set in a mound of rocks 20 inches high, marked the post "Post 4 Occident Mine" From which a pine stump 29 inches in diameter bears N 40 deg 35 min E 1.01 chains. The top of a blue slate reef 10 links high bears S 43 min E 15 links. Thence with a var 15 deg 55 min E, 3d Course—S 11 deg E .97 chains. Wagon road—descending 3.03 chains. An old stone cabin. A tall pine tree stands 15 links to East of line, 3.42 chains. Middle of Cerro Gordo Cañon—bears S W. Commence ascending on steep, rocky ridge, 8.48 chains. Trail on ridge dividing Cerro Gordo Cañon from Ygnacio Ravine 11.77 chains. Open cut 30 feet west of mouth of an old prospecting tunnel in blue slate, 12.98 chains. Old trail—runs N 65 deg W 13.69 chains. Summit of ridge at old trail 14.34 chains. Summit of ridge commence descending 15.38 chains. Crossing of Belshaw toll road 22.72 chains. Post on S E cor of claim. Said post is 36 inches long, 3x3 inches square and is set in a mound of earth 25 inches high, marked the post "Post 5 Occident Mine," from which a red iron boulder 2½x3¾ feet square and standing 28 inches high bears S 84 deg 40 min E 85 links. A pine tree 9 inks high standing 6 ft. west of bottom of a gulch—gulch bears S, bears N 35 deg 11 min E 1 06 chains. The middle of the Belshaw toll road bears S 72 deg W 18 links. Thence with a var 15 deg 55 min E, 4th Course—South 79 deg W 18 chains. Road—commence ascending 2.04 chains. Quartzite ridge bears N—S 2.27 chains. Post marked "Post 6 Occident Mine" on south end of line of lode—commence descending 2.87 chains. Trail—runs N W and S E 4.54 chains To place of beginning, "Post 1 Occident Mine," containing 10 32 100 acres. From the Armagh U. S. Mineral Monument as herein described the mouth or entrance to the "Armagh Tunnel" as noted under the head of "Report" bears S 76 deg 55 min W 9.24 chains. The course of said Tunnel is S 58 deg 55 min E. Length 350 feet on the 27th of March, 1880.

ARMAGH U. S. MINERAL MONUMENT.

The "Armagh U. S. Mineral Monument" is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon, and very precisely on the W. B. line of the Ygnacio mine (as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Dep. Min. Sur.) and distant 17.51 chains from the S W cor stake of the Ygnacio mine.

At the point above given I drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter x16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high x5 feet in diameter at its base. Marked the top of post "U. S. Mineral Monument. Erected January 31, A. D. 1880, by Wm. Crapo, U. S. Deputy Mineral Surveyor—under authority of the U. S. Surveyor General for California." From said post in mineral monument, with a variation of 15 deg 55 min E, the extreme end of the bluff on which the monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face of rock 7½ feet high bears N 60 degs E .07 links. The N E cor of an old adobe *vaso* chimney bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The N W cor of Rafael Diaz' house bears S 28 deg 33 min E 1.58 chains An old well 30 feet deep on north side of Cerro Gordo Cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE.

Commence at "Post 1 Occident mine," thence with a var 15 deg 55 min E, S 79 deg W 3 03 chains to Post on S W cor of Ygnacio mine as surveyed for a patent N 11 deg W 17.51 chains. To U. S. Mineral Monument which when computed gives for a closing line from "Post 1 Occident Mine" to U. S. Mineral Monument N 20 deg 48 min W 17.77 chains.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 147 of locations.

The adjoining claimants are, on the west the San Francisco mine, on the south the Moter mine and on the east the Trachyte Flat mine.

Any and all persons claiming adversely any portion of said Occident mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

JAMES E. GOODALL, Register.

MINING APPLICATION NO. 162,

...TO THE....

ARMAGH MINE.

U. S. LAND OFFICE,
Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred (1,500) linear feet of the "Armagh Mine" or vein bearing gold and silver, with surface ground six hundred (600) feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 38, in Township ——, Range ——, of Mount Diablo Meridian. Said Lot No. 38 being described in field notes of survey as follows, to-wit:

Commenced at "Post 1 Armagh Mine," on S E corner of claim. Said post is 30 inches long 2x3 inches square and is set in a rock mound 2 feet high, from which with a var 15 deg 55 min E a pine stump 18 inches high by 10 inches in diameter bears S 15¾ deg E 77 links. A pine stump 15 inches diameter bears S ⅔ deg 30 min W 91 links. A red ferrugenous quartz reef standing 4 feet high bears N 24 links. A pine stump 12 inches high x5 inches in diameter bears N 49 deg 20 min E 15 links. Thence with a var 15 deg 55 min E, N 11 deg W 3.20 chains. Ascending to summit of ridge commence descending, 6.98 chains; dump of old prospecting cut, 10.80 chains; Belshaw toll road, 13.16 chains; Belshaw toll road in middle of Cerro Gordo Cañon, commence ascending 14.25 chains; road running to Potosi house, 21.66 chains; wagon road—Citizens' grade—22.72 chains; post on the N E corner of claim Said post is 30 inches long, 2x3 inches square, and is set in a mound of earth 20 inches high. Sage brush slope, sloping S W; no natural object for witness mark in vicinity. Marked post "Post 2 Armagh Mine." Thence with a var 15 deg 55 min E, S 79 deg W .07 chains. Trail runs N S; commence descending—2.20 chains; wagon road, Citizen's grade—4.54 chains; post on north end of line of lode, marked the post "Post 3 Armagh Mine"—8 43 chains. Trail runs N S—9.09 chains. To post on N W corner of claim, situated on sage brush slope, sloping to S W. Said post is 3 feet long, 2x3 inches in diameter and is set in a mound of earth 2 feet high; marked the post "Post 4 Armagh Mine" No suitable natural object within measuring distance. Thence with a var 15 deg 55 min E, S 11 deg E, commence ascending—1.75 chains; commence ascending—3.97 chains; crossing of foot trail runs west—8.27 chains; toll road in middle of cañon, commence ascending, 18.45 chains; summit of ridge bears west; commence descending, 19.74 chains; south end of "Silver Wedge" claim, 22.72 chains, to post on S W corner of claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of earth 20 inches high; marked the post "Post 5 Armagh Mine," from which a pine bush 2 feet high bears N 76 deg W 19 links. The chimney of an old deserted vaso bears N 22 deg 30 min E 24 links. Thence with a var 15 deg 55 min E, N 79 deg E 63 chains. Descending into bottom of gulch—gulch bears south, commence ascending—4.55 chains. "Post 6 Armagh Mine," or south end of line of lode, 3.99 chains; crossing of toll road, 9.09 chains; "Post 1 Armagh Mine," place of beginning. From which post the Armagh U. S. Mineral Monument bears N 4 deg 10 min W 12.67 chains, by calculation, containing 20 64 100 acres.

Location of the Armagh Tunnel.—From the "Armagh U. S. Mineral Monument" the mouth of the Armagh tunnel bears S 76 deg 55 min W 9.24 chains. The course of said tunnel is S 58 deg 55 min E. Length, 350 feet.

ARMAGH U. S. MINERAL MONUMENT—DESCRIPTION THEREOF:

There not being any lines of the U S public land surveys within 100 chains of the Armagh mine, I built a Mineral Monument and connected therewith. Said Mineral Monument is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon and very precisely on the west boundary line of, and distant 17.51 chains from the southwest corner stake of the Ygnacio mine, as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Deputy Mineral Surveyor. At this point drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter by 16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high by 5 feet in diameter at its base. Marked the top of the post "U. S. Mineral Monument. Erected January 31, 1880, by Wm. Crapo, U. S. Deputy Mineral Surveyor, under authority of the U. S. Surveyor General for California." From said post in Mineral Monument, with a variation 15 deg 55 min E, the extreme end of the rocky bluff on which the Mineral Monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face 7½ feet high bears N 60 deg E .07 links. The northeast corner of an old adobe vaso chimney, a Mexican furnace for smelting silver and lead ores, bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The northwest corner of Rafael Diaz' house bears S 38 deg 23 min E 1.58 chains. An old well 30 feet deep on north side of cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE.

Commence at "Post 1 Armagh Mine," thence with a var 15 deg 55 min E. N 79 deg E 1.51 chains to west boundary line of Ygnacio mine, and at a point 325 feet—4.92 chains from the southwest corner stake of the Ygnacio mine; thence with a var 15 deg 55 min E, N 11 deg W 12.59 chains to U. S. Mineral Monument.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 146, of locations. The adjoining claimants are, on the East, the Greenly mine.

Any and all persons claiming adversely any portion of said Armagh mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, in the State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

A CONTRIBUTION TO CALIFORNIA GEOLOGY.

Paper Read Before the California Geological Society by Melville Atwood.

Mr. I. Beetes Jukes, in his very useful and truly practical "Students' Manuel of Geology"—and which ought to be read by all engaged in mining—says, in his introduction to the subject:

In order to reduce the great subject of geology to something like order, it appears advisable to divide it into three heads, for which we use the terms of (1) Geognosy; (2) Palæntology and (3) the history and formation of the series of stratified rocks. By geognosy, I would understand, then, the study of the structure of rocks, independently of their arrangement into a chronological series, and I would divide it into two parts: lithology (stone lore) and petrology (rock lore). Lithology would mean the study of the internal structure, the mineralogical composition, the texture, and other characters of rocks, such as could be determined in the closet by the aid of hand specimens.

Under petrology, I would arrange the larger characteristics of rocks, the study of rock masses, their planes of division, their forms, their positions and mutual relations, and other characters that can only be studied in "the field," but without entering on the question of the geological time of their production.

Under the head of palæntology, I should wish to give the heads of several great questions as to the laws that have governed the distribution of life, both in space and in time, as also to indicate some of the chief points in the structure of the more important extinct races and their relations to those now living.

"JOINTED STRUCTURE."

All rocks, eruptive, sedimentary and metamorphic, are traversed by numerous planes of divisions termed "joints," obviously the natural result of the contractions or shrinkage of the rock masses during consolidation.

In studying the stratified rocks it will be seen that, besides the planes of division, the result of succession in the acts of deposition, and which form separate strata or beds, that there are other planes of divisions (joints) which intersect the beds at various angles. It is not uncommon for these joints to change their angles in passing from one bed or stratum to another. Joints are mostly regular and close in proportion to the compactness of the texture of the rock; in sandstones they are uneven and often open.

In volcanic rocks the joints have been in many cases widened by the action of water percolating through them and dissolving a portion of the rock. Little or no attention appears to have been paid to the jointed structure of the enclosing rocks of the Comstock lode—the general direction or course of the planes of jointing in Comstock rocks are nearly the same of that of the lode, and their dip and the underlay of the lode and ore bodies have a corresponding angle of inclination. A careful examination of the jointing of the rock east of the lode would enable a petrologist to distinguish the dykes from the sheet rock. The prismatic joints, like those in the basalt at the Giants' Causeway, and which often resemble dry starch in their irregular and wrinkled sides, are too well known to say anything about them. The joints in granite enable the quarryman to carry on his work with success—indeed, the whole art of quarrying consists in taking advantage of the natural divisions of rocks by joints.

I have made a careful examination of the "jointed structure" from the Aurora tunnel to Bodie Bluff, and found that in that section the joints, or rents, form planes of separation which are often slightly open and from a few inches to many feet apart. They traverse the rock in straght and well determined lines, which have definite compass bearings. They appear to be of three kinds: "vertical joints," "dip joints" and "diagonal joints." The crevice veins filling portions of these joints, or rents, are mostly of a limited extent and depth, theugh sometimes rich in gold.

On Bodie Bluff the croppings of many veins of this character may be seen; they are similar to what are termed "gash veins," being wedge-shaped and terminating at no inconsiderable depth. Others, however, are very different, though of the same class, like many of those met with to the south of the Standard mine, which are rich in gold, but do not appear to have any croppings, and have been discovered by cross-cutting at some depth below the surface of the ground, filling portions of the dip joints and following them down till intersected by diagonal joints, and running along the diagonal ones into other dip joints.

A similar class of auriferous veins have been met with in Australia. Mr. Daintree, F. G. S., says in a paper which he read before the London Geological Society in 1878, "On certain modes of occurrence of gold in Australia:" Below the zone of decomposition, however, we generally lose a class of auriferous veins which have proved very misleading to the miner, though usually very rich in gold. These usually follow the line of the jointings in the rock, and are in my opinion simply due to the decomposition of the auriferous pyrities, and of the country rock and the re-deposit of such of the decomposed material as passed into chemical solution in local fissures. The Bodie rocks are of the same class as those met with to the east of the Comstock, and overlying that lode, the greater portion of which may be called "Trachytic Diorites" in all their different stages of alteration and decomposition—diorite being employed for the old term, greenstone. Mr. Rutley, in his valuable little work on "The Study of the Rocks," says: "The term 'greenstone,' which, in its older signification embraced basalt, diabase, gabbro, diorite, etc., has subsequently been restricted in its application, and employed as a synonym for diorite; since, however, the name is almost meaningless, it seems desirable either to discard it, or, still better, use it in its original sense as an ambiguous and comprehensive term, useful in field geology, but otherwise only admissible as an expression of comparative ignorance, such as may safely be employed in the case of rocks of a certain type, which have reached so advanced a stage of decomposition, and in which the constituent minerals are so poorly developed that it is no longer safe or possible to hazard any opinion concerning their precise normal mineralogical constitution." The rocks collected during the sinking of the new Yellow Jacket shaft—now, I believe, some 3,000 feet deep—will, when properly determined, throw more light on the geology of the Comstock than any work that has yet been undertaken.

The difference between the Comstock lode and the lodes of Bodie (I mean those of the Bodie lodes which occupy parts of fissures which have dislocated and displaced the jointed structure), are that the country east of the Comstock lode forming the hanging wall consists entirely of acid rocks (rocks containing a large proportion of silica), while the west country foot wall rocks are what are called basic rocks, anamesite, dolerite and Mount Davidson diorite, all of which contain but a small percentage of silica.

The branch fissures, however, which yielded such immensely rich ore-bodies, have jointed structure to the east and west of them and are enclosed in acid rocks, so that it is comparitively easy to distinguish between them and the main lode.

The Bodie lodes, so far as I have examined them have acid rocks for their foot and hanging walls; in fact, are enclosed in them.

The most reasonable solution for the hot water encountered in the deep workings of the Comstock is that of "expiring volcanic action," and the high temperature of the east country rocks, or those overlying the lode, I think, is caused by the heated vapors rising from the main fissure through the planes of the jointed structure and numerous branch fissures, the west country rocks being comparatively cool.

Hot springs are nearly always found in the vicinity of extinct and active volcanoes. "We learn from Bunsen's experiments on the great geyser in Iceland, that at the depth of only 74 feet, at the bottom of the tube, a column of water may be in a state of rest, and yet possess a heat of 120° Centigrade, or 248° Fahrenheit." Those who can remember the Steamboat Springs in Nevada and the Geysers in Lake county twenty years ago, can realize how rapidly the volcanic action is subsiding.

In M. Trurcher and Margolli's book on "Volcanoes," the Steamboat Springs are described as follows: "We have already described the intermittent springs of Iceland—the Geysers; similar springs have been discovered in California, on the eastern slope of the chain of Sierra Nevada, not far from the Lake of Washoe. The water rises in jets to a height of seven yards; the jets follow each other at intervals of five minutes, and produce a noise which resembles thunder."

The temperature of the hot water met with in the Clifford amalgamated mines in Cornwall closely corresponds with that of the Comstock. See in Prof. W. W. Smyth's report, 1864. At a depth of 1,380 feet below the adit, or 1,650 from the surface, the water issued at a temperature of 122°. The enclosing rocks of the Wheal Clifford lodes are clay, slate, and quartz porphyry, both of a compact texture.

NEBRASKA and Missouri emigrants are moving into Montana.

A Little of Science.

In the vicinity of Milan pile-dwellings have been discovered in a peat-moor, and the foundation of a Roman theater in the city itself.

It is reported that Prof. Geo. L. Vose, who is regarded as authority upon such subjects, says that 200 railroad bridges have fallen in the last ten years.

In a gravel-pit near the town of Posen a mammoth skull has been discovered, but unfortunately, in pieces. Most of the pieces, however, are well preserved. The facial bones alone weigh 28 pounds.

E. Da Canti reports that it has been found in the Azores that the entrance of smoke into the conservatories causes a rapid development of the buds in the case of roses, ananas, etc., and that this fact is now made use of in hastening the blooming.

For an acid-proof cement make a concentrated solution of silicate of soda and form a paste with powdered glass. This simple mixture will sometimes be found invaluable in the operations of the laboratory where a luting is required to resist the action of acid fumes.

A society has been formed in Paris to combat the excessive indulgence in smoking which has of late become the fashion in almost the whole of Europe. The Society offers various prizes for treatises on the human health and the dangers it is subjected to from excessive use of tobacco.

A good recipe for dressing shoes, such as is sold in bottles under the title of French dressing, is as follows: Logwood extract, 6 oz., dissolve in soft water 1 gallon; borax, 6 oz., dissolve in soft water 1 gallon, and add 1½ oz. shellac, boil to dissolve; bichromate of potash ⅜ oz., dissolve in soft water ½ pint, and add 3 oz. ammonia water. Mix altogether.

A Martyr to Duty.

On one of the hottest corners of Woodward avenue, at high noon yesterday, a small boy with a bootblack's kit sat under the full blaze of a sun pouring down for all it was worth. The boy perspired, roasted, blistered and almost melted, but he had stuck there for half an hour, when a lady, passing by, halted and said:

"Little boy, aren't you afraid of being sun-struck?"

"Yes, mam," was the prompt reply.

"Then why don't you go into the shade?"

"I can't."

"Did anyone tell you to wait here?"

"No, mam, but I am doing it on my own hook. It's awful hot, and I'm most dead, but I've got to stand it."

She looked to see if he was tied, and was about to go on and regard him as the soon of a brutal father in a saloon round the corner, when the lad explained:

"There he is now! That boy up there is the chap I was waiting for, and I had to sit hereto see him when he turned the corner. He's the feller that called my sister a poke-eyed rabbit, and I'm going to jump on him and lick him most to death! I wish you'd hold my box so I can get the bulge on him afore he suspects anything."—*Detroit Free Press.*

INDEPENDENCE, CAL.:

SATURDAY, JULY 31.....1880

ALL FIXED NOW.

The Greenback idiots had a sort of a State Convention in San Francisco, the other day, and built up a platform peculiarly their own. In discussing the financial plank, it was strongly argued that the Government ought to loan the people all the paper money each individual might want to borrow to carry on his business, and without interest, it being understood, however, that the borrowers were to give security for the repayment of the "money." While all were strong in the faith that interest was robbery, it was finally agreed that for the present it would not be expedient to compel Uncle Sam to loan his "money" altogether without interest, so in the plank adopted it was settled that he might charge three per cent. per annum, provided one per cent. was made payable to the county in which the borrower lived and had his being.

Another plank requires the Government to furnish indigent people, not only a farm, but also the means to run it.

The following boss idiots were nominated as the Weaver Presidential Electors: At Large—T. B. Dunn and J. E. Clark; First Congressional District—L. M. Mansfield; Second—J. N. Redstone; Third—George Elliot; Fourth—T. J. McCready.

By way of a Congressman for this (the Fourth) District, a Los Angeles man named J. D. Godfrey was duly nominated. Then, after selecting a State Central Committee this notable band of mortals quit sine die, and went off home feeling some better.

THE lumber ship *Mathilde*, bound from Oregon to Valparaiso, foundered at sea some six weeks ago. The crew took to their boats; the mate's boat was picked up with her crew barely alive, after having floated about in her for twenty-two days. There were seven men besides the captain and his young wife in the other boat, and of this nothing has been heard; but the presumption is this boat load got to Soccorro Island, on which may be found a little water, but is a perfect desert in all other respects. The mate got to San Francisco, and at once, with others, set out to induce the Government to send a steam revenue cutter to the rescue. After four days' loss of time the application for the steam cutter was denied, but a sailing cutter offered instead. This vessel has sailed on her errand of mercy, but cannot reach the island under ten days. In view of this and the evident need of the earliest possible aid, a gallant Englishman, Sir Thomas Hesketh, goes at once in his own steam yacht, the *Lancanshire Witch*, to the rescue. The wrecked ship belongs to the Sandwich Islands, but the captain and crew are Americans.

THE Land Commissioner makes the following sensible and important ruling as to what constitutes a valid mining location: "A mining claim must be fairly defined in some manner, and the law contemplates that it shall be so described that any well intentioned person may readily find it after an examination of the records. A vein must first be found before a location can be made. It is not sufficient that A has discovered a ledge and B locates the extension, on the supposition that it continues its course into the adjoining ground. B must also find it or C may come in and discover it, in which case B can maintain no title to it, notwithstanding his prior location of the same ground." This is the substance of the decision, though not the precise wording.

THE Chilian Admiral, Riveros, has given notice that he is going to bombard Lima, the Peruvian capital. The Admiral has already threatened that Lima, when taken, will be given over to destruction and ravage by the Chilean troops, as were Molino and Arica, because, as he states, the Chilean officers cannot restrain their men. The Peruvians are preparing for the most desperate resistance, every man and boy being required to drill, while all the women and children are being sent into or beyond the Cordilleras.

SECRETARY SCHURZ and party, including his two daughters, arrived in San Francisco on the 27th. He will tarry in the city, deliver a speech or two, go to Yo Semite and then start on his return East, stopping at various Indian Agencies, the nominal object of his traveling.

The *Chronicle's* table showing, by counties, the population of this State, is complete except three of the smaller counties, and non-classification of races. The whole population foots up to 863,000, being a gain of 54 per cent. since 1870.

BLOODY DEEDS.

It strikes us that deeds of blood were never of more frequent occurrence than during the past few weeks. Scarce a mail but brings account of some murder or "justifiable homicide," as having occurred, not in Texas, but somewhere on this coast where people profess that they would not like to live in Texas, for fear of the evil eye of the Jim Curries of that State. This is affectation—the records will show more Jim Curries for this coast than gives character to the Lone Star State. Let the latter take what comfort she can in the belief that the Pacific Slope can discount her in deeds of blood. The two sections differ somewhat in jury methods to save the "unfortunate" murderer, but if any difference of credit is to be made, the system of Texas juries shows more manliness than ours; there they do not try so hard to show that the murdered man was a bad man and needed killing; they simply say that if the gentlemanly defendant had not have been drunk he never would have thought of deliberately murdering so good a person as deceased; here it is self-defense, when it is made to appear that deceased was a bad egg, would have done some killing himself if he had been prepared, and as it was, had, in effect, viciously cocked his left eye at the man with the gun—verdicts of "not guilty" are as often brought in on such pretexts of self-defense in this State as they are on the other kind in Texas, and so far as the public may know, murders in fact are even more common in this country than in Texas, with all its bad reputation, which reputation is much enhanced because a perjured jury have just said Currie did not do murder when, in a drunken frenzy, he shot down an unarmed man in cold blood. That black deed is universally denounced there as well as here. It is not an improbable thing to expect a similar verdict when young Kalloch is tried, if he ever is. In that case we will bet the verdict will be more generally justified in this State than the Currie verdict is in Texas. Yet of two black murders, this, in San Francisco, was the blackest, insomuch that it was a deliberately planned and cowardly executed assassination by a pretended preacher of the Gospel and who was neither drunk nor crazy when he slew his unsuspecting victim, whereas, the other was the impulsive act of a whisky-crazed hoodlum.

This is no defense of this last mentioned act nor of the Texas system of settling personal matters, still less of her reputation for deeds of violence; the tendency is to show that a worse condition of affairs in some respects exists right in our own State. It would not exist either here nor there if not fostered by prevailing public sentiment. The laws to punish murder are rigid enough and good enough in both States to prevent murder so far as impending punishment can prevent it. But perverted public sentiment has perverted the law, or so far nullified it that it has actually come to be looked upon as the murderer's best hope of safety. There is no crime so defensible in the courts as man-killing. The murderously inclined have no need to restrain their hand for scarce a moment for fear of the law. Realizing this, many others not naturally so inclined, feel it to be a measure of their own safety oftentimes to shoot at once or be shot. There are many homicides, or murders in reality, clearly attributable to this peculiar mutual mistrust, which would not exist if society were to say it must end. Public sentiment is responsible for the numbers of what we may call "amateur" man-killers. It says in effect: "Don't let him get the drop on you; the law won't harm nor protect you, and a man that won't protect himself is no man"—all of which we may take as a sentimental truth, which, however, almost every day causes some man to needlessly imbrue his hands in the blood of his fellow man.

Here, in our own midst, the man-slayer has been abroad in two very recent cases; each, in accordance with the rule last mentioned, "got his man," though neither "man" was armed, or intended to do any killing himself just then. But the amateur killers didn't know that, so they didn't do murder according to law.

But here are some cases that would probably be legal murders in Texas, but are not likely to be so adjudged by the more enlightened juries of this coast: Brophy, up here at Candelaria, who waylaid McLaughlin like a veritable Thug; Young Kalloch, already mentioned; also these two cases which occurred last Monday: E. S. Shroeder, of Oakland, has a wife who met him at the boat that evening, and told him that on the previous Saturday Dr. Lefevre, a prominent dentist, while operating on her teeth, chloroformed and outraged her. Without further inquiry, the husband went straight to the doctor's office and shot him dead. On the same day, at Nevada City, G. W. Smith killed T. W. Sigourney because the latter had foreclosed a mortgage on Smith's dwelling.

The papers of the week mention the occurrence of several other homicides, pending murder trials, etc., in various parts of the country. Perhaps the four planets in perihelion have started a boom of blood, steamer collisions, cyclones, sun-strokes and terrible accidents.

The West Point Affair.

There are certain qualities and characteristics which always distinguish the gentleman. He is always kindly in spirit, courteous in manner, and gallant in the defense of the weak, and especially of those—whether men or women—who have no power to defend themselves. Describe any man, anywhere, in these words, and there would be no hesitation in any society in pronouncing him a gentleman. Great surprise has been manifested among the people in different parts of the country that a system of offensive and persistent discourtesy has been practiced toward the Cadet Whittaker at West Point, on account of the fact that he had a tincture of African blood in his veins. It was supposed that the typical West Point cadet was a gentleman, and that such treatment as had been bestowed upon Whittaker would be impossible there.

Now, there is a very simple explanation of the social treatment of Whittaker, and there is really no occasion for surprise in the matter. For, consider how the school is made up. Nothing more miscellaneous than the components of the West Point school can possibly be imagined. A large number seek appointments there because they cannot afford to pay for a first-class education themselves. They are often the sons of helpless widows—perhaps sometimes of pushing and thrifty tradesmen. Indeed, we suppose that the most of those who go to West Point are in circumstances which render it desirable to get an education for nothing. What sort of an assemblage would this condition naturally bring together? Would it naturally bring those who have been well bred—those who have had the culture of polite society, and of high toned Christian homes? Is it reasonable to expect that the average cadet will be a gentleman? Is it not asking too much that he shall make equal progress in mathematics and polite ideas? The smart boy of a Congressional district may have been regarded with pride in the little community he came from, but he could not reasonably be expected to blossom at once into a gentleman when engrafted into a community whose roots strike into the same soil from which he has hitherto drawn all his nourishment.

* * There must be some among the cadets of good families and good instincts, whose impulses would naturally be to treat Whittaker in a gentlemanly way. We are sorry for these, for they have been morally overborne by the baser elements in the institution. They have not the backbone to stand by the poor African and take the proscription that would come of it. They must settle it with themselves as to whether this bending to public opinion is an evidence of bravery or cowardice, and as to whether they can afford to have their sense of justice sophisticated, and their character for Christian courtesy sacrificed by yielding deference to a collection of ill-bred snobs. The West Point Academy may be a very useful institution in its educational and military aspect, but until an African can have as good a chance there as a white man, through the social respect and kindness of all who come into contact with him, it can lay no valid claim to being a collection of gentlemen.—*The Editor of Scribner for July.*

IT is estimated that among the dead rivers of California lying up 7,000 or 8,000 feet above the level of the sea, there lies a treasure of more than $300,000,000, the annual product being uniformly about $8,000,000. From one spot in Nevada county there has been taken about $100,000,000. Some of these dead rivers have a fall of about 80 feet to the mile, affording good opportunities for drainage, under currents, and all the various modern appliances for saving fine gold.

THE plan for utilizing the Genesee falls is really being carried out. The power is to be controlled by letting the water fall into perpendicular cylinders in such a way as to compress air with tremendous force, and this air is to be conducted to various points for use in running machinery. The first application of this novel power will be in the propulsion of street cars. If the scheme proves a success, Niagara will be utilized in the same way.

BISMARCK does not like the Free Masons, and the latter fear official measures against them, since his remark that "it is easier to negotiate with the Jesuits, who are sensible people, than the Free Masons, who outwit the cleverest." Guess Bis's petition was rejected once or twice, and that soured him.

IT is stated that New Zealand owes $175,000,000, and is suffering from such wide-spread business prostration that an appeal to the charity of the world is not improbable. Thousands of her people are threatened with starvation; affairs there are quite as bad as in Ireland.

THE Canton of Schwiz, in Switzerland, has re-established capital punishment, and has enacted that executions be public. This makes the fourth Canton which has restored the punishment of death.

GEN. HANCOCK, in addition to his present duties, has been assigned to the command of the Department of the South, during the temporary absence of Brigadier-Gen. Augur.

EDISON has given up his effort to devise an electric light, and is now working on a noiseless, smokeless and dustless electric locomotive.

IN GENERAL.

The ex-Empres Eugenie has arrived in England from her sad visit to Zululand.

The German Government has expelled the Mormon missionaries who went to that country to proselyte.

The Appellate Court of Belgium has confirmed the sentence of six months' imprisonment, passed in 1878 on the financier Philaparte for an irregular course of speculations. They must be mighty particular about little matters in that country.

At Monterey, Mexico, on the 26th instant, about 100 soldiers undertook to liberate an officer arrested for drunkenness. In the fight with the police a Captain and Major were killed and 14 soldiers were killed or wounded.

It is reported at Newport that James C. Flood has purchased a $100,000 house there, to be given to Ulysess S. Grant, Jr., after his marriage with Flood's daughter, which marriage is soon to take place.

Gen. Grant is making a tour of the Gunnison country, after which he goes to New York to reside and become the President of a great land, water and mining company of New Mexico.

Michigan has added 420,000 to her population since 1870.

The Philipine Islands are troubled with a chronic earthquake.

The American rifle team, after winning much glory in Ireland, went to Wimbledon, England, where the bloody Hinglishmen cleaned them out in short order.

Three hundred and twenty lives are known to have been lost by the earthquake of last week which destroyed the town of Manilla, Central America.

Los Angeles has a population of 11,183, of which 804 are Chinese.

The Southern Pacific Railroad track is laid 17 miles beyond Benson, A. T.

In San Francisco, last week, 119 applicants for teachers' certificates were excluded from final examination because they fell short of the required 60 per cent. minimum in arithmetic, grammar, or theory and practice of teaching.

On the 10th of next month the Annual Mechanics' Fair opens in San Francisco.

On Friday of last week the boiler of a steam thrasher exploded near Tuolumne City, killing one man and injuring eight others.

Secretary Thompson, of the Navy, is at Mare Island Navy Yard.

Secretary Schurz was expected in San Francisco this week.

July 26, a pleasure steamer capsized on a Switzerland lake, drowning sixteen persons, and on the same date a steamer want down in the British Channel, drowning five persons. On the 23d, an excursion steamer on the Detroit river crushed another steamer to the bottom, drowning some twenty of the passengers of the latter, mostly boys boys and girls, choristers of a Catholic church.

The recent flood in Oregon has caused a change in the ship channel at the mouth of the Columbia, and much trouble will be caused thereby.

It is expected that eight volumes of Union and Confederate records of the war will be sent to the press in a short time.

THE Mint and Sub-Treasury at San Francisco are overflowing with silver coin, and application is made for the transfer East of two million dollars. The cost of transferring this sum at the rates charged by the express companies and railroads would be $20,000 at one per cent. The question of the mode in which this silver can be transported, and where it can be most easily stored and not exceed the amount of $20,000 appropriated for vault room, is being considered by the Treasury Department. Some of this stupendous difficulty might be obviated by the shipment of a few tons of the coin to this office; we will manage to settle for the freight, and no questions asked. In the possible event that the Government does not accept this plan, our delinquents are still requested to pay up.

AT Cathey's Valley, Mariposa county, Mrs. Frank McCann lately killed her husband's elder brother, Patrick. She since states that she was compelled to do it to save herself from forced dishonor, her husband being absent, and Patrick having come to the house for the purpose, and would listen to neither prayers nor therats.

THE bodies of the twenty men who were drowned in the late terrible Hudson river tunnel disaster, have not yet been recovered. The work of pumping out the tunnel, repairing, etc., to get at the bodies and to resume regular work, is being pushed ahead day and night, and with all available means.

THE volcano Fuego, in Gautemala, is in active operation. At San Benito, and even beyond that point in Mexico, and down to San Salvador, fire and dust, thrown by the volcano, fall in quantities, rendering it certain that the effects in the immediate neighborhood must be calamitous.

A NEW YORK dispatch of the 27th says that day made the thirtieth of Dr. Tanner's voluntary starvation. The unfavorable symptoms of the day previous were no longer manifested. His pulse was 84, temperature 98.80, respiration 14, weight 130 pounds.

JUDGE MCCRARY, of Kansas, has decided all the points in favor of the Western Union Company in their dispute with the Kansas Pacific Company and others, respecting rights of way for their lines.

SAN FRANCISCO LETTER.

The Welch Murder—Political, Etc., Etc.

SAN FRANCISCO, July 25.

MESSRS. EDITORS—The news of Billy Welch's murder fell upon his friends here like the shock of a terrible earthquake. For some days we could not realize the truth of the sad report. Billy had a great many warm friends in this city, and was loved by all who knew him here. His aged mother, for whom alone he braved the dangers of frontier life, has not yet been informed of her devoted son's sad fate for fear that it might cause her sudden death. We must all bow in humble submission to the decrees of fate, and trust that Billy Welch will be better off and happier in his new home than he was here.

MIXED UP AFFAIRS.

Nothing strange has taken place in this one horse town for some time. The beautiful new Constitution has got things so badly mixed up that we don't know where we stand. Some say we are to have a municipal election this coming Fall, and others say the present officers hold their positions for three years from the time they were elected. We had the McClure charter before us, but the Supreme Court sat down on that like the fat woman did on the floor when the chair was pulled from behind her as she was about to be seated. Now we have a new charter framed by some of the brightest legal lights in the city; and such a conglomeration of nonsense, inconsistency and absurdity never was heard of before. We are called upon to vote on the adoption of this damphool instrument on the 8th of next month, and the chances are ten to one that it will not be adopted. Under those circumstances we will fall back on the old Consolidation Act. All this is caused by this beautiful new Constitution.

CRIMINAL MATTERS.

Young Kalloch has not yet had his trial for shooting Chas. De Young. His case was called up yesterday and he was given until next Thursday to plead; the interest in the case has all died away—very little is now heard about it. Sam Tetlow, who killed Wm. Skeantlebury in the Bella Union the 5th of July, is still in custody. The Coroner's jury brought in a verdict of justifiable homocide, but the Police Court wants to hear all the testimony over again and perhaps they will bring in a different verdict. Sam feels very bad over the unfortunate affair, and will never be the same jovial-hearted Sam Tetlow again.

THE REGATTA

Last Saturday caused some excitement in town, and the bay was alive with all kinds of vessels carrying crowds of people, all wild to see the race between the yachts *Con O'Connor* and the *Consuello*. We were there on the *S. M. Whipple*, and enjoyed the trip around the bay, but we did not enjoy seeing the *Con O'Connor* come in ahead. We did not bet that way. A great many horse men have turned their attention to yachting, and the Society for the Prevention of Cruelty to Animals cannot stop them from running their yachts as far as they please. The annual regatta will take place on the 7th of August and some fine prizes are offered.

SATURDAY AFTERNOON

Kearney street is the grand parade for all the old painted hags, lodging house keepers, baby-hawkers, favorite servant girls, regulars, check gorrillas, hoodlums, cigarette fiends and coarse boot clerks in the city. The same old familiar faces may be seen there every Saturday afternoon about 4 o'clock, and all the women try to out-do each other in dressing gay and smiling serenely, like a jackass eating thistles. And the way some of the old gals get themselves up is really astonishing. With half an in inch of powder, a few cards of red paint on their faces, a few drops of vermilion on their lips, a box of Mason's blacking on their eye-brows and lashes, and their hair banged a la rat peeking out from a bale of oakum, an idiot would take them for angels of thirty-five summers. Little do they know the remarks that are passed upon them as they go by a crowd of statuary that may be seen in front of each cigar stand on the street from Market to Bush. The men, or rather things, vermin, pests, or whatever you may call them, should be ashamed of themselves; but they are void of all shame and everything that belongs to common decency. It seems strange that with a police force of four hundred men this intolerable nuisance cannot be abated.

THE POLITICIANS

Are getting to work in dead earnest all through the city. There are more Hancock and English clubs than one can count. There never was so much enthusiasm among the Democrats, and as a majority of the W. P. C. are with that ticket it looks as though the Democrats would have things pretty much their own way. However, the Republicans have the inside and that is a big advantage, and nearly all the good workers belong to the Republicans. It is a hard job to beat such men as W. T. Higgins James Gannon, W. H. L. Barnes, Dave McClure and several others that I could mention. When I write again I will be able to tell you more definitely how the thing stands. W. G. L.

THE Anaheim *Gazette* reports that the sale of the Temescal tin mines will shortly be consummated, if, indeed, the sale is not already effected. The purchasers are two wealthy firms, dealers in metals, one doing business in New York and the other in London. There can be no question that the moment they obtain sole control of the mines will witness the beginning of preparations for working them on a scale greater than any one has dreamed of. The price paid for the mines—one million and a half dollars—gives an inkling of the stupendous wealth at the command of the purchasers. It is a fact not generally known that the attention of the New York firm was first drawn to these mines by H. S. Knapp, of Silverado, and, upon his representations, the firm sent lawyers, surveyors, experts and photographers to the mine in rapid succession.—*Los Angeles Express.*

WHEN baby frets because you put a bib on it, put it down as a whine bibber and mocker. Name this paper when mentioning the fact to any one.—*Gate City.*

YESTERDAY evening Thomas McGovern, a native of New York, aged 60 years, met his death by being choked with a piece of meat lodging in his wind-pipe. The body was taken in charge by H. Ward, at whose undertaking rooms a post-mortem examination was held.—*Bodie Chronicle, July 24.*

BORN.

At Eureka, Humboldt Co., Cal., July 9, 1880, to the wife of A. C. Tibbetts (formerly of the Modock) twins—son and daughter, weight respectively 12 and 10 pounds.

NEW ADVERTISEMENTS.

SCHOOL ELECTION NOTICE.

NOTICE IS HEREBY GIVEN TO THE qualified electors of Independence School District, County of Inyo, State of California, that an election will be held on SATURDAY, the TWENTY-FIRST day of AUGUST, 1880, at which will be submitted the question of voting a tax to pay balance due Teacher on last year, Census Marshal for this year, construction of needed outbuildings and incidental expenses.

It will be necessary to raise for this purpose the sum of $240.

The polls will be held at the District School House, and will be open between the hours of 8 o'clock A. M. and 6 o'clock P. M.

M. of said day, to pay said delinquent assessment thereon, together with costs of advertising and expenses of sale.

JOHN CALVERT, Secretary.

OFFICE—Northwest corner Fourth and Howard Streets, San Francisco, California. n528td

THE ENGINEERING and MINING JOURNAL.

PUBLISHED WEEKLY.

DEVOTED TO

Mining, Metallurgy, Engineering and Science.

RICHARD P. ROTHWELL, C.E., M.E., ROSSITER W. RAYMOND, Ph.D., } Editors.
WILLIAM H. WAHL, Ph.D., Department of Progress in Science and the Arts.

IT IS AN ACCEPTED AUTHORITY ON ALL questions relating to the great mining industries of the country. It is the oldest publication of its class in America, thoroughly independent; being of the trade and not in it, occupies a just and impartial position, which enables it to advise and teach without fear or favor. It devotes much space to questions bearing upon economical management of mines, and from time to time illustrates the more important improvements in mining machinery and engineering methods. Special attention is given to reliable mining news from all parts of the country, which is gathered by an efficient corps of correspondents in every section, and from an extended exchange list. The metal and ore markets, and gold, silver and miscellaneous stocks are reported and commented upon weekly by experienced financiers, who are unbiased by private interests, and upon these matters it is accepted as a reliable guide and unfailing instructor. Gives statistics of production of coal and iron, and of our great gold, silver and other mines. Its scientific notes are an epitome of the latest researches, its trade reports full, and its editorials sagacious and comprehensive. It enjoys the widest circulation and greatest influence of any journal of its class in the world; its patrons and readers comprising the most select and intelligent men in every quarter.

Subscription, $4 per year, in advance; 10c., single copy.

Advertising rates on application.

Address, THE SCIENTIFIC PUBLISHING CO., 27 Park Place, New York. P. O. Box, 4404. n511t4eow

THE BEST PAPER. TRY IT!

BEAUTIFULLY ILLUSTRATED.

35th YEAR.

The Scientific American.

THE "SCIENTIFIC AMERICAN" IS A large, First-Class Weekly Newspaper of Sixteen Pages, printed in the most beautiful style, *profusely illustrated with splendid engravings*, representing the newest Inventions and the most recent Advances in the Arts and Sciences; including New and Interesting Facts in Agriculture, Horticulture, the Home, Health, Medical Progress, Social Science, Natural History, Geology, Astronomy. The most valuable practical papers, by eminent writers in all departments of Science, will be found in the Scientific American.

Terms, $3.20 per year; $1.60 half year, which includes postage. Discount to Agents. Single copies, ten cents. Sold by all Newsdealers. Remit by postal order to MUNN & CO., Publishers, 37 Park Row, New York.

PATENTS. In connection with the SCIENTIFIC AMERICAN, Messrs. MUNN & Co. are Solicitors of American and Foreign Patents; have had 35 years experience, and now have the largest establishment in the world. Patents are obtained on the best terms. A special notice is made in the SCIENTIFIC AMERICAN of all inventions patented through this Agency, with the name and residence of the Patentee. By the immense circulation thus given, public attention is directed to the merits of the new patent, and sales or introduction often easily effected.

Any person who has made a new discovery or invention, can ascertain, *free of charge*, whether a patent can probably be obtained, by writing to MUNN & Co. We also send *free* our Hand Book about the Patent Laws, Patents, Caveats, Trade-Marks, their costs, and how procured, with hints for procuring advances on inventions. Address for the Paper, or concerning Patents,

MUNN & CO.,
37 Park Row, New York.

INYO INDEPENDENT.

INDEPENDENCE, CAL.:

SATURDAY, JULY 31.....1880

AN OATH OF OFFICE.—The following ponderous oath of office is of record in the public archives of the godly town of Cerro Gordo. The original, which was not saved from the late fires at the most imminent peril of its rescuers—because it was in this office at the time, has been placed under a plate-glass case, silver-mounted:

SOLEMN OATH OF OFFICE OF J. BRISCOE, ESQ., ELECTED TO THE HONORABLE OFFICE OF CONSTABLE OF SAID DOMAIN:

I, John Briscoe, a citizen of the United States, a little over twenty years of age, do positively swear, allege and affirm that I will truthfully, soberly, honorably, cautiously and faithfully obey the flaws of laws, and perform the duties of Constable in and for the Fifth Township.

That I will steal no more poles, but will protect personal, real, public and private property of the citizens of Cerro Gordo and vicinage; that I will arrest and safely keep in durance vile each and every inebriate found at an undue hour surveying the streets of our city and commonwealth; that I will arrest and dignifiedly keep, lodge, feed and instruct any person or persons, tramp or tramps found possessed of or lugging about any pistols, Henri rifles, mountain or prarie fowling pieces, Bowie knives, slung-shots, cutlasses and other implements usually had, carried by and characteristic of bushwhackers, pirates and free-lunchers. That I will, with agility, courage, bravery, without compunction, and with alacrity obey the laws and by-laws of this Cerro Gordian metropolis—whose domains extend far beyond the reach of future surveyors and astronomers, with their tripods and appendages usually had and tugged about by such wise savages and destroyers of the human family's equilibrium. I further unwittingly promise to (with a kind eye and benevolent heart) have a brotherly feeling toward all men; to contemplate with serenity the vicissitude inherent to the family of walking vegetables, a la theory Darwin. That I will protect my fellow men, provide for the needy and the sick, the widows and the fatherless; inquire into all matters of any interes to to the people of this district, town and village. To protect the citizens of this Phat Hill against all encroachments from the various barbarous tribes that inhabit the Owens River Valley and the tributaries on the one side and Malayan colonies of Darwin and Panamint on the other.

Yes, I do! I will!!

Sealed with my seal; affixed with my right paw this 5 day of Septender, Anno Domini Salvum in Quodam. [U. S. SEAL]

JOHN BRISCOE.

ON THE GROUND.—State Senator Thos. O'Callahan, of New York, one of the "men-with-the-money," who recently purchased the Sierra Nevada, Michigan, Detroit, Mollie and Evening Shade mines, Swansea District, arrived at Lone Pine about a week ago, and has since been engaged looking at his new property and at several interests in Cerro Gordo. He is under the fatherly care of Doc. Cottrell. This is Senator O'Callahan's first visit to the Coast, and he requests us to say that if people will let up asking him "how he likes California" he will get a book printed on the subject and distribute few million copies free.

FOR CERRO GORDO.—Our junior will take in Cerro Gordo again on a mining excursion—and one of general observation—next week. Should our senior, in a streak of originality, and while playing a lone hand at the cases, wish to display the beauties of a new font of job-type he may avail himself of the circumstance and opportunity—to save work by setting up the outside and his heavy editorials in larger type.

GOOD.—Supt. Holt is in receipt of encouraging reports as to the probable early resumption of work on the Independence Tunnel, but, at present, we are not authorized to give details. The tunnel is bound to be run at some time; and when it taps the Rex Montis series and the other rich mines on the north side of Kearsarge Mountain, will prove one of the most important mining works in the State.

AT RISK.—The Court House has been running along since the 1st instant uncovered by the usual insurance of $15,000. It hasn't burned, however. The hiatus occurs through the Treasurer declining to pay a warrant of $412 out of unapportioned funds. The matter will probably be provided for at the meeting of the Board of Supervisors next week.

TAKING A LOOK.—Robert Steen, who is up after lumber for use at the Mariposa-Orion mine in old Coso District, has taken a professional look at several properties in Crysopolis and Union Districts. He thinks well of some of the Phillips mines across the river, as also the Hirsch, being the south extension of the old Eclipse or present Brown Monster ledge.

AT WORK.—Supt. Gray has again resumed work, with a small force, in the Kearsarge tunnel. He is running on ledge matter, occasionally striking small spots of the rich blue sulphuret ore which was found in the lower level of the old workings.

WHAT'S WANTED.—Hickey Hood says the Independence Hancock and English Club "has got ter git more talkin' in it," or he'll be blankety-blanked "ef the hull bizness hadn't butter be stopped."

TO LONE PINE.—Charley Levy has removed himself and barber shop to Lone Pine, supplying a needed tonsorial institution there.

HIS CONDITION.—Uncle Gid Whiteman, the noted pioneer and prospector, is at the Camp Independence hospital, slowly sinking under a stroke of paralysis.

AT LAST.—Some months ago—just how many we can't say exactly—a sum of money was contributed by the citizens of this place and forwarded to the Beatty Organ Company for one of their cheaper instruments for use in our Sunday school. Many days elapsed and Mr. B. said never a word. Then he was informed that it would look better if he would send the instrument or return the cash. Then he said his establishment was overrun with orders, hence the delay; that an addition of $35 to the sum already received would enable him to immediately ship a very much better instrument. He was told that that was impossible. Many more days passed, and nothing said. But now comes a shipping bill to Mrs. E. M. Willis, the prime mover in the enterprise, indicating that Mr. B., rather than occasion further disappointment, is sending a better instrument than was ordered. It arrive will here some time in August, and then there will be some forty-odd dollars freight money to be raised. Please make a note of this last remark, and, meantime, don't waste your mineral substance in riotous living.

YES OR NO.—As will be seen by notice elsewhere in this issue, the Trustees of Independence School District have ordered an election by which to raise the sum of $240 for the purposes named in the said notice. Had it been at all practicable to have paid off the existing liablilities of the district in any other way no election for the purpose would have been called; but there is no other fair recourse, and that is all that need be said about it, except that to the existing indebtedness a barely sufficient sum has been added to provide what common decency demands. Under the new law the district will be put to no cost whatever for the assessment and collection of the tax voted. To raise the required amount will involve the addition of between one and two mills extra tax on each dollar of the present assessment roll of the property of the district. The addition is made by the Supervisors at their meeting in October when the general tax levy is made, and is collected as a part of the general tax and by the same officer.

THE DROWNED.—For the past two weeks a party has been searching the river from Lone Pine Creek down to the Lake. in a fruitless effort to recover the remains of the drowned boy, the young son of E. A. and Margaret Reddy. Mr. Reddy arrived from Bodie on Saturday last, and with the aid of Messrs. Seeley, Mee and others has employed every possible means to recover the body. He expresses the profoundest gratitude to the people of Lone Pine generally for their sincere sympathy and hearty co-operation. A net has been placed across the river at the bridge and a watch is still kept up, though the body has doubtless been entirely buried in the shifting sand.

DEMONSTRATION.—We have an authentic account of a Republican Garfield and Arthur demonstration at Bishop Creek the other evening, from which is taken the follow principal points:

1. Drum Major—S. G. Sneden, Esq.
2. Drummer—Budd Stoutenborough.
3. Torch-light Procession—Jack Horton.

HAS REFORMED.—We suspect Post Agent Gelatt has reformed—turned over a new leaf, so to speak. This hypothesis is predicated on the fact that we don't see him around town quite so often since Mrs. G. and family got back from their long sojourn down on the coast, so vastly improved in health.

REGULAR SESSION.—The Board of Supervisors meet on Monday next in regular session, and we presume will alternate the usual business with equalization matters until all is disposed of. Westerville, of this District, is still absent.

AT HOME.—County Clerk Crough returned from his Tuolumne trip early this week. His father has almost entirely recovered. Johnny reports that country as progressing swimmingly.

CIRCUS-LIKE.—The "Logan Combination" have, this afternoon, erected quite a large circus tent directly in front of this office, and will give their advertised performance this evening.

WAS A SUCCESS.—We learn that the late Quarterly Meeting at Bishop Creek was largely attended, and results were very satisfactory to all concerned.

PREACHING.—Rev. F. M. Willis will hold the usual services in this place tomorrow evening, and at the Post on Tuesday evening.

"IT isn't the bones I object to," said Jones to his landlady, while he was dissecting a bit of shad; "but it is the very stupid way in which the fish mixes its flesh up with them." And then he gave up the job and tackled the ham and eggs.

IT costs $3 50 a ton to transport granite from Placer county to the foot of Market street, Oakland, while it costs but $4 per ton to ship the same material from the State of Maine to San Francisco.

THERE is no further need of American contributions for Ireland. The potato crop is ripe. Blight appears in some fields that were planted with old seed, but no material damage is feared.

A PERSON is expected to be thankful because he enjoys good health. Only a small boy can enjoy bad health, and then it must be bad enough to keep him out of school.

INYO INDEPENDENT.

INDEPENDENCE, CAL.:

SATURDAY, JULY 31.....1880

SOME girls have very peculiar dispositions. They can work hard all day making a silk embroidered motto where the words, "Love one another," stand out in all shades and colors, and then take nearly the entire top off of their little brother's head just because he wants to stay in the parlor while Adolphus is making his regular call.

THE author of the song, "I'm Sitting 'Neath the Willows," is informed that if he will only sit there so constantly in the future that no time can be spared to mail anything to this office, his first offense will be forgiven.

"How does painting agree with my daughter?" asked an anxious parent. "It makes her too red in the face," replied the teacher.

How rapidly this world is becoming civilized! A book pedler hung himself in New Jersey, the other day.

POLITICAL.

OFFICIAL.

HEADQUARTERS REPUBLICAN STATE CENTRAL COMMITTEE, SAN FRANCISCO, July 14th, 1880

A REPUBLICAN STATE CONVENTION IS hereby called to assemble at Sacramento City on WEDNESDAY, AUGUST ELEVENTH, in the Assembly Chamber of the State Capitol, at 2 o'clock P. M., for the purpose of nominating SIX (6) Presidential Electors and SIX (6) Alternates, ONE each from each Congressional District and TWO (2) each at large.

The Convention will be composed of Three Hundred and Ninety-four (394) Delegates, appointed as follows:

Alameda	25	Plumas	3
Alpine	1	Sacramento	19
Amador	6	San Benito	2
Butte	8	San Bernardino	3
Calaveras	4	San Diego	4
Colusa	4	San Francisco	101
Contra Costa	6	San Joaquin	11
Del Norte	1	San Luis Obispo	4
El Dorado	7	San Mateo	4
Fresno	2	Santa Barbara	6
Humboldt	8	Santa Clara	17
Inyo	2	Santa Cruz	8
Kern	3	Shasta	3
Lake	2	Sierra	5
Lassen	1	Siskiyou	4
Los Angeles	15	Solano	10
Marin	3	Sonoma	12
Mariposa	2	Stanislaus	4
Mendocino	5	Sutter	3
Merced	3	Tehama	3
Modoc	1	Trinity	2
Mono	1	Tulare	5

The Committee recommend that the Delegates to the State Convention from each Congressional District will form the Convention for the nomination of Congressman, such Convention to be held at such time and place as the Congressional Committee may order.

Delegates to be chosen in such manner as the County Central Committees may direct.

Where primaries are held, the Committee recommend the following test for voters at such primaries: "All those who will pledge themselves to vote for the nominees of the Republican Party at the coming Presidential and Congressional elections."

By order of the Committee:

W. W. MORROW, Chairman.
JAMES R. FINLAYSON, Secretary. n527t1

COMMITTEE MEETING.

A MEETING OF THE REPUBLICAN County Central Committee is hereby called, to take place at 2 o'clock P. M. on SATURDAY, JULY 31. This meeting is called for the purpose of appointing two Delegates to the Republican State Convention, which is to meet in Sacramento on the 11th day of August next, and for the transaction of other business of a character making it especially desirable that every member of the Committee should be present.

MINING.

MINING APPLICATION NO 161,

....TO THE....

OCCIDENT MINE.

U. S. LAND OFFICE, Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred linear feet of the "Occident Mine" or vein, bearing silver and gold, with surface ground three hundred feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 37, in Township ——, Range —— of —— Meridian, said Lot No. 37 being described in field notes of survey as follows, to-wit:

SURVEY OF EXTERIOR BOUNDARIES:

Began at a post on the southwest cor. of claim; marked the post "Post 1 Occident Mine." Said post is 2x3 inches square by 30 inches long and set in a mound of earth 20 inches high. From which var. 15 deg 55 min E., a pine stump 8 inches diameter bears N. 28 deg 50 min W 11 links. A pine stump 6 inches diameter bears N. 85 deg 1 min W. 45 links. A pine stump 20 inches diameter bears S. 33 deg 5 min W. 76 links. A pine tree 7 feet high x6 inches diameter bears S 39 deg 51 min E. 82 links. A pine bush 2 feet high x3 inches diameter bears N. 69 deg 10 min E. 67 links. From said Post the "Armagh U. S. Mineral Monument" by calculation bears N 20 degs 48 min W 17.17 chains. Thence with a var 15 deg 55 min E, 1st course—N 11 deg W 3.03 chains, ascending to point of hill at bottom of old prospecting cut 6.49 chains. End of slope —6.88 chains. On level line—commence descending 7.64 chains, old prospecting tunnel 8.42 chains. Old prospecting cut 12.47 chains. Old dump of prospecting cut 14.13 chains. Middle of Ygnacio Ravine—Ravine bears N 65 degs W 15.21 chains. Trail on ridge dividing Ygnacio Ravine from Cerro Gordo Cañon. Ridge bears W 16.07 chains. Rocky ridge—commence descending 17.19 chains. Middle of Cerro Gordo Cañon—commence ascending 21.85 chains. Wagon road—Citizens grade 22.72 chains. To post on N W cor of claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of rocks 2 feet high, marked the post "Post 2 Occident Mine." At foot of post is a cactus burr 20 inches in diameter growing in the rock. From said post a pine stump 2½ feet in diameter standing 8 feet below the wagon road, Citizen's grade, bears S 38 deg E 1.54 chains. No other suitable natural object within measuring distance. Thence with a var 15 deg 55 min E, 2d Course—N 79 deg E 2.27 chains, ascending rocky slope to "Post 3 Occident Mine" on north end of line of lode 3.42 chains. Rocky ridge bears south 4.54 chains. To a post on N E cor of claim. Said post is 30 inches long, 2x3 inches square, and is set in a mound of rocks 20 inches high, marked the post "Post 4 Occident Mine." From which a pine stump 20 inches in diameter bears N 40 deg 35 min E 1.01 chains. The top of a blue slate reef 10 links high bears S 43 min E 15 links. Thence with a var 15 deg 55 min E, 3d Course—S 11 deg E .97 chains. Wagon road—descending 3.03 chains. An old stone cabin. A tall pine tree stands 15 links to East of line, 3.42 chains. Middle of Cerro Gordo Cañon—bears S W. Commence ascending on steep, rocky ridge, 8.48 chains. Trail on ridge dividing Cerro Gordo Cañon from Ygnacio Ravine 11.77 chains. Open cut 30 feet west of mouth of an old prospecting tunnel in blue slate, 12.98 chains. Old trail—runs N 65 deg W 13.69 chains. Summit of ridge at old trail 14.34 chains. Summit of ridge commence descending 15.38 chains. Crossing of Belshaw toll road 22.72 chains. Post on S E cor of claim. Said post is 36 inches long, 3x3 inches square and is set in a mound of earth 25 inches high, marked the post "Post 5 Occident Mine," from which a red iron boulder 2½x3¾ feet square and standing 26 inches high bears S 84 deg 40 min E 85 links. A pine tree 9 links high standing 6 ft. west of bottom of a gulch—gulch bears S, bears N 35 deg 11 min E 1.06 chains. The middle of the Belshaw toll road bears S 79 deg W 18 links. Thence with a var 15 deg 55 min E, 4th Course—South 79 deg W 18 chains. Road—commence ascending, 2.04 chains. Quartzite ridge bears N—S 2.27 chains. Post marked "Post 6 Occident Mine" on south end of line of lode—commence descending 2.87 chains. Trail—runs N W and S E 4.54 chains. To place of beginning, "Post 1 Occident Mine," containing 10 32-100 acres. From the Armagh U. S. Mineral Monument as herein described the mouth or entrance to the "Armagh Tunnel" as noted under the head of "Report" bears S 76 deg 55 min W 9.24 chains. The course of said Tunnel is S 58 deg 55 min E. Length 350 feet on the 27th of March, 1880.

ARMAGH U. S. MINERAL MONUMENT.

The "Armagh U. S. Mineral Monument" is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon, and very precisely on the W. B. line of the Ygnacio mine (as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Dep. Min. Sur.) and distant 17.51 chains from the S W cor stake of the Ygnacio mine.

At the point above given I drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter x16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high x5 feet in diameter at its base. Marked the top of post "U. S. Mineral Monument. Erected January 31, A. D. 1880, by Wm. Crapo, U. S. Deputy Mineral Surveyor—under authority of the U. S. Surveyor General for California." From said post in mineral monument, with a variation of 15 deg 55 min E, the extreme end of the bluff on which the monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face of rock 7½ feet high bears N 60 degs E .07 links. The N E cor of an old adobe *vaso* chimney bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The N W cor of Rafael Diaz' house bears S 28 deg 33 min E 1.58 chains. An old well 30 feet deep on north side of Cerro Gordo Cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE.

Commence at "Post 1 Occident mine," thence with a var 15 deg 55 min E, S 79 deg W 3.03 chains to Post on S W cor of Ygnacio mine as surveyed for a patent N 11 deg W 17.51 chains. To U. S. Mineral Monument which when computed gives for a closing line from "Post 1 Occident Mine" to U. S. Mineral Monument N 20 deg 48 min W 17.77 chains.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 147 of locations.

The adjoining claimants are, on the west the San Francisco mine, on the south the Moter mine and on the east the Trachyte Flat mine.

Any and all persons claiming adversely any portion of said Occident mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

MINING APPLICATION NO. 162,

...TO THE....

ARMAGH MINE.

U. S. LAND OFFICE, Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred (1,500) linear feet of the "Armagh Mine" or vein bearing gold and silver, with surface ground six hundred (600) feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 38, in Township ——, Range ——, of Mount Diablo Meridian. Said Lot No. 38 being described in field notes of survey as follows, to-wit:

Commenced at "Post 1 Armagh Mine," on S E corner of claim. Said post is 30 inches long 2x3 inches square and is set in a rock mound 2 feet high, from which with a var 15 deg 55 min E a pine stump 18 inches high by 10 inches in diameter bears S 15¾ deg E 77 links. A pine stump 15 inches diameter bears S 2½ deg 30 min W 91 links. A red ferrugenous quartz reef standing 4 feet high bears N 24 links. A pine stump 12 inches high x5 inches in diameter bears N 49 deg 30 min E 15 links. Thence with a var 15 deg 55 min E, N 11 deg W 3.20 chains. Ascending to summit of ridge commence descending, 6.98 chains; dump of old prospecting cut, 10.80 chains; Belshaw toll road, 13.16 chains; Belshaw toll road in middle of Cerro Gordo Cañon, commence ascending 14.25 chains; road running to Potosi house, 21.66 chains; wagon road—Citizens' grade—22.72 chains; post on the N E corner of claim. Said post is 30 inches long, 2x3 inches square, and is set in a mound of earth 20 inches high. Sage brush slope, sloping S W; no natural object for witness mark in vicinity. Marked post "Post 2 Armagh Mine." Thence with a var 15 deg 55 min E, S 79 deg W .07 chains. Trail runs N S; commence descending—2.20 chains; wagon road, Citizen's grade—4.54 chains; post on north end of line of lode, marked the post "Post 3 Armagh Mine"—8.43 chains. Trail runs N S—9.09 chains. To post on N W corner of claim, situated on sage brush slope, sloping to S W. Said post is 3 feet long, 2x3 inches in diameter and is set in a mound of earth 2 feet high; marked the post "Post 4 Armagh Mine." No suitable natural object within measuring distance. Thence Thence with a var 15 deg 55 min E, S 11 deg E, commence ascending—1.75 chains; commence ascending—3.97 chains; crossing of foot trail runs west—8.27 chains; toll road in middle of cañon, commence ascending, 18.45 chains; summit of ridge bears west; commence descending, 19.74 chains; south end of "Silver Wedge" claim, 22.72 chains, to post on S W corner of claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of earth 20 inches high; marked the post "Post 5 Armagh Mine," from which a pine bush 2 feet high bears N 76 deg W 19 links. The chimney of an old deserted vaso bears N 22 deg 30 min E 24 links. Thence with a var 15 deg 55 min E, N 79 deg E 63 chains. Descending into bottom of gulch—gulch bears south, commence ascending—4.55 chains. "Post 6 Armagh Mine," or south end of line of lode, 3.99 chains; crossing of toll road, 9.09 chains; "Post 1 Armagh Mine," place of beginning. From which post the Armagh U. S. Mineral Monument bears N 4 deg 10 min W 12.67 chains, by calculation, containing 20 64 100 acres.

Location of the Armagh Tunnel.—From the "Armagh U. S. Mineral Monument" the mouth of the Armagh tunnel bears S 76 deg 55 min W 9.24 chains. The course of said tunnel is S 58 deg 55 min E. Length, 350 feet.

ARMAGH U. S. MINERAL MONUMENT—DESCRIPTION THEREOF:

There not being any lines of the U S public land surveys within 100 chains of the Armagh mine, I built a Mineral Monument and connected therewith. Said Mineral Monument is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon and very precisely on the west boundary line of, and distant 17.51 chains from the southwest corner stake of the Ygnacio mine, as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Deputy Mineral Surveyor. At this point drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter by 16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high by 5 feet in diameter at its base. Marked the top of the post "U S. Mineral Monument. Erected January 31, 1880, by Wm. Crapo, U. S. Deputy Mineral Surveyor, under authority of the U S. Surveyor General for California." From said post in Mineral Monument, with a variation 15 deg 55 min E, the extreme end of the rocky bluff on which the Mineral Monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face 7½ feet high bears N 60 deg E .07 links. The northeast corner of an old adobe vaso chimney, a Mexican furnace for smelting silver and lead ores, bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The northwest corner of Rafael Diaz' house bears S 38 deg 23 min E 1.58 chains. An old well 30 feet deep on north side of cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE.

Commence at "Post 1 Armagh Mine," thence with a var 15 deg 55 min E, N 79 deg E 1.51 chains to west boundary line of Ygnacio mine, and at a point 325 feet—4.92 chains from the southwest corner stake of the Ygnacio mine; thence with a var 15 deg 55 min E, N 11 deg W 12.59 chains to U. S. Mineral Monument.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 146, of locations. The adjoining claimants are, on the East, the Greenly mine

Any and all persons claiming adversely any portion of said Armagh mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, in the State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

PROBATE NOTICE.

IN THE SUPERIOR COURT OF THE County of Inyo, State of California. In the matter of the Estate of Nancy Williams, deceased. Order to show cause why order of sale of real estate should not be made. It appearing to said Court, by the petition this day presented and filed by John A. Lank, the Administrator of the estate of Nancy Williams, deceased, praying for an order of sale of real estate, that it is necessary to sell the whole of the real estate to preserve the same from destruction.

It is therefore ordered by the said Court that all persons interested in the estate of said deceased appear before the Superior Court on MONDAY, the SIXTH day of SEPTEMBER, A. D. 1880, at 10 o'clock in the forenoon of said day, at the Court Room of said Court, at the Court House, in the County of Inyo, to show cause why an order should not be granted to the said Administrator to sell the real estate of said deceased as shall be necessary.

And that a copy of this order be published at least four successive weeks in THE INYO INDEPENDENT, a newspaper printed and published in said county. JOHN A. HANNAH, Judge.

Dated July 17, 1880.

OFFICE OF THE COUNTY CLERK of the County of Inyo.

I, John Crough, County Clerk of the County of Inyo, State of California, and ex-Officio Clerk of the Superior Court in and for said County, do hereby certify the foregoing to be a true, full and correct copy of an order duly made and entered upon the minutes of said Superior Court.

WITNESS, my hand and the Seal of said Superior Court, this Seventeenth day of July, A. D. 1880. JOHN CROUGH, Clerk,
[SEAL] By DANIEL CROUGH, Deputy Clerk.

The Questions of the Hour.

If Gen. Hancock expects the suffrages of the people of Iowa, will he at once, promptly and without prevarication or mental reservation, stand up and answer the following questions? The people of the Hawkeye State demands it, the country expects it, and the General will either answer or admit by his silence or evasion that his candidature is a hollow farce:

1. Who killed Cock Robin?
2. Where were you when the light went out?
3. Have you heard "Pinafore," and if so, how many?
4. Did you and Wade Hampton and Ben Hill agree so harmoniously in politics eighteen years ago as you do now?
5. If not, who has changed, yourself or Ben?
6. Who made the world, Robert Ingersoll, or Joseph Cook?
7. What become of all the pins?
8. Who was the original Garfield man?
9. Do you believe in the first term?
10. Who was the inventor of seasickness, and do you believe in an international copyright for the protection of the same?
11. Does a tame goat out rank oleomargerine?
12. Analyze the following sentence, and parse the first 23 words: "Whither, oh, children, hast thou as much cheerfully weepest so distance that evening at sunrise?"
13. Write in colloquial French the following exercise: "Where is the black cat of the widowed husband of my Aunt Maria's son Tom?" "No, but I have the red-hen of the bald-headed uncle of my mother-in-law's fat sister Bill."
14. Have you such a thing as a $5 bill about your clothes?
15. Who do you think would be a good man for a private little consulate somewhere on the Mediterranean coast?

P. S. You may answer this privately by mail, if you please.—[Burlington Hawkeye.

The annihilation of the British army of Gen. Burrows in Afghanistan, has created a profound sensation throughout Europe. As the British Government is little inclined to brook such a defeat and disgrace, at the hands of a half civilized foe, it may be anticipated that there will be a bloody and unrelenting war in Central Asia, not exceeded in its terrible characteristics even by the famous Sepoy rebellion, when the mutineers were shot away from the muzzles of the British guns.

HARD putty, it is said, can be removed from a window sash with great readiness by simply applying a piece of heated metal, such as a soldering iron or other similar instrument. When heated—but not red hot—the iron is to be passed slowly over the putty, which is thereby rendered so soft as to be easily parted from the wood.

What Resuscitated Him.

The tenant of a house on Crawford street, who was behind on his rent, was some days since ordered to vacate, and then he put his imagination at work to invent excuses to remain in the house. He first had his wife fall sick, and thereby got in a week. Then he was taken with the chills, and got in four days more. Then he got two days in which to hunt another house, and yesterday, when an officer went there for the key, he found the man dying. At least his wife said such was the case, and she acted like one greatly distressed in mind.

"This is very sudden," remarked the non-plussed officer.

"Very sudden, sir. He had just said to me that we would begin moving after dinner, when he dropped to the floor and has been lying in a stupor ever since. The doctor thinks he may never rally again."

"Can I see him?"

"Oh, yes, but please don't speak above a whisper."

She led the way to the bedroom. There lay the unconscious man, but somehow he didn't look as a sick man should, and his breath had a strong smell of whisky. The officer felt of his pulse, and made up his mind that it was a game to beat the court. He therefore began:

"Well, Mrs. Blank, I congratulate you. In a few more hours you will be rid of him forever. He is a great loafer and a hard drinker, and but for this he would have died in State Prison."

The wife opened her eyes in astonishment, and the officer continued:

"I'll leave word with the undertaker as I go down. Any sort of a box will do, or may be they'll haul him out on the commons. It's no consequence what becomes of these old soakers. You will be a happy woman when the old galoot goes up the spout."

At this point the dying man rose up, took a cool survey of the officer, and quietly observed:

"Sir, you are no gentleman! No, sir, you are not! I'm no soaker or loafer, and I want you to understand that I'm able to have as decent a funeral as you can. You can take your old house and go to bangs with it for all me. Mary, hand me my clothes, and we'll show this vulgarian that we can move out of this old shanty and into a residence in about forty minutes."

In twenty minutes their goods were all on the walk and the house locked up.—[Detroit Free Press.

A WRITER on Australian life in the Boston "Commercial Bulletin" tells how a sick man was found by his mate at the diggings murdered, and his gold gone. The culprit was found, but contrived that night to escape with the money, which, for safe keeping, had been placed in the place of detention. Nothing could be heard of him, but a few days later came the following: "Mr. Magistrate: Jem Bell, the murdered man, was once a mate of mine. He was a good man. You will find his murderer at the head of Dead Horse Gully. I have kept the gold for the reward.—KANGAROO BILL, Captain of the Bushrangers." They found the murderer's remains — a fleshless skeleton, every bone picked clean. He had been staked down on the ground, with his back to an ant hill, and left for the ants to eat him alive. A more awful retribution can scarcely be conceived.

JUST as some boys had got out the body of Wilson Leonard, a colored boy who had fallen into a mill-pond at St. Michaels, Md., a colored man came up and said: "Put dat boy back into de water; you had no right to get him out till de jury comes. Dat is de law and you must 'bey it." Although the lad was kicking vigorously, but covered with mud, he was put back to await legal investigation. After a while the boys concluded to wait no longer, but life had then fled.—[N. Y. Sun.

A MINE has been discovered somewhere near the head of White river, a distance of about 35 miles from Delano, Kern county, of which a sufficient quantiiy of gold and silver ore has been extracted to give a good general idea of its merits, the results being as follows: Gold, per ton, $5; silver, $235, and copper 7½ per cent. Besides this, the vein is three feet in breadth, runs north and south, and pitches at an angle of 45 degrees west.

ALL SORTS.

Sweating for one's daily bread is a "pore" way of getting it.

When the slow eater calls for ketchup he means business.

INDEPENDENCE, CAL.:

SATURDAY, AUGUST 7.....1880

HOW TO APPLY.

Considerable interest is being manifested in the matter of undertaking the culture of that superior fish, the carp. Already one of our most enterprising citizens up the valley has prepared a two-acre pond for the purpose, and made application for a stock of fish. There are plenty of streams and other ponds in this valley just suited for this peculiar and excellent fish, and doubtless there are numbers of our citizens who would like to stock them. A word as to how to proceed to obtain a stock may be of some help.

Parties wishing to obtain a stock of "German Carp," as they are called, may address Spencer F. Beard, Fish Commissioner, Washington, D. C., for forms of application, or apply to him for the fish direct by observing the following directions:

Give your name and Bostoffice address, not forgetting the date of your application; state the nearest railroad station, together with the name of the railroad, where you can receive the fish, the intended time of arrival of which you will be duly notified; give the size of your pond, or stream, and state whether it is muddy, boggy or gravelly, and the kind of fish already in it, if any. That is all, except to repeat that your address (name, State, county and Postoffice) must be carefully and legibly given.

The application must then be sent to any one of our Congressmen for his endorsement and transmission to the Commissioner, taking care to enclose stamp to pay transmission.

This office may be able to help some in procuring this endorsament in case the applicant is not personally known to the Congressman; but the same end may be easier attained through the intermediate endorsement, under seal, of some official or notary acquainted with the applicant.

The water is drawn from the carp pond at Washington to obtain fish only at stated intervals, therefore an application may remain on file some time before the fish can be shipped. The Commissioner hopes to make one more distribution this season.

RAILROAD EARNINGS.

Late compilations of statistics concerning the earnings of railroads in the United States, and their percentage of increase during the few years past, make some rather astonishing developments. It is stated that the gross earnings of all the prominent railroads in the United States for the year 1879 amounted to no less a sum than $528,000,000, an increase of over eight per cent. on the previous year's gross earnings. In 1863 the whole business of four of the principal trunk lines did not amount to as much as their increase last year. The railway business of 1880 is exceeding that of last year by not less than twenty per cent. The gross earnings of the Central Pacific for June of this year were $308,000 greater than for the same month last year. The earnings of thirty-nine railways for the month of June of this year were $17,759,015, an increase of 36½ per cent. over June of last year. For the first half of the year ending June 30, 1880, the gross receipts of thirty-three roads were $82,044,776, an average of 26 per cent. over the same period of 1879. The gains of the New York Central for the half year were $1,300,000; Chicago and Alton, $1,318,000 for the same time. The traffic of the Northern Pacific was $62,000 greater this last June than for the same month last year, and the gross earnings of the Denver and Rio Grande road were $50,000 greater in the first week in July, 1880, than in the corresponding week of 1879.

SUPT. HAINES, of the Western Union Telegraph, informs the Los Angeles *Express* that his company designs pushing its wires across the Territories along the new railroad route, to connect with the Eastern system, thus forming a second complete transcontinental line. Starting from this side, it has been constructed with the Southern Pacific road to a point beyond Tucson. Whether it has followed the Atchison, Topeka and Santa Fé road westward from the other side of the continent in the same manner is not stated. Mr. Haines says that within a year, the great bulk of the company's business will be done over the southern line.

BOTH of the nominees for the Presidency are Freemasons and Knights Templar—Gen. James A. Garfield being a member of Pentalpha Lodge, No. 23, and Columbia Commandery, No. 2, Washington, and Gen. Winfield S. Hancock a member of Charity Lodge, No. 190, and Hutchinson Commandery, No. 32, of Norristown, Pa.

THEIR LETTERS.

Gen. Hancock and Mr. English (who, by the way, is the only candidate in the entire Presidential outfit who is simply a plain Mr.) now give to the world their letters of acceptance, and both will be found in full text in all the principal newspapers, as well as many not particularly "principal" or principled. THE INDEPENDENT is not given to the reproduction of the full text of documents of this class, nor to reviews of the same, partisan politics being no part of its mission. Nevertheless, this much may be remarked:

Gen. Hancock, so far as he goes, expresses no sentiment that can raise a question of his true patriotism even among his strongest political enemies, while his explicit determination to maintain the Constitutional Amendments as they are elicits the commendation even of those enemies. The fault of this bid for public favor is not in anything it does say or promise but that some things are left unsaid altogether. Of these the most noticeable to the Pacific coast politician is the omission of any reference whatever to the Chinese question. We are disposed to give him praise for saying nothing on that point, for it is not reasonable to suppose that he, until within the last month or so, has ever had any personal reasons to look into the matter to that extent that would justfy him now in defining a positive future national course in relation to it. And anything less than a positive plan would not have satisfied his party on this coast. There are too many of all parties on this coast who forget that this is too purely a general international matter for any honorable nation, however great, to undertake to dispose of in sand-lot style.

We think the letters of both Garfield and Hancock are befittingly dignified expressions of their personal opinions of what the governmental policy should be. We do not see any matertal difference in their conclusions on the issues mutually touched upon; their respective strikers laud them as wonderfully statesmanlike documents; conversely, both are puerile effusions, each, from the opposite stand-point, being immeasurably more statesmanlike than the other. We do not doubt for one moment but that most all of such silly partisan strikers would have talked the same way, but in exactly the reverse order, if the signatures to these documents had been reversed. Any newspaper reporter can express opinions on public policy, and such as may be generally upheld, and yet be totally incapable of devising a real statesmanlike method of putting them to practical use, which is the essential part of statesmanship. These candidates very well agree as to what ought to be done in certain things, but we have yet to guess how they would respectively go about it.

MR. English's letter, like that of his competitor, Gen. Arthur, is entitled to no more notice than any other stump speech, Mr. English's being on the lowest plane of the two, if there is any noticeable difference.

INTELLIGENCE from Callao, dated July 22d, says: The Peruvians rigged a torpedo boat with 300 pounds of dynamite under a false bottom. Fruit was placed above this and the boat set adrift in the harbor. Boats from the Chilean transport *Loa* picked up the fruit boat and brought it alongside the ship. The fruit was taken out, when the machinery under the false bottom set the charge off. The *Loa* was almost lifted out of the water and sank stern foremost. One hundred and fifty men were drowned and but few were saved.

A CHICAGO girl overdid the decorative art business. She ornamented the kitchen range with grass and ferns, so that when it was red hot the mimic vegetation looked cool and inviting. Her lover found her one day, like Werther's "Charlotte," cutting bread and butter. The decorative stove seduced him to sit squarely upon it while he plied the fair creature with the honey of compliments. He now bears the letters "Eureka range No. 8," and, in revenge, has gone to St. Louis to swell the census.

THE first number of the *Genoa Weekly Courier* came to hand last Sunday. It is a neat sixteen-column paper, printed on the material of the *Carson Valley News*, which paper it purchased and absorbed. It is a "star" little newspaper, and we give it a hearty welcome.

AN ex-soldier who was making out his papers at Los Angeles to draw his quarterly pension brought in as the necessary witness before the County Clerk an ex-soldier of the Confederacy taken prisoner by the pensioner in one of the battles of the rebellion.

DR. TANNER, the champion starvist, either finished his forty days contract at noon yesterday, or it finished him.

MIKE McGOWAN the Man Eater, is making toward Virginia City to take a hand in the Spring fights.

NEW ADVERTISEMENTS.

COMMITTEE MEETING.

MEMBERS OF THE DEMOCRATIC County Central Committee are hereby notified that a meeting of said Committee will be held at the office of the Chairman, at Independence, on SATURDAY, the FOURTEENTH day of AUGUST, 1880, at the hour of 8 o'clock P. M., for the transaction of general business.

S. P. MOFFAT, Chairman.

H. M. ISAACS, Secretary.

August 7, 1880. n529t2

ASSESSMENT NOTICE.

LOS ANGELES MINING AND SMELTING Company.

Location of Works, Resting Springs, Inyo County, California.

Location of Principal Place of Business, Los Angeles, Los Angeles County, California.

Notice is hereby given that at a meeting of the Board of Directors of said Company, held on the Third day of August, 1880, an assessment (No. 4) of Two Dollars per share was levied upon the entire capital stock of said corporation, payable immediately, in United States gold coin, to J. M. Elliott, Secretary of said Company, at his office, No. 1 Temple Block, in the city and county of Los Angeles, State of California.

Any stock upon which this assessment shall remain unpaid on Monday, the Twentieth (20th) day of September, 1880, will be delinquent and advertised for sale at public auction, and unless payment is made before, will be sold on TUESDAY, the NINETEENTH (19th) day of OCTOBER, 1880, to pay said delinquent assessment, together with costs of advertising and expenses of sale. By order of the Board of Directors.

J. M. ELLIOTT, Secretary.

Office of the Secretary—No. 1 Temple Block, City and County of Los Angeles, California.

INYO INDEPENDENT.

INDEPENDENCE, CAL.:

SATURDAY, AUGUST 7.....1880

WHAT ENLIGHTENED HIM.—Bishop Creek has a citizen, and a very popular one, too, who was born a Democrat, and, spite of all that could be done to cure him of the disorder, it grew worse on him till it is now conceded to be incurably chronic. This citizen, as usual on such stirring occasions, went down to the town the other evening to help carry on a Democratic revival as per general invitation. It so happened the Republicans were engaged in a similar labor on their own account, and as they were making a good deal of noise, this citizen was natually enough deceived thereby, and soon found himself in their midst, "whooping up the good cause" louder than anybody, and all the more vigorously because he recognized in the orator of the evening an old wheel-horse Republican, but whom he supposed had reformed; and so he cheered and pounded the floor on the slightest provocation, not so much at the sentiments expressed as in gloryfication at this important gain to his party ranks. And the other fellows, believing they, too, had also gained an important convert, let themselves out for all that was supposed to be in sight, and unadulterated enthusiasm ruled the hour. The speaker was lifted to his work; in a burst of eloquence he wound up with a call for "three cheers for our noble party!" in which duty this citizen loaned his full powers, and was in proper shape to "come down" vehemently on the next proposition; but his "come down," was something like that of a wet dish-rag, for this is what fell on his ears; "Three cheers and a tiger for our next President—James A. Garfield!" As soon as he recovered from his paralysis, he said to the most convenient man: "Say, where's them blank fool Hancock fellers got their meetin'; I'll go and help them some, I guess." And he went.

CERRO GORDO.—Just at present the old town of Cerro Gordo—once among the livliest on the coast, and one of the very best bullion producers—presents a picture of almost absolute quietude. Out of the late fires nothing but the graded lots where stood the principal business houses were saved—the ground and foundations were spared. The male population, exclusive of Mexicans, Indians and Chinamen, can be enumerated easily—Dr. Gould, Dan. Williams, Wm. Crapo and Bill Johnson, with Sam Cowles down at the store, comprise the outfit. Several of the other old-timers are out at Beveridge District. In the Lower Town the Hawley Company has three or four men at work, while John Davis guards Ygnacio interests. The old camp, however, is only laboring under a temporary suspension of animation, and unless all signs fail it will shortly boom as it never has before. Its enormous wealth is just becoming understood.

A PROMISING MINE.—Some months ago we made reference to a mine called the Waco Star, upon which Mr. John Bowman was operating. After a suspension of work for several months, Mr. Bowman recently resumed operations, and results so far certainly give promise of a really valuable mine. Surface strippings show good ore all along the thirty or forty feet uncovered, and from a 25-foot tunnel forty-odd tons of ore have been piled on the dump; numerous assays indicate an average value of not less than $80 a ton, chiefly gold. The pay streak is over three feet wide, in about ten feet of ledge matter. The ledge is located higher up on the mountain, and about a mile and three-quarters distant from the Brown Monster.

ITS OFFICERS.—The officers of Busy Bee Lodge, No. 250, I. O. G. T., were last Monday evening duly installed by Rev. F. M. Willis, S. D. G. W. C. T., and the full list is as follows: P. A. Chalfant, W. C. T.; Mrs. F. M. Willis, W. V. T.: Norman E. Conklin, W. S.; Mrs. Annie Brown, W. F. S.: Mrs. Amalia Isaacs, W. T.; Fred. George, W. M.; Willie A. Chalfant, W. I. G.; Winton Willis, W. O. G.; Mrs. Mary May, W. C.; Mrs. M. George, W. R. S.; Mrs. M. Q. Parker, W. L. S.: Miss Carrie Willis, W. A. S.; Miss Maggie Conklin, W. D. M.: H. P. Cartier, L. D.; H. M. Isaacs, P. W. C. T.

HANCOCK AND ENGLISH.—About the time the Republicans of Bishop, last Saturday, were organizing and burning brooms and enthusing generally, the Democrats perpetrated the organization of a regular Hancock and English Club. President, John B. White; Secretaries, Henry Wainright and P. Forbes; Treasurer, B. Peeler. Thirty names were enrolled and the Club will number a membership of 100 or more shortly.

ORE SHIPPED.—Messrs. Harris & Rhine this week shipped quite a number of sacks of the mixed copper, silver and gold ore from the Hirsch ledge, for a working test in San Francisco. The Hirsch is an extension of the Brown Monster, and is presumed to be a large and valuable mine.

IN SESSION.—The Board of Supervisors have been in session all the present week, attending to multifarious matters. A quite extended report of the proceedings, kindly furnished this office by Deputy Clerk H. M. Isaacs, is necessarily laid over until next week.

POSTPONED.—It has been deemed advisable to postpone the school tax election called by the Trustees for this school district, from the 21st to the 28th of August, for which see advertisement

LETTER LIST.—On the 1st instant the following letters were advertised in the Independence Postoffice: Manuel Montaño Alanio; John Conger, and John T. Conger.

GONE BELOW.—Captain and Mrs. Jos. Eudey have gone to the Bay, the former in connection with some mining business.

DARWIN NOTES.

DARWIN, August 5.

MESSRS. EDITORS—Our camp is gradually assuming a good, healthy business outlook, so far as

MINING INTERESTS

Are concerned. Eddy & Gorman have resumed work on the Custer and other properties.

Sim Reid & Co. are vigorously working the Promontorio, now called the Maggie.

A lease has just been made of the Del Monte, by its owner, Sim Reid, to Eugene Kurtz and Henry Allari, to extract ore. Mr. H. Jackson has commenced to work on some of his mines.

Robert Steen has commenced to make a lively camp at Old Coso. Lumber, provisions and mining supplies were carried over yesterday; silent nature was somewhat disturbed, the monotony being broken by the rumbling noise of two wagon loads of freight.

More parties will soon start in. Six or eight *good* miners could get work right away.

I will close this note with the following statement of the prices which Messrs. Gorman & Eddy will pay for ores at their coming run in September or October next:

"The following prices will be paid for ores delivered at the Defiance furnace that contain 25 per cent. lead—

	Per Ton.
30 ounces per ton, silver.....	$ 7 50
35 " " "	10 00
40 " " "	15 00
45 " " "	18 75
50 " " "	22 00
60 " " "	29 00

Above 60 ounces per ton, will pay 80 cents per ounce, less 25 ounces for working ores. All fractional parts between the above stated figures will be paid for according to prices stated above. GORMAN & EDDY."

Yours, truly,

C. F. O'BRION.

Miners' Meeting—Consolidation of Districts.

A meeting of miners was held at Round Valley, July 27, 1880. R. M. Hilton was chosen Chairman and J. B. White, Secretary.

The following resolutions were adopted—

That the mining districts known as the French and the Sierra Nevada be consolidated, and said new district be known as the Round Valley Mining District.

That its boundaries are the summit of the Sierra Nevada, West Bishop on the south, Mineatta District on the north and the eastern line of old Sierra Nevada District on the east.

That the records of the Sierra Nevada and French Districts acknowledged as legal are to be considered as the records of the Round Valley District, and the laws of the new district are to be in conformity with the mining laws of the United States.

That locators have thirty days to define their claims, erect monuments and make their record.

That the term of office of the Recorder shall be two years, and that Recorder's fees are $2 50 recording each notice.

John B. White was elected Recorder, and after resolving that the proceedings be published the meeting adjourned.

Republican County Central Committee—Delegates Appointed.

A meeting of the Republican Central Committee of Inyo County was held at Independence, Cal., July 31, 1880, T. F. A. Connelly in the chair.

A. R. Conklin was unanimously elected Secretary of said Committee.

Upon motion of J. W. Symmes, it was

Resolved, That A. R. Conklin, of Independence, and Seth G. Sneden, of Bishop Creek, be, and they hereby are, appointed as delegates to represent the county of Inyo at the Republican State Convention, to be held at Sacramento on the 11th day of August, 1880, with power to appoint proxies if they are unable to appear in person.

Which resolution was unanimously adopted.

Upon motion, the fixing of a day for holding the Republican County Convention was postponed.

Adjourned.

T. F. A. CONNELLY, Chairman.
A. R. CONKLIN, Secretary.

WHAT HE WAS AFRAID OF.—The children in a certain preacher's family not a thousand miles distant, were discussing Dr. Tanner's chances for successfully completing his great starving feat. "Hope he'll die," said a young brother. "Why!" exclaimed the astonished mother, inquiringly. "Well," replied the embryo minister, "if he lives forty days on plain air and water, folks will think preacher's families can do it, too, and won't pay 'em a cent."

ORGANIZED.—At Bishop Creek, on Saturday evening last, a Garfield and Arthur campaign club was organized. J. L. Garretson was chosen President, George Collins Secretary, and F. G. Powers Treasurer and Marshal. Forty-one names were enrolled.

JUDGE YULE, of the Oakland Police Court, on the 3d instant rendered his decision in the case of Edward F. Schroder, charged with murder, for having shot and killed Dr. Albert Lefevre. He held the accused to answer before the Superior Court, and denied the application of defendant's counsel for bail.

THE daughter of the king of the Sandwich Islands, Victoria-Kawekui-Kafulani-Lunali-lo-Kalaniuiahilapilapa, is a nice little girl of four years. She was baptized in sections.

A FIRE broke out on the morning of the 2d instant in the town of Red Bluff, and caused a loss of about $100,000.

IN GENERAL.

The bodies of the victims of the recent disaster in the Hudson river tunnel, Jersey City, have not yet been recovered.

The census shows the population of the State of New York to be 5,080,000.

Heavy rains have greatly damaged the crops in several portions of England.

Confirmatory reports continue to be received of the British disaster in Afghanistan.

The jury in the case of the *Seawanahaka* disaster blame the crew for not saving more lives.

The return of the census of Arizona gives the total population as 41,580.

Secretary Thompson expresses himself highly pleased with the condition of things at the Mare Island Navy Yard.

N. A. Chandler killed himself Friday night of last week at Eureka, Nev.

Kansas has a population of 1,000,000.

Mrs. A. T. Stewart is to endow a college at Garden City, N. Y., with a fund of $3,000,000 or $4,000,000.

The notorious Bender murderers are said to be in custody in Nebraska.

J. H. Graham fired five shots at Miles Finlen Saturday night, at Virginia City, none of which took effect.

Railroad trains are now running regularly into Leadville, Col.

During this season 20,000 seal were taken on the west coast of Vancouver Island, valued at $180,000.

The military are arranging to give Victorio a warm reception should he cross the Arizona border.

The public debt statement for July shows a decrease of $5,576,053.

The election for State officers in Alabama took place on the 2d instant. A heavy Democratic vote was polled. Kentucky went the same way.

The trial of Carlton for the murder of Brummet at Hollister, San Benito county, began at San Jose on the 2d instant.

The Ute Commission have succeeded in their work and the removal of the Indians is now only a question of time.

IN the case of Quong On Long, one of the ruling spirits of his kind, and the principal merchant, who was up before Judge Humphreys several days since, has brought to light one of the beauties of our new laws. The charge was that of selling whisky without a license, and his attorney opened the way of his escape by reading that the Constitution declares the State incapable of granting a licenses to Chinamen, and so the case was dismissed.—*Colton Semi-Tropic.*

MRS. M. J. Cahill, wife of the editor of the Chicago *Pilot*, called at Holy Angels Academy, Buffalo, New York, on the night of August 1st, and took possession of her four children and carried them away, urging her claim at the point of a revolver.

A GRAND Masonic reception will soon be extended to Lieutenant Gorringe by the Masons of New York, Brooklyn and Jersey City, under the auspices of his own Lodge, the Anglo-Saxon, No. 137, of Brooklyn.

A LITTLE girl went into a drug-store the other day and said to the proprietor in a half whisper: "If a little girl haint got no money, how much chewing gum do you give her for nothing?"

POLITICAL.

OFFICIAL.

HEADQUARTERS REPUBLICAN STATE CENTRAL COMMITTEE, SAN FRANCISCO, July 14th, 1880

A REPUBLICAN STATE CONVENTION IS hereby called to assemble at Sacramento City on WEDNESDAY, AUGUST ELEVENTH, in the Assembly Chamber of the State Capitol, at 2 o'clock P. M., for the purpose of nominating SIX (6) Presidential Electors and SIX (6) Alternates, ONE each from each Congressional District and TWO (2) each at large.

The Convention will be composed of Three Hundred and Ninety-four (394) Delegates, appointed as follows:

Alameda	25	Plumas	3
Alpine	1	Sacramento	19
Amador	6	San Benito	2
Butte	8	San Bernardino	3
Calaveras	4	San Diego	4
Colusa	4	San Francisco	101
Contra Costa	6	San Joaquin	11
Del Norte	1	San Luis Obispo	4
El Dorado	7	San Mateo	4
Fresno	2	Santa Barbara	6
Humboldt	8	Santa Clara	17
Inyo	2	Santa Cruz	8
Kern	3	Shasta	3
Lake	2	Sierra	5
Lassen	1	Siskiyou	4
Los Angeles	15	Solano	10
Marin	3	Sonoma	12
Mariposa	2	Stanislaus	4
Mendocino	5	Sutter	3
Merced	3	Tehama	3
Modoc	1	Trinity	2
Mono	1	Tulare	5
Monterey	6	Tuolumne	4
Napa	6	Ventura	3
Nevada	12	Yolo	6
Placer	8	Yuba	6

The Committee recommend that the Delegates to the State Convention from each Congressional District will form the Convention for the nomination of Congressman, such Convention to be held at such time and place as the Congressional Committee may order.

Delegates to be chosen in such manner as the County Central Committees may direct.

Where primaries are held, the Committee recommend the following test for voters at such primaries: "All those who will pledge themselves to vote for the nominees of the Republican Party at the coming Presidential and Congressional elections."

By order of the Committee:

W. W. MORROW, Chairman.
JAMES R. FINLAYSON, Secretary. n527t1

INDEPENDENCE, CAL.
BOOK, NEWS AND JOB
PRINTERS.

PREPARED TO FILL ALL ORDERS FOR

Posters, Theater Bills,
Concert Programmes, Etc., in any color or colors of Ink, and on any color or kind of Paper—all sizes.

Books and Pamphlets,
For Societies, Mining Reports, Briefs, Transcripts, Speeches, Etc., Etc

Legal Blanks,
For District, County, Probate and Justices' Courts; Official Blanks, Deeds, Mortgages, Bonds, Leases, Etc.

Bill Heads and Statements
Ruled and Printed to Order.

Letter and Note Headings.
All Styles and Qualities of Paper in Stock

Envelopes,
In all all varieties of Size, Color and Weight.

Circulars and Invitations.
Guaranteed to Please.

Show Cards,
In plain or most Ornamental Styles.

Bank Checks,
On Plain, Tinted or Government (Stamped) Paper

Books
Of Blank Orders, Notes, Receipts, Certificates, Invoices, Etc., from one to six on sheet, perforated from stub and bound in any style desired.

Cards,
Business, Wedding, Visiting and Reception—in all the latest styles.

Show Tickets,
On 6-ply Railroad Board, all Sizes and Colors; Pool Tickets, Scale Cards, etc., on lighter board cut to order.

Hotel Registers and Stock Books,
Ruled and manufactured to Order.

Pay-Rolls and Time Books
Prepared according to copy.

Stock Certificates,
In Books, on Linen Bond Paper; finest styles.

Shipping Bills,
Way-Bills and Bills of Fare, ruled and printed.

Dancing Programmes,
Latest Novelties.

Shipping Tags,
All sizes and the best in use; an indispensible article to Merchants and Shippers.

Funeral Notices,
On Mourning Note.

Blotting Pads,
Best description, Plain or Printed, cut to order

Druggists' Labels,
Any desired styles, ranging from Gold on Black Paper to Black on Gold Paper.

Paper Bags,
Printed Cheaply and Expeditiously.

Ballots and Election Work,
In strict compliance with every requirement of the Code.

Political Cards, Deposit Tags, Address Slips, Prescription Blanks, Photographic Cards, Assay Certificates, Calendars, Labels, Advertisements on Postal Cards, Notices, Dodgers, Announcements, Etc., Etc.

ALL WORK
Which may require it is substantially Bound in
PAPER, CLOTH OR LEATHER.

BRONZE AND CHROMATIC WORK
Made a Specialty

We have arranged a careful Schedule of Prices based on the principle of
"LIVE AND LET LIVE."

Having an abundance of new and modern printing material, rapid presses and good workmen, together with a very large, complete and constantly supplied stock of
Stationery and Binding Material
We confidently hope to merit and receive the patronage of the public.

SATURDAY, AUGUST 7.....1880

THE claims of Dr. Unger for curing intemperance would seem to be justified, if we may rely upon as good authority as the Chicago "Tribune" for the evidence. Mr. Jos. Medill, the editor, is said to be a strong indorser of the new remedy, and from the editorial commendation of it in the "Tribune" we conclude the remedy has produced some benefit to the community already. It is claimed that the doctor has cured 28,000 persons of the worst form of intemperance with it, and that this is the first remedy ever discovered that kills the disease and the inclination to drink at one and the same time.

Remedy—Take one pound of best, fresh, quill red Peruvian bark, powder it, and soak it in one pint of diluted alcohol. Afterward strain and evaporate down to half a pint. Directions for its use: Dose—a teaspoonful every three hours the first and second days, and occasionally moisten the tongue between doses. It acts like quinine, and the patient can tell by a headache if he is getting too much. On the third day take as previously, but reduce the dose to one-half a teaspoonful. Afterward reduce the dose to fifteen drops, and then down to ten and then to five drops. To make a cure, it takes from five to fifteen days, and in extreme cases, thirty days. Seven days are about the average in which a cure can be effected.—[Scientific American.

THE removal of the Bureau of Engraving and Printing, at Washington, to a building half a mile from the Treasury has made it necessary to provide new arrangements for the transfer of money and bonds between the two establishments. The Department has constructed a heavy, van-like wagon, a sort of a vault on wheels, built of iron and steel, and arranged internally like a vault with a sheet iron lining. The doors are fastened with tremendous bolts, and the locks are of the combination order. The body of the vehicle is painted an olive color with gilt ornamentation. When drawn through the streets by two immense horses it attracts considerable attention, especially as it is always accompanied by five armed agents of the Treasury Department, two guarding the front and three the rear.

A Kansas City reporter was on the train that carried Grant from Galena, and he went through the cars getting up a list of the people. One of the passengers was a short, thick set man with a beard, and he sat gazing pensively out of the window, with a cigar in his mouth. "Are you one of the invited guests?" asked the reporter, tapping the man on the shoulder. The man said he was, and kept on smoking. "From St. Jo, or Leavenworth?" asked the reporter, note book and pencil in hand. "Illinois," replied the man, still smoking. "I'll have to trouble you for your name," persisted the reporter. "Grant," said the man, still smoking. "Initials, please?" asked the reporter. "Ulysses S. Grant," replied the man, quietly. "Oh," faintly ejaculated the reporter. And he moved.

THE New York "Commercial" states that "it is rather a curious fact that the girls seldom marry men belonging to their father's profession. There are exceptions, of course, but such we believe to be the general rule. The farmer's daughter fancies a city life, the city girl a country life, the soldier's daughter—Gen. Sherman's, for instance—affects the navy, and a sailor's the army. You do not often find that a minister's daughter marries a minister, or a doctor's, a doctor. Editors' daughters know better, of course, than to marry editors, and a hotel-keeper's daughter generally waits a little."

A stampede from Leadville is in progress. Business is demoralized. The streets are deserted. Rents have come down, several dance-houses and theatres have closed, mines are looking poor, and a great many people are leaving. Hundreds of lots are being sold for taxes. People would rather abandon than pay the taxes on them.

A visitor at Mineral King, in a private letter to one of the proprietors of the Visalia "Delta," says: "After sinking a long ways in fallen rubbish in the cave of the Empire mine, they have at length struck a large body of good ore, and I think Fowler could now borrow all the money he wants."

WITHERED leaves having the yellow, brown or red autumnal colors, can be made green again by steeping them in water with a little zinc powder.

PROBATE NOTICE.

IN THE SUPERIOR COURT OF THE County of Inyo, State of California. In the matter of the Estate of Nancy Williams, deceased. Order to show cause why order of sale of real estate should not be made. It appearing to said Court, by the petition this day presented and filed by John A. Lank, the Administrator of the estate of Nancy Williams, deceased, praying for an order of sale of real estate, that it is necessary to sell the whole of the real estate to preserve the same from destruction.

It is therefore ordered by the said Court that all persons interested in the estate of said deceased appear before the Superior Court on MONDAY, the SIXTH day of SEPTEMBER, A. D. 1880, at 10 o'clock in the forenoon of said day, at the Court Room of said Court, at the Court House, in the County of Inyo, to show cause why an order should not be granted to the said Administrator to sell the real estate of said deceased as shall be necessary.

And that a copy of this order be published at least four successive weeks in THE INYO INDEPENDENT, a newspaper printed and published in said county. JOHN A. HANNAH, Judge.

Dated July 17, 1880.

OFFICE OF THE COUNTY CLERK of the County of Inyo.

I, John Crough, County Clerk of the County of Inyo, State of California, and ex-Officio Clerk of the Superior Court in and for said County, do hereby certify the foregoing to be a true, full and correct copy of an order duly made and entered upon the minutes of said Superior Court.

WITNESS, my hand and the Seal of said Superior [SEAL] Court, this Seventeenth day of July, A. D. 1880. JOHN CROUGH, Clerk, By DANIEL CROUGH, Deputy Clerk.

THE ENGINEERING and MINING JOURNAL.

PUBLISHED WEEKLY.

DEVOTED TO

Mining, Metallurgy, Engineering and Science.

RICHARD P. ROTHWELL, C.E., M.E., ROSSITER W. RAYMOND, Ph.D., Editors. WILLIAM H. WAHL, Ph. D., Department of Progress in Science and the Arts.

IT IS AN ACCEPTED AUTHORITY ON ALL questions relating to the great mining industries of the country. It is the oldest publication of its class in America, thoroughly independent, being of the trade and not in it, occupies a just and impartial position, which enables it to advise and teach without fear or favor. It devotes much space to questions bearing upon economical management of mines, and from time to time illustrates the more important improvements in mining machinery and engineering methods. Special attention is given to reliable mining news from all parts of the country, which is gathered by an efficicient corps of correspondents in every section, and from an extended exchange list. The metal and ore markets, and gold, silver and miscellaneous stocks are reported and commented upon weekly by experienced financiers, who are unbiased by private interests, and upon these matters it is accepted as a reliable guide and unfailing instructor. Gives statistics of production of coal and iron, and of our great gold, silver and other mines. Its scientific notes are an epitome of the latest researches, its trade reports full, and its editorials sagacious and comprehensive. It enjoys the widest circulation and greatest influence of any journal of its class in the world; its patrons and readers comprising the most select and intelligent men in every quarter.

Subscription, $4 per year, in advance; 10c., single copy.

THE BEST PAPER. TRY IT!

BEAUTIFULLY ILLUSTRATED.

35th YEAR.

The Scientific American.

THE "SCIENTIFIC AMERICAN" IS A large, First-Class Weekly Newspaper of Sixteen Pages, printed in the most beautiful style, *profusely illustrated with splendid engravings*, representing the newest Inventions and the most recent Advances in the Arts and Sciences; including New and Interesting Facts in Agriculture, Horticulture, the Home, Health, Medical Progress, Social Science, Natural History, Geology, Astronomy. The most valuable practical papers, by eminent writers in all departments of Science, will be found in the Scientific American.

Terms, $3.20 per year; $1.60 half year, which includes postage. Discount to Agents. Single copies, ten cents. Sold by all Newsdealers. Remit by postal order to MUNN & CO., Publishers, 47 Park Row, New York.

PATENTS. In connection with the SCIENTIFIC AMERICAN, Messrs. MUNN & Co. are Solicitors of American and Foreign Patents; have had 35 years experience, and now have the largest establishment in the world. Patents are obtained on the best terms. A special notice is made in the SCIENTIFIC AMERICAN of all inventions patented through this Agency, with the name and residence of the Patentee. By the immense circulation thus given, public attention is directed to the merits of the new patent, and sales or introduction often easily effected.

Any person who has made a new discovery or invention, can ascertain, *free of charge*, whether a patent can probably be obtained, by writing to MUNN & Co. We also send *free* our Hand Book about the Patent Laws, Patents, Caveats, Trade-Marks, their costs, and how procured, with hints for procuring advances on inventions. Address for the Paper, or concerning Patents,

MINING.

MINING APPLICATION NO 161,

....TO THE....

OCCIDENT MINE.

U. S. LAND OFFICE, Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred linear feet of the "Occident Mine" or vein, bearing silver and gold, with surface ground three hundred feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 37, in Township ——, Range —— of —— Meridian, said Lot No. 37 being described in field notes of survey as follows, to-wit:

SURVEY OF EXTERIOR BOUNDARIES:

Began at a post on the southwest cor. of claim; marked the post "Post 1 Occident Mine." Said post is 2x3 inches square by 30 inches long and set in a mound of earth 20 inches high. From which var. 15 deg 55 min E., a pine stump 8 inches diameter bears N. 28 deg 50 min W. 11 links. A pine stump 6 inches diameter bears N. 85 deg 1 min W. 45 links. A pine stump 20 inches diameter bears S. 33 deg 5 min W. 76 links. A pine tree 7 feet high x6 inches diameter bears S. 23 deg 51 min E. 82 links. A pine bush 2 feet high x3 inches diameter bears N. 69 deg 10 min E. 67 links. From said Post the "Armagh U. S. Mineral Monument" by calculation bears N 20 degs 48 min W 17.17 chains. Thence with a var 15 deg 55 min E, 1st course—N 11 deg W 3.03 chains, ascending to point of hill at bottom of old prospecting cut 6.49 chains. End of slope —6.88 chains. On level line—commence descending 7.64 chains, old prospecting tunnel 8.42 chains. Old prospecting cut 12.47 chains. Old dump of prospecting cut 14.13 chains. Middle of Ygnacio Ravine—Ravine bears N 65 degs W 15.21 chains. Trail on ridge dividing Ygnacio Ravine from Cerro Gordo Cañon. Ridge bears W 16.07 chains. Rocky ridge—commence descending 17.19 chains. Middle of Cerro Gordo Cañon—commence ascending 21.85 chains. Wagon road—Citizens grade 22.72 chains. To post on N W cor of claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of rocks 2 feet high, marked the post "Post 2 Occident Mine." At foot of post is a cactus burr 20 inches in diameter growing in the rock. From said post a pine stump 2½ feet in diameter standing 8 feet below the wagon road, Citizen's grade, bears S 38 deg E 1.54 chains. No other suitable natural object within measuring distance. Thence with a var 15 deg 55 min E, 2d Course—N 79 deg E 2.27 chains, ascending rocky slope to "Post 3 Occident Mine" on north end of line of lode 3.42 chains. Rocky ridge bears south 4.54 chains. To a post on N E cor of claim. Said post is 30 inches long, 2x3 inches square, and is set in a mound of rocks 20 inches high, marked the post "Post 4 Occident Mine." From which a pine stump 20 inches in diameter bears N 40 deg 35 min E 1.01 chains. The top of a blue slate reef 10 links high bears S 43 min E 15 links. Thence with a var 15 deg 55 min E, 3d Course—S 11 deg E .97 chains. Wagon road—descending 3.03 chains. An old stone cabin. A tall pine tree stands 15 links to East of line, 3.42 chains. Middle of Cerro Gordo Cañon—bears S W. Commence ascending on steep, rocky ridge, 8.48 chains. Trail on ridge dividing Cerro Gordo Cañon from Ygnacio Ravine 11.77 chains. Open cut 30 feet west of mouth of an old prospecting tunnel in blue slate, 12.98 chains. Old trail—runs N 65 deg W 13.69 chains. Summit of ridge at old trail 14.34 chains. Summit of ridge commence descending 15.38 chains. Crossing of Belshaw toll road 22.72 chains. Post on S E cor of claim. Said post is 36 inches long, 3x3 inches square and is set in a mound of earth 25 inches high, marked the post "Post 5 Occident Mine," from which a red iron boulder 2½x3¾ feet square and standing 26 inches high bears S 84 deg 40 min E 85 links. A pine tree 9 links high standing 6 ft. west of bottom of a gulch—gulch bears S, bears N 35 deg 11 min E 1 06 chains. The middle of the Belshaw toll road bears S 79 deg W 18 links. Thence with a var 15 deg 55 min E, 4th Course—South 79 deg W 18 chains. Road—commence ascending, 2.04 chains. Quartzite ridge bears N—S 2.27 chains. Post marked "Post 6 Occident Mine" on south end of line of lode—commence descending 2.87 chains. Trail—runs N W and S E 4.54 chains To place of beginning, "Post 1 Occident Mine," containing 10 32-100 acres. From the Armagh U. S. Mineral Monument as herein described the mouth or entrance to the "Armagh Tunnel" as noted under the head of "Report" bears S 76 deg 55 min W 9.24 chains. The course of said Tunnel is S 58 deg 55 min E. Length 350 feet on the 27th of March, 1880.

ARMAGH U. S. MINERAL MONUMENT.

The "Armagh U. S. Mineral Monument" is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon, and very precisely on the W. B. line of the Ygnacio mine (as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Dep. Min. Sur.) and distant 17.51 chains from the S W cor stake of the Ygnacio mine.

At the point above given I drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter x16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high x5 feet in diameter at its base. Marked the top of post "U. S. Mineral Monument. Erected January 3d, A. D. 1880, by Wm. Crapo, U. S. Deputy Mineral Surveyor—under authority of the U. S. Surveyor General for California." From said post in mineral monument, with a variation of 15 deg 55 min E, the extreme end of the bluff on which the monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face of rock 7½ feet high bears N 60 degs E .07 links. The N E cor of an old adobe *vaso* chimney bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bear N 62 links. The N W cor of Rafael Diaz' house bears S 28 deg 33 min E 1.58 chains. An old well 30 feet deep on north side of Cerro Gordo Cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE.

Commence at "Post 1 Occident mine," thence with a var 15 deg 55 min E, S 79 deg W 3 03 chains to Post on S W cor of Ygnacio mine as surveyed for a patent N 11 deg W 17.51 chains. To U. S. Mineral Monument which when computed gives for a closing line from "Post 1 Occident Mine" to U. S. Mineral Monument N 20 deg 48 min W 17.77 chains.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 147 of locations.

The adjoining claimants are, on the west the San Francisco mine, on the south the Moter mine and on the east the Trachyte Flat mine.

Any and all persons claiming adversely any portion of said Occident mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

JAMES E. GOODALL, Register.

MINING APPLICATION NO. 162,

...TO THE....

ARMAGH MINE.

U. S. LAND OFFICE, Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred (1,500) linear feet of the "Armagh Mine" or vein bearing gold and silver, with surface ground six hundred (600) feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 38, in Township ——, Range ——, of Mount Diablo Meridian. Said Lot No. 38 being described in field notes of survey as follows, to-wit:

Commenced at "Post 1 Armagh Mine," on S E corner of claim. Said post is 30 inches long 2x3 inches square and is set in a rock mound 2 feet high, from which with a var 15 deg 55 min E a pine stump 18 inches high by 10 inches in diameter bears S 15¾ deg E 77 links. A pine stump 15 inches diameter bears S ⅔ deg 30 min W 91 links. A red ferrugenous quartz reef standing 4 feet high bears N 24 links. A pine stump 12 inches high x5 inches in diameter bears N 49 deg 30 min E 15 links. Thence with a var 15 deg 55 min E, N 11 deg W 3.20 chains. Ascending to summit of ridge commence descending, 6.98 chains; dump of old prospecting cut, 10.80 chains; Belshaw toll road, 13.16 chains; Belshaw toll road in middle of Cerro Gordo Cañon, commence ascending 14.25 chains; road running to Potosi house, 21.66 chains; wagon road—Citizens' grade—22.72 chains; post on the N E corner of claim Said post is 30 inches long, 2x3 inches square, and is set in a mound of earth 20 inches high. Sage brush slope, sloping S W; no natural object for witness mark in vicinity. Marked post "Post 2 Armagh Mine." Thence with a var 15 deg 55 min E, S 79 deg W .07 chains. Trail runs N S; commence descending—2.20 chains; wagon road, Citizen's grade—4.54 chains; post on north end of line of lode, marked the post "Post 3 Armagh Mine"—8.43 chains. Trail runs N S—9.09 chains. To post on N W corner of claim, situated on sage brush slope, sloping to S W. Said post is 3 feet long, 2x3 inches in diameter and is set in a mound of earth 2 feet high; marked the post "Post 4 Armagh Mine." No suitable natural object within measuring distance. Thence Thence with a var 15 deg 55 min E, S 11 deg E, commence ascending—1.75 chains; commence ascending—3.97 chains; crossing of foot trail runs west—8.27 chains; toll road in middle of cañon, commence ascending, 18.45 chains; summit of ridge bears west; commence descending, 19.74 chains; south end of "Silver Wedge" claim, 22.72 chains, to post on S W corner of claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of earth 20 inches high; marked the post "Post 5 Armagh Mine," from which a pine bush 2 feet high bears N 76 deg W 19 links. The chimney of an old deserted vaso bears N 22 deg 30 min E 24 links. Thence with a var 15 deg 55 min E, N 79 deg E 63 chains. Descending into bottom of gulch—gulch bears south, commence ascending—4.55 chains. "Post 6 Armagh Mine," or south end of line of lode, 3.99 chains; crossing of toll road, 9.09 chains; "Post 1 Armagh Mine," place of beginning. From which post the Armagh U. S. Mineral Monument bears N 4 deg 10 min W 12.67 chains, by calculation, containing 20 64 100 acres.

Location of the Armagh Tunnel.—From the "Armagh U. S. Mineral Monument" the mouth of the Armagh tunnel bears S 76 deg 55 min W 9.24 chains. The course of said tunnel is S 58 deg 55 min E. Length, 350 feet.

ARMAGH U. S. MINERAL MONUMENT—DESCRIPTION THEREOF:

There not being any lines of the U. S. public land surveys within 100 chains of the Armagh mine, I built a Mineral Monument and connected therewith. Said Mineral Monument is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon and very precisely on the west boundary line of, and distant 17.51 chains from the southwest corner stake of the Ygnacio mine, as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Deputy Mineral Surveyor. At this point drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter by 16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high by 5 feet in diameter at its base. Marked the top of the post "U. S. Mineral Monument. Erected January 3d, 1880, by Wm. Crapo, U. S. Deputy Mineral Surveyor, under authority of the U. S. Surveyor General for California." From said post in Mineral Monument, with a variation 15 deg 55 min E, the extreme end of the rocky bluff on which the Mineral Monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face 7½ feet high bears N 60 deg E .07 links. The northeast corner of an old adobe vaso chimney, a Mexican furnace for smelting silver and lead ores, bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The northwest corner of Rafael Diaz' house bears S 38 deg 23 min E 1.58 chains. An old well 30 feet deep on north side of cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE.

Commence at "Post 1 Armagh Mine," thence with a var 15 deg 55 min E N 79 deg E 1.51 chains to west boundary line of Ygnacio mine, and at a point 325 feet—4.92 chains from the southwest corner stake of the Ygnacio mine; thence with a var 15 deg 55 min E, N 11 deg W 12.59 chains to U. S. Mineral Monument.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 146, of locations. The adjoining claimants are, on the East, the Greenly mine.

Any and all persons claiming adversely any portion of said Armagh mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, in the State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

MONO LAKE.

Its Remarkable Waters and Products—"Grub" Enough for Everybody.

There are at present a large number of Piute squaws of all ages and conditions on the shores of Mono Lake engaged in gathering their Winter supply of food. The lake is filled from top to bottom and shore to shore with a curiously formed insect or grub. They are so numerous that the water is clouded with them. These worms, under a microscope, present a hideous appearance—having large, red mouths and eyes, and ten legs on each side. The body in the water has a whitish cast. These insects in the course of time develop and gradually come to the surface, when they drift to the shore, forming a continuous ring around the entire lake. They cling to each other in numbers, and can be picked up in bunches. The gathering of these worms is done by the squaws only, the bucks being contented to sit in groups in the immediate vicinity and while away the pleasant hours with poker. The squaws are provided with large pieces of willow work made in the shape of a handless spoon. Into this the "dead sea fruit" is brushed and deposited in heaps on the shore. From a distance the piles resemble coffee grounds, and, on close inspection, ordinary ants. They have a strong odor of fish when first taken from the water, which soon passes away and a less pleasing sensation follows.

After a drying process is gone through with, the exterior covering—heads, tails, legs and everything—is rubbed off, which exposes the genuine meat. This is carefully separated from the objectionable matter, and after a thorough drying, is packed away for use during the cold Winter months. This food is agreeable to the taste, being sweet and wholesome. When properly ground up with the aid of a little flour and moderately fried these worms may be heartily enjoyed by white people, provided they are taken in ignorance.

The water of Mono Lake is something quite wonderful. It has a strong taste of salt and soda. By analysis the mineral substance is divided as follows: salt, 45 per cent., soda, 40, and borax, 15. There is no visible outlet to the lake and it is fed by streams of fresh, mountain water. The islands are wonderful, and the whole surroundings are a study. As a cure for chronic catarrh the water has no superior, and for a shampoo it surpasses anything ever found in a barber shop. During the season myriads of ducks fatten in the water. The small islands are the breeding spots for millions of sea gulls, who remain there during the Summer and seek a more congenial spot when Winter approaches.—*Bodie Free Press.*

NEW YORK is to-day the greatest mining center in the United States. The largest mines in the country are organized under the laws of this State, and their principal offices are in this city. All the leading mining enterprises of the country are passing rapidly to the control of Eastern capitalists. During last year companies were organized here which now disburse monthly $1,000,000 in dividends. New organizations are now announced daily, and the stock of hundreds of mining companies is offered to our investors. The amount of money invested in mines is increasing daily. The circle of people interested in mines and mining stocks is rapidly enlarging, and before many months, it will include all classes who have or earn more than a bare sustenance. There are thousands of Eastern people interested in mining to-day where there were but hundreds a year ago, and the number will increase in greater proportion during the present year.—*New York Mining News.*

THE British *Medical Journal* says that garlic will cure more ills and ailments than any five drugs which can be named.

Old, But Good.

Milton's blindness was the result of overwork and dyspepsia.

One of the most eminent American divines having, for some time, been compelled to forego the pleasures of reading, has spent thousands of dollars in value, and lost years of time, in consequence of getting up several hours before day and studying by artificial light. His eyes never got well.

Multitudes of men and women have made their eyes weak for life by too free use of the eye-sight, reading small print and doing fine sewing.

In view of these things, it is well to observe the following rules:

Avoid all sudden changes between light and darkness.

Never begin to read or write or sew for several minutes after coming from darkness to a bright light.

Never read by twilight, or moonlight, or during a very cloudy day.

Never read or sew directly in front of the light, or window, or door.

It is best to have the light fall from above, obliquely over the left shoulder.

Never sleep so that on first waking, the eyes shall open on the light of a window.

Too much light creates a glare, and pains and confuses the sight. The moment you are sensible of an effort to distinguish, that moment cease, and take a walk or ride.

As the sky is blue and the earth green, it would seem that the ceiling should be a bluish tinge, and the carpet green, and the walls of some mellow tint.

The moment you are tempted to rub the eyes, that moment cease using them.

If the eyelids are glued together on waking up, do not forcibly open them, but apply the saliva with the fingers—it is the speediest dilutent in the world—then wash your face and eyes with warm water.

This has been going around for about ten years, and its ownership, we guess, is lost; but it is good enough to go on indefinitely.—*Scientific Press.*

A Serpent's Deadly Breath.

About three weeks ago a young man named Walton and a companion, while working in the harvest field, discovered a snake coiled up in a shock of wheat. Walton advanced near the shock and was preparing to aim a blow, when the reptile darted at him, springing near his face with a hissing sound. Walton fell fainting to the ground, and it was thought he had been bitten.

Young Walton was carried to his home, and remained weak and slightly unwell for a short time, but was soon sufficiently recovered to be able to resume his usual duties.

It was then thought it was only a bad case of fright, and that his encounter with the reptile had injured him to no great extent. However, after remaining in apparent health for several days, on last Tuesday he was suddenly taken sick. He began to suffer intensely, and at first the nature of his illness could not be ascertained. He grew worse hourly, until at last his life was despaired of. His flesh began to swell and turned spotted and of a peculiar color, and in the last day or two it has begun to scale and fall off. So far it has been impossible to relieve his intense sufferings. He seems to be experiencing the horrors of indescribable torture, which will certainly end in death. No improvement in his condition can be noticed, and with his flesh dropping off inch by inch, he is slowly wasting away and dying a slow death, accompanied by unimaginable suffering. Those who have seen him say that he presents a sight sickening to behold.

The general opinion is that when the reptile sprang at his face he inhaled its breath, and that the poison has now coursed through his entire system. This seems to be the correct solution of the case. Great sympathy is expressed for Walton, the unfortunate youth, and his agonized friends.—*Cincinnati Commercial.*

THE gentleman is sure to win in this life of ours. If you speak the right word at the right time; if you are careful to leave people with a good impression; if you do not trespass on the rights of others; if you always think of others as well as yourself; if you do not forget the courtesies which belong to your position, you are quite sure to accomplish much in life which others with equal abilities will fail to do. This is where the race is not to the swift or the battle to the strong. It is where you make people feel that you are unselfish and honorable, and truthful and sincere. This is what society is looking for in men, and it is astonishing how much men are able to win of self-respect, and success, and usefulness, who possess these qualities of good breeding.

ALL A MISTAKE.—It seems that Dalzelle was not murdered, after all the fuss made about his death, for Hurley, Hammond and Post, who were known to have killed him, have been tried for murder and acquitted! If three men shoot another to death, it is not murder, but a pleasant pastime in the mountain—unless it can be proved the three conspired to kill their man. Out of all the murders committed in this county in the last two years, not a murderer convicted! What laws; what a country, and what a peoples!—*Bodie Chronicle.*

GROUNDWORK for a French mot, as fixed up by the *Argonaut:* French husband discovers a liason between wife and family physican—"Ah! ha! I have at last confirm my suspect— But wait! I vill seek mon revenge!! I vill immolate ze rascal zat destroy my honair—Ah! I vill make him gif me receipt in full for my bill. Sacr-r-r! I vill haf my revenge!!!"

Inyo County.

This great interior section of California will one day soon play a much more important part in the mining world. Until Bodie forced its way to the front, Mono county was as much of a terra incog. as Inyo. We see by THE INDEPENDENT there is an increasing interest in the many districts on the part of outsiders. We fully believe from personal observation and reliable report, that Cerro Gordo, now so neglected, will, next to Bodie, play a new part in the bullion output east of the Sierras in California.—*Bodie Free Press.*

"THERE, that explains where my clothes-line went to," exclaimed an Iowa woman, as she found her husband hanging in the stable.

SATURDAY, AUGUST 14.....1880

CONGRESSIONAL NOMINATIONS.

By the Bodie *Free Press*, received this morning, we learn that during the Republican State Convention proceedings, which began in Sacramento Wednesday last, the several Congressional District Conventions were held, and made nominations as follows:

First District—Horace Davis (present incumbent); Second — Horace Page (present incumbent); Third —George Knight, of Humboldt, and for our district, R. Pacheco, the present incumbent.

Two weeks since the Greenback-Labor party placed Col. Godfrey, of Los Angeles, in nomination for Congressman in this district. Last week the Democratic Convention at Los Angeles nominated Wallace Leach, of San Diego, their candidate last year, for the same position. So, as last year, the voters of this Fourth District again have three candidates to choose from, a fact that enhances Pacheco's chances, which otherwise would be slim.

Congressman Berry has been renominated by the Democrats of the Third District, that party having yet to name their men in the First and Second.

Jos. Wasson, of Mono, with others, was put in nomination against Pacheco, receiving five votes. He was worthy of the majority vote in that Convention, and at least his full party vote for the office, were he the candidate.

AN action has been brought in the Circuit Court against John Broder and Isaac Harris, the sureties on the bond of Thomas May, Receiver of Public Moneys at Independence, Cal., in 1874, to recover $1,076 03, an alleged deficit in the accounts. A similar action was brought to recover $988 77 from the sureties of George M. Gerrish, once Disbursing Agent at Visalia.—*S. F. Chronicle, Aug. 1.*

We are incidentally given to understand that Mr. May can vindicate himself in this matter without trouble, but, beyond that, we can throw no light on the subject now.

AL. LIVINGSTONE of Genoa, while on his way to Carson Monday morning, stopped at a saloon at the head of Jack's Valley, kept by a German familiarly known as "Old Hannes," and discovered the proprietor lying on the floor dead. He was murdered by unknown parties for $100.

IN Salt Lake City, August 6th, a man was hauling a load of hay, and some scoundrelly boys crept under the wagon, set fire to the hay, and escaped before the fire was discovered. It made warm times for the man on the wagon.

THE Los Angeles *Journal* says that three men rented a bee ranch near Pasadena, spending $400 on outfit, and have made thirty tons of honey, worth at present $3,500.

THOMAS FRENCH was recently lost at Elk Mountain, W. T. His partner, Shafer, was killed by a mountain lion. French was without food for eight days.

THE Industrial Aid Association of Kern is taking steps to introduce the prairie chicken of the Western States into that region.

THE year 1881 will be a mathematical curiosity. From left to right and right to left it reads the same; 18 divided by 2 gives 8 as a quotient; if 1881 is divided by 209, 9 is the quotient; if divided by 9, the product is two nines; 1 and 8 are 9, and 8 and 1 are 9. If the 18 be placed under the 81, the amount is 99. If the figures 1, 8, 8, and 1 be added, it will give 18. Reading from left to right is 18, and reading from right to left is 18, and 18 is two-ninths of 81. By adding, dividing and multiplying, 19 nines are produced, being one nine for each year required to produce the century.

TONAL: "I am ferry astonisht, Alister Dhu, that you'll call your tog after a heathen god, and you wass pelong to ta Free Kirk, too." Alister: "Take you care, Tonal Roy, what you'll spoke, for it wass not ta true spoke you wass said shust thiss moment." Tonal: "Chwhy? Ton't you call him Chupiter, and Chupiter is a heathen god, and nothink else, mirover." Alister: "Maype he iss, too, but it wass nothink of ta sort whatiffer, for ta tog wass called so because he wass stupiter as no other tog wass neffer wass again or since pefore, and not efter any heathen idol of woot or stone, forbye. So there's for you, Tonal Roy."

MR. LUCKHARDT, the famous engineer and mineralogist, has just returned from a visit to Resting Springs district. The mercury during his trip played such frolicsome little pranks as rising to 116° in the shade. During his three months' residence at Resting Springs, Mr. Luckhardt did much valuable work for our Los Angeles company. He speaks very well of the outlook of this property and of the district at large.—*Los Angeles Herald.*

VALUABLE coal beds have been found at a point near the Arizona and New Mexico line, and near the line of the Southern Pacific Railroad.

THE STATE APPORTIONMENT.

It will be the duty of the incoming Legislature to re-apportion members of the Legislature according to population as shown by the census just taken. The State, according to Constitutional provision, must be divided into forty Senatorial and eighty Assembly districts, as nearly equal in population as the rule for fixing boundaries will allow. As fixed by law, the allotment is to begin at the northern end of the State, and on the basis of the Government census of 1880 and every ten years thereafter, be districted as above stated. "In the formation of such districts, no county, or city and county, shall be divided, unless it contains sufficient population within itself to form two or more such districts; nor shall a part of any county, or of any city and county, be united with any other county, or city and county, in forming any district."

The San Francisco *Chronicle's* census table shows a total population for the State of 794,000, excluding 70,000 Chinese, who cut no figure in the apportionment. This would give each Assembly district, averaged through, 9,925, and 19,850 to each Senatorial district.

On this basis, then, Inyo and Mono will have to dissolve their existing partnership in the Assemblyman after the election this Fall. Mono has a population sufficient to give her a Representative to herself, but our county has not, nor has San Bernardino, so it is likely the two will be coupled together with one Representative between them.

Inyo, Tulare and Kern will probably constitute our Senatorial district, and, together, elect one Senator.

Practically, San Bernardino is further away from us than Sacramento. Nor is it even remotely probable that their respective lines of travel, trade or postal connections will ever run any nearer together than they do now—and, for contiguous counties, no two could be put any further apart. For these reasons, the proposed union can never be a happy one, and it is to be hoped no necessities will compel such a mutually disagreeable thing. We can respect San Bernardino—barring the long name—as a friend, or a brother, even, but as for any closer relation, we beg to be excused; we are not on it—unless circumstances prove stronger than we are—which will probably be the result. This is one of the important things our next Representative will have to look after.

THE BENDERS.

Barring politics and Dr. Tanner, the champion starvalogist, the most interesting general topic just now is about that band of murdering beasts, the Benders, two of whom have at last been arrested after seven years of fruitless pursuit, which has extended into about every State and Territory in the Union. It is the old man and his wife that have been caught, Kate and John being yet at large, but certain to be captured very soon. The old couple were arrested near Omaha, and the others were known to be but a short distance away at the time. Both, after denying their identity for some time, finally admitted they were the genuine Kansas Benders, and told of their numerous murders without apparent reserve. In telling this the old woman seemed to think she was exculpating herself, while the old man told his story under the impression that he alone had been captured, and with perfect indifference as to his own fate, else in the belief of a crazed mind that he had done nothing of any great consequence anyway. Putting all the known atrocities of these people together, the believers in the transmigration of souls can adduce substantial proof in support of their theory, and show that the repulsive forms of these Benders were assigned the souls, spirit and perceptions of the corpse-devouring hyena. Following is a portion of old Bender's statement as given to a reporter and which corroborates that of his wife in every detail:

My name is Alex. McGregor. I was born in the State of New York, and lived there till I married my first wife. When I married her she had one child called William Houck, begotten in adultery. After being married two weeks John Bender, my son, was born. We then moved to Illinois, where Kate was born. Kate and John were good children, but ran away when about 17 years old and went to Kansas. My first wife died in Illinois of consumption. After two years I married my second wife. Her children all died. I had no children by my second wife. While living in Illinois I committed my first murder. I killed a short, dark haired man and sent him down the cellar through a trap-door. I got some money from him. I buried him back of the house about two rods. The old woman helped to bury him. I then went to Independence, Iowa, and worked on a farm at my trade, blacksmithing. After a while I went to Kansas. I had heard from Kate and John, who wrote me to come on. I went to Kansas to live with them. Maggie and her cousin were at a place called Bender's Hotel. After being there a few days I helped John make a trap-door, the same as I had in Illinois. The first man we killed would not go on the trap-door. He and Kate slept together, and she killed him with a butcher knife. She showed me the knife. We buried him near the house. The only man I ever killed alone was a pedler. I hit him on the back of the head with a stone hammer. I hit him but once. I got a good deal of money from him, but do not know how much. Remember others that we killed. One man John killed and put under the ice. Two little girls, seven or eight years of age, we buried alive. Their parents we killed the day before. I used to stand behind a curtain and push a trap-door. Kate and Maggie were always down in the cellar to cut the victim's throat. I often heard them whetting their knives. John and Kate used to sleep together. Leander Smith was Kate's lover, and Justice Gremshaw was Maggie's man. After leaving Kansas we went with the Indians. We thought this Spring we must go to Illinois to die. I started with Kate, John, Maggie and four children. The old women and I left them at Schuyler. They had a team of old horses, one a bay and one a gray, and an old wagon.

LATER—We are now told that these Benders are frauds, impostors, but we don't propose to deprive our readers of such a sensational "confession" as the above on that account.

OUR ROUND VALLEY LETTER.

MESSRS. EDITORS: We are a fortunate people in having a fine farming country—facts bear us out in this assertion. Another prosperous year; will be blessed with abundance again. This season's makes fifteen crops successively; not a single failure since the inception of farming in Owens Valley; no grasshoppers, no drouth, no weevil, no rust, and but little smut to ravage our grain fields—who wouldn't crow a little for such favors?

The latest issue of THE INDEPENDENT gives us to understand that a Round Valley mining district has been formed, which, of course, implies that besides agricultural, we also have mineral resources in this vicinity. The outlook up this way is promising; still, we will not just yet agitate the removal of the county seat—no, not till after Garcock's election.

PROGRESSION.

During Taboose Days we used to have to pay 25 cents a letter, besides postage, for sending or receiving an epistle to or from Aurora. The Postoffice was then at Owensville. A pony carried the mail. Now, Round Valley boasts of a daily mail (Sundays excepted). The boys and girls are thereby greatly enthused; their little hearts go flippity-flap when trotting daily, with great expectations, for sweet epistles of love.

SOME PERFUME.

Skunks have been a great nuisance this year—murdering chickens by the wholesale. One farmer's wife complains of having lost 150 chickens since last Spring. However, your scribbler feels jubilant to chronicle quite a slaughtering of the innocents (skunks) lately; to wit: as Captain Parsons, more familiarly known as "Sailor Jack," was homeward bound the other day he suddenly encountered seventeen skunks, big and little, frolicking together. Without any preliminaries, the Captain grabbed a three-year old club and succeeded in demolishing eleven! Had not the party of the second part discharged a full broadside of its peculiar chain shot full into the Captain's eyes, thereby, for the time being, causing a total eclipse of the sun, he would have murdered the remaining six. It being Sunday, quite a crowd of us were lounging and talking religion when very suddenly it struck us that a volcanic eruption of nastiness had broken out in the vicinity. Just then we observed the perfumed Captain marching up, and when within about a hundred yards he grinningly yelled:

"Boys, do you smell something?"

We did.

It would have been more appropriate had he inquired:

"Is there anything in Christendom that will *ever* cleanse me?"

His clothes were immediately interred, and it was seriously suggested that the brave Captain himself be buried alive, to be resurrected sometime during the next century. Not only exteriorly but interiorly was the Captain somewhat affected. He avers that an old masculine skunk took deliberate aim at him and shot him right square in the mouth. Captain Parsons, like all veteran shellbacks, has sailed in all climes, and has, during his checkered and eventful life, sampled a great variety of juices, but he swears that the pure concentrated, direct-from-the-still skunk distillation just beats Tophet.

COOKING MADE EASY.

Prof. Goodridge (why not have a few titled gentlemen right here as well elsewhere?) makes a liberal offer—24 lessons in cooking for one dollar. It mortifies the Prof. to see so much good material for grub spoiled by miserable cooks, hence his liberal proposition to females only. He has had many years experience in cooking, which, of course, qualifies him as a competent teacher in the art. We always have been proud of our women cooks up this way—thought, and still think, they are number ones; still, we should bear in mind the old adage: "Never too old to learn."

Some time ago an elderly lady, known down your way as "Uncle Bill," was perambulating through here on horseback, with a bundle of blankets fastened on behind her saddle. The mighty orb of day was fast sinking behind Mt. Lyell when a certain person accosted her ladyship thusly: "Madam, it is getting late; you had better come in and stay with us over night." "Have you a family?" was her query. "Yes." "Oh, well, I generally stay with the bachelors; they are very accommodating." Like a beautiful dream, she has since mizzled from view; still, it is presumed her brief sojourn and lectures "where they would do most good" has awakened this new interest in the true science of cookery. HANFIELD.

JOHN WOODS of Poway, San Diego county, while driving along the road recently, was attacked by a swarm of bees. They settled in clouds both upon Woods and the horse, and commenced action at once, inflicting numerous stings.

BORN.

At Pleasant Valley, Inyo County, Cal., July 29, 1880, to the wife of James Black, a daughter.

At Independence, Inyo County, Cal., August 11, 1880, to the wife of Omie I. Mairs, a son.

MARRIED.

At Bishop Creek, Inyo County, Cal., August 8, 1880, by Rev. F. M. Willis, W. H. NICHOLS to MRS. MARY A. PARKER.

DIED.

At Big Pine, Inyo County, Cal., August 9, 1880, HANNAH, wife of Thomas G. Beasley, a native of Ohio, aged 52 years and 9 months.

Visalia papers please copy.

PROPOSALS

....FOR ...

Publishing and Printing.

NOTICE IS HEREBY GIVEN THAT sealed proposals will be received by the Board of Supervisors of the County of Inyo, State of California, at the office of the County Clerk, up to the hour of 12 o'clock M. on MONDAY, the FOURTH day of OCTOBER, A. D. 1880, to contract for county printing, as follows:

1. Advertising, such as is required by law and shall be ordered by said Board, including Notices for Proposals to Contract, Reports of Auditor and Treasurer, Proceedings of the Board of Supervisors, and the annual List of Delinquent Taxes. Said proposals shall submit to the Board the rate which will be charged per square of two hundred and fifty ems space for the first and each subsequent weekly publication.

2. The printing of two hundred and fifty copies of the Great Register of Inyo County, in the usual form, bound in paper. Bids must specify the price of such printing per name of each elector. Printed matter to be delivered at the Court House of said county.

Said contracts to continue for the term of one year from and after ratification.

Payment for such advertising and printing shall be made on bills duly sworn to and presented at the regular meetings of the Board, by warrants drawn upon the General Expense Fund.

The right to reject any and all bids is reserved.

Said proposals must be indorsed "Proposals for Advertising," and "Proposals for County Printing," and addressed to the Clerk of the Board of Supervisors, Inyo County. The same will be opened between the hours of 1 and 4 o'clock P. M., on said Fourth day of October, 1880.

By order of the Board of Supervisors.

JOHN CROUGH, Clerk.

M., before Hon. John A. Hannah, Superior Judge of Inyo County, at his office at Independence, Wm R Tibbetts, for the W½ of SE¼, N½ of SW¼ and SE¼ of NW¼, Section 14, Township 11 South, Range 34 East, M. D. M., and names the following as his witnesses, viz.: V. G. Thompson and T. F. A. Connell, of Independence, and Thos. W. Hill and Ezra M. Goodale, of Independence, Cal.

JAMES E. GOODALL,

n530t5 Register.

INYO COUNTY TRESPASS LAW

ADOPTED BY THE BOARD OF Supervisors August 7, 1880.

It is hereby ordered by the Board of Supervisors of the County of Inyo, State of California, that the following law be and the same is hereby declared to be the Trespass Law of Inyo County:

SECTION 1. Any owner, or any occupant of any land or possessory claim, finding any horse, mare, colt, mule, jack, jenny, horned cattle, hogs, sheep or goats, or any number of such animals, upon such land or possessory claim, whether such land or claim be inclosed or not, may take up and safely keep such animal or animals at the expense of the owner or owners, and shall be allowed for keeping said animal or animals the following named sums: For each horse, mare, colt, mule, jack or jenny, the sum of twenty cents per day; for each head of horned cattle, the sum of twenty cents per day; and for each head of swine, sheep or goats, the sum of five cents per day.

SEC. 2. Any person taking up animals under the provisions of this Act shall, immediately upon the taking up of such animals, notify the owner or owners of such animals, or his, her, or their agent or agents, if known to him, and living within six miles of the place where such animals were taken up, of the time and place of such taking up, together with the number, character and description thereof; also, as nearly as he can, the marks and brands, if any, of each animal; and such owner or owners, his, her, or their agent or agents, may, at any time after the receipt of such notice, and upon proof of ownership, tender the amount of damages claimed, and demand the delivery into his, her, or their possession, of such animals; and if suit shall have been commenced, such tender may be to the Justice or Judge before whom such suit is brought, or the owner or owners may give bonds with sureties, to be approved by the Justice or Judge trying the case, for the payment of all damages and costs of suit, and he may demand the release and delivery into his or their possession, of all animals held under the action, and the Judge or Justice shall order the immediate delivery of such animals; but if no owner, owners or agents of owners appear within two days to claim said animals, or if he or they appear and fail to pay satisfactory damages, or if the owner is unknown to him or her, or lives more than six miles from the place of taking up, then if the compensation and damages claimed be less than three hundred dollars ($300), the taker up of such animals shall, within two days, file a written complaint, verified by his or her oath, with the nearest acting Justice of the Peace in the township where such animals were taken up; or if the amount of compensation and damages claimed be more than three hundred dollars, then in the Superior Court of said county, setting forth in said complaint the facts, nature, location, and amount of the damages claimed, and a description of all animals so taken up, the number, the marks and brands, if any, and the supposed value of each animal, or the supposed aggregate value of such animals, and the time and place of taking up. The action shall be in favor of the owner or owners, or occupants of said lands or possessory claims, and against the property in rem; and any action thus commenced, may include all the animals thus found trespassing at any one time, whether of one or more marks or brands; and no judgment shall be entered under the provisions of this Act for damages done, except upon the testimony of at least two credible witnesses, whose names shall be entered in the Justice's docket, or in the minutes of the Court in which the action is had.

NEW ADVERTISEMENTS.

SEC. 3. Upon the filing of the complaint, a summons shall be issued, and if said action be in a Justice's Court, shall be made returnable not less than fifteen nor more than twenty days from the date of issuance, and directed to all owners and claimants of the property described, and shall contain a description of each animal, with its marks and brands, if any. The summons shall be served by posting a copy of the same at the door of the room where said Justice or Superior Court is held, for ten days before the return day thereof, and also at the same time by filing a copy of such summons with the Recorder of said county; but the Recorder shall not file the copy of summons until the payment of a fee of one dollar; and it shall be the duty of said Recorder, on payment of his fee of one dollar, to forthwith compare the marks and brands, if any, described in said summons, with the record of marks and brands in his office, and thereupon to notify the owner or owners of such marks and brands of the fact of the pendency of such action, and of the time and Court when and where the same is set for hearing. The certificate of the officer stating the facts of such posting and filing, or the affidavit of any person, competent to be a witness, who shall have so posted and filed, shall be conclusive evidence of a sufficient service thereof; *provided*, that in any case when any animal or animals, seized under this Act, are alleged in said complaint to be worth fifty dollars or more, it shall be the duty of the County Recorder to cause publication to be made of the fact and time of seizure, and marks and brands, with a description of the animal or animals, in a newspaper of the county, at least ten days before the sale, the newspaper in which all such notices are to be made to be designated, and the rates of publication to be fixed, by the Board of Supervisors of the county.

SEC. 4. If the judgment be in favor of the plaintiff, the property may be levied upon and sold as other personal property seized on execution. The officer selling shall give a bill of sale to the purchaser, describing the animal or animals sold, and to whom, and the price paid for each, and referring to the judgment under which such sale was made. Any overplus of the proceeds of such sale, after satisfying the judgment and costs, shall be paid by the Justice or Clerk to the owner of the property, upon demand, if demanded within six months from the date of sale; and if not so demanded, the same shall, at the expiration of said time, be paid into the County Treasury, for the benefit of the County School Fund; and the owner may also redeem any animal or animals sold under the provisions of this Act at any time within sixty days after the sale, by producing satisfactory proof of ownership, and paying the purchaser the amount of purchase money in gold coin, with interest at the rate of two per cent per month; but if no redemption be made within sixty days such bill of sale shall be conclusive evidence of title in favor of the purchaser of the animal or animals therein described.

SEC. 5. The fees of all officers for service required under this Act shall be the same as now allowed by law for similar services in other civil actions, and shall be taxed as costs in the judgment.

SEC. 6. The Justice and Clerk shall keep a book, which shall be open to public inspection, and shall record therein all sales made pursuant to any judgment rendered in their respective Courts under the provisions of this Act, which record shall contain a description of the animals sold, the prices paid, the name of the purchaser, the amount of fees and charges, and the amount of surplus money, if any, arising from each sale, and whether any animal or animals have been redeemed; and if such surplus money shall be received by the owner of any animal, he shall receipt for it in the margin opposite such record, and the Justice or Clerk shall, without fee, deliver such book to his successor in office, and also all surplus money in his hands arising from any sale made by authority of this Act, taking his receipt therefor.

SEC. 7. Any person who shall drive stock from any lands or possessory claim other than his own, to any other lands or possessory claim, or shall take up any such animal or animals on any land or possessory claim other than his own, for the purpose of taking advantage of any of the provisions of this Act, shall be deemed guilty of a felony; and any person who shall fail or neglect to give the notice required by the second section of this Act, or shall rescue or take from the possession of the taker-up any animal or animals, without first having paid the compensation, fees, and damage claimed or awarded, and any officer violating any of the provisions of this act, shall be deemed guilty of a misdemeanor.

SEC. 8. The owner or occupant of any land or possessory claim, whether inclosed or not, independent of the foregoing provisions of this Act, and if he fail to avail himself therefrom, may maintain an action; *provided*, such action be commenced within sixty (60) days in any Court of competent jurisdiction, against the owner of, or person having the control of, any of the animals named in section one, for any damages such animals may commit upon his said land or claim; and if judgment be rendered in his favor, it shall be entered for the amount of the actual damage proved.

SEC. 9. Nothing in this Act shall be so construed as to prevent the free use for grazing purposes of all unoccupied lands not taxed; *provided*, that each actual settler, who shall have a prima facie title to the land upon which he is settled, shall be protected in the possession of one hundred and sixty acres, and residence on the land shall be considered a prima facie title; *and, provided further*, that said one hundred and sixty acres shall be marked and defined by visible and well defined monuments.

Approved and adopted this Seventh day of August, A. D. 1880, and ordered that the same be published in THE INYO INDEPENDENT for four successive weeks.

J. R. W. STERVILLE,

Chairman of the Board of Supervisors.

Attest: JOHN CROUGH, Clerk.

SATURDAY, AUGUST 14.....1880

BOARD OF SUPERVISORS.

A Long Session—Proceedings and Bills Allowed.

AUGUST 2.

Met as a Board of Equalization. Present, Charles Meysan, Chairman pro tem, and D. Olds.

The Assessor having received some statements since the delivery of the assessment roll to the Clerk, ordered that the Assessor enter the same.

Ygnacio mine assessment reduced from $8,000 to $1,600 ! !

The proposition to raise Peter Perrier's assessment from $300 to $1,000 was negatived.

In the application of O. I. Mairs for a reduction, ordered that of the 20 tons of grains assessed to Mairs 23,000 lbs be assessed to the applicant and 1,600 lbs to Jones & Spaulding, the whole at 2¼c per lb.

AUGUST 3.

As Board of Supervisors.

The military roll for 1880 was examined, corrected and approved.

The order of July 8, instructing the County Treasurer to pay $412 50 out of unapportioned money for insurance on the Court House, was rescinded, and the Treasurer authorized to transfer $537 00 of moneys in the Sinking Fund to the General Expense Fund; that the Auditor draw a warrant for the amount on said fund, thus insuring the county building for $15,000 from July 27, 1880, to July 27, 1881.

On petition of tax-payers of Road District No. 1, bonds were approved and petition granted. J. L. Bourland and James Shaw were appointed Viewers, to act with the County Surveyor.

AUGUST 4.

Reports of County Treasurer and Auditor examined, approved and ordered published.

Supervisor Meysan moved that the bill of $90 by J. W. Smith for services as Jailer be allowed at $54, or at the rate of $3 per day only for time when the jail is occupied; carried.

Bill of J. G. Dodge for conveying John Silva to the hospital, laid over.

AUGUST 5.

Full Board present.

Action in case of bill of J. W. Smith as Jailer rescinded and full amount allowed, Meysan voting no.

Salary bills of Clerk and Treasurer allowed in full, Meysan voting no.

Bill of John Knupple, of $600 for repairing private bridge rejected.

Bill of Dr. Gelcich for holding medical examination on body of Michael Andres, rejected for informality.

Report of John Bodle, Road Overseer of District No. 2, approved; bill of $31 16 allowed at $28 66 on fund of said road district.

AUGUST 6.

Moved by Supervisor Meysan that the Board proceed to fix the compensation of officers. Lost, for want of a second.

Meysan objected to payment of the Assessor's salary, and asked that his protest be entered on the minutes, to which Mr. Olds protested. A vote being taken, the objection was entered.

Resignation of D. Campbell as Justice of the Peace 2d Township, received and accepted.

Report of J. W. Symmes, County Superintendent, for the year ending June 30, 1880, received and accepted.

Ordered that a new election precinct be established, the same to comprise all that territory of Supervisor District No. 1 lying east of the summit of the White Mountains. [Deep Springs.]

Also, that a new election precinct be established, to comprise all the territory comprised in Judicial Township No. 8. [Resting Springs.]

Also, that the northern boundary line of Election Precincts No. 5 and No. 9 shall be the northern boundary line of Judicial Township No. 2, and the southern boundary line shall be the line between U. S. Townships 9 and 10.

Ordered that the northern boundary of Election Precinct No. 1 shall be on the line between U. S. Townships No. 9 and 10, and the southern boundary shall be the line between U. S. Townships 11 and 12.

Ordered that the seal purchased and used by the Clerk as the seal of this Board be adopted and the design approved.

AUGUST 7.

Ordered that the trespass law as published elsewhere be the same for Inyo County. [It is almost verbatim the old cumbersome and impracticable State law of 1874.—EDS.]

Olds moved that County Government Resolutions Nos. 1, 2, 3, 4, 5, 6 and 7 be repealed. Carried—Olds and Westerville voting aye, Meysan no.

MONDAY, Aug. 9.

Ordered that the Clerk publish a notice inviting sealed proposals for county printing and advertising.

On petition, Wm. Boyd was appointed Road Overseer of the Third District.

AUGUST 10.

The following was offered by Westerville and seconded by Meysan:

WHEREAS—On the 7th day of August, 1880, the Board of Supervisors of Inyo County repealed certain County Government Resolutions, to-wit: Nos. 1, 2, 3, 4, 5, 6 and 7, and whereas this Board has since the aforesaid repeal reconsidered the whole matter and resolved that the interests of the county as well as its inhabitants cannot be made better by amending any of the aforesaid numbered Resolutions,

It is ordered that said repeal is hereby rescinded, and the said County Government Numbered Resolutions, 1, 2, 3, 4, 5, 6 and 7 are and shall be hereafter in full force and effect for the purpose specified in the original resolutions.

Unanimously approved.

Ordered that a "Contingent Fund" be established, out of which the expenses of the insurance of the Court House, blanks, books and postage stamps for county officers shall be paid.

Ordered that a special meeting be held October 4th, 1880, for the purpose of receiving bids and contracts for county publication and printing, and also to consider the report of the appointed Viewers of Road District No. 2.

Adjourned.

BILLS ALLOWED DURING THE SESSION.

On the Expense Fund—Chalfant & Parker, advertising, $40 50; D. Campbell, Justice of the Peace, $3; Harris & Rhine, merchandise, $7 25; O. I. Mairs, conveying sick, $3; Dr. P. G. Gelcich, $5; Bancroft & Co., bianks, $3 90; same, for assessment roll, $34 87; Thos. May, for Deputy Assessors, $457 50.

On the General Expense Fund—John Crough, Clerk's fees, $14 50; L. Wood, merchandise, $1 25; J. W. Smith, Jailer, $54 00; V. G. Thompson, boarding prisoners, $16 20; Thomas May, military list etc., $59 60; J. W. Smith, Sheriff's fees, $156 80; C. H. Lander, Justice of the Peace, $31 25; C. Meysan, $36 40; D. Olds, $54; Chalfant & Parker, printing, $13; John Crough, for freight, $1 56; Rothschild & Co., merchandise, $4 50; Harris & Rhine, merchandise, $1 75; O. I. Mairs, conveying sick, $16; G. H. Hardy, Treasurer, $125; H. M. Isaacs, Deputy Clerk, $17 75; Dr. P. G. Gelcich, $5. J. R. Westerville, $53; D. Olds, $59; C. Meysan, $41 40.

On Road Fund of District No. 1—A. S. Mizener, $154 85; A. K. Briggs, bill of $78 30 allowed for $6 30.

On the Hospital Fund—Mrs. M. Lewis, care of indigent sick, $166 93.

On Salary Fund—Thomas May, Assessor, $600; J. W. Symmes, School Superintendent, $33 33.

Bishop Creek Gossip.

MESSRS. EDITORS: W. B. Hutchings has returned from Casa Diablo Springs, where he has been rusticating for some time past.

The Garfield and Arthur Club of this burg now has over eighty members, and a good prospect for more. Among the new members is John Burns, a renowned Democrat.

Geo. Blazer, accompanied by Mr. and Mrs. Chas. Hollenbeck, has gone to 'Dobe Meadows, and they do say, there's a young lady up there who believes "Blazer" is a good enough family name for her.

Folks here call people from the Los Angeles section, "Bee-herders." I'll wager Frank Hutchison can herd more bees, and get stung oftener, than any bee-herder that ever was in that region.

W. H. Nichols and Mrs. Mary Parker were married Sunday evening by Rev. F. M. Willis.

Chas. O'Connor, the would-be foot-racer, is trying to get up an eight-day go-as-you-please race for a four-day clock. Or he will fight any one, one-half a day, provided there can be a 20-foot-high iron fence between.

Please publish, that the world may know this, and oblige, REGULUS, JR.

SEVERE ACCIDENT.—Uncle Abe Parker, our pioneer blacksmith, and whom everybody knows, is now for the first time during his sixty-odd years' pilgrimage confined to his bed by either disease or accident. Wednesday last he was lending a hand to ease down an 800-pound bale of sacks from a C. G. F. Company's wagon unloading in front of Wood's store; by some means, the bale, after being slid half-way to the ground, came down by the run, its solid corner striking Uncle Abe's left leg below the knee, crushing it back against a small box in such a manner as to break both bones square off about eight inches above the ankle. He was soon placed on an extemporized stretcher, and carried, notwithstanding his 260 pounds dead weight, to his residence near by, where, under Dr. George's care, he is getting along remarkably well.

OASIS LODGE No. 352, I. O. G. T.—The roll of officers of the above named old stand-by Lodge of Bishop Creek Good Templars is as follows: Frank R. Parker, W. C. T.; Eliza McCroskey, W. R. S.; Viola Howell, W. L. S.; Julia Rogers, W. V. T.; P. W. Forbes, W. S.; H. Stenhouse, W. A. S.; B. McCluskey, W. F. S.; J. R. Riley, W. T.; H. G. Plumley, W. M.; Eddie Clark, W. D. M.; J. C. Mills, W. I. G.; H. L. White, W. O. G.; R. Berkley, W. C.; Wm. Hull, P. W. C. T., and J. C. Mills, L. D.

SICKNESS.—The whooping cough, bloody flux, and similar disorders are somewhat prevalent in this place at this time, giving Dr. George a good deal more work than common. So far his practice proves him to be a most competent physician. As two members of THE INDEPENDENT family have been suffering from one of these diseases, thereby detracting from our already limited force, we are compelled to run a "short" paper this week as well as last.

IN HOSPITAL.—A family of emigrants from Tulare County, consisting of the father, mother and three children passed here a few days since, all so sick with malarial fever as to make it a necessity for them to stop for medical aid. A permit was granted them by Supervisor Meysan, and all are now under Dr. George's and Mrs. Lewis' efficient care at the County Hospital.

APOLOGETICAL.—Our Lokleitems is compelled to give his department the clean go-by this week, and his excuses, were they known, would be accepted by our readers. However, the items for the week will keep until next, and our subscribers may look for less shortcomings hereafter.

TO ORGANIZE.—The Republicans of this place and vicinity have resolved upon organizing a Garfield and Arthur Club, for further particulars of which, see advertised call for a meeting next Wednesday night.

PREACHING.—Rev. F. M. Willis will preach as usual in this place to-morrow evening, at the Post on Tuesday evening and at 11 A. M. at Bishop Creek, August 21, one week from to-morrow.

DR. TANNER successfully completed his big starving contract, and now proposes to lecture—which makes people regret such a big success.

"SENATOR" Bill Sharon, of Nev—of San Francisco, does have "cheek" sure enough. He wants to be Senator for Nevada again!

OUR SAN FRANCISCO LETTER.

SAN FRANCISCO, Aug. 8, 1830.

MESSRS. EDITORS: Our town was somewhat shocked last week by the sad report that John Cahill had shot at Mrs. N. Scheline and then took a shot at himself. The report was true. And when I looked at the cold remains of poor unfortunate John Cahill, I was struck dumb with wonder. A great many of your readers will remember him as one of the twins who resided in Virginia City from '62 to '67 or '68; and no two better, nobler hearted boys ever lived. From what we can learn of the affair, John had been sick some time, and in a moment of delirium he went to the house of Mrs. Scheline, who had been an old acquaintance of his, and took a shot at her with the intention of putting an end to her existence. The bullet struck one of the steel ribs in her corset, and glanced around without doing her any harm except a little fright. He then placed the pistol to his own forehead and sent a ball through his brain, from which he died in a few hours after.

All the papers are pitching into Mrs. Scheline, and almost commanding her to come to their offices and give them a few dollars, or they would make it mighty hot for her. And the probable result is that they will succeed in separating that couple; but they won't get a cent for their trouble.

John Cahill is dead—killed by his own hand, in a moment of delirium brought on by a fit of sickness; and why bring that young woman to answer for something she was not in the least responsible for, first nor last? Shame on such journalism!

The Oakland tragedy has about died out as a sensation. There is a great diversity of opinion here on that affair. Some blame Schroeder, others his wife, and still others who think Lefevre got only what he had earned and deserved. The truth, if fully known, will show that all were to blame except the poor, unfortunate children, upon whom the real punishment falls.

Mining stocks have been a little more active this week, but no one has made a fortune out of the move.

The regatta passed off very quietly; as I fully anticipated, it passed off without causing any stir in town. The theater business is run entirely in the ground; I don't think there is a place in town that is paying any more than expenses, and some are not doing that. There are plenty of good places to go to, but people won't patronize them. There are no pedestrians now in town, except one from Lookout. He arrived here some day last week; he is a small, wiry looking individual, and looks as though he could get away with that New York colored gemman or any one else. He says that Ned or Pat Reddy, Jack Wilson, Jack Gunn, Little Fitz, or any man around Darwin will back him for any amount that us San Franciscans will put up. His name, it is Peter Nivers, and he is familiar with the emquad. We do not think it will be safe to bet against him.

The Mechanics' Fair opens in a few days, and is intended to out do any preceding one ever seen here. Alameda is the popular resort for bathers, and every Saturday and Sunday afternoon some beautiful sights are displayed by the men, women and children who frequent those places. It is as good as a theater, for there is a great deal more of "shape" to be seen, and that is why a great many visit the theaters. The Sand-Lotters go out there every Sunday afternoon, and make themselves as odious as so many polecats. The scenes enacted there are a disgrace to any community. W. G. L.

LEGAL.

PROBATE NOTICE.

IN THE SUPERIOR COURT OF THE County of Inyo, State of California. In the matter of the Estate of Nancy Williams, deceased. Order to show cause why order of sale of real estate should not be made. It appearing to said Court, by the petition this day presented and filed by John A. Lank, the Administrator of the estate of Nancy Williams, deceased, praying for an order of sale of real estate, that it is necessary to sell the whole of the real estate to preserve the same from destruction.

It is therefore ordered by the said Court that all persons interested in the estate of said deceased appear before the Superior Court on MONDAY, the SIXTH day of SEPTEMBER, A. D. 1880, at 10 o'clock in the forenoon of said day, at the Court Room of said Court, at the Court House, in the County of Inyo, to show cause why an order should not be granted to the said Administrator to sell the real estate of said deceased as shall be necessary.

And that a copy of this order be published at least four successive weeks in THE INYO INDEPENDENT, a newspaper printed and published in said county.

JOHN A. HANNAH, Judge.

Dated July 17, 1880.

OFFICE OF THE COUNTY CLERK } of the County of Inyo. }

I, John Crough, County Clerk of the County of Inyo, State of California, and ex-Officio Clerk of the Superior Court in and for said County, do hereby certify the foregoing to be a true, full and correct copy of an order duly made and entered upon the minutes of said Superior Court.

WITNESS, my hand and the Seal of said Superior Court, this Seventeenth day of July, A. D. 1880. [SEAL.]

JOHN CROUGH, Clerk,
By DANIEL CROUGH, Deputy Clerk.

THE ENGINEERING and MINING JOURNAL.

PUBLISHED WEEKLY.

DEVOTED TO

Mining, Metallurgy, Engineering and Science.

RICHARD P. ROTHWELL, C.E., M.E., ROSSITER W. RAYMOND, Ph.D., } Editors.
WILLIAM H. WAHL, Ph. D., Department of Progress in Science and the Arts.

IT IS AN ACCEPTED AUTHORITY ON ALL questions relating to the great mining industries of the country. It is the oldest publication of its class in America, thoroughly independent; being of the trade and not in it, occupies a just and impartial position, which enables it to advise and teach without fear or favor. It devotes much space to questions bearing upon economical management of mines, and from time to time illustrates the more important improvements in mining machinery and engineering methods. Special attention is given to reliable mining news from all parts of the country, which is gathered by an efficicient corps of correspondents in every section, and from an extended exchange list. The metal and ore markets, and gold, silver and miscellaneous stocks are reported and commented upon weekly by experienced financiers, who are unbiased by private interests, and upon these matters it is accepted as a reliable guide and unfailing instructor. Gives statistics of production of coal and iron, and of our great gold, silver and other mines. Its scientific notes are an epitome of the latest researches, its trade reports full, and its editorials sagacious and comprehensive. It enjoys the widest circulation and greatest influence of any journal of its class in the world; its patrons and readers comprising the most select and intelligent men in every quarter.

Subscription, $4 per year, in advance; 10c., single copy.

THE BEST PAPER. TRY IT!

BEAUTIFULLY ILLUSTRATED.

35th YEAR.

The Scientific American.

THE "SCIENTIFIC AMERICAN" IS A large, First-Class Weekly Newspaper of Sixteen Pages, printed in the most beautiful style, *profusely illustrated with splendid engravings*, representing the newest Inventions and the most recent Advances in the Arts and Sciences; including New and Interesting Facts in Agriculture, Horticulture, the Home, Health, Medical Progress, Social Science, Natural History, Geology, Astronomy. The most valuable practical papers, by eminent writers in all departments of Science, will be found in the Scientific American.

Terms, $3.20 per year; $1.60 half year, which includes postage. Discount to Agents. Single copies, ten cents. Sold by all Newsdealers. Remit by postal order to MUNN & CO., Publishers, 47 Park Row, New York.

PATENTS. In connection with the SCIENTIFIC AMERICAN, Messrs. MUNN & Co. are Solicitors of American and Foreign Patents; have had 35 years experience, and now have the largest establishment in the world. Patents are obtained on the best terms. A special notice is made in the SCIENTIFIC AMERICAN of all inventions patented through this Agency, with the name and residence of the Patentee. By the immense circulation thus given, public attention is directed to the merits of the new patent, and sales or introduction often easily effected.

Any person who has made a new discovery or invention, can ascertain, *free of charge*, whether a patent can probably be obtained, by writing to MUNN & Co. We also send *free* our Hand Book about the Patent Laws, Patents, Caveats, Trade-Marks, their costs, and how procured, with hints for procuring advances on inventions. Address for the Paper, or concerning Patents,

MUNN & CO.,

MINING.

MINING APPLICATION NO 161,

....TO THE....

OCCIDENT MINE.

U. S. LAND OFFICE, Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred linear feet of the "Occident Mine" or vein, bearing silver and gold, with surface ground three hundred feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 37, in Township ——, Range —— of —— Meridian, said Lot No. 37 being described in field notes of survey as follows, to-wit:

SURVEY OF EXTERIOR BOUNDARIES:

Began at a post on the southwest cor. of claim; marked the post "Post 1 Occident Mine." Said post is 2x3 inches square by 30 inches long and set in a mound of earth 20 inches high. From which var. 15 deg 55 min E., a pine stump 8 inches diameter bears N. 28 deg 50 min W 11 links. A pine stump 6 inches diameter bears N. 85 deg 1 min W. 45 links. A pine stump 20 inches diameter bears S. 33 deg 5 min W. 76 links. A pine tree 7 feet high x6 inches diameter bears S 39 deg 51 min E. 82 links. A pine bush 2 feet high x3 inches diameter bears N. 69 deg 10 min E. 67 links. From said Post the "Armagh U. S. Mineral Monument" by calculation bears N 20 degs 48 min W 17.17 chains. Thence with a var 15 deg 55 min E, 1st course—N 11 deg W 3.03 chains, ascending to point of hill at bottom of old prospecting cut 6.49 chains. End of slope —6.88 chains. On level line—commence descending 7.64 chains, old prospecting tunnel 8.42 chains. Old prospecting cut 12.47 chains. Old dump of prospecting cut 14.13 chains. Middle of Ygnacio Ravine—Ravine bears N 65 degs W 15.21 chains. Trail on ridge dividing Ygnacio Ravine from Cerro Gordo Cañon. Ridge bears W 16.07 chains. Rocky ridge—commence descending 17.19 chains. Middle of Cerro Gordo Cañon—commence ascending 21.85 chains. Wagon road—Citizens grade 22.72 chains. To post on N W cor of claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of rocks 2 feet high, marked the post "Post 2 Occident Mine." At foot of post is a cactus burr 20 inches in diameter growing in the rock. From said post a pine stump 2½ feet in diameter standing 8 feet below the wagon road, Citizen's grade, bears S 38 deg E 1.54 chains. No other suitable natural object within measuring distance. Thence with a var 15 deg 55 min E, 2d Course—N 79 deg E 2.27 chains, ascending rocky slope to "Post 3 Occident Mine" on north end of line of lode 3.42 chains. Rocky ridge bears south 4.54 chains To a post on N E cor of claim. Said post is 30 inches long, 2x3 inches square, and is set in a mound of rocks 20 inches high, marked the post "Post 4 Occident Mine" From which a pine stump 20 inches in diameter bears N 40 deg 35 min E 1.01 chains. The top of a blue slate reef 10 links high bears S 43 min E 15 links. Thence with a var 15 deg 55 min E, 3d Course—S 11 deg E .97 chains. Wagon road—descending 3.03 chains. An old stone cabin. A tall pine tree stands 15 links to East of line, 3.42 chains. Middle of Cerro Gordo Cañon—bears S W. Commence ascending on steep, rocky ridge, 8.48 chains. Trail on ridge dividing Cerro Gordo Cañon from Ygnacio Ravine 11.77 chains. Open cut 30 feet west of mouth of an old prospecting tunnel in blue slate, 12.98 chains. Old trail—runs N 65 deg W 13.69 chains. Summit of ridge at old trail 14.34 chains. Summit of ridge commence descending 15.38 chains. Crossing of Belshaw toll road 22.72 chains. Post on S E cor of claim. Said post is 36 inches long, 3x3 inches square and is set in a mound of earth 25 inches high, marked the post "Post 5 Occident Mine," from which a red iron boulder 2½x3¾ feet square and standing 26 inches high bears S 84 deg 40 min E 85 links. A pine tree 9 links high standing 6 ft. west of bottom of a gulch—gulch bears S. bears N 35 deg 11 min E 1.06 chains. The middle of the Belshaw toll road bears S 79 deg W 18 links. Thence with a var 15 deg 55 min E, 4th Course—South 79 deg W 18 chains. Road—commence ascending, 2.04 chains. Quartzite ridge bears N—S 2.27 chains. Post marked "Post 6 Occident Mine" on south end of line of lode—commence descending 2.87 chains. Trail—runs N W and S E 4.54 chains. To place of beginning, "Post 1 Occident Mine," containing 10.32-100 acres. From the Armagh U. S. Mineral Monument as herein described the mouth or entrance to the "Armagh Tunnel" as noted under the head of "Report" bears S 76 deg 55 min W 9.24 chains. The course of said Tunnel is S 58 deg 55 min E. Length 350 feet on the 27th of March, 1880.

ARMAGH U. S. MINERAL MONUMENT.

The "Armagh U. S. Mineral Monument" is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon and very precisely on the W. B. line of the Ygnacio mine (as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Dep. Min. Sur.) and distant 17.51 chains from the S W cor stake of the Ygnacio mine.

At the point above given I drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter x16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high x5 feet in diameter at its base. Marked the top of post "U. S. Mineral Monument. Erected January 31, A. D. 1880, by Wm Crapo, U. S. Deputy Mineral Surveyor—under authority of the U. S. Surveyor General for California." From said post in mineral monument, with a variation of 15 deg 55 min E, the extreme end of the bluff on which the monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face of rock 7½ feet high bears N 60 degs E .07 links. The N E cor of an old adobe *vaso* chimney bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The N W cor of Rafael Diaz' house bears S 28 deg 33 min E 1.58 chains. An old well 30 feet deep on north side of Cerro Gordo Cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE.

Commence at "Post 1 Occident mine," thence with a var 15 deg 55 min E, S 79 deg W 3.03 chains to Post on S W cor of Ygnacio mine as surveyed for a patent N 11 deg W 17.51 chains. To U. S. Mineral Monument which when computed gives for a closing line from "Post 1 Occident Mine" to U. S. Mineral Monument N 20 deg 48 min W 17.77 chains.

The location of this mine is recorded in the Recorder's office o. Cerro Gordo Mining District, in Book F, page 147 of locations.

The adjoining claimants are, on the west the San Francisco mine, on the south the Moter mine and on the east the Trachyte Flat mine.

Any and all persons claiming adversely any portion of said Occident mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

MINING APPLICATION NO. 162,

...TO THE....

ARMAGH MINE.

U. S. LAND OFFICE, Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred (1 500) linear feet of the "Armagh Mine" or vein bearing gold and silver, with surface ground six hundred (600) feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 38, in Township ——, Range ——, of Mount Diablo Meridian. Said Lot No. 38 being described in field notes of survey as follows, to-wit:

Commenced at "Post 1 Armagh Mine," on S E corner of claim. Said post is 30 inches long 2x3 inches square and is set in a rock mound 2 feet high, from which with a var 15 deg 55 min E a pine stump 18 inches high by 10 inches in diameter bears S 15¾ deg E 77 links. A pine stump 15 inches diameter bears S ⅝ deg 30 min W 91 links. A red ferrugenous quartz reef standing 4 feet high bears N 24 links. A pine stump 12 inches high x5 inches in diameter bears N 49 deg 30 min E 15 links. Thence with a var 15 deg 55 min E, N 11 deg W 3.20 chains. Ascending to summit of ridge commence descending, 6.98 chains; dump of old prospecting cut, 10.80 chains; Belshaw toll road, 13.16 chains; Belshaw toll road in middle of Cerro Gordo Cañon, commence ascending 14.25 chains; road running to Potosi house, 21.66 chains; wagon road—Citizens' grade—22.72 chains; post on the N E corner of claim Said post is 30 inches long, 2x3 inches square, and is set in a mound of earth 20 inches high. Sage brush slope, sloping S W; no natural object for witness mark in vicinity. Marked post "Post 2 Armagh Mine." Thence with a var 15 deg 55 min E, S 79 deg W .07 chains. Trail runs N S; commence descending—2.20 chains; wagon road, Citizen's grade—4.54 chains; post on north end of line of lode, marked the post "Post 3 Armagh Mine"—8.43 chains. Trail runs N S—9.09 chains. To post on N W corner of claim, situated on sage brush slope, sloping to S W. Said post is 3 feet long, 2x3 inches in diameter and is set in a mound of earth 2 feet high; marked the post "Post 4 Armagh Mine" No suitable natural object within measuring distance. Thence Thence with a var 15 deg 55 min E, S 11 deg E, commence ascending—1.75 chains; commence ascending—3.97 chains; crossing of foot trail runs west—8.27 chains; toll road in middle of cañon, commence ascending, 18.45 chains; summit of ridge bears west; commence descending, 19.74 chains; south end of "Silver Wedge" claim, 22.72 chains, to post on S W corner of claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of earth 20 inches high; marked the post "Post 5 Armagh Mine," from which a pine bush 2 feet high bears N 76 deg W 19 links. The chimney of an old deserted vaso bears N 22 deg 30 min E 24 links. Thence with a var 15 deg 55 min E, N 79 deg E 63 chains. Descending into bottom of gulch—gulch bears south, commence ascending—4.55 chains. "Post 6 Armagh Mine," or south end of line of lode, 3.99 chains; crossing of toll road, 9.09 chains; "Post 1 Armagh Mine," place of beginning. From which post the Armagh U. S. Mineral Monument bears N 4 deg 15 min W 12.67 chains, by calculation, containing 20.64-100 acres.

Location of the Armagh Tunnel.—From the "Armagh U. S. Mineral Monument" the mouth of the Armagh tunnel bears S 76 deg 55 min W 9.24 chains. The course of said tunnel is S 58 deg 55 min E. Length, 350 feet.

ARMAGH U. S. MINERAL MONUMENT—DESCRIPTION THEREOF:

There not being any lines of the U S. public land surveys within 100 chains of the Armagh mine, I built a Mineral Monument and connected therewith. Said Mineral Monument is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon and very precisely on the west boundary line of, and distant 17.51 chains from the southwest corner stake of the Ygnacio mine, as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Deputy Mineral Surveyor. At this point drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter by 16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high by 5 feet in diameter at its base. Marked the top of the post "U. S. Mineral Monument. Erected January 31, 1880, by Wm. Crapo, U. S. Deputy Mineral Surveyor, under authority of the U. S. Surveyor General for California." From said post in Mineral Monument, with a variation 15 deg 55 min E, the extreme end of the rocky bluff on which the Mineral Monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face 7½ feet high bears N 60 deg E .07 links. The northeast corner of an old adobe vaso chimney, a Mexican furnace for smelting silver and lead ores, bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The northwest corner of Rafael Diaz' house bears S 38 deg 23 min E 1.58 chains. An old well 30 feet deep on north side of cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE.

Commence at "Post 1 Armagh Mine," thence with a var 15 deg 55 min E, N 79 deg E 1.51 chains to west boundary line of Ygnacio mine, and at a point 325 feet—4.92 chains from the southwest corner stake of the Ygnacio mine; thence with a var 15 deg 55 min E, N 11 deg W 12.59 chains to U. S. Mineral Monument.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 146, of locations. The adjoining claimants are, on the East, the Greenly mine.

Any and all persons claiming adversely any portion of said Armagh mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, in the State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

ASSESSMENT NOTICE.

LOS ANGELES MINING AND SMELTING Company.

Location of Works, Resting Springs, Inyo County, California.

Location of Principal Place of Business, Los Angeles, Los Angeles County, California.

Notice is hereby given that at a meeting of the Board of Directors of said Company, held on the third day of August, 1880, an assessment (No. 4) of two dollars per share was levied upon the entire capital stock of said corporation, payable immediately, in United States gold coin, to J. M. Elliott, Secretary of said Company, at his office, No. 1 Temple Block, in the city and county of Los Angeles, State of California.

Any stock upon which this assessment shall remain unpaid on Monday, the Twentieth (20th) day of September, 1880, will be delinquent and advertised for sale at public auction, and unless payment is made before, will be sold on TUESDAY, the NINETEENTH (19th) day of OCTOBER, 1880, to pay said delinquent assessment, together with costs of advertising and expenses of sale. By order of the Board of Directors.

J. M. ELLIOTT, Secretary.

Office of the Secretary—No. 1 Temple Block, City and County of Los Angeles, California.

Yield of Famous Mines.

The California yielded $2,576,973 in 1879, of which amount $1,333,511 were in gold. The shareholders were paid $1,620,000 in dividends.

The Consolidated Virginia yielded during 1879 the sum of $2,481,359, of which $1,188,329 were in gold. The shareholders received $1,850,000 in dividends.

The Ontario (Utah) during the year 1879, produced silver bullion to the value of $1,325,486, of which $600,000 were paid to shareholders in twelve dividends.

The Standard Consolidated, of Bodie District, for the year 1879, produced bullion to the value of $1,210,456, chiefly in gold, of which shareholders received $600,000.

The Eureka Consolidated (Nev.) in 1879, produced the sum of $2,743,400, of which $944,500 were in gold. Of this amount the shareholders received $825,000, or about 30 per cent., in dividends.

The Richmond Consolidated, in the same locality, during 1879, yielded $1,554,000, of which the shareholders received $337,500 in quarterly dividends. The stock is selling in London at from $46 50 to $50 per share of the par value of $25.—*New York Mining News.*

Plantation Proverbs.

One-eyed mule can't be handled on de bline side.

Moon may shine, but a lightered knot's mighty handy.

De pig dat runs off wid de year ob corn gets little mo' dan de cob.

Eickor talks mighty loud when it gits loose from de jug.

Sleepin' in de fence corner don't fotch Krismus in de kitchen.

'Tween de bug an' de bee-martin, taint hard to tell who's gwine ter git ketched.

De proudness of a man don't count w'en his hed's cool.

You'd see mo' ob de mink ef he know'd whar de house-dog sleeps.

Hungry rooster don't kakle w'en he fine de wurm.

'Simmons ain't good tell der fros' bit.

Watch out w'en you're gittin' all you want.

Fattenin' hog ain't in luck.—*Atlanta Constitution.*

It appears that the question of title to the townsite of Lundy has not been definitely settled, notwithstanding the findings of the Register and Receiver of the Bodie Land Office, as the settlers or "jumpers" express their determination of appealing the case. A committee was around Wednesday and Thursday raising money to defray the expenses of appeal. It is to be regretted an amicable understanding could not be arrived at between Mr. Boomershine and the claimants, as continued litigation only retards growth and prevents improvement. We do not pretend to decide who is right or who is wrong, but would like to see the matter settled definitely.—*Homer Index:*

SEVERAL days since an important development was made in the May Lundy tunnel (Mono county). The ore vein which the tunnel was following suddenly become larger, and the ore became enormously rich. It is partially decomposed, and is perfectly alive with particles of free gold; it will easily go $1,000 a ton, just as it comes out. The ground is so soft that two men easily take out a ton of ore to the shift. So says the Homer *Index.*

"WILL you have some strawberries?" asked a lady of a guest. "Yes, madam; I eat strawberries with enthusiasm." "Do tell! We haven't anything but cream and sugar for them this evening."

GEORGE III's crown weighed seven pounds. Victoria's weighs only nineteen ounces.

A Tramp Trap.

It is a well known fact that freight cars are a great resort for tramps. These cars afford them traveling conveyance, sleeping apartments, and everything which conduces to make the life of a tramp pleasant and comfortable. To hunt them out or to capture them while in these cars has been one of the great studies of railroad men. One of the most prominent citizens of Colorado Springs has invented what he calls a "tramp trap." It consssts of an ordinary freight car, in which is a movable bed resting on spiral springs, something like a spring mattrass. To this bed is attached a clutch, which acts on an elliptic spring connected with the doors. The movable bed is adjusted so as not to move until a required weight is upon it—say 1,500 pounds, the average weight of 10 tramps. In this car are placed several boxes of crackers, baskets of wine, boxes of cheese, bundles of cigars, etc., and the doors left wide open. These articles are soon discovered by the tramps, and they begin to swarm around the car and to enter one by one. When the required weight is in the car the bottom suddenly flies up, throws out the clutch, and the doors close as quick as a flash and fasten with a spring lock. The tramps are thus secured until the proper officer comes and kills the tramps. We understand the inventor has made application for a patent, and the right to use the same will be placed at a very low figure, as he wants to benefit mankind and not to make money.—*Railway Age.*

Nye County, Nevada.

The mines of Nye county are attracting considerable attention at present, especially those of Grantsville. It would pay capital to come this way to seek investment. In Philadelpia District there are mines, as good as any in the county, shut down for want of capital to work them. Jefferson is almost deserted, and yet there are mines there that would well repay a judicious outlay for their proper development. The Belmont mine is being worked steadily and producing a fair quantity of good ore. Spanish Belt District, which lay under a cloud so long, is now making a showing through the Barcelona Company's mines that will cause a stir before this time next year. There are also good mines at Downeville, Ellsworth, Lodi, Ophir Cañon, Jett Cañon and Northumberland, that would well repay the investment of capital. The mines of San Antonio were rich on top and are almost certain to prove productive again when properly opened up. The mines at Morey never looked better and they are producing sufficient ore of a good grade to keep the mill running to its full capacity. There is a probability of operations being carried on on a more extensive scale in the Tybo Con. mines. Altogether the outlook for Nye is better than it has been for years.—*Belmont Courier.*

MANY parents must be entirely ignorant of the manner in which their daughters conduct themselves on railroad trains, or they would put a stop to their carryings on. The young Miss who flirts with the brakeman on entering the car, stalks with a stately air toward her seat, flops into it as though she were faint from over exertion, then stares at the passengers, throwing signs to such as she chooses to recognize, and on the first opportunity begins to to giggle and chatter with some companion equally light-headed and frivolous—such a lady is in a fair way of encountering a wreck of some kind. She is inviting her own downfall. The girl who is modest and reserved in her demeanor—who is neither prudish on the one hand nor indecorously free on the other—who makes no effort to attract attention and encourages no advances in the way of love making, will always be safe from annoyance and proof against scandal. It requires some strength of character on the part of young ladies to keep within the proper limits in regard to this matter, and if parents are not well assured that their daughters are strong enough to travel alone they should either place them under a guardian or withdraw them altogether from the trains.—*Pittsburg Commercial.*

DR. SIDNEY RINGER calls the attention of the profession in the *Lancet* to the value of glycerine as a remedy in flatulence, acidity of the stomach, and pyrosis. He states that sometimes he finds all of these gastric troubles combined, but glycerine in nearly all cases releives them. In some cases, too it removes pain and vomiting, probably like charcoal, by preventing the formation of acrid acids, which irritate delicate and irritable stomachs. Glycerine does not prevent the digestive action of pepsin and hydrochloric acid; and hence, while it prevents the formation of wind and acidity, probably by checking fermentation, it no way hinders digestion. He administers a drachm to two drachms either before, with, or immediately after food. It may be given in water, coffee, tea, or lemon and soda water. In tea and coffee it may replace sugar, a substance which greatly favors flatulence, as indeed, does tea in many cases. In some cases a cure does not occur till the lapse of ten days or a fortnight.—*Scientific American.*

THE French Chamber has passed a vote of credit of $1,800,000 for the Sahara Railroad, part of which two companies have already offered to contract for, while the Medine and Niger section will be undertaken by the Government.

A GIRL just returned to Hannibal, Mo., from a Boston high school said, upon seeing a fire engine at work: "Who would evah have dweamed such a vewy dimunitive looking apawatus would hold so much wattaw!"

INYO INDEPENDENT.

PUBLISHED EVERY SATURDAY, BY

CHALFANT & PARKER.

J. E. PARKER. P. A. CHALFANT.

INDEPENDENCE, CAL.:

SATURDAY, AUGUST 21.....1880

THE annual *Newspaper Directory* of Messrs. Geo. P. Rowell & Co., which is just out, brings its usually interesting budget of information about the press of the country, compiled from latest returns. According to this work there are in the States and Territories of the Union 9,723 publications, ranging in periodicity from daily to quarterly. New York heads the list with 1,239; Pennsylvania comes second with 835; third, Illinois, 832; fourth, Ohio, 653; fifth, Iowa, 590: sixth, Missouri, 451: seventh, Indiana, 415: eighth, Michigan, 395; ninth, Massachusetts, 382; tenth, Wisconsin, 314; eleventh, California, 305. In the number of daily papers California ranks fourth on the list, and ties with Ohio, each having 48. The Dominion of Canada has 553 publications and Newfoundland 11.

RETURNS to the Department of Agriculture since August 1st show an increase in the condition of cotton as compared with July. The preseut average condition for the whole country is 102. The general average of the corn crop on August 1st is 98, against 100 on July 1st. The condition of spring wheat is 88, against 81 last year. The early months were very dry, and the rains which came were too late to restore the loss. California and Oregon report the highest condition since several years. Tobacco shows a general average for the whole country at 86.

THE Arizona and New Mexico R. R. Company has been organized in Arizona to build a road from Benson City, the new town on the Southern Pacific Railroad, and on the west side of the San Pedro river, in the county of Pima' thence southerly up the San Pedro valley, crossing the river twice to the city of Charlestown, about twenty miles; thence northeasterly nine miles to the city of Tombstone, thence fifteen miles in the same direction to Dragoon Pass, where it forms another junction with the Southern Pacific.

THE Tucson *Citizen* says that on August 1 a crowd of several hundred assembled at Junction Station, 40 miles from Tucson, to witness a horse race. Considerable money changed hands, and angry discussions followed, ending in a fight. The fight enlarged, and it became a cavalry battle. After two hours the fight endad, when a horrible sight was presented; about a dozen men were lying torn, trampled and bleeding, while those on horseback were badly cut, and their horses wild with fright and pain.

THE Railroad Company have decided to establish the shops of the Southern Pacific Road at Tucson, Arizona. The Sacramento *Bee* says a large quantity of first-class machinery, to be used therein, was on Friday and Saturday forwarded from Sacramento to that place. The new works will be under the personal supervision of A. Kilburn, Division Master Mechanic, with H. McCloskey as foreman.

THE Gergenson process is to be tested on a large scale in El Dorado county. It is known as the steam oxydized and amalgamating plan. Three men have erected works, consisting of furnace and Pacific grinders, by which eight to twelve tons of ore per day can be worked, and they claim to be able to extract 90 per cent. The works are located on Big Cañon, near the True mine.

THE Electoral tickets of both parties are complete in this State. The Republicans have named Gen. J. F. Miller, Henry Edgerton, Claus Spreckels, Chas. N. Fox, W. W. McKaig and Tho R. Bard. The Democrats have named W. T. Wallace, David S. Terry, Dr. J. C. Shorb, W. B. C. Brown, Barclay Henley and R. F. Del Valle.

THE Chicago *Christian Cynosure* states that there is a fifth Presidential candidate in the field. His name is John W. Phelps, and his habitation, Vermont. The Vice is Samuel C. Pomeroy, of Kansas. They stand on the platform of "the American party," which like the *Cynosure*, is anti-secret society in its character.

THE indictments against eleven Mussel Slough settlers for resisting United States Marshal Poole in the discharge of his duty a few months ago, when seven men were killed, have been transferred, says a San Francisco dispatch, from the United States District Court to the Circuit Court for trial.

SPECIE is flowing to the United States, a sign that the European customers for the products of Uncle Sam's farm are still sending over their orders and prefer to pay cash to returning any of our Government and railroad securities which they hold.

INVOLVING SOME TAX VALUES.

The case of Reddy against Tinkum, pending in the Mono county courts, is one of sufficient interest to many old residents of this county, if not to Inyo taxpayers in general, to justify some attention at our hands. The *Bentonian* publishes a letter from Dr. Griswold relating to the subject, of which letter it remarks: "It [the letter] is the more important from the fact that it treats on a subject most severely testing the pockets of the taxpayers of Mono county. Should the case of Reddy vs. Tinkum be eventually decided in favor of the plaintiff it will open the door to a series of claims that will seriously cripple the finances if not utterly bankrupt the county." We know nothing of the merits of the case whatever, but we are inclined to think that our contemporary pictures possible consequences rather too dark, unless the old claims are far heavier than now appears. Following is the defendant's side of the story as quite ably presented by Dr. Griswold, and comprises everything that we have heard relating to it on either side:

Editor Bentonian—Dear sir: Having just returned from Bridgeport, to which place I was subpœnæd as a witness in the case of P. Reddy against Z. B. Tinkum, County Treasurer of Mono county, and by virtue of his office, party defendant on the part of the people, in which a writ of mandamus was prayed for to compel the Treasurer to pay a certain warrant issued at Aurora, while that place was de facto the county seat of our county; and finding that many of the people of Mono county are but partially informed of the nature of the case, I propose to give a brief history of it through your paper. In connection therewith, as a citizen of Mono county, and therefore one of the parties defendant, I subjoin a "brief," which I drew up and submitted to the attorney for the defense, and which I believe embodies the essential points of the case. Now, in using the word "brief," I am aware that I may be guilty of arrogance and chargeable with conceit; and if any learned lawyer should feel aggrieved and indignant thereat, I assure him I am perfectly willnig to be forgiven and he has my full and free consent to denounce it with the most portentious language he knows how to use.

This brief * is substantially the argument that I used in the Assembly in 1876, when I was a member from this district, though at that time made with more amplitude and detail, when the identical warrants now at issue came up as a "Bill of Relief" as a case of equity against the State.

* * In 1861-62 by Act of Legislature the county seat was established at Aurora. In 1863 the boundary line was run and Aurora was found to be in the State of Nevada. In 1864 the Legislature established the county seat at Bridgeport. At this time Bishop Creek and Round Valley were a part of Mono county. The last assessment roll made while Aurora was the county seat amounted to about $530,000 of both real and pesonal property. After the county seat was at Bridgeport the assessment roll amounted to only about $92,000, showing that more than four-fifths of the assessable property of Mono county belonged to the people of Nevada. The people of Aurora were also in the majority. They wielded the political power of the county, and were the potential agents in creating the debt.

I was told by the late Mr. Hall, Express Agent in 1875, that the amount of the scrip was about $35,000, which, with the accrued interest to date, would be more than doubled. Much of this is perhaps lost and much still afloat and would turn up from time to time. The amount now pending, with interest, is about $18,000.

Should this mandamus (how would it do to write it "man-damn-us?) be granted and affirmed by the Courts of the State, then the case might arise, clearly within the jurisdiction of the Courts, of the liability of Inyo county in the proportion of the amount of the assessable property of Bishop Creek and Round Valley to the $92,000.

In the session of 1875-76 a bill of relief for R. M. Wilson, former County Clerk of Mono county, was introduced in the Senate of the State to pay warrants issued to him to pay him for his services as clerk. The face of the warrants was $3,800: with interest between $8,000 and $9,000. It was referrred to a committee who reported back a substitute making it mandatory on Mono county to pay the warrants. Mr. Wilson wanted me to support the bill. After getting the facts, figures and history of it I told him I would not vote for it but would fight it and knew that I could defeat it. There it rested till the latter end of the session, when Wilson, finding he could do no better, acting under the advice of Senator Eaken with my concurrence, had a bill of relief presented in the Senate for the face of the warrants. It passed the Senate without trouble. It came to the House when the appropriations were up and there was great opposition to all bills of relief, and it required strenuous exertions on my part to insure its success. It finally passed the House on Saturday evening, the last day but one of the session, but failed to receive the signature of the Governor. Had it become a law it would have exonerated Mono county from all liability, actual or contingent, to the extent of at least ten thousand dollars.

The Legislature of the State has on three several occasions passed bills of relief: First—$15,000 Sonora Road Bonds, issued at Aurora, authorized by the State; second—$4,200 of scrip in payment of County Judge Moultrie's salary; and lastly, $3,800 for R. M. Wilson, not perfected into a law—and has thus recognized this principle: that all the equities in the case lie against the State and in favor of the people of Mono county through the default of the State in defining its boundary and making the mistake of organizing a county outside its jurisdiction. Therefore, it would seem, from the premises and the principles involved, that this case does not lie within the purview of common, equity and statutory law, but is to be resolved upon those immutable principles of natural right, equity, and justice from which our Constitutions, both State and Federal, so far as they do and can go, are supposed to be the concrete expression, and which find their most perfect exemplification in that sublimest of all systems of human jurisprudence so aptly and happily styled, "The Laws of Nature and of Nations."

M. GRISWOLD.

Benton, August, 1880.

THE "BRIEF."

The jurisdiction of the Constitution of the State of California is limited by the territorial boundaries of the State.

The legislative, executive, and judicial departments of the government are the creatures of the Constitution, and therefore their jurisdiction is limited by that of the Constitution.

The Act of the Legislature in establishing the county seat and organizing the county of Mono at Aurora, outside of the territorial limits of the State, was an act outside of its jurisdiction, and therefore null and void ab initio; and all acts performed by the said "supposed" Mono county were also null and void, and imposed no liability on the present Mono county.

That, when the State boundary was run and it was found that Aurora was within the Territory of Nevada, from that moment the suppositious Mono county ceased to be even a de facto political organization, and the present Mono county was remanded back to the legal status in which it was prior to the establishing of the county seat at Aurora.

That the Act establishing the county seat at Bridgep rt was not a rehabilitation or reunification of the former supposed Mono county, but was to all legal intents and purposes the creation of a county de novo.

That the question involved is one of those exceptional and anomalous ones which sometimes arise in the course of human affairs, and which lie outside of the category of "legal rights and wrongs," and therefore are beyond the reach of "judicial remedies."

That the only course the scripholders have is not in the Courts for "remedy," but in the Legislature for "relief."

THE NEW BASIS.

The Chicago *Times* estimates the representative population of the United States under the census of 1880 at 48,205,000, and anticipates that the quota for Congressional representation will be 175,000. The House, in that case, will be composed of 285 members, the present House being 293. There would be a collective loss of eight members distributed among all the States, but several of them will gain sufficiently in population to gain in Congressional membership in despite of this percentage of loss. The States which will gain on this basis are California, Iowa, Minnesota, Nebraska, and West Virginia, one each, Kansas three, and Texas four. Politically, this gain would be a gain of six in Republican States and five in Democratic States, with California as the election might go. New York would lose four, Pennsylvania three, Ohio two, Alabama, Georgia, Illinois, Indiana, Louisiana, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, Tennessee and Vermont, one each. As the Congressional delegation is divided in nearly all of these States, the political drift of the loss cannot be accurately estimated. California gains one member in any event, and two if the quota is not increased out of proportion to the increase of population over 1870.

EUREKA, Nevada, is an ill-fated town. On the morning of the 17th a fire broke out, and never ceased till about one million dollars' worth of property was destroyed. Among the prominent buildings destroyed, the dispatch mentions these: Wau's brewery, the *Leader* printing office, the Odd Fellow's building, the Jackson House, the International Hotel, and the theater, besides a vast number of dwellings, places of business, etc. The people are very much discouraged, many of them not yet having got out of debt from the losses entailed upon them by last year's big fire—which, however, was not as big as this last one. The *Sentinel* is getting out a sheet for the *Daily Leader* till the latter can get new material, having to replace everything from case to press, as well as building.

THE most important news that has transpired lately is that the Chinese Minister at Washington has given formal notification to Secretary Evarts of the decision of his government to extend the commercial activity of the Empire by revoking the ancient decree prohibiting subjects from engaging in commercial relations with ports, and that in future the greatest latitude will be accorded Chinese merchants who may desire to engage in foreign trade. China has an immense maritime population and the effect of turning it loose on the ocean is likely to have a stimulating effect on the commerce of the world. It will cheapen the price of oriental goods and in process of time, the charges for ocean carriage.

A CONNECTICUT printer will try to fast three weeks and work at the case ten hours every day during that time. Of course he must be locked up every night, and kept away from pi. If he actually fasts his form will show proof of but little fat matter at the end of the take.—*Eureka Sentinel.*

Notable Deaths.

Hon. Wm. Bigler died on the 9th instant at his home in Clearfield, Pennsylvania, in the 66th year of his age. He commenced life as a printer, at which trade the greater part of his education was attained. He has filled numerous high positions, among others, as Governor of Pennsylvania, his brother John being at the same time (1851) Governor of California; the latter also began life as a printer.

Dudley Field, only son of Hon. David Dudley Field, died suddenly while attending a family re-union at his father's residence in Massachusetts, on the 10th instant. He was a young lawyer of great abilities, even more brilliant in natural powers than his distinguished father and uncles. He leaves a wife and child, many relatives and an unusually large circle of personal friends and admirers on both sides of the Atlantic to mourn his untimely death.

Adelaide Neilson, the greatest and handsomest Shakesperian actress of the age, died in Paris on Sunday last, in the prime of life, and almost without a moment's warning.

A cablegram of the same date stated that Marshal Bazaine was also dead, but it was a mistake.

NATIVE CALIFORNIAN TOBACCO.—Prof. J. T. Rothrock is of the opiniona that the early natives of California smoked the leaves of *Nicotiana clevelandii*—a species only quite recently described by Prof. Asa Gray. It is a small plant with flowers, and it was found by Prof. Rothrock only in association with the shell heaps which occur so abundantly on the coasts of Southern and Central California. He states that perhaps of all the remains of extinct races so richly furnished by that region, none were so common as the pipes usually made of stone resembling serpentine. The tobacco of *N. clevelandii* Prof. Rothrock found by experience to be excessively strong.—*Scientific American.*

The plant referred grows profusely about this office. Early in the season an antiquated old Indian comes along and breaks off the flower stem, when the leaves grow larger and more "bully bueno" to the Piute palate. Doubtless if scientifically prepared it would make a powerful snuff, a substitute for tobacco, or as an adulteration of the weed.

BY a recent ruling of the War Department, men who abandoned the military service without having fulfilled their contracts of enlistment and were deserters at large on the date of muster out of their regiments, are held to have forfeited thereby their right to a discharge, and to such men the Adjutant General is forbidden to issue discharge certificates. Inasmuch as a soldier is considered by the Pension Bureau as still in the service, unless a regular formal discharge is granted, this order will work great hardships to those pension claimants who are debarred from a discharge by this new order. It will effectually debar them from obtaining a pension.

THE Masonic, or Knights Templars', gathering at Chicago is the grandest affair of the kind ever seen on the continent. The tents cover a mile or more along the lake shore, and, all told, not less than 200,000 visitors gathered in the city the first day to take part in or to witness the grand pageantry. Of all the Sir Knights there, those of this State were cutting the widest swath—took with them a car load of California fruit, wines, and all that sort of thing, with which they kept open houses, or tents rather, "putting on dog till you couldn't rest."

A CHINESE steamer, the *Ho Chung*, belonging to the Chinese Transportation Company, has been laid on between a Chinese port and San Francisco. Her business will be principally the bringing of coolies.

THE Nevada Republicans have renominated Judge Beatty, Supreme Judge, and Congressman Daggett for the positions they now respectively hold.

IT is announced that General Grant has accepted the presidency of the San Pedro & Cañon del Agua Mining Company. It is also intimated that he may not assume the active duties of the office for some time; in other words, that he will for a time at least become the tool of the promoters, by acting as a figure head. It has been demonstrated that there is no more important position of trust than the presidency of a large mining company and none where the reputation of a man is more at stake The day has passed for the public to accept mere figure heads for mining companies. In the future, there should be demanded from officers their closest attention to the companies' interests, and for any neglect in this particular they should be made accountable.—*Engineering Journal.*

IT seems that new life is to be infused into mining operations at Havilah. Mr. Sherman, who has recently returned from the East, is about to commence work on an extensive scale, the results of what he has done in the past having satisfied the monied powers that it will pay. He has just completed a boarding house for his employes, and a stable. The machinery of a first-class twenty-stamp mill is on its way and the extensive tunnels, levels, galleries, etc., in his mines will be ventilated by compressed air generated by machinery worked by the power of Kern river, six or eight miles away. The cost of the mill and other improvements is estimated at about $200,000.—*Kern Co. Californian.*

PAT HOLLAND has been awarded $300 by a Bodie jury to indemnify him for the bite of a dog. On the Comstock, where Holland is better known, the damages would have been awarded to the dog owner.—*Carson Appeal.*

A CLOCK was on exhibiton which fired off a pistol hourly. The exhibitor on being questioned as to its object replied that it was to kill time.

DIED.

At Bishop Creek, Inyo County, Cal., August 18, 1880, JOSEPH HENRY SHELLY, eldest child of Jos and Carrie Shelley, aged 22 months and 3 days.

Why take our little ones away,
That we so dearly love?
Softly, I heard an angel say:
"To live with you above."

INYO COUNTY DEMOCRATIC PRIMARIES

....AND....

County Convention.

AT A MEETING OF THE DEMOCRATIC County Central Committee of Inyo County, held at Independence on Saturday, August 14, 1880, it was ordered that a Primary Election be held on SATURDAY, the TWENTY-EIGHTH day of AUGUST, 1880, between the hours of 1 and 10 o'clock P. M. of said day, for the purpose of electing Delegates to a County Nominating Convention, to be held at Independence, on

Saturday, September 18, 1880,

At which election twenty-eight Delegates will be chosen, apportioned to the several precincts as follows:

ROUND VALLEY—Two Delegates; polling place at Stoutenborough's Store. Inspector, David Olds; Judges, A. McGee and Chas. Parsons.

BISHOP CREEK—Six Delegates; polling place at the Bishop Creek Hotel. Inspector, Wm. O. Harrell; Judges, John B. White and T. K. Hutchison.

BIG PINE—Two Delegates; polling place at McMurry's Hotel. Inspector, J. W. McMurry; Judges, W. A. Baker and D. P. Macarter.

FISH SPRINGS—One Delegate; polling place at the Taboose Station. Inspector, D. B. Curtis; Judges, H. C. Wright and Thos. Spaulding.

DEEP SPRINGS—One Delegate; polling place at Gilbert's Ranch. Inspector, J. S. Broder; Judges, John Chastine and M. J. Pyrne.

INDEPENDENCE—Four Delegates; polling place at Mai s' Livery Stable. Inspector, Geo. W. Brady; Judges, John A. Lank and Jos. Fernbach.

GEORGE'S CREEK—One Delegate; polling place at the Half-Way House. Inspector, John Shepherd; Judges, Charles Keppler and T. S. Hamilton.

LONE PINE—Two Delegates; polling place at Meysan's Store. Inspector, Charles Meysan; Judges, Juan Meza and John Lucas.

SWANSEA—One Delegate; polling place at the Mill Company's office, Keeler City. Inspector, J. H. Holt; Judges, John Alexander and ——— ———.

CERRO GORDO—One Delegate; polling place at Duval's Hall. Inspector, J. R. Hughes; Judges, ——— and ———.

DARWIN—Two Delegates; polling place at Store of Waterman & O'Brion. Inspector, Martin Mee; Judges, C. F. O'Brion and A. Jackson.

LOOKOUT—Two Delegates; polling place at Fitzgerald's Saloon. Inspector, Frank Fitzgerald; Judges, ——— ——— and ——— ———.

OLANCHA—One Delegate; polling place at Walker's Station. Inspector, William Walker; Judges, ——— ——— and ——— ———.

PANAMINT—One Delegate; polling place at Company's office. Inspector, Fred. Russell; Judges, ——— ——— and ——— ———.

RESTING SPRINGS—One Delegate; polling place at Company's office. Inspector, ——— ———; Judges, ——— ——— and ——— ———.

QUALIFICATION OF VOTERS:

"Do you promise to support the Democratic Electors at the ensuing Presidential Election? Yes."

By order of the Committee.

S. P. MOFFAT, Chairman.

HENRY M. ISAACS, Secretary.

INYO INDEPENDENT.

INDEPENDENCE, CAL.:
SATURDAY, AUGUST 21.....1880

SWANSEA DISTRICT.—State Senator Thos. O'Callahan and G. R. Cottrell, of New York, of whose visit to Lone Pine and Cerro Gordo we made mention a few weeks since, have returned to the East. They made a number of visits to different mines and locations in the Inyos, and finally bonded the Hercules, Mountain Star, Dreadnaught, Warrior and Silver Eagle claims, belonging to Thos. Moran, John Lubken and Martin Mee, and the Single Star, belonging to Julius Roeper and Geo. Thorpe. The sum of $20,000 is to be paid therefor. These mines are upon two small ledges, running parallel and about one-half mile apart. The ledges are contact veins, with every evidence of permanency and continuous depth. The ore is exceedingly rich, that on the dumps being retained by the owners for shipment assaying $1,400 and upwards per ton in silver. This new company has been formed mainly through the efforts and influence of John Ely, and we have no doubt of its ultimate success. The boys have put their mines in at a low figure compared to their evident value—an example that, for the sake of the country, many others would do well to follow.

PERSONAL.—Wm. T. Grant, C. T., an old Inyoite, but lately from all over the northern country, is in town nursing a stiff leg—the effects of that bad break at Candelaria. He doesn't mind the crutches much, but it is discouraging to have the old hens crow at him while he can't get around....Peter Taylor, of the Freeborn Cañon works, has gone to Los Angeles for a short stay....John R. Hughes, from Beveridge, is in, and reports a favorable clean-up at the arastras, which will be kept in steady operation....Martin Mee says Darwin is looking "way up."....Wm. Walker and son Edward, the latter suffering from a peculiar throat affection, were among the visitors....S. Zaun, Paul Houard, E. H. Edwards, J. H. Dodge and others from Lone Pine put in a brief appearance.

IN THE FIELD.—The announcements of the first candidates to shy their castors into the political field will be seen in the advertising columns this week. John R. Hughes, the old hard-shell Democrat of Cerro Gordo, is out for Sheriff, as is also Sheriff Smith on the Republican side. A candidate who, for the sake of the salary, is willing to serve the dear people as County Treasurer, also crops out. Certainly, none of this batch of willin' Barkises need any special introduction to our local readers. However late, the ice is thus broken, and more may be expected next week. Our columns are open to all, from President to Constable, at a reasonable cash fee.

FOR SHERIFF.—We neglected, last week, to call attention to the announcement of R. T. Harrell, as a candidate for Sheriff of Esmeralda County, Nevada. "Thad" Harrell, as he is best known to our readers of southern Esmeralda, is a staunch and popular man for the place, having barely missed the Democratic nomination at the last election. Thad. will make it lively for Clem Ogg, his probable Republican opponent.

CRYSOPOLIS.—The Colossus and Oro Fino mines, in the old Union District across the river, are being developed by a force of eight or ten men, under the direction of Supt. G. K. Phillips. Mr. J. S. Phillips, a noted mining engineer and author, arrived from New York last week, and has set about making a thorough and exhaustive examination and report upon the property.

I. O. G. T.—S. P. Moffat, A. R. Conklin and H. M. Isaacs, P. W. C. T's, are the duly elected Grand Lodge Representatives for Busy Bee Lodge of Good Templars of this place; and it is likely the two last mentioned if not all three will personally attend the Grand Lodge session, which, we believe, is to be holden during the first week in October next.

SAN CARLOS.—Work is being resumed on the old Green Monster mine, situated in the Inyos near old San Carlos, on the opposite side of the valley. It was patented some years ago and belongs to the Union Mining Company, a San Francisco incorporation. Supt. A. Wingard and Mr. H. Krebbs have the matter in charge.

DEEP SPRINGS.—Messrs. Greenly, Broder and Lake are in from Deep Spring District. All hands are in a state of suppressed excitement over the recent developments in the great Whiteman ledge, which has been traced, located and to a considerable extent sampled, for a distance of four miles.

WAUCOBA.—Wm. C. Chapin, a mining man of New York and San Francisco, arrived last week and is now over the mountains examining the mines of Waucoba District. He will go from there northward and take a look at some of the principal Deep Spring properties.

PORTWINE.—Mr. Edward Chenot, at the Camp Independence store, has a quantity of imported French port wine, old, and guaranteed as a pure article, a fact worth mentioning for the information of those to whom such may be of material value for medical purposes.

THE HAWLEY MILL.—Supt. Holt is crowding lumber, material and men to the front, with the intention of completing the new mill at Keeler in the shortest time possible.

BULLION SHIPPED.—The *Bentonian*, of the 16th, reports bullion shipments from the Diana mill to the amount of $7,572 since July 27, and $8,874 from the Indian Queen for the same period.

POLITICAL.—The call for Democratic primaries and County Convention will be found in full in another column.

"BORAX."—THE OLD SLATE RANGE TO THE FRONT.

PANAMINT STATION, Aug 10.

MESSRS EDITORS—I just learned from a gentleman who arrived here from Borax Lake that a Mr. Rock, from San Francisco, who is representing Eastern capital, has bought from J. W. Searles the Antrim mine, located at Slate Range, for the snug sum of $125,000. It is his intention to put up at once a forty-stamp mill, and started back to San Francisco to ship the machinery. Before starting for the city he appointed G. W. Blount as Superintendent of the mine, who is going to put a force of men at once to work taking out ore. In the appointment of Mr. Blount, Mr. Rock has made a good selection, as he is an old miner of long experience, and one of the discoverers of Slate Range. In fact, he will be the right man in the right place.

My informant also says that Borax Lake, politically speaking, is pretty lively at present. The employes there are about evenly divided. They were addressed by Mr. Blount on the 4th instant, on the Republican side, upon the political issues of the day. The Hon. James Storey, who was twice elected to the Iowa State Senate, and who is now stopping at the lake for the benefit of his health, will address them on the 20th, from the Democratic standpoint, and will reply to Mr. Blount.

Mr. Storey, I understand, has been engaged by the Democratic State Central Commitee to stump the State for Hancock and English.

BORAX.

The Republicans.

Pursuant to published call, the Republicans of this locality met in the court-room on Wednesday evening for the purpose of effecting the preliminary organization of a Garfield and Arthur Club.

The meeting was called to order by T. F. A. Connelly, Chairman Republican County Central Committee.

Judge A. R. Conklin was chosen Chairman, pro tem., and George H. Hardy, Secretary pro tem. The Chairman, on taking his seat, in explaining the objects of the proposed organization, addressad the meeting at considerable length, and in excellent style.

On motion, a roll was prepared by the Secretary, pledging its signers to aid in organizing the contemplated Club, and signatures invited thereto.

Following is the roll, the first nineteen in the order given signing while the meeting was in session, the remainder at the first opportunity thereafter:

A. R. Conklin, Geo. H. Hardy, P. A. Chalfant, H. D. Gelatt, T. F. A. Connelly, Thomas Parker, Omie I. Mairs, Lafe Gill, Thomas May, Jacob Vagt, Frank Lawrence, Charles A. Walter, F. M. Willis, W. H. Huff, Charles M. Green, Isaac Harris, J. F. Cannell, B. L. Brown, V. G. Thompson, W. F. Matlack, Julius C. Roeper, W. H. George, J. W. Smith, Geo. K. Phillips, A. Stecker, John Willett, Nathan Rhine and J. W. Symmes.

On motion, the Chairman appointed Committees of three each, to report at the next meeting, as follows:

On Permanent Organization—T. F. A. Connelly, Chas. A. Walters and W. H. Huff,

On Rules of Government—P. A. Chalfant, Jacob Vagt, and Lafayette Gill. Moved and carried, that the Chairman of this meeting be added to the last named Committee.

Ordered, that the Secretary be authorized to receive signatures to the above roll at any time between the present and the next meeting.

Also, that a copy of these proceedings be furnished THE INYO INDEPENDENT for publication.

Whereupon, pending motion to adjourn to meet for permanent organization at 8 o'clock, Wednesday evening, August 25, the Chairman again made an appropriate appeal to members to each individually to do all he honorably could to promote the Republican cause, for whose standard bearers three hearty cheers were given, and the meeting closed.

BISHOP ITEMS.—A correspondent at Bishop Creek favors us with these items: "Last evening [18th] Mr. Geo. Blazer and Miss Mary McCroskey were united in matrimony....Dan Ashley, of Benton, and Al. Morgan, of Bodie, are here, the latter looking after some mines on the head of Bishop Creek, which he thinks are good....Boggie, Reed & Laird say they have struck it rich in the Mineral Hill mine over in the White Mountains....The Garfield and Arthur Club intend visiting Round Valley in force on Saturday evening, and take it by storm....The Hancock and English Club met last Saturday evening; it now has seventy-five members enrolled. REGULUS, JR."

FIRES.—During the early part of last week the farm house of Julius Roeper, at George's Creek, was totally destroyed by fire. We have been unable to learn the exact loss or the particulars of the accident. Last Monday, also, Charley Begole's haystack, near Lone Pine, caught fire and was entirely consumed. It contained about seventy tons of hay, old and new. In this instance the fire originated from burning gun-wads, fired by some Chinamen who were intent upon killing coyotes.

THE ASSESSMENT ROLL.—County Clerk Crough has completed the work of "proving up" the assessment roll, finding the Assessor's figuring and footings correct all through. Following is the several classes of property:

Real Estate	$407,856 00
Improvements	358,545 00
Personal Property	484,479 00
Money	12,809 00
Total	$1,263,689 00

ROBBERIES.—Monday night last, robbers got away with all of Lola Travis' jewelry and small valuables at Lone Pine, while a night or two previously at Cerro Gordo, the residence of Dan Williams and Bill Johnson on Nob Hill was by like hands cleaned of grub.

TO GO BELOW.—Uncle Gid. Whiteman, who has been so long nearly helpless with paralysis, is to start by private conveyance Monday next for San Francisco, where his children are living. He has been at Mrs. Lewis's hospital at the Post for some time past, under Dr. George's care, and has improved so much that he feels able to undertake the proposed long and trying journey, more especially as it is his all absorbing desire to rejoin his children.

INDEPENDENCE, CAL.:

SATURDAY, AUGUST 21.....1880

Blocked the Trade.

A citizen of Cass ave. having a residence worth about $16,000, has a sign "For sale" on the house, and the other day an old African, driving a stone-blind horse and a wagon which wobbled all over the road, drew up in front of the place just as the owner came out.

"Boss, am dat place for sale?" promptly inquired the darkey, as he dropped the reins.

"Yes, sir," was the reply.

"What's your werry lowest figgers, sah?"

"Sixteen thousand dollars."

"Dat incloodes de back yard an' all, I 'spose?"

"Yes, sir."

The old man got down, looked over the fence and peered around, and finally said:

"How much would you 'low me on dat hoss and wagin ef we made a trade?"

"Oh, about $5."

"The querist settled his hat with a jerk, climbed into his wagon and was driving away without a word, when the citizen asked:

"Well, what do you think?"

"Wat does I fink, sah? Why, sah, I fink de trade am blocked. I'ze willin' to knock off sumthin', but I can't take no $5 for dis outfit. De hoss alone cost me $6."—*Detroit Free Press.*

In conversation with D. A. Bender, one of the railroad magnates now in Candelaria, the *True Fissure* learned that the work of grading from the Mound House that way, of the Carson and Colorado Railroad, is being pushed as rapidly as possible. It is the intention of the company to put all the men possible on the work, and get the grading finished to the south end of the lake. By the time this is accomplished, say the middle of October, the work of laying the track will be begun from the Mound House, and the graders will be moved forward on the line from the lake to this point. By the time the ties and rails will be in position to this end of the lake the grading will all be finished and the laying of the track to this point will be continued. From such data it will be seen that if the Fall is open and good weather continues until late in the season, the locomotive may be be expected here next January. The builders will hurry the work as much as possible, and if they make it in that length of time, or even longer, the people here will be very well satisfied.—*Homer Index.*

A CAMBRIDGE boy, after a week's absence in the country, wrote as follows to his mother in relation to the fun he was having: "I got here all right and forgot to write before. It is a very nice place for fun. A feller and I went out in a boat and the boat tipped over and a man got me out and I was so full of water I didn't know nothin' tor a good long while. The other boy is got to be buried after they find him. His mother come from Chelsea, and she cries all the time. A horse kicked me over and I've got to have some money to pay a doctor for fixing my head. We are going to set an old barn on fire to-night and I should smile if we don't have some bully fun. I lost my watch and I am very sorry. I shall bring home some mud turkles and I shall bring home a tame woodchuck if I can git him in my trunk."

VASELINE, or petroleum jelly, is one of the most useful substances for external use ever brought to the attention of the medical profession. Being neutral, bland and unchangeable, as a mere lubricant, or as a basis in the preparation of ointments and liniments, it deserves to supplant all animal fats and oils. And for the toilet, whether alone or in combination with aromatics, for the choicest pomades and soaps, excels all other substances in elegance and exemption from injurious properties.—*Sanitarian.*

A PROMINENT attorney, residing in Syracuse, while fishing a day or two since, pointed out to his companion a sign-board, remarking, "The fellow that put that up is a liar." "Why?" asked his companion. "Because the sign reads: 'No fishing in this brook,' and I caught the best trout in my basket right under that board."

IVORY that has been spotted, or has grown yellow, can be made as clear and fresh as new by rubbing with fine sand paper, and then polishing with finely powdered pumice stone.

GLADSTONE is not dead yet, nor has his power as a leader.

THE BEST PAPER. TRY IT!

BEAUTIFULLY ILLUSTRATED.

35th YEAR.

The Scientific American.

THE "SCIENTIFIC AMERICAN" IS A large, First-Class Weekly Newspaper of Sixteen Pages, printed in the most beautiful style, *profusely illustrated with splendid engravings*, representing the newest Inventions and the most recent Advances in the Arts and Sciences; including New and Interesting Facts in Agriculture, Horticulture, the Home, Health, Medical Progress, Social Science, Natural History, Geology, Astronomy. The most valuable practical papers, by eminent writers in all departments of Science, will be found in the Scientific American.

Terms, $3.20 per year; $1.60 half year, which includes postage. Discount to Agents. Single copies, ten cents. Sold by all Newsdealers. Remit by postal order to MUNN & CO., Publishers, 47 Park Row, New York.

PATENTS. In connection with the SCIENTIFIC AMERICAN, Messrs. MUNN & Co. are Solicitors of American and Foreign Patents; have had 35 years experience, and now have the largest establishment in the world. Patents are obtained on the best terms. A special notice is made in the SCIENTIFIC AMERICAN of all inventions patented through this Agency, with the name and residence of the Patentee. By the immense circulation thus given, public attention is directed to the merits of the new patent, and sales or introduction often easily effected.

Any person who has made a new discovery or invention, can ascertain, *free of charge*, whether a patent can probably be obtained, by writing to MUNN & Co. We also send *free* our Hand Book about the Patent Laws, Patents, Caveats, Trade-Marks, their costs, and how procured, with hints for procuring advances on inventions. Address for the Paper, or concerning Patents,

INYO COUNTY TRESPASS LAW

ADOPTED BY THE BOARD OF Supervisors August 7, 1880.

It is hereby ordered by the Board of Supervisors of the County of Inyo, State of California, that the following law be and the same is hereby declared to be the Trespass Law of Inyo County:

SECTION 1. Any owner, or any occupant of any land or possessory claim, finding any horse, mare, colt, mule, jack, jenny, horned cattle, hogs, sheep or goats, or any number of such animals, upon such land or possessory claim, whether such land or claim be inclosed or not, may take up and safely keep such animal or animals at the expense of the owner or owners, and shall be allowed for keeping said animal or animals the following named sums: For each horse, mare, colt, mule, jack or jenny, the sum of twenty cents per day; for each head of horned cattle, the sum of twenty cents per day; and for each head of swine, sheep or goats, the sum of five cents per day.

SEC. 2. Any person taking up animals under the provisions of this Act shall, immediately upon the taking up of such animals, notify the owner or owners of such animals, or his, her, or their agent or agents, if known to him, and living within six miles of the place where such animals were taken up, of the time and place of such taking up, together with the number, character and description thereof; also, as nearly as he can, the marks and brands, if any, of each animal; and such owner or owners, his, her, or their agent or agents, may, at any time after the receipt of such notice, and upon proof of ownership, tender the amount of damages claimed, and demand the delivery into his, her, or their possession, of such animals; and if suit shall have been commenced, such tender may be to the Justice or Judge before whom such suit is brought, or the owner or owners may give bonds with sureties, to be approved by the Justice or Judge trying the case, for the payment of all damages and costs of suit, and he may demand the release and delivery into his or their possession, of all animals held under the action, and the Judge or Justice shall order the immediate delivery of such animals; but if no owner, owners or agents of owners appear within two days to claim said animals, or if he or they appear and fail to pay satisfactory damages, or if the owner is unknown to him or her, or lives more than six miles from the place of taking up, then if the compensation and damages claimed be less than three hundred dollars ($300), the taker up of such animals shall, within two days, file a written complaint, verified by his or her oath, with the nearest acting Justice of the Peace in the township where such animals were taken up; or if the amount of compensation and damages claimed be more than three hundred dollars, then in the Superior Court of said county, setting forth in said complaint the facts, nature, location, and amount of the damages claimed, and a description of all animals so takenup, the number, the marks and brands, if any, and the supposed value of each animal, or the supposed aggregate value of such animals, and the time and place of taking up. The action shall be in favor of the owner or owners, or occupants of said lands or possessory claims, and against the property in rem; and any action thus commenced, may include all the animals thus found trespassing at any one time, whether of one or more marks or brands; and no judgment shall be entered under the provisions of this Act for damages done, except upon the testimony of at least two credible witnesses, whose names shall be entered in the Justice's docket, or in the minutes of the Court in which the action is had.

SEC 3. Upon the filing of the complaint, a summons shall be issued, and if said action be in a Justice's Court, shall be made returnable not less than fifteen nor more than twenty days from the date of issuance, and directed to all owners and claimants of the property described, and shall contain a description of each animal, with its marks and brands, if any. The summons shall be served by posting a copy of the same at the door of the room where said Justice or Superior Court is held, for ten days before the return day thereof, and also at the same time by filing a copy of such summons with the Recorder of said county; but the Recorder shall not file the copy of summons until the payment of a fee of one dollar; and it shall be the duty of said Recorder, on payment of his fee of one dollar, to forthwith compare the marks and brands, if any, described in said summons, with the record of marks and brands in his office, and thereupon to notify the owner or owners of such marks and brands of the fact of the pendency of such action, and of the time and Court when and where the same is set for hearing. The certificate of the officer stating the facts of such posting and filing, or the affidavit of any person, competent to be a witness, who shall have so posted and filed, shall be conclusive evidence of a sufficient service thereof; *provided*, that in any case when any animal or animals, seized under this Act, are alleged in said complaint to be worth fifty dollars or more, it shall be the duty of the County Recorder to cause publication to be made of the fact and time of seizure, and marks and brands, with a description of the animal or animals, in a newspaper of the county, at least ten days before the sale, the newspaper in which all such notices are to be made to be designated, and the rates of publication to be fixed, by the Board of Supervisors of the county.

SEC. 4. If the judgment be in favor of the plaintiff, the property may be levied upon and sold as other personal property seized on execution. The officer selling shall give a bill of sale to the purchaser, describing the animal or animals sold, and to whom, and the price paid for each, and referring to the judgment under which such sale was made. Any overplus of the proceeds of such sale, after satisfying the judgment and costs, shall be paid by the Justice or Clerk to the owner of the property, upon demand, if demanded within six months from the date of sale; and if not so demanded, the same shall, at the expiration of said time, be paid into the County Treasury, for the benefit of the County School Fund; and the owner may also redeem any animal or animals sold under the provisions of this Act at any time within sixty days after the sale, by producing satisfactory proof of ownership, and paying the purchaser the amount of purchase money in gold coin, with interest at the rate of two per cent per month; but if no redemption be made within sixty days such bill of sale shall be conclusive evidence of title in favor of the purchaser of the animal or animals therein described.

SEC. 5. The fees of all officers for service required under this Act shall be the same as now allowed by law for similar services in other civil actions, and shall be taxed as costs in the judgment.

SEC. 6. The Justice and Clerk shall keep a book, which shall be open to public inspection, and shall record therein all sales made pursuant to any judgment rendered in their respective Courts under the provisions of this Act, which record shall contain a description of the animals sold, the prices paid, the name of the purchaser, the amount of fees and charges, and the amount of surplus money, if any, arising from each sale, and whether any animal or animals have been redeemed; and if such surplus money shall be received by the owner of any animal, he shall receipt for it in the margin opposite such record, and the Justice or Clerk shall, without fee, deliver such book to his successor in office, and also all surplus money in his hands arising from any sale made by authority of this Act, taking his receipt therefor.

SEC. 7. Any person who shall drive stock from any lands or possessory claim other than his own, to any other lands or possessory claim, or shall take up any such animal or animals on any land or possessory claim other than his own, for the purpose of taking advantage of any of the provisions of this Act, shall be deemed guilty of a felony; and any person who shall fail or neglect to give the notice required by the second section of this Act, or shall rescue or take from the possession of the taker-up any animal or animals, without first having paid the compensation, fees, and damage claimed or awarded, and any officer violating any of the provisions of this Act, shall be deemed guilty of a misdemeanor.

SEC. 8. The owner or occupant of any land or possessory claim, whether inclosed or not, independent of the foregoing provisions of this Act, and if he fail to avail himself thereof, may maintain an action; *procidal*, such action be commenced within sixty (60) days in any court of competent jurisdiction, against the owner of, or person having the control of, any of the animals named in section one, for any damages such animals may commit up n his said land or claim; and if judgment be rendered in his favor, it shall be entered for the amount of the actual damage proved.

SEC. 9. Nothing in this Act shall be so construed as to prevent the free use for grazing purposes of all unoccupied lands not taxed; *provided*, that each actual settler, who shall have a prima facie title to the land upon which he is settled, shall be protected in the possession of one hundred and sixty acres, and residence on the land shall be considered a prima facie title; *and, provided further*, that said one hundred and sixty acres shall be marked and defined by visible and well defined monuments.

Approved and adopted this Seventh day of August, A. D. 1880 and ordered that the same be published in THE INYO INDEPENDENT for four successive weeks.

J. R. WESTERVILLE,
Chairman of the Board of Supervisors.

Attest: JOHN CROUGH, Clerk.

PROPOSALS

....FOR ...

Publishing and Printing.

NOTICE IS HEREBY GIVEN THAT sealed proposals will be received by the Board of Supervisors of the County of Inyo, State of California, at the office of the County Clerk, up to the hour of 12 o'clock M. on MONDAY, the FOURTH day of OCTOBER, A. D. 1880, to contract for county printing, as follows:

1. Advertising, such as is required by law and shall be ordered by said Board, including Notices for Proposals to Contract, Reports of Auditor and Treasurer, Proceedings of the Board of Supervisors, and the annual List of Delinquent Taxes. Said proposals shall submit to the Board the rate which will be charged per square of two hundred and fifty ems space for the first and each subsequent weekly publication.

2. The printing of two hundred and fifty copies of the Great Register of Inyo County, in the usual form, bund in paper. Bids must specify the price of such printing per name of each elector. Printed matter to be delivered at the Court House of said county.

Said contracts to continue for the term of one year from and after ratification.

Payment for such advertising and printing shall be made on bills duly sworn to and presented at the regular meetings of the Board, by warrants d awn upon the General Expense Fund.

The right to reject any and all bids is reserved.

Said proposals must be indorsed "Proposals for Advertising," and "Proposals for County Printing," and addressed to the Clerk of the Board of Supervisors, Inyo County. The same will be opened between the hours of 1 and 4 o'clock P. M., on said Fourth day of October, 1880.

By order of the Board of Supervisors

JOHN CROUGH, Clerk.

MINING.

MINING APPLICATION NO 161,

....TO THE....

OCCIDENT MINE.

U. S. LAND OFFICE, Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred linear feet of the "Occident Mine" or vein, bearing silver and gold, with surface ground three hundred feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 37, in Township ——, Range —— of —— Meridian, said Lot No. 37 being described in field notes of survey as follows, to-wit:

SURVEY OF EXTERIOR BOUNDARIES:

Began at a post on the southwest cor. of claim; marked the post "Post 1 Occident Mine." Said post is 2x3 inches square by 30 inches long and set in a mound of earth 20 inches high. From which var. 15 deg 55 min E., a pine stump 8 inches diameter bears N. 28 deg 50 min W 11 links. A pine stump 6 inches diameter bears N. 85 deg 1 min W. 45 links. A pine stump 20 inches diameter bears S. 33 deg 5 min W. 76 links. A pine tree 7 feet high x6 inches diameter bears S 39 deg 51 min E. 82 links. A pine bush 2 feet high x3 inches diameter bears N. 69 deg 10 min E. 67 links. From said Post the "Armagh U. S. Mineral Monument" by calculation bears N 20 degs 48 min W 17.17 chains. Thence with a var 15 deg 55 min E, 1st course—N 11 deg W 3.03 chains, ascending to point of hill at bottom of old prospecting cut 6.49 chains. End of slope —6.88 chains. On level line—commence descending 7.64 chains, old prospecting tunnel 8.42 chains. Old prospecting cut 12.47 chains. Old dump of prospecting cut 14.13 chains. Middle of Ygnacio Ravine—Ravine bears N 65 degs W 15.21 chains. Trail on ridge dividing Ygnacio Ravine from Cerro Gordo Cañon. Ridge bears W 16 07 chains. Rocky ridge—commence descending 17.19 chains. Middle of Cerro Gordo Cañon—commence ascending 21.85 chains. Wagon road—Citizens grade 22.72 chains. To post on N W cor of claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of rocks 2 feet high, marked the post "Post 2 Occident Mine." At foot of post is a cactus burr 20 inches in diameter growing in the rock. From said post a pine stump 2½ feet in diameter standing 8 feet below the wagon road, Citizen's grade, bears S 38 deg E 1.54 chains. No other suitable natural object within measuring distance. Thence with a var 15 deg 55 min E, 2d Course—N 79 deg E 2.27 chains, ascending rocky slope to "Post 3 Occident Mine" on north end of line of lode 3.42 chains. Rocky ridge bears south 4.54 chains. To a post on N E cor of claim. Said post is 30 inches long, 2x3 inches square, and is set in a mound of rocks 20 inches high, marked the post "Post 4 Occident Mine." From which a pine stump 20 inches in diameter bears N 40 deg 35 min E 1.01 chains. The top of a blue slate reef 10 links high bears S 43 min E 15 links. Thence with a var 15 deg 55 min E, 3d Course—S 11 deg E .97 chains. Wagon road—descending 3.03 chains. An old stone cabin. A tall pine tree stands 15 links to East of line, 3.42 chains. Middle of Cerro Gordo Cañon—bears S W. Commence ascending on steep, rocky ridge, 8.48 chains. Trail on ridge dividing Cerro Gordo Cañon from Ygnacio Ravine 11.77 chains. Open cut 30 feet west of mouth of an old prospecting tunnel in blue slate, 12 98 chains. Old trail—runs N 65 deg W 13 69 chains. Summit of ridge at old trail 14.34 chains. Summit of ridge commence descending 15.38 chains. Crossing of Belshaw toll road 22.72 chains. Post on S E cor of claim. Said post is 36 inches long, 3x3 inches square and is set in a mound of earth 25 inches high, marked the post "Post 5 Occident Mine," from which a red iron boulder 2½x3¾ feet square and standing 26 inches high bears S 84 deg 40 min E 85 links. A pine tree 9 links high standing 6 ft. west of bottom of a gulch—gulch bears S. bears N 35 deg 11 min E 1 06 chains. The middle of the Belshaw toll road bears S 79 deg W 18 links. Thence with a var 15 deg 55 min E, 4th Course—South 79 deg W 18 chains. Road—commence ascending, 2.04 chains. Quartzite ridge bears N—S 2.27 chains. Post marked "Post 6 Occident Mine" on south end of line of lode—commence descending 2.87 chains. Trail—runs N W and S E 4.54 chains. To place of beginning, "Post 1 Occident Mine," containing 10 32 100 acres from the Armagh U. S. Mineral Monument as herein described the mouth or entrance to the "Armagh Tunnel" as noted under the head of "Report" bears S 76 deg 55 min W 9.24 chains. The course of said Tunnel is S 58 deg 55 min E. Length 350 feet. Located on the 27th of March, 1880.

ARMAGH U. S. MINERAL MONUMENT.

The "Armagh U. S. Mineral Monument" is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon, and very precisely on the W. B line of the Ygnacio mine (as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Dep. Min. Sur.) and distant 17.51 chains from the S W cor stake of the Ygnacio mine.

At the point above given I drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter x16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high x5 feet in diameter at its base. Marked the top of post "U. S. Mineral Monument. Erected January 31, A. D. 1880, by Wm Crapo, U. S. Deputy Mineral Surveyor—under authority of the U. S. Surveyor General for California." From said post in mineral monument; with a variation of 15 deg 55 min E, the extreme end of the bluff on which the monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face of rock 7½ feet high bears N 60 degs E .07 links. The N E cor of an old adobe vaso chimney bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The N W cor of Rafael Diaz' house bears S 28 deg 33 min E 1.58 chains. An old well 30 feet deep on north side of Cerro Gordo Cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE.

Commence at "Post 1 Occident mine," thence with a var 15 deg 55 min E, S 79 deg W 3 03 chains to Post on S W cor of Ygnacio mine as surveyed for a patent N 11 deg W 17 51 chains. To U. S. Mineral Monument which when computed gives for a closing line from "Post 1 Occident Mine" to U. S. Mineral Monument N 20 deg 48 min W 17.77 chains.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 147 of locations.

The adjoining claimants are, on the west the San Francisco mine, on the south the Motor mine and on the east the Trachyte Flat mine.

Any and all persons claiming adversely any portion of said Occident mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

MINING APPLICATION NO. 162,

...TO THE....

ARMAGH MINE.

U. S. LAND OFFICE, Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred (1 500) linear feet of the "Armagh Mine" or vein bearing gold and silver, with surface ground six hundred (600) feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 38, in Township ——, Range ——, of Mount Diablo Meridian. Said Lot No. 38 being described in field notes of survey as follows, to-wit:

Commenced at "Post 1 Armagh Mine," on S E corner of claim. Said post is 30 inches long 2x3 inches square and is set in a rock mound 2 feet high, from which with a var 15 deg 55 min E a pine stump 18 inches high by 10 inches in diameter bears S 15¾ deg E 77 links. A pine stump 15 inches diameter bears S ¾ deg 30 min W 91 links. A red ferruginous quartz reef standing 4 feet high bears N 24 links. A pine stump 12 inches high x5 inches in diameter bears N 49 deg 30 min E 15 links. Thence with a var 15 deg 55 min E, N 11 deg W 3.20 chains. Ascending to summit of ridge commence descending, 6 98 chains; dump of old prospecting cut, 10.80 chains; Belshaw toll road, 13.16 chains; Belshaw toll road in middle of Cerro Gordo Cañon, commence ascending 14.25 chains; road running to Potosi house, 21.66 chains; wagon road—Citizens' grade—22.72 chains; post on the N E corner of claim. Said post is 30 inches long, 2x3 inches square, and is set in a mound of earth 20 inches high. Sage brush slope, sloping S W; no natural object for witness mark in vicinity. Marked post "Post 2 Armagh Mine." Thence with a var 15 deg 55 min E, S 79 deg W .07 chains. Trail runs N S; commence descending—2.20 chains; wagon road, Citizen's grade—4.54 chains; post on north end of line of lode, marked the post "Post 3 Armagh Mine"—8 43 chains. Trail runs N S—9.09 chains. To post on N W corner of claim, situated on sage brush slope, sloping to S W. Said post is 3 feet long, 2x3 inches in diameter and is set in a mound of earth 2 feet high; marked the post "Post 4 Armagh Mine." No suitable natural object within measuring distance. Thence Thence with a var 15 deg 55 min E, S 11 deg E, commence ascending—1.75 chains; commence ascending—3.97 chains; crossing of foot trail runs west—8.27 chains; toll road in middle of cañon, commence ascending, 18.45 chains; summit of ridge bears west; commence descending, 19.74 chains; south end of "Silver Wedge" claim, 22.72 chains, to post on S W corner of claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of earth 20 inches high; marked the post "Post 5 Armagh Mine," from which a pine bush 2 feet high bears N 76 deg W 19 links. The chimney of an old deserted vaso bears N 22 deg 30 min E 24 links. Thence with a var 15 deg 55 min E, N 79 deg E 63 chains. Descending into bottom of gulch—gulch bears south, commence ascending—4.55 chains. "Post 6 Armagh Mine," or south end of line of lode, 3.99 chains; crossing of toll road, 9.09 chains; "Post 1 Armagh Mine," place of beginning. From which post the Armagh U. S. Mineral Monument bears N 4 deg 10 min W 12.67 chains, by calculation, containing 20 64 100 acres.

Location of the Armagh Tunnel.—From the "Armagh U. S. Mineral Monument" the mouth of the Armagh tunnel bears S 76 deg 55 min W 9.24 chains. The course of said tunnel is S 58 deg 55 min E. Length, 350 feet.

ARMAGH U. S. MINERAL MONUMENT—DESCRIPTION THEREOF:

There not being any lines of the U. S. public land surveys within 100 chains of the Armagh mine, I built a Mineral Monument and connected therewith. Said Mineral Monument is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon and very precisely on the west boundary line of, and distant 17.51 chains from the southwest corner stake of the Ygnacio mine, as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Deputy Mineral Surveyor. At this point drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter by 16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high by 5 feet in diameter at its base. Marked the top of the post "U. S. Mineral Monument. Erected January 31, 1880, by Wm. Crapo, U. S. Deputy Mineral Surveyor, under authority of the U. S. Surveyor General for California." From said post in Mineral Monument, with a variation 15 deg 55 min E, the extreme end of the rocky bluff on which the Mineral Monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face 7½ feet high bears N 60 deg E .07 links. The northeast corner of an old adobe vaso chimney, a Mexican furnace for smelting silver and lead ores, bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The northwest corner of Rafael Diaz' house bears S 38 deg 23 min E 1.58 chains. An old well 20 feet deep on north side of cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE.

Commence at "Post 1 Armagh Mine," thence with a var 15 deg 55 min E N 79 deg E 1.51 chains to west boundary line of Ygnacio mine, and at a point 325 feet—4.92 chains from the southwest corner stake of the Ygnacio mine; thence with a var 15 deg 55 min E, N 11 deg W 12.59 chains to U. S. Mineral Monument.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 146, of locations. The adjoining claimants are, on the East, the Greenly mine.

Any and all persons claiming adversely any portion of said Armagh mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, in the State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

JAMES E GOODALL,
Register.

ASSESSMENT NOTICE.

LOS ANGELES MINING AND SMELTING Company.

Location of Works, Resting Springs, Inyo County, California

Location of Principal Place of Business, Los Angeles, Los Angeles County, California.

Notice is hereby given that at a meeting of the Board of Directors of said Company, held on the Third day of August, 1880, an assessment (No. 4) of two Dollars per share was levied upon the entire capital stock of said corporation, payable immediately, in United States gold coin, to J. M. Elliott, Secretary of said Company, at his office, No. 1 Temple Block, in the city and county of Los Angeles, State of California.

Any stock upon which this assessment shall remain unpaid on Monday, the Twentieth (20th) day of September, 1880, will be delinquent and advertised for sale at public auction, and unless payment is made before, will be sold on TUESDAY, the NINETEENTH (19th) day of OCTOBER, 1880 to pay said delinquent assessment, together with costs of advertising and expenses of sale. By order of the Board of Directors.

J. M. ELLIOTT, Secretary.

Office of the Secretary—No. 1 Temple Block, City and County of Los Angeles, California.

LEGAL.

PROBATE NOTICE.

IN THE SUPERIOR COURT OF THE County of Inyo, State of California. In the matter of the Estate of Nancy Williams, deceased. Order to show cause why order of sale of real estate should not be made. It appearing to said Court, by the petition this day presented and filed by John A. Lank, the Administrator of the estate of Nancy Williams, deceased, praying for an order of sale of real estate, that it is necessary to sell the whole of the real estate to preserve the same from destruction.

It is therefore ordered by the said Court that all persons interested in the estate of said deceased appear before the Superior Court on MONDAY, the SIXTH day of SEPTEMBER, A. D. 1880, at 10 o'clock in the forenoon of said day, at the Court Room of said Court, at the Court House, in the County of Inyo, to show cause why an order should not be granted to the said Administrator to sell the real estate of said deceased as shall be necessary.

And that a copy of this order be published at least four successive weeks in THE INYO INDEPENDENT, a newspaper printed and published in said county. JOHN A. HANNAH, Judge.

Dated July 17, 1880.

OFFICE OF THE COUNTY CLERK, of the County of Inyo.

I, John Crough, County Clerk of the County of Inyo, State of California, and ex-Officio Clerk of the Superior Court in and for said County, do hereby certify the foregoing to be a true, full and correct copy of an order duly made and entered upon the minutes of said Superior Court.

WITNESS, my hand and the Seal of said Superior Court, this Seventeenth day of July, A. D. 1880. [SEAL] JOHN CROUGH, Clerk,
By DANIEL CROUGH, Deputy Clerk.

Odd Happenings.

THE sun's rays, focalized through the glass of a round water bottle at Alyth, Scotland, set fire to a house.

A Berks County, Pa., hen laid a nest full of eggs in the forks of a tree, twelve feet from the ground where she hatched the eggs out.

A Reading, Pa., man only sixty-five years old has been married three times, and the father of eleven pair of twins. He has forty-one children in all.

A snake was killed on the farm of W. H. Williams, Gwinnett County, Ga., which had two feet with five toes, the feet being shaped like those of a lizard.

A beautiful woman aged twenty-two, very intelligent, with pleasing manners, is an inmate of the Virginia Penitentiary, serving a long sentence for horse stealing.

After a recent shower at Kokoma, Ind., the ground was found covered with fish. They were the size of minnows.

The St. Paul and Pacific elevator at Minneapolis has been seriously damaged by a peculiar worm that perforates the boards and lets the wheat down as if running through a sieve.

A few days ago while an excursion from out on the Lake Shore road was spreading itself over Detroit, a pair of lovers seated themselves on the steps of the City Hall and of course took hold of hands. Some of the officials in the building noticed this, and one gentleman offered to bet a dollar that they would squeeze for a straight hour without once breaking their hold. The bet was taken, and a third party took his station where he could watch the result. It was an awful hot day, but that didn't make the least difference. At the end of forty minutes the two red hands were tightly clasped. So they were when five minutes more would have struck the hour. Then the young man made an uneasy movement; leaning over to her flaxen curls he said: "Smantha, I'm going to let go of your hand for a minute, but you won't be mad, will you, darling; I wouldn't let go till you did only some sort of bug is crawling down my back, and I can't keep my mind on you and bugs at the same time."—*Detroit Free Press.*

THERE is political humor in Georgia. Albert Cox, who is running for Congress in that State is thus reported in a speech made at Columbus: "If you see fit to send me to Congress, I will go to the best of my ability. [Cheers.] I believe I would like to go. [Renewed cheers.] In fact, I know I want to go. [Loud cheers.] I have heard that the salary is ample, and, as I have a small family, I won't insist on its increas. [Cheers.] As I am fond of vindication I want to vindicate myself. It has been hurled at me like a thunderbolt that I am too young. In answer to this, I would say, first, I can't help it, and it is not my fault; second, I am trying to grow older every day; third, I am succeeding; fourth, I am afraid I will be much older than I am before I get to Congress." [Prolonged applause.

WE understand that the chief mission East of L. A. Scowden, the civil engineer, and William Irwin, Superintendent of the Standard mine, is the promoting of a railroad enterprise to connect Bodie with the timber belt lying south of Mono Lake, eventually probably to be part of a system mentioned some weeks ago, crossing the Sierras toward the San Joaquin Valley and extending into Owens Valley. This is mostly an enterprise formulated by ex-Senator Stewart, in connection with J. B. Haggin, Wm. M. Lent and others. It is practical, and in due time would be a paying investment. The local part of it has been needed for two years past.—*Bodie Free Press.*

Scientists Puzzled.

The Delmater Iron Works in East Thirteenth street were visited this morning by a number of scientific engineers and believers of motor-power for the purpose of inspecting the quaint little engine now on exhibition there, built for Capt. Ericsson. The miniature engine is constructed and worked on the caloric motor principle after the designs of Capt. Ericsson, who, for many years, has studied this and the solar principle.

The long headed scientists seemed to be more or less puzzled as they went into the details of construction of the engine, and at the close of their examination had any quantities of theories to advance.

The engine appears to be nothing but a plaything, standing as it does among so much heavy machinery, but its power, nevertheless, when in motion, excites the surprise and admiration of the most dubious.

The engine has no boiler nor valves yet it has the power of pumping water fifty feet high, and higher if necessary.

The motor power is obtained from heated air placed in the cylinder, the air being heated by means of three gas jets, which are kept burning under a closed cylinder. When the proper heat is obtained, the piston is forced through the cylinder head. The air is cooled in the upper part of the cylinder by means of a water jacket, and can be used over again. With a pressure of twenty pounds to the square inch, the engine pumps 200 gallons of water fifty feet high.

It occupies a space of only thirty-nine by twenty inches, and stands forty-eight inches high. When in motion, it is entirely noiseless.

It is believed these engines, worked on the caloric principle, will become very popular as soon as they are better understood, the expense of working them not exceeding three cents an hour. —*New York Mail.*

Hints for Preserving Fruits.

A useful hint to cooks was given at a recent sanitary convention in Grand Rapids, Michigan. It was pointed out that by adding sugar to sour fruits, during the cooking process, the greater part of the cane sugar was converted by the aid of the acid into grape sugar, which does not possess half the sweetening power. By cooking the fruit first and then adding the sugar to an agreeable sweetness, a very great deal of sugar is saved. Raspberry, strawberry, and cherry syrups of the German Pharmacopœia have to be made by bruising the fruit and letting the marc and juice ferment, after which the juice is strained and filtered. A better and safer way is to add at once to the freshly bruised fruit five to six per cent. of alcohol, to let the whole stand for some days, decant and filter. Lastly, boil up once to remove the greater part of the alcohol. Syrups made with the juice prepared as above retain in a remarkable degree the odor and taste of the fresh fruit.

THEY have queer girls in Colorado. One of them who resides in Cache la Poudre valley has been receiving the attentions of a young man for a year, becoming impatient at his failure to bring matters to a crisis, she resolved to ascertain his intentions. When next he called, she took him gently by the ear, led im to a seat, and said, "Bobby, you've been *foolin'* round this claim for mighty near a year, an hev' never yit shot off yer mouth on the marryin' biz. I've cottoned to yer on the square clean through and hev stood off every other galoot that has tried to chin in, an' now I want yer to come to bizziness or leave the ranch. Ef yer on the marry an' want a pard that 'll stick to yer till yer pass in yer checks, I'm yer hairpin: but if that ain't yer game draw out an' give some other fellow a show for his pile. Now sing yer song or skip out." He sang.

THE United States Senate is at present composed of seventy-six members. Of these forty-three are Democrats—if we can count on David Davis as a Democrat—and thirty-three are Republicans. Of the seventy-six Senators the terms of twenty-five expire on the fourth of March next. Of the outgoing Senators fourteen are Democrats and eleven are Republicans. The Democrats will lose Thurman, who will be succeded by Garfield; and the Republicans will lose Bruce, who will be succeded by George. Of the remaining twenty-three only seven seats are doubtful; they are occupied by Eaton, Randolf, Kernan, Wallace, Booth, Hamlin, and Sharon. Of these seven, four are Democrats, and if they are succeded by Republicans, the Democratic majority will be reduced to six—Thurman and Bruce being a standoff.

"YES; I am to be married, my dear friend. The young lady is pretty and vary clever, yet she cannot play the piano-forte, that is her only failing." "Why, I should call that a blessing. It is certainly no fault." "Hear me through. She cannot play the piano-forte, and yet she always insists on playing!"

THE editor of a newspaper that has adopted phonetic spelling, in a measure, received a postal card from an old subscriber in the country, which read as follows; "I hev tuk your paper for leven yeres, but if you kant spel enny better than you have been doin for the las to months you may jes stoppit."

A MAN out West obtained a divorce from his wife, and married again within three days after the decree was granted. An Irishman, commenting on the man's action, remarked, "Bedad, he couldn't have had much respict for his first wife, to be marrying again so soon after lavin' her."

Secret Society Notes.

Forty-three Lodges and 2,500 members in California is the status of the Knights of Honor at the present time

The District Lodge of Good Templars will hold a public meeting and reception on the evening of August 28.

The Temperance Legion continues its successful work at Y. M. C. A. Hall, with a large attendance at its Thursday and Sunday evening meetings.

The Chosen Friends are adding rapidly to their members.

Good Templarism continues to advance. The present year will be the most successful one this Order has ever experienced in California. New Lodges are frequently reported.

The many "Five-Cent Temperance Coffee Saloons" all over the city are constant reminders of the successful "Murphy movement."

Forestry still advances, and the Ancient Order can be reported as doing well.

Father Mathew T. A. B. Society, No. 1, is adding to its roll weekly. The Sunday evening meetings are well attended.

The Boys' and Girls' Aid Society, 68 Clementina street, have pleasant gatherings for the children every Thursday evening. This Society is doing a good work.

The American Legion of Honor have several new Councils.

The Knight of the Golden Rule are doing more or less work all the time. —*S. F. Call.*

The Woman Who is Not Particular.

Go where you will, you will see the woman who is not particular. It makes not the least bit of difference in the world to her where she sits or what she has to eat. She is not particular; it makes no difference to her. So she sits in the cosiest seat and eats of the best that is going. Into a railroad train the other day entered the woman who is not particular. She had a child in her arms. In the center of the car were several vacant seats. Most persons would have taken one of them; but when the gentlemen with her, presumably her husband, pointed to these seats, the woman replied sweetly: "Oh, I'm not particular, Henry, I'll sit right down here." And down she sat, with her 150 avoirdupois, not to mention the infant, into the half-seat by the door. You see, she wasn't particular. She didn't mind that a lady was already in the seat; she didn't mind that two-thirds her own body rested on that lady; she didn't mind that that lady was immovably pinned against the iron frame work of the seat; she didn't mind that her baby was mussing the lady's bonnet trimmings with its unwashed hands; she didn't mind that it had dropped its moistened gingerbread in the lady's lap. Oh, no, she wasn't particular.

DURING the past Spring and the present Summer much attention has been called to the Deep Spring Valley mines in Inyo County. We have conversed with many parties, during the past few months, who have given these mines a superficial inspection. In fact no other kind of an observation can be had there, as the prospecting so far done can be called merely surface work. Some of these parties have been reticent in expressing their views, others give it as their opinion that there are probably rich mineral deposits there, while others again are enthusiastic in their belief that within a twelve month Deep Spring Valley is destined to be agitated with a boom of no inconsiderable magnitude. Robert Linford, an old Bentonian and thorough miner, has recently been down and carefully scrutinized these new mines so far as he enabled to do so. Linford says "the stuff" is undoubtedly there, and it only requires hard knocks and milling facilities to open up a bullion producing district. He also furnishes the information that parties are now in San Francisco negotiating for milling machinery to put on the spot at once. If the indications around the grass roots, as it were will justify the erection of a reduction mill it looks as though Deep Spring Valley might come to the front ere long.—*Bentonian.*

A REMARKABLE MAN.—As an Indian fighter, when under the controlling influence of drink, "Grizzly Dan" is also a holy terror. In Montana he was once set upon by a whole tribe of howling red devils and was obliged to run for his life. He headed for the brink of a cliff about 700 feet high, dodging the bullets fired at him as he ran, being able through long practice to tell the course of a ball by the sound as it approached from the rear. Grizzly Dan unhesitatingly leaped over the cliff, to the amazement of the Indians, who gathered in a row to watch his fall. Dan turned in the air as he was falling, raised his Winchester rifle to his shoulder and pulled the trigger. An Indian toppled over with a ball through his left eye, and Dan kept pulling the lever and trigger until 17 of the red devils had balls through their left eyes and were falling over the cliff after him. The eighteenth shot only carried away an Indian's nose, as the air was so full of falling Indians between Dan and the top of the cliff that his aim was a little confused. He struck feet foremost in the river below and swam ashore uninjured. The Indian remaining on the top of the cliff was the sole survivor of the tribe, and was ever afterwards known as "Man-with-a-hole-in-his-nose.—*Carson Appeal.*

THERE is no accounting for tastes; a summons in a breach of promise suit against the bridegroom was sent in with the bridal presents.

JUDGE SEPULVEDA of Los Angeles, has decided that the law passed by the last Legislature, forbidding the licensing of Chinese, is unconstitutional and void.

INDEPENDENCE, CAL.:

SATURDAY, AUGUST 28.....1880

FOLLOWING is the only business transacted at Chicago, August 29, by the Triennial Conclave which is made public: Benj. Dean, of Boston, was elected Most Eminent Grand Master; R. E. Withers, of Alexandria, Va., Deputy Grand Master; Chas. Roome, of New York, Grand Generalissimo; John P. S. Gavin, of Lebanon, Pa., Grand Captain General; Judge Hugh McCardy, of Carunna, Mich., Grand Senior Warden; Wm. L. Thomas, of Danville, Ky., Grand Junior Warden; J. W. Simonds, of New York, Grand Treasurer, and T. S. Parvin, of Iowa, Grand Recorder. The Conclave has granted a charter to Eureka Commandery, No. 2, Eureka, Nevada.

THE New York *Herald* has a long article going to show that the new census demonstrates that the great South is passing out of existence as a political factor. According to its figures the following States will lose in representation: Alabama, Florida, Georgia, Louisiana, North Carolina, Tennessee, Indiana, Maine, New Hamshire, and Vermont one each; New York three, and Pennsylvania and Ohio two each. The following will gain: Missouri one, Texas three, Michigan one, Iowa two, Wisconsin one, Minnesota two, Nebraska three, California two, and Oregon one.

DURING the year ending June 30, 1890, 657,243 immigrants arrived in this country. In 1873, the year of the greatest immigration, there arrived but 459,803 immigrants. There was therefore an increase last year of nearly one-third more than in any preceding year. During July last 49,922 immigrants were landed in the United States, of whom 11,000 were from Germany, 6,000 from Ireland and 5,000 from England.

THE managers of the State Fair at Sacramento have decided to have a stand for the special accommodation of the press. Heretofore the reporters have been compelled to report the races sitting on the railing along side the home stretch and the next day listen to the managers heap profanity upon them for not getting the time correct.

THE steamer *Newbern* from Mazatlan brings the news that the United States yacht *Freda* arrived there from Socorro Island on the 17th inst. She found no signs of Capt. Jones, wife and boat's crew of the abandoned bark *Mathilde*. Nothing was heard of the English yacht *Lancashire Witch*, on the same errand as the *Freda*.

AT a Consistory at Rome, August 20, the Pope announced the following appointments: P. Monogue, Virginia City, Nevada, Bishop in Partibus, with a future succession to Bishop O'Connel, Grass Valley, Cal.; Rev. Portillo, Bishop in Partibus and Vicar Apostolic of Lower California; James Lacid Patterson, Bishop in Partibus.

SIXTY-SEVEN Russian immigrants, some survivors of a party of 330 which left Russia in 1877 for Brazil, have arrived at New York, sick and destitute. They found the South American climate unsuited to them, and after losing all their funds, decided to leave the country, where they had experienced such hardships.

A WRITER in the Redding *Independent* gives the following Indian names for rivers: For the Sacramento, Wy-Mim or North river; for Pitt river, Pool-Mim or East river; for the McCloud river, Winnimmim, or Middle river.

THE new Atlantic Cable Company has been registered with a Portuguese concession for a cable from England to the Azores, and thence to America. A financial contract has been concluded for laying a light cable by this route.

THE Santa Clara *Journal* says: Miss Julia Doty, formerly of Manchester, N. H., has recieved intimation that 30 factory girls from that place contemplate a visit to California in hopes of bettering their condition.

IT is said that 20,000 Americans have visited Europe this season and left $10,000,000. They will come home and complain of hard times and scarcity of money.

THE Mariposa *Gazette* says that a farmer of that county cures rattlesnake bites by bathing the affected parts with coal oil.

HERBERT SPENCER, the great writer, begins next year a tour of the world, going from England to the United States first.

THE First National Bank of Los Angeles has been authorized to commence business with a capital of $100,000.

THE COUNTY GOVERNMENT BILL

In the San Francisco *Chronicle*, of the 23d, we have an account of the proceedings in a suit before Judge Spencer in San José, the result of which is destined to have an important bearing upon the interests of the entire State; it is in a test suit to determine the constitutionality of the County Government law. As stated in the dispatch, the Supervisors of that county, some time ago, found themselves, by reason of the provisions of the law in question, in an exceedingly vexatious and uncertain position regarding their control of the county finances, to settle which difficulty a test case was decided upon.

The law referred to prohibits a Board of Supervisors from allowing in any one month more than one-twelfth the annual revenue of any fund, and as the annual revenue of the funds—except the Road Fund, over which the Board exercises partial control, and of the School Fund, which was exempt from the action of the law—could not be known before the taxes for the year should be collected and apportioned, the question arose whether or not the Board could allow any bills for services rendered or articles purchased upon any fund not then possessing a cash balance. In order to determine the matter the San José Board allowed a claim upon the Infirmary Fund, which the Auditor refused to pay. In due time the case was brought to legal issue before Judge Spencer of the Superior Court, and a decision rendered in favor of the Board. The Court held that the Act did not contemplate the absolute stoppage of the wheels of government, as must follow from the inability of the county to meet its obligations. The case rested at this, though the principal points as to its unconstitutionality had not been touched upon. In a short time the Board again found themselves in another like quandary as to their powers under this bill, and now the case is to taken up to the Supreme Court, where the broad question of the constitutionality of the County Government bill will be tested.

The importance of the expected decision will be appreciated when it is understood that it not only concerns the manner of government in the several counties of the State, but also the question of the election of all the county officers at the approaching election.

The bill will be attacked principally if not solely on the ground that it is special, San Francisco being excepted from its provisions. The best lawyers in San José are confident it will be decided as a special law, in which case it is, of course, unconstitutional, and a nullity. It will be pressed to a decision as rapidly as possible.

MR. J. S PHILLIPS, M. E., formerly of San Francisco, but now of No. 1 Wall Street, New York, came to this city this week, en route to the Owens River Valley, where he is to examine a mine for Eastern capitalists. The mine is the old Chrysopolis, about ten miles above Independence, Inyo county. A 20-stamp mill was built on this property some fifteen years ago, but they failed in some way to treat the ore successfully, and it has been idle ever since. Mr. Phillips will thoroughly examine the five or six veins of the mine and will take a number of men with him to prospect the works clearly. If he condemns the mine, he will return in five or six weeks. If he approves he will remain longer and start it swinging. Mr. Phillips has had many years experience in the mining business, and is the author of the "Explorers, Miners, and Metallurgists' Companion." The Eastern people have this time sent a man to examine for them who is practical in his views.—*Scientific Press.*

THE daily attendance at the Mechanics' Fair is constantly increasing and the financial exhibit bids fair to equal, if not exceed that of previous years. The receipts up to last Saturday night, exclusive of the revenue from special privileges and the sale of tickets at stores and offices aggregated the sum of $11,363 50. The spaces are now all filled, the exhibits completely arranged, and the noise of the carpenter's hammer no longer jars upon the ear of the visitor. The art gallery is attracting more than usual attention, and justly so, as it surpasses any similar display of previous years. The machinery department receives its usual share of attention, and the garden affords a cool and pleasant haven for the weary and overheated visitors.—*S. F. Chronicle.*

WE would remind prospectors that nine monuments should be put up on every claim to comply with the law. Monuments on the lode line simply, will only hold twenty-five feet on each side of the ledge, no matter if the location notice does say that the locator claims 300 feet on each side of it. If the side lines are not defined the law holds that there are no side lines, and will only recognize the locator's right to the lode line in case of contest. A great many claims in Homer District have never been properly monumented, which means that the locators have left themselves open to intrusion and despoilment. We advise prospectors to pay more attention to the law hereafter in this regard.—*Homer Index.*

A CORRESPONDENT writing from Riverside, San Bernardino county, bases big hopes on the Carson and Colorado railroad, after it penetrates Owens river valley. It is expected to enhance the fruit interest of all kinds by furnishing a mining market everywhere east of the Sierras and as far north as the Central Pacific. There is good logic in this.—*Bodie Free Press.*

Trouble is imminent between the Alaska and British Columbia Indians over the latter's poaching on the former's sea otter grounds.

The Knights Templar at Chicago, nominated Benjamin Dean of Boston, as most Eminent Commander.

The harvest in the west of Ireland is now certain to be abundant.

The marriage of Count Von Halsefelt with the American lady, Miss Moulton, has been legally dissolved.

Work will be begun at once on the new wagon-road from Bodie to the point at the southern extremity of Walker lake where the Carson and Colorado road can be intersected. Five tons of powder have been shipped from Carson for the work.

A man who was one of the five in a wagon which was struck by a locomotive in Syracuse, says the engineer was flirting with a young lady at the time.

Erskine Wood, shot by Hiram C. Briggs at Coeymans the other day, ran half a mile and lived fifty-eight hours after the bullet passed through his heart.

The man who fired at Lord Lytton, Viceroy of India, and then declared himself insane, has recovered and has been committed for trial.

An English rector has omitted the prayers for Parliament since the Liberals came into power, and says that "he does not think such a lot worth praying for."

THE use of whiskey for rattlesnake bites in Colusa county has increased so enormously during the past twelve months that the overworked snakes have resolved to leave the State, unless the Board of Immigration reinforces them strongly. They work on double time, and yet can't do half the biting that is demanded by the consumers. One snake who does business at Colusa, is six weeks behind his orders, and three of the clerks employed in the Court-House are sick.

A Western man having lost his wife a sympathizing friend remarked upon his woe-begone appearance. "Well I guess you would look thin, too," was the melancholy rejoinder, "if you had to get up before daylight, make the fires, draw water, split wood, and feed the cattle before breakfast. I tell you what it is, if I don't get somebody to fill poor, dear, sainted Maria's place, I shall be resting by her side before many weeks."

BUILDING STONE is manufactured from furnace slag on a large scale at Osnabruck, Germany. One establishment delivered 6,000,000 brick during the last year. The artificial stone is valuable for ventilation, as it permits four times as much air to pass as ordinary building stone; it also requires 20 times as long to saturate the stone with moisture as it does the bricks baked from clay.

Manufacturing cities in Massachusetts have grown largely in population during during the last decade. The increase in the older established manufacturing cities has been from thirty per cent. in Lynn to fifty in Lowell, which has become the second city in the State, and almost one hundred per cent. in Holyoke and Fall River.

OUR people are stricken but undismayed. The burnt district will be rebuilt as fast as circumstances will permit. We hear of but very little fault-finding, and less absolute throwing up of the sponge. A few months will heal most of the scars.—*Eureka Sentinel.*

THE necessary orders have been given to provide for additional storage room at the Philadelphia mint for the standard silver dollars. A new vault has been ordered from a well-known manufacturer in Boston of sufficient capacity to store four million dollars in silver.

THEY are showing inventions in England in devising pretty additions to weddings. Four little children dressed as sailors holding the bride's train in the bridal procession was one of the features of an English wedding last month.

AN old farmer caught a thief in his barn, and went for him with a harness trace. The neighbors aroused by the cries of the man, rushed in and asked the farmer what he was doing. "Trying to trace out stolen property," was the reply.

A HANDSOME girl of Indianapolis, Indiana, who habitually used arsenic to improve her complexion, has not only nearly lost her eyesight, but her contemplated marriage with a wealthy and reputable physician is indefinitely postponed.

IN the Paris Postoffice recently there was found, in a panel adjacent to the letter box, a letter which had been posted 50 years ago, and which found the person to whom it was addressed still alive.

INDEPENDENCE, CAL.:

SATURDAY, AUGUST 28.....1880

FATAL ACCIDENT.—Last Sunday, at about 4 o'clock in the afternoon, J. E. Shipton, Division Agent of the Cerro Gordo Freighting Company, was instantly killed by being crushed between two heavily loaded freight wagons. So far as we can give them, the details of the sad affair are as follows: Mr. Shipton was coming up the road on horseback intending to cross the river and go down the opposite side to look out a route by which to take to the foot of the mountain on that side a load of mill machinery. Just before reaching the point where he would leave the main road to go to the river, he overtook one of the company's teams crossing a gulch some three and a half miles this side of Lone Pine. The driver had taken his two wagons across separately; with a portion of his team he was pulling up the back-action to couple it on to the front wagon, when Mr. Shipton stepped in to guide the short tongue of the former to position for coupling. As very often happens, the clevis on the tongue failed to catch on the projection designed to receive it, allowing the rear wagon through its own momentum to run against the other with great force, although the team had ceased pulling at the proper instant. The ends of the bottom planks of the two wagon beds came directly together, and between them Mr. Shipton's head was caught and crushed to pieces. The driver was not aware of what happened until after he had turned his team to take a back pull on the back-action that it might again be brought into required position. After making the shocking discovery that Mr. Shipton was held between the wagons and lifeless he had to pull the wagon back with the team to release him. A small rod of iron, part of the load of the front wagon, projected clear of the bed five or six inches, and this, it is altogether likely, was the cause of the accident; it had been driven through the coat collar at the back of the neck, but without injury to the flesh, and held the body suspended after the wagons were drawn apart. Deceased was a native of Jo. Davis county, Illinois, where he leaves a wife and a son some sixteen years of age, and was in his fortieth year at the time of his death. Through an unfortunate mining operation he had lost quite a competence, and as a sequence, a few months ago sought and obtained the position he held at the time of his death, and in which he has by his strict attention to business, accommodating spirit, and gentlemanly and genial manners, won the highest esteem of this entire public, and his sad demise is regretted by every one in this section as that of a near friend. He was buried at Lone Pine, the sad rite being witnessed by about every person in the place. Wagon Master Lott, of the same company, as we learn from several different persons cognizant of the facts, displayed so much heartlessness in overhauling deceased's personal effects when taken charge of by Justice of the Peace Paul Houard, as to excite a great deal of unfavorable comment wherever the facts have been made known—a circumstance to which we allude in this connection at the solicitation of several different persons.

POLITICAL.—Our Round Valley correspondent gives us an interesting account in detail of the movements, arguments, etc., of the Bishop Creek and Round Valley Garfield and Arthur Club on the occasion of the recent visit of the Bishop division to Round Valley. We could not devote space to any local matter more interesting to local readers in general than to fill it with just such racy accounts of the doings and sayings of our own citizens. But as "like begets like," it is obvious to our own knowledge as publishers that our space would even now be swamped were we to give place to political *arguments*. It is due our much esteemed correspondent to say that we do not consider his report as a political argument, or intended as such, but still enough so in its bearings as to call for a response from those who take issue with the views reported. But from other sources and localities already come political essays with requests to publish. To save offense hereafter, we must from the start reject everything designed as argument, but especially desire full reports of political transactions by Clubs, Conventions, etc., in every detail, barring arguments alone. With this understanding, we condense the report before us as follows: "Quite a number of prominent Republicans from Bishop Creek—several vehicles loaded with Garfieldites, Drum Majors, drums, flags, etc., besides a cavalcade—invaded Round Valley last Saturday night (August 21), and made things lively till midnight, what with a torchlight procession, speech making, cheering, and the like. Assembled at the school house, a meeting was organized with Mr. R. Hilton as Chairman. Judge Sneden, and Messrs. Mallory, Roe, Wannicott, McArthur and T. E. Jones each addressed the assembly earnestly and to a good purpose—from the Republican standpoint, of course. At the close it was arranged that the Bishop Creek and Round Valley Garfield and Arthur Club would visit Big Pine on Saturday evening, September 4th. Ye sinners, be prepared for a fusilade."

THE G. & A. CLUB.—The Garfielders perfected the organization of their Club on Wednesday evening, adopting the name of the "Inyo Garfield Club". Judge Conklin was chosen President. Dr. W. H. George and Jacob Vagt 1st and 2d Vice Presidents. Geo. H. Hardy Secretary, Thomas Parker, Treasurer and Lafe Gill, Sergeant at arms. Save when otherwise ordered, the regular meetings take place every other Wednesday. As will be seen by notice in this issue, the next meeting is set for September 8, at which time and occasion delegates to the County Convention will be chosen to represent this precinct. At the same time a local Glee club will make its debut and present some new campaign songs. The roll now comprises forty names.

AN APPEAL FOR JUSTICE.

LONE PINE BRIDGE, INYO CO., CAL., August 24, 1880.

MESSRS. EDITORS: Through the columns of your valuable journal I wish to explain myself. When the Lone Pine bridge was burned at the hands of an incendiary, more than a year ago, the Hon. Board of Supervisors of Inyo county, consisting of Messrs. Meysan, Westerville and Garretson, came to my place of business and ordered me, in the interest of the county, to place my private bridge in such condition that the traveling public could safely cross it, night or day—so that no possible damage could accrue against the county—at the same time, requiring that I should make no charges for toll, saying they would either give me a charter, or the county would pay me for all my labor, trouble and outlay.

Now, during the whole period from that date till the new county bridge was opened to use, I remained faithfully at my post day and night, and with hired help, taking every possible care against accident by which the county might be mulct in damages. Let every teamster and traveler who crossed my bridge bear witness as to the truth of this.

My bill for this was presented at every subsequent session of the Board, and, as uniformly, it has been rejected.

I would not trespass upon you in this manner, only I think my claim a just one, and the reading public may judge between me and the Board of Supervisors.

JOHN KNUPPLE.

MARBLE.—Mr. H. Yager has discovered and partially opened a marble ledge or quarry on the creek a short distance above Big Pine. He says the quarry will afford solid slabs or blocks full four feet long and perhaps of much larger dimensions without break, stain or flaw. The marble is a pure white, fine grained, and capable of a brilliant polish. Mr. Yager is a marble cutter of many years experience, and from this experience, he adjudges this to be fully as fine a stone in all respects as the Rutland (Vermont) No. 2. It is well suited for grave stones, and can be cut and finished here at considerably less cost than the imported stones of like dimensions and quality. Mr. Yager is carrying on business in San Bernardino, but before returning there, would fill an order for a monument or two from this marble to show what can be done with it, and with the view of establishing the business here next Spring if prospective patronage will justify. We commend this rather important matter to the attention of our citizens throughout the valley. Mr. Yager can be addressed at Big Pine.

POLITICAL.—Elsewhere will be seen the gratifying announcement that a leading political candidate, and one of the best speakers in the State, is to visit this county, something which has not been done before by any State or Congressional candidate. Hon. Wallace Leach, of San Diego, Democratic nominee for Congress from this District, will speak at the Court House on September 7, a week from next Tuesday night. A grand ball will follow, and every lady and gentleman for as many miles around as can get here, should be in attendance. Mr. Leach will of course speak at Bishop Creek and other points on his route to Bodie. In this connection, we are glad ts add, it is stated that Congressman Romualdo Pacheco, Mr. Leach's opponent, is likely to visit Inyo some time during the canvass—a fact which will be welcome to the ex-Governor's many friends here.

THE HOSPITAL.—There are now at the County Hospital two lunatics—both troublesome, filthy and liable at any moment to become dangerous to the other inmates. Now as the County Hospital is not the County Insane Asylum, nor in the least prepared to take care of the insane; and as the care of such was not contemplated in the contract, we hold that to send lunatics there is an imposition upon, not only the contractor but the legitimate patients of the institution. It is a square up and up imposition, that and nothing less to thus attempt to combine a lunatic asylum and County Hospital in one.

MUSIC.—The Sunday School organ, to which we have referred heretofore, arrived here early this week and stands in the school house ready for business. It astonishes every one who has seen it how such a fine toned and beautifully constructed instrument can be furnished in these distant wilds, or even at the factory for so small a sum as $90, the cost of this one, freight and all. Of this sum $42 was for freight, which sum was contributed in short order by the few of our citizens appealed to for such help, His Honor of the Superior Court heading the list with the largest amount by any one person.

CANDIDATES.—Announcements for the week show the following candidates for county offices: John Crough and S. V. Stevens for County Clerk; John W. P. Laird for District Attorney; Geo. H. Hardy for Treasurer, and C. A. Walters for Supervisor. All are subject to nomination by their respective party Conventions.

HOSPITAL.—Attention is directed to the advertisement of Mrs. Lewis' private hospital, at Camp Independence. Persons in need of treatment, and without homes of their own, cannot do better.

PREACHING.—Rev F. M. Willis will preach at the Post School House, at 11 o'clock to-morrow, and in this place in the evening at the usual hour.

NEW RESTAURANT.—Louis Fromm is snugly fixed for business in the Old Headquarters building. See his advertisement.

MEETINGS.—Consult the advertising columns for notices of various political meetings, including the Republican primaries and Convention.

MIKE MCGOWAN got in a bite on an unsuspecting Bodeite the other day, for which he will now chew the cud of repentence for forty days in the county jail.

A DAY IN KEELER CITY.

DARWIN, August 23.

MESSRS. EDITORS—Upon invitation of J. P. Taylor, of the Kern & Inyo Stage Company, extended August 20th, took passage upon one of their fine Concord wagons, and in his company journeyed towards Keeler, over the dry, barren and uninviting country that God seems to have piled up in all sorts of forms and shapes, no doubt with the view of getting it out of the way, and looking upon it as refuse which must have taxed his divine Lordship to dispose of.

Darwin is known to be a town that possesses no charms to hold a man if he takes it into his head to emigrate, especially if you have been unfortunate enough to have lived there long. J. H. Largey was the gentlemanly driver who held the reins, Taylor the roasted Spring chickens, and your humble servant "the rose that all are praising" in Inyo county (with many honorable exceptions), a flower that if sniffed often and long produces in the human breath an aroma which, when united with "Jackson's Best," would have been a delicious nectar for a certain class of ancient gods. It perhaps may be needless for me to say, although I will, that that Taylor, assisted by the writer and Jim, took frequent peeps and smells at the aforesaid rose—neither of us being Neal Dow men. We gave friend Barnes at Coso Station one sniff, and he thanked us for bringing so beautiful a flower along. When in the dryest and most barren part of the road, who should we meet, almost like a dispensation of providence, as it were. but the veritable Paul Houard, of Lone Pine, with peaches, which he freely dispensed to us at twenty-five cents per pound. Paul was on his way to what will some day be one of the foremost base-bullion camps on the coast. We offered him a chance to smell of our rose, but he gentlemanly declined, saying that the Lone Pine roses were far superior in taste and flavor to the Darwin article, which refusal greatly pleased us, as at the time there were only three or four more leaves left upon the flower. At about 1 P. M, arrived at Lake Stage Station ,wheae horses are changed, and driver every other day. We found the company's agent, Charles Johnson, with a fine meal prepared, and every thing kept in apple-pie order.

"KEELER CITY"

Is most beautifuly located upon the borders of Owens Lake, and in close proximity to the Stage Station, and at a point where there is more of the "lovely green" covering earths surface than at any other place on the Eastern shore of the lake. Across its placid waters and on its western shore, the grand old Sierra Nevada range, like a great breast-work reach apparently up into heaven itself, and towering above all majestic Mount Whitney, looking in the distance like the dome of our National Capitol, now partialy covered with the emblem of purity, the white snow from the ethereal realms. Taking a view eastward, we find there is a gradual slope from the town up to the foot of the Cerro Gordo mountain range, with an excellent road up to their summit, about 7 to 8 miles distant. Three times per week the Stage Co. send a conveyance up to Cerro Gordo under the care of Henry Rachman, who is a careful mountain driver, carrying passengers, mail, and express matter, there being both a postoffice and express office on the Hill. About one year or so ago, Capt, J. M. Keeler arrived from San Francisco in the interests I believe of Eastern capitalists, or Mr. David. N. Hawley, of the firm of Marcus C. Hawley & Co., and commenced searching for mines in this county, finally succeeded in securing various ones entire, and interests in others, which are mainly located on Cerro Gordo hill. Upon reporting progress made from time to time, they organized what is now known as the Owens Valley Mill and Mining Company. About the 1st of March last the present site for the city was selected, and a house and well commenced. About the 20th of the same month ground was broken for the 10-stamp mill now under process of speedy erection. Thus was started without display or ostentation the town of Keeler City, which will possess when finished one of the finest, if not the best, quartz mills in California. Upon my arrival, found the Captain on the ground and was received and escorted all around with a courtesy satisfactory to the most fastidious, and made at home at once.

The excavation and foundation walls for the mill are finished; all the machinery and timbers, lumber, etc., is on the ground, and a sufficient force engaged to erect and complete the mill by the 1st of October. Everything is being done in the most substantial manner; the machinery is of the latest and most improved style, and an hour's observation will convince any one, that the mill when completed will be No. 1 in every particular. The corps of officers acting in conjunction with Capt. Keeler, who is the company's agent here are as follows: J. H. Holt, general Superintendent, John Evans, millwright, William Hedge, engineer, and George W. Field acts as assistant to the Captain in keeping supplied the wants of the various departments. The company have secured, or control, the Cottonwood property on the opposite side of the lake, comprising their lands bordering on the lake, coal kilns, steamer, mill up in the mountains, etc. The mill is being thoroughly overhauled, a new hurdy gurdy wheel, and saw put in. The fitting up of the steamer will soon be commenced; in the meantime a sail boat will be employed. A contract has been let for cutting logs, for 150,000 feet of lumber, and 300 cords of wood. Joe Le Cyr, one of the founders of Darwin, just completed the delivering of some 40,000 feet of lumber and timber from Black Rock and Big Pine, The Dodge Brothers have been more or less engaged in teaming for the company. Over 300 feet of pier or dock will soon be run out into the lake for a landing for the steamer, bringing wood and lumber from Cottonwood. Mr. A. Wymple and lady keep the boarding house, and judging from the fine, fat and healthy looks of all the employes and their pleasing manners, they are all well fed. The conclusion that an unprejudiced observer arrives at after a day's sojourn in Keeler, is that Keeler city is as yet a very young town, which some day may grow to be a *city* in reality; that there is a generally live and healthy look about everything being done; that it will contain as fine a mill as any mining locality can want, an ornament to our county, if kept continually cracking rock, and a credit to its owners and the skilled labor putting it up. It is the cause of considerable money being disbursed in our county, which benefits business and laboring men. For the honor and reputation of our county let all owners of mines now go to work and take out ores, and keep what mills and furnaces we have working. We want no more coin put out in building them; we have enough, and more thus far than we can supply. Mills and furnaces can work up our ores after they are dug out of the veins, but the mere erecting them over our county on our prospects will not take the ores out. From now on let us discourage theis erection on any vein, until it has been worked and produced ore enough to pay for a mill or furnace.

Let mill, furnace, and mine owners, come to a mutual understanding, concede to each other a fair share of gains and profits in mining, and all go to work in harmony, not looking for a fortune in a month or two, but be satisfied pecuniarily together, waiting for their fruit and harvest bye and bye.

Yours Truly,

C. F. O'BRION.

INYO INDEPENDENT.

INDEPENDENCE, CAL.:

SATURDAY, AUGUST 28.....1880

A COUNTERFEIT of the standard dollar, bearing the date 1880, has made its appearance in several places in California. but are said to be more numerous in San Francisco than elsewhere. They bear the coinage initial of the San Francisco Mint, and have the genuine ring, although their weight is only 301½ grains while the genuine weighs 412½ grains. As is usual with all counterfeited coins, their appearance presents a dull color, and are greasy to the touch.

THE production of the South African diamond mines still continues to be enormous, and the statement is made that the quality of the stones, which is frequently marred by a slight tinge of color, is improving.

INYO COUNTY DEMOCRATIC PRIMARIES

....AND....

County Convention.

AT A MEETING OF THE DEMOCRATIC County Central Committee of Inyo County, held at Independence on Saturday, August 14, 1880, it was ordered that a Primary Election be held on SATURDAY, the TWENTY-EIGHTH day of AUGUST, 1880, between the hours of 1 and 10 o'clock P. M. of said day, for the purpose of electing Delegates to a County Nominating Convention, to be held at Independence, on

Saturday, September 18, 1880,

At which election twenty-eight Delegates will be chosen, apportioned to the several precincts as follows:

ROUND VALLEY—Two Delegates; polling place at Stoutenborough's Store. Inspector, David Olds; Judges, A. McGee and Chas. Parsons.

BISHOP CREEK—Six Delegates; polling place at the Bishop Creek Hotel. Inspector, Wm. O. Harrell; Judges, John B. White and T. K. Hutchison.

BIG PINE—Two Delegates; polling place at McMurry's Hotel. Inspector, J. W. McMurry; Judges, W. A. Baker and D. P. Macarter.

FISH SPRINGS—One Delegate; polling place at the Taboose Station. Inspector, D. B. Curtis; Judges, H. C. Wright and Thos. Spaulding.

Deep Springs—One Delegate; polling place at Gilbert's Ranch. Inspector, J. S. Broder; Judges, John Chastine and M. J. Byrne.

INDEPENDENCE—Four Delegates; polling place at Mairs' Livery Stable. Inspector, Geo. W. Brady; Judges, John A. Lank and Jos. Fernbach.

GEORGE'S CREEK—One Delegate; polling place at the Half-Way House. Inspector, John Shepherd; Judges, Charles Keppler and T. S. Hamilton.

LONE PINE—Two Delegates; polling place at Meysan's Store. Inspector, Charles Meysan; Judges, Juan Meza and John Lucas.

SWANSEA—One Delegate; polling place at the Mill Company's office, Keeler City. Inspector, J. H. Holt; Judges, John Alexander and ——

CERRO GORDO—One Delegate; polling place at Duval's Hall. Inspector, J. R. Hughes; Judges, —— and ——.

DARWIN—Two Delegates: polling place at Store of Waterman & O'Brion. Inspector, Martin Mee; Judges, C. F. O'Brion and A. Jackson.

LOOKOUT—Two Delegates; polling place at Fitzgerald's Saloon. Inspector, Frank Fitzgerald; Judges, —— —— and —— ——.

OLANCHA—One Delegate; polling place at Walker's Station. Inspector, William Walker; Judges, —— —— and —— ——.

PANAMINT.—One Delegate; polling place at Company's office. Inspector, Fred. Russell; Judges, —— —— and —— ——.

RESTING SPRINGS—One Delegate; polling place at Company's office Inspector, —— ——; Judges, —— —— and —— ——.

QUALIFICATION OF VOTERS:

"Do you promise to support the Democratic Electors at the ensuing Presidential Election? Yes."

By order of the Committee.

OFFICIAL.

INYO COUNTY TRESPASS LAW

ADOPTED BY THE BOARD OF Supervisors August 7, 1880.

It is hereby ordered by the Board of Supervisors of the County of Inyo, State of California, that the following law be and the same is hereby declared to be the Trespass Law of Inyo County:

SECTION 1. Any owner, or any occupant of any land or possessory claim, finding any horse, mare, colt, mule, jack, jenny, horned cattle, hogs, sheep or goats, or any number of such animals, upon such land or possessory claim, whether such land or claim be inclosed or not, may take up and safely keep such animal or animals at the expense of the owner or owners, and shall be allowed for keeping said animal or animals the following named sums: For each horse, mare, colt, mule, jack or jenny, the sum of twenty cents per day; for each head of horned cattle, the sum of twenty cents per day; and for each head of swine, sheep or goats, the sum of five cents per day.

SEC. 2. Any person taking up animals under the provisions of this Act shall, immediately upon the taking up of such animals, notify the owner or owners of such animals, or his, her, or their agent or agents, if known to him, and living within six miles of the place where such animals were taken up, of the time and place of such taking up, together with the number, character and description thereof; also, as nearly as he can, the marks and brands, if any, of each animal; and such owner or owners, his, her, or their agent or agents, may, at any time after the receipt of such notice, and upon proof of ownership, tender the amount of damages claimed, and demand the delivery into his, her, or their possession, of such animals; and if suit shall have been commenced, such tender may be to the Justice or Judge before whom such suit is brought, or the owner or owners may give bonds with sureties, to be approved by the Justice or Judge trying the case, for the payment of all damages and costs of suit, and he may demand the release and delivery into his or their possession, of all animals held under the action, and the Judge or Justice shall order the immediate delivery of such animals; but if no owner, owners or agents of owners appear within two days to claim said animals, or if he or they appear and fail to pay satisfactory damages, or if the owner is unknown to him or her, or lives more than six miles from the place of taking up, then if the compensation and damages claimed be less than three hundred dollars ($300), the taker up of such animals shall, within two days, file a written complaint, verified by his or her oath, with the nearest acting Justice of the Peace in the township where such animals were taken up; or if the amount of compensation and damages claimed be more than three hundred dollars, then in the Superior Court of said county, setting forth in said complaint the facts, nature, location, and amount of the damages claimed, and a description of all animals so takenup, the number, the marks and brands, if any, and the supposed value of each animal, or the supposed aggregate value of such animals, and the time and place of taking up. The action shall be in favor of the owner or owners, or occupants of said lands or possessory claims, and against the property in rem; and any action thus commenced, may include all the animals thus found trespassing at any one time, whether of one or more marks or brands; and no judgment shall be entered under the provisions of this Act for damages done, except upon the testimony of at least two credible witnesses, whose names shall be entered in the Justice's docket, or in the minutes of the Court in which the action is had.

SEC 3. Upon the filing of the complaint, a summons shall be issued, and if said action be in a Justice's Court, shall be made returnable not less than fifteen nor more than twenty days from the date of issuance, and directed to all owners and claimants of the property described, and shall contain a description of each animal, with its marks and brands, if any. The summons shall be served by posting a copy of the same at the door of the room where said Justice or Superior Court is held, for ten days before the return day thereof, and also at the same time by filing a copy of such summons with the Recorder of said county; but the Recorder shall not file the copy of summons until the payment of a fee of one dollar; and it shall be the duty of said Recorder, on payment of his fee of one dollar, to forthwith compare the marks and brands, if any, described in said summons, with the record of marks and brands in his office, and thereupon to notify the owner or owners of such marks and brands of the fact of the pendency of such action, and of the time and Court when and where the same is set for hearing. The certificate of the officer stating the facts of such posting and filing, or the affidavit of any person, competent to be a witness, who shall have so posted and filed, shall be conclusive evidence of a sufficient service thereof; *provided*, that in any case when any animal or animals, seized under this Act, are alleged in said complaint to be worth fifty dollars or more, it shall be the duty of the County Recorder to cause publication to be made of the fact and time of seizure, and marks and brands, with a description of the animal or animals, in a newspaper of the county, at least ten days before the sale, the newspaper in which all such notices are to be made to be designated, and the rates of publication to be fixed, by the Board of Supervisors of the county.

SEC. 4. If the judgment be in favor of the plaintiff, the property may be levied upon and sold as other personal property seized on execution. The officer selling shall give a bill of sale to the purchaser, describing the animal or animals sold, and to whom, and the price paid for each, and referring to the judgment under which such sale was made. Any overplus of the proceeds of such sale, after satisfying the judgment and costs, shall be paid by the Justice or Clerk to the owner of the property, upon demand, if demanded within six months from the date of sale; and if not so demanded, the same shall, at the expiration of said time, be paid into the County Treasury, for the benefit of the County School Fund; and the owner may also redeem any animal or animals sold under the provisions of this Act at any time within sixty days after the sale, by producing satisfactory proof of ownership, and paying the purchaser the amount of purchase money in gold coin, with interest at the rate of two per cent per month; but if no redemption be made within sixty days such bill of sale shall be conclusive evidence of title in favor of the purchaser of the animal or animals therein described.

SEC. 5. The fees of all officers for service required under this Act shall be the same as now allowed by law for similar services in other civil actions, and shall be taxed as costs in the judgment.

SEC. 6. The Justice and Clerk shall keep a book, which shall be open to public inspection, and shall record therein all sales made pursuant to any judgment rendered in their respective Courts under the provisions of this Act, which record shall contain a description of the animals sold, the prices paid, the name of the purchaser, the amount of fees and charges, and the amount of surplus money, if any, arising from each sale, and whether any animal or animals have been redeemed; and if such surplus money shall be received by the owner of any animal, he shall receipt for it in the margin opposite such record, and the Justice or Clerk shall, without fee, deliver such book to his successor in office, and also all surplus money in his hands arising from any sale made by authority of this Act, taking his receipt therefor.

SEC. 7. Any person who shall drive stock from any lands or possessory claim other than his own, to any other lands or possessory claim, or shall take up any such animal or animals on any land or possessory claim other than his own, for the purpose of taking advantage of any of the provisions of this Act, shall be deemed guilty of a felony; and any person who shall fail or neglect to give the notice required by the second section of this Act, or shall rescue or take from the possession of the taker-up any animal or animals, without first having paid the compensation, fees, and damage claimed or awarded, and any officer violating any of the provisions of this Act, shall be deemed guilty of a misdemeanor.

SEC. 8. The owner or occupant of any land or possessory claim, whether inclosed or not, independent of the foregoing provisions of this Act, and if he fail to avail himself there of, may maintain an action; *provided*, such action be commenced within sixty (60) days in any court of competent jurisdiction, against the owner of, or person having the control of, any of the animals named in section one, for any damages such animals may commit upon his said land or claim; and if judgment be rendered in his favor, it shall be entered for the amount of the actual damage proved.

SEC. 9. Nothing in this Act shall be so construed as to prevent the free use for grazing purposes of all unoccupied lands not taxed; *provided*, that each actual settler, who shall have a prima facie title to the land upon which he is settled, shall be protected in the possession of one hundred and sixty acres, and residence on the land shall be considered a prima facie title; *and, provided further*, that said one hundred and sixty acres shall be marked and defined by visible and well defined monuments.

Approved and adopted this Seventh day of August, A. D. 1880, and ordered that the same be published in THE INYO INDEPENDENT for four successive weeks.

J. R. WESTERVILLE,
Chairman of the Board of Supervisors.
Attest: JOHN CROUGH, Clerk.

PROPOSALS

....FOR....

Publishing and Printing.

NOTICE IS HEREBY GIVEN THAT sealed proposals will be received by the Board of Supervisors of the County of Inyo, State of California, at the office of the County Clerk, up to the hour of 12 o'clock M. on MONDAY, the FOURTH day of OCTOBER, A. D. 1880, to contract for county printing, as follows:

1. Advertising, such as is required by law and shall be ordered by said Board, including Notices for Proposals to Contract, Reports of Auditor and Treasurer, Proceedings of the Board of Supervisors, and the annual List of Delinquent Taxes. Said proposals shall submit to the Board the rate which will be charged per square of two hundred and fifty ems space for the first and each subsequent weekly publication.

2. The printing of two hundred and fifty copies of the Great Register of Inyo County, in the usual form, bund in paper. Bids must specify the price of such printing per name of each elector. Printed matter to be delivered at the Court House of said county.

Said contracts to continue for the term of one year from and after ratification.

Payment for such advertising and printing shall be made on bills duly sworn to and presented at the regular meetings of the Board, by warrants drawn upon the General Expense Fund.

The right to reject any and all bids is reserved.

Said proposals must be indorsed "Proposals for Advertising," and "Proposals for County Printing," and addressed to the Clerk of the Board of Supervisors, Inyo County. The same will be opened between the hours of 1 and 4 o'clock P. M., on said Fourth day of October, 1880.

By order of the Board of Supervisors.

JOHN CROUGH, Clerk.

MINING.

MINING APPLICATION NO 161,

....TO THE....

OCCIDENT MINE.

U. S. LAND OFFICE,
Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred linear feet of the "Occident Mine" or vein, bearing silver and gold, with surface ground three hundred feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 37, in Township ——, Range —— of —— Meridian, said Lot No. 37 being described in field notes of survey as follows, to-wit:

SURVEY OF EXTERIOR BOUNDARIES:

Began at a post on the southwest cor. of claim; marked the post "Post 1 Occident Mine." Said post is 2x3 inches square by 30 inches long and set in a mound of earth 20 inches high. From which var. 15 deg 55 min E., a pine stump 8 inches diameter bears N. 28 deg 50 min W. 11 links. A pine stump 6 inches diameter bears N. 85 deg 1 min W. 45 links. A pine stump 20 inches diameter bears S. 33 deg 5 min W. 76 links. A pine tree 7 feet high x6 inches diameter bears S 39 deg 51 min E. 82 links. A pine bush 2 feet high x3 inches diameter bears N. 69 deg 10 min E. 67 links. From said Post the "Armagh U. S. Mineral Monument" by calculation bears N 20 degs 48 min W 17.17 chains. Thence with a var 15 deg 55 min E, 1st course—N 11 deg W 3.03 chains, ascending to point of hill at bottom of old prospecting cut 6.49 chains. End of slope —6.88 chains. On level line—commence descending 7.64 chains, old prospecting tunnel 8.42 chains. Old prospecting cut 12.47 chains. Old dump of prospecting cut 14.13 chains. Middle of Ygnacio Ravine—Ravine bears N 65 degs W 15.21 chains. Trail on ridge dividing Ygnacio Ravine from Cerro Gordo Cañon. Ridge bears W 16.07 chains. Rocky ridge—commence descending 17.19 chains. Middle of Cerro Gordo Cañon—commence ascending 21.85 chains. Wagon road—Citizens grade 22.72 chains. To post on N W cor of claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of rocks 2 feet high, marked the post "Post 2 Occident Mine." At foot of post is a cactus burr 20 inches in diameter growing in the rock. From said post a pine stump 2½ feet in diameter standing 8 feet below the wagon road, Citizen's grade, bears S 38 deg E 1.54 chains. No other suitable natural object within measuring distance. Thence with a var 15 deg 55 min E, 2d Course—N 79 deg E 2.27 chains, ascending rocky slope to "Post 3 Occident Mine" on north end of line of lode 3.42 chains. Rocky ridge bears south 4.54 chains. To a post on N E cor of claim. Said post is 30 inches long, 2x3 inches square, and is set in a mound of rocks 20 inches high, marked the post "Post 4 Occident Mine" From which a pine stump 20 inches in diameter bears N 40 deg 35 min E 1.01 chains. The top of a blue slate reef 10 links high bears S 43 min E 15 links. Thence with a var 15 deg 55 min E, 3d Course—S 11 deg E .97 chains. Wagon road—descending 3.68 chains. An old stone cabin. A tall pine tree stands 15 links to East of line, 3.42 chains. Middle of Cerro Gordo Cañon—bears S W. Commence ascending on steep, rocky ridge, 8.43 chains. Trail on ridge dividing Cerro Gordo Cañon from Ygnacio Ravine 11.77 chains. Open cut 30 feet west of mouth of an old prospecting tunnel in blue slate, 12.98 chains. Old trail—runs N 65 deg W 13.69 chains. Summit of ridge at old trail 14.34 chains. Summit of ridge commence descending 15.38 chains. Crossing of Belshaw toll road 22.72 chains. Post on S E cor of claim. Said post is 36 inches long, 3x3 inches square and is set in a mound of earth 25 inches high, marked the post "Post 5 Occident Mine," from which a red iron boulder 2½x3¾ feet square and standing 25 inches high bears S 84 deg 40 min E 86 links. A pine tree 9 links high standing 5 ft. west of bottom of a gulch—gulch bears S. bears N 35 deg 11 min E 1.06 chains. The middle of the Belshaw toll road bears S 79 deg W 18 links. Thence with a var 15 deg 55 min E, 4th Course—South 79 deg W 18 chains. Road—commence ascending, 2.04 chains. Quartzite ridge bears N—S 2.27 chains. Post marked "Post 6 Occident Mine" on south end of line of lode—commence descending 2.87 chains. Trail—runs N W and S E 4.54 chains To place of beginning, "Post 1 Occident Mine," containing 10 32-100 acres. From the Armagh U. S. Mineral Monument as herein described the mouth or entrance to the "Armagh Tunnel" as noted under the head of "Report" bears S 76 deg 55 min W 9.24 chains. The course of said Tunnel is S 58 deg 55 min E. Length 350 feet on the 27th of March, 1880.

ARMAGH U. S. MINERAL MONUMENT.

The "Armagh U. S. Mineral Monument" is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon, and very precisely on the W. B. line of the Ygnacio mine (as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Dep. Min. Sur.) and distant 17.51 chains from the S W cor stake of the Ygnacio mine.

At the point above given I drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter x15 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high x5 feet in diameter at its base. Marked the top of post "U. S. Mineral Monument. Erected January 3d, A. D. 1880, by Wm. Crapo, U. S. Deputy Mineral Surveyor—under authority of the U. S. Surveyor General for California." From said post in mineral monument, with a variation of 15 deg 55 min E, the extreme end of the bluff on which the monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face of rock 7½ feet high bears N 60 degs E .07 links. The N E cor of an old adobe vaso chimney bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The N W cor of Rafael Diaz' house bears S 28 deg 33 min E 1.58 chains. An old well 30 feet deep on north side of Cerro Gordo Cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE.

Commence at "Post 1 Occident mine," thence with a var 15 deg 55 min E. S 79 deg W 3.03 chains to Post on S W cor of Ygnacio mine as surveyed for a patent N 11 deg W 17.51 chains. To U. S. Mineral Monument which when computed gives for a closing line from "Post 1 Occident Mine" to U. S. Mineral Monument N 20 deg 48 min W 17.77 chains.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 147 of locations.

The adjoining claimants are, on the west the San Francisco mine, on the south the Moter mine and on the east the Trachyte Flat mine.

Any and all persons claiming adversely any portion of said Occident mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

MINING APPLICATION NO. 162,

...TO THE....

ARMAGH MINE.

U. S. LAND OFFICE,
Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred (1 500) linear feet of the "Armagh Mine" or vein bearing gold and silver, with surface ground six hundred (600) feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 38, in Township ——, Range ——, of Mount Diablo Meridian. Said Lot No. 38 being described in field notes of survey as follows, to-wit:

Commenced at "Post 1 Armagh Mine," on S E corner of claim. Said post is 30 inches long 2x3 inches square and is set in a rock mound 2 feet high, from which with a var 15 deg 55 min E a pine stump 18 inches high by 10 inches in diameter bears S 15¾ deg E 77 links. A pine stump 15 inches diameter bears S ¾ deg 30 min W 91 links. A red ferrugenous quartz reef standing 4 feet high bears N 24 links. A pine stump 12 inches high x6 inches in diameter bears N 49 deg 30 min E 15 links. Thence with a var 15 deg 55 min E, N 11 deg W 3.20 chains. Ascending to summit of ridge commence descending, 6.98 chains; dump of old prospecting cut, 10.80 chains: Belshaw toll road, 13.16 chains; Belshaw toll road in middle of Cerro Gordo Cañon, commence ascending 14.25 chains; road running to Potosi house, 21.66 chains; wagon road—Citizens' grade—22.72 chains; post on the N E corner of claim Said post is 30 inches long, 2x3 inches square, and is set in a mound of earth 20 inches high. Sage brush slope, sloping S W; no natural object for witness mark in vicinity. Marked post "Post 2 Armagh Mine." Thence with a var 15 deg 55 min E, S 79 deg W .07 chains. Trail runs N S; commence descending—2.20 chains; wagon road, Citizen's grade—4.54 chains; post on north end of line of lode, marked the post "Post 3 Armagh Mine"—8 43 chains. Trail runs N S—9.09 chains. To post on N W corner of claim, situated on sage brush slope, sloping to S W. Said post is 8 feet long, 2x3 inches in diameter and is set in a mound of earth 2 feet high; marked the post "Post 4 Armagh Mine." No suitable natural object within measuring distance. Thence Thence with a var 15 deg 55 min E, S 11 deg E, commence ascending—1.75 chains; commence ascending—3.97 chains; crossing of foot trail runs west—8.27 chains; toll road in middle of cañon, commence ascending, 18.46 chains; summit of ridge bears west; commence descending, 19.74 chains; south end of "Silver Wedge" claim, 22.72 chains, to post on S W corner of claim. Said post is 30 inches long, 2x3 in ches square and is set in a mound of earth 20 inches high; marked the post "Post 5 Armagh Mine," from which a pine bush 2 feet high bears N 76 deg W 19 links. The chimney of an old deserted vaso bears N 22 deg 30 min E 24 links. Thence with a var 15 deg 55 min E, N 79 deg E 65 chains. Descending into bottom of gulch—gulch bears south, commence ascending—4.55 chains. "Post 6 Armagh Mine," or south end of line of lode, 3.90 chains; crossing of toll road, 9.09 chains; "Post 1 Armagh Mine," place of beginning. From which post the Armagh U. S. Mineral Monument bears N 4 deg 10 min W 12.67 chains, by calculation, containing 20 64-100 acres.

Location of the Armagh Tunnel.—From the "Armagh U. S. Mineral Monument" the mouth of the Armagh tunnel bears S 76 deg 55 min W 9.24 chains. The course of said tunnel is S 58 deg 55 min E. Length, 350 feet.

ARMAGH U. S. MINERAL MONUMENT—DESCRIPTION THEREOF:

There not being any lines of the U. S. public land surveys within 100 chains of the Armagh mine, I built a Mineral Monument and connected therewith. Said Mineral Monument is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon and very precisely on the west boundary line of, and distant 17.51 chains from the southwest corner stake of the Ygnacio mine, as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Deputy Mineral Surveyor. At this point drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter by 15 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high by 5 feet in diameter at its base. Marked the top of the post "U. S. Mineral Monument. Erected January 3d, 1880, by Wm. Crapo, U. S. Deputy Mineral Surveyor, under authority of the U. S. Surveyor General for California." From said post in Mineral Monument, with a variation 15 deg 55 min E, the extreme end of the rocky bluff on which the Mineral Monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face 7½ feet high bears N 60 deg E .07 links. The northeast corner of an old adobe vaso chimney, a Mexican furnace for smelting silver and lead ores, bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The northwest corner of Rafael Diaz' house bears S 38 deg 23 min E 1.58 chains. An old well 30 feet deep on north side of cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE.

Commence at "Post 1 Armagh Mine," thence with a var 15 deg 55 min E. N 79 deg E 1.51 chains to west boundary line of Ygnacio mine, and at a point 325 feet—4.92 chains from the southwest corner stake of the Ygnacio mine; thence with a var 15 deg 55 min E, N 11 deg W 12.59 chains to U. S. Mineral Monument.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 146, of locations. The adjoining claimants are, on the East, the Greenly mine.

Any and all persons claiming adversely any portion of said Armagh mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, in the State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

LEGAL.

PROBATE NOTICE.

IN THE SUPERIOR COURT OF THE County of Inyo, State of California. In the matter of the Estate of Nancy Williams, deceased. order to show cause why order of sale of real estate should not be made. It appearing to said Court, by the petition this day presented and filed by John A. Lank, the Administrator of the estate of Nancy Williams, deceased, praying for an order of sale of real estate, that it is necessary to sell the whole of the real estate to preserve the same from destruction.

It is therefore ordered by the said Court that all persons interested in the estate of said deceased appear before the Superior Court on MONDAY, the SIXTH day of SEPTEMBER, A. D. 1880, at 10 o'clock in the forenoon of said day, at the Court Room of said Court, at the Court House, in the County of Inyo, to show cause why an order should not be granted to the said Administrator to sell the real estate of said deceased as shall be necessary.

And that a copy of this order be published at least four successive weeks in THE INYO INDEPENDENT, a newspaper printed and published in said county.

JOHN A. HANNAH, Judge.

Dated July 17, 1880.

OFFICE OF THE COUNTY CLERK of the County of Inyo.

I, John Crough, County Clerk of the County of Inyo, State of California, and ex-Officio Clerk of the Superior Court in and for said County, do hereby certify the foregoing to be a true, full and correct copy of an order duly made and entered upon the minutes of said Superior Court.

WITNESS, my hand and the Seal of said Superior Court, this Seventeenth day of July, A. D. 1880. JOHN CROUGH, Clerk,

[SEAL.] By BASIL CROUGH, Deputy Clerk.

LIBERTY AND GENIUS.

[FROM MY SCRAP-BOOK.]

Wherever there is life to be kindled by love,
Wherever a soul to inspire,
Strike this key-note of God that trembles above
Night's silver-tongued voices of fire,
Liberty of Genius is power.

The power that grasps in the universe, that drives out beyond space, and grapples with the starry worlds of Heaven.

The man who is constantly fearing a lion in his path is a coward.

The man, or woman, whose excessive caution holds them back from striking the anvil with earnest endeavor, is poor and cowardly in purpose.

The required step must be taken to reach the goal; though a precipice of fire should bridge the road!—work must be done and the result left to God.

The soul that is earnest, that is truthful and aspiring, will not stop to count the cost.

Circumstances cannot control Liberty or Genius, but this eternal power will bend and break them to its path.

This very audacity is divine.

Genius will find room for itself, or it is none. Men and women in all grades of life, do their utmost. If they do little, it is because they have no capacity to do more. I hear people tell about "unfortunate genius," "unappreciated talent," "malignant stars," and other weak and contradictory things. This is all nonsense.

Where power exists, it cannot be suppressed any more than the earthquake can be smothered. As well attempt to seal up the crater of Vesuvius as to hide God's given power of soul.

You may as well forbid the mountain pines to wag their high tops, and to make no noise when they are fretted with the gusts of heaven, as to hush the voice of Genius.

There is no such thing as unfortunate Genius. If a man or woman is fit for a work, God appoints the field.

He does more: He points to the earth with her mountains, oceans and cataracts, and says to man: "Be Great!" He points to the eternal dome of heaven and its blazing worlds, and says: "Round out thy life with beauty."

He points to the myriads of down-trodden men and women and says:

"Work with me for the redemption of these, my children."

He lures and incites and thrusts greatness upon men, and they will not take the gift. Genius loves toil, impediment and poverty; for from these it gains its strength to throw off the shadows, and lifts its head to immortality.

Neglect is but the fiat of an undying future. To be popular is to be indorsed in the To-day, and forgotten in the To-morrow.

It is the mess of pottage that alienates the birthright.

Genius that succumbs to misfortune, that allows itself to be blasted by the slime of slander, and the petty weakness of the soulless and unthinking, is so much the less genius.

The man or woman who stops to whine over the snarls and detractions of the envious and ignorant, gives the sign of their own littleness.

Genius is that eternal power that can silence worlds with its voice, and battle to the death the thousand Hercules.

Then make way for this God-crowned Spirit of might, that was born in the glory of the Continuing City, but even lives in lowly and down-trodden souls.

Fling out the banner of Liberty and Genius. Let its broad folds of sunshine and love wave over every turret and dome of souls to all eternity!

L. H.

BOSTON girls bathe with perfect security from sharks. They merely put on a pair of blue spectacles and look intellectual and the sharks light out for deep water.

Queen Victoria's Family.

The House of Hanover began in the little town of Celle, which now has about 15,000 people, with William the Pious, son of a Duke of Celle, who had been Martin Luther's pupil. "I have never seen the righteous forsaken nor his seed begging bread." William lost his sight and his mind, but he knew the Psalm tunes of Dr. Luther, and had them played to him when he was very old. His sons drew lots to know which should marry, as the estate was small. George, the sixth son out of a family of fifteen, drew the wife and the posterity. He lived abreast of Queen Elizabeth and visited her.

Duke George became a general under Gustavus Adolphus, and died in 1641, and his grandson, Ernest Augustus, married the niece of Charles I. of England, Sophia, daughter of Elizabeth Stuart, Queen of Bohemia. She alone of all her sisters remained a Protestant, thus being the only Protestant branch of the Royal Stuart line; and when Queen Anne's last child died, in the year 1700, they made Sophia's son Duke of Cambridge. This son, George Louis, born 1660, became George I.

He had previously divorced his wife for adultery, but brought two mistresses over to England in his suite, being then over fifty. He was principally engaged putting down the son of James II, and executing rebels who supported more honest rights to the throne.

His son George II, was King thirty-three years from 1757, and Sir Robert Walpole adminstered the country for both son and father. George II married Caroline of Anspach, who loved him at the expense of her children, and bidding him on her death-bed marry again he answered: "No, I will keep only mistresses."

The first two Georges hated England, their parents and their children. The Earl of Chatham was conspicuous in the second George's reign, which closed in 1760, when he was seventy-seven years old.

George III was the son of Frederick, Prince of Wales, and he married Charlotte, of Mecklenburg. He was afflicted with insanity for much of his wonderful reign, during which he lost America, won India, found steam and beat Napoleon. About 1810 he became blind and imbecile and deaf.

George IV was born in 1762, and was very handsome; he married his cousin Caroline of Brunswick, and divorced her for adultery. Victoria was his brother's daughter.—*Cor. Cincinnati Enquirer.*

THE punishment which J. H. Clemetshaw is likely to get in California, viz. fourteen years in the Penitentiary, is what he should have had before he came to America if the stories told of his career in England are true. In Salt Lake he certainly merited severer treatment than he received, notwithstanding the *Herald* was taken to task for suggesting that the fellow was a rogue. Clemetshaw's sentence in San Francisco is for perjury in the interest of young Kalloch, the murderer of Charles De Young. The trunkmaker had not laid his plans for escape so well as he usually did, and particularly as he did here when he undertook the commission of a crime. The chief reasons for his success in roguery and immunity from punishment, were the shrewdness with he which performed, the cunning that he exhibited in covering his tracks. Though he owes the Utah Penitentiary a term, if San Quentin shall retain him fourteen years this Territory will forgive the gray haired old man when he is at the end of his term.—*Salt Lake Herald.*

A SMART young man asked a gentleman from Cape Cod: "What's the difference between you and a clam?" thinking that the Cape Codger would say he didn't know, and then the young man would pity him for not being able to see any difference between himself and a clam, but the thing didn't work. The codger took the young man and brushed a path across the street with him, and then, after crowding him in an empty fish barrel and yanking him out again, said: "A clam wouldn't be a playing with you this way. That's the difference 'twixt me and a clam." The young man had no more questions to ask.

AN absent-minded speaker named Yancy undertook to whisper something of importance in the ear of old Mr. Reynolds, Saturday, but in his absent-mindness neglected to remove his cigar, the fire end of which was driven right into the gentleman's ear. Mr. Reynolds jumped straight into the air about six feet, and coming down split Yancy's nose by a well directed blow. Yancy picked himself up, and started for home, declaring in his rage that he'd be hanged before he'd tell old Reynolds what he was going to.

IT was very careless leaving the parrot in the parlor Sunday evening, but she never thought anything about it until Monday morning when he roused the whole house by making a smacking and crying, "Darling Susie; darling Susie." He kept it up all day, too, and the old folks are much interested in the case.

BURDETTE says that they call a locust tree and a high board fence and 23 beer tables a grove, anywhere within 30 miles of New York. There are a few dozen of these kind of "groves" and "gardens" in the vicinity of San Francisco.

A GIRL who can put a square patch on a pair of pantaloons may not be so accomplished as one who can work a green worsted dog on a yellow ground, but she is of more real value in the community.

An Incautious Editor.

There is a Nevada editor who is in a heap of trouble, and all the editors in the State are rushing up to him and barking at him and taking nips out of his tender places and are proceeding to drive him out of the State. Has he been found out? You are quite right, gentle reader, that's just it. He has been found out. You must know that for some time past the journalists of Nevada have talked of little else but "the sack." Everybody accused everybody else of being influenced in some way or other by said sack, and most everybody in strenuously denying the impeachment, fervently wished that he had been. At last it occurred to one editor—Boynton Carlisle, of the Genoa *Courier*—that the sack had been bandied about quite long enough among the journalists of the sage brush, and if he did not want it flung a flaccid rag at his door he had better reach out for it. So he reached. He reached thus:

GENOA, NEV., August 14.

MR. STROTHER (Virginia City.)—Dear sir: I did not finish my business with you yesterday. I understood you to say that Sharon intended to make a fight, and that you were doing *business* for him. The *Courier* will do a certain amount of advertising for Mr. Sharon during the balance of the campaign for $200; or the *Courier* will remain silent on the question for $200. I go to press next Wednesday and an answer by Tuesday will oblige,

Yours, truly,
BOYNTON CARLISLE.

The consequences were disastrous. Mr. Strother handed the letter to the Virginia *Enterprise;* that paper waited until the Wednesday; the *Courier* came out full of abuse of Sharon, and accusing him of endeavoring to corrupt the press of the State; and then the *Enterprise* published the letter with appropriate comment. The Virginia *Chronicle* pronounces Carlisle "an ass and a rascal," and advises him to quit journalism and leave Nevada. We hardly think ourselves that Mr. Carlisle is exactly cut out for a political editor of the period. He lacks caution. —*Stock Report.*

Farm Labor and Wages.

Colonel Worthington, the statistician of the agricultural department, has finished his annual report of farm labor and wages, from which a number of interesting facts given below are gathered by the *Tribune*: The table giving the average of wages of farm laborers, with and without board, as compared with the wages paid in several branches of skilled mechanical labor, was compiled from returns made to the department last April, from which it is learned that in the Pacific and mining States and Territories, the range of monthly wages for farm laborers without board is between $30.75 in Montana and $22.50 in Washington Territory. Of the States east of the Mississippi, Minnesota pays her farm laborers better than any other Northern State, the monthly wages with board being $16.33, while Vermont pays only $12.62. In the Southern States the prices paid range from $12.26 in Louisiana to $7.35 in South Carolina, the average being $9.60.

A POPULAR Macon minister recently passed a night thirty miles below Americus with a backwoodsman, whose house contained only two rooms. The family, however, consisted of twenty-one, but owing to a dance in the neighborhood, only seventeen of the children were at home. The minister spent the night with the father and seven sons in one room, while the old lady and ten daughters occupied the other. In the morning a junior member of the family, in response to an application for a washbowl, brought him an old rusty tin pan, and, after the face toilet was complete, hunted up about seven teeth of an old tucking comb for him to arrange his hair with. During the progress of this important ceremony, the following conversation between the two took place:

"Mister, do you wash every mornin'?"

"I do."

"An' comb your ha'r, too?"

"Yes."

"Well, don't it look to you sometimes like you is a heap o' trouble to yourself."—*Macon (Ga.) Telegraph.*

THE political contest to carry the October election in Indiana is assuming tremendous magnitude. Both parties are throwing their best speakers into the fight, and a political meeting addressed by distinguished individuals is held in even the smallest towns every night. It seems to be conceded that the result of the October election will have a decisive effect on the vote of the State in November. The Democrats are handicapped by a considerable increase of the colored vote, the result of the late exodus; but leading politicians of that party declare that they will carry the State notwithstanding these Republican recruits. Wm. H. English is very confident of success.—*Los Angeles Express.*

A GREAT sensation has been caused throughout Berks county, Pennsylvania, by the discovery of Benjamin Zechler, a lunatic who has been confined in a house in Albany township by his brother, Jacob Zechler, for twenty-seven years. He was chained to the floor in a small house built especially for him, and in a room eight feet square, and with only one window for ventilation. This chamber was in a shocking state. The man was perfectly nude, and in the entire twenty-seven years had never been washed, combed or shaved. He made a desperate resistance when the officers attempted to remove him, but he was subsequently taken to the insane asylum. The case is to be investigated by the authorities.

IT isn't what goes in but what comes out of the inkstand that makes the trouble.—*Transcript.*

HOTELS.

THE BLANEY HOUSE,
Independence, - Cal.,
V. G. THOMPSON, Prop'r.

THE PROPRIETOR OF THE "BLANEY" respectfully announces to his friends and the traveling public that the house will be conducted as a

J. E. PARKER. P. A. CHALFANT.

INDEPENDENCE, CAL.:

SATURDAY, SEPTEMBER 4.....1880

Important Decision.

(1), That a claimant having a mining claim which has been located and recorded according to law, has the right to have it accurately surveyed and plotted, by or under the authority of the Surveyor General.

(2). The survey being an ex parte proceeding, no one except the claimant can have the right to appeal from the action of the Surveyor General in approving or disapproving the same.—Decision of Aug. 9, 1880, in matter of protest of M. Shaughnessy, Utah.

THE Carson *Times* says the managers of the Carson and Colorado Railroad, which great enterprise seems to excite more attention in California than in Nevada, have not only decided to construct the road through to Candelaria as rapidly as money and labor can build it, but will also extend the line southward from that point certainly for a distance of fifty miles and possibly much further. It is not unlikely that a detour may be made from the line of original survey and direct communication be had with Belleville. The fact is that there seems to be no limit to the immense possibilities of this new pathway for commerce, and at no distant date we confidently expect to see the road completed to a junction with the St. Louis and San Francisco railroad now building on the 35th parallel with all the energy and skill that unlimited means can command.

THE Sixth District Fair of 1880, at Los Angeles, will commence on the 18th and continue until the 23d of October. It is to be under the direct control and auspices of the State. The District Board of Agriculture announce that the Fair should be made a true and full exposition of all the known material resources of the territory within our borders, of all the industries and industrial productions of this section, and of all the tangible evidences of the substantial prosperity of the people. An examination of the extended premium list and general programme shows a liberal and thoroughly comprehensive plan. Inyo County is comprised in the District, and it is to be regretted that the great distance and lack of transportation facilities will practically prevent the display of any of our mineral or agricultural productions.

OUR neighbor down here two or three hundred miles in San Bernardino, our adjoining county, the Colton *Semi-Tropic*, has "shook" its patent outside, and now comes out a clean strained home-made newspaper, and in manner, method and matter, is, in our opinion, the best weekly publication in Southern California. A full page in each of its last two issues is taken up with a complete article about how to raise carp, prepare the ponds and so on, with well executed cuts and diagrams, the whole together being a timely and valuable bit of information for all who contemplate stocking carp or any kind of fish ponds. We hope to reproduce the article ere long.

The Salt Lake *Tribune* is not very mealy mouthed when speaking of the Saints of Salt Lake. Here is a specimen brick: "The mansard harem of Geo. Q. Cannon looks shabby and deserted. The six-ply polyg appears to have invested all the money paid him by the United States Government for misrepresenting Utah, in this big elephant which seems to be more of a resort for bats and bugs than concubines. The grounds are unkempt, the fences are tumbling down and stray cows browse unmolested on the broken shrubbery. It would be a fit habitation for that 'Happy Polygamic Family.'"

GOV. PERKINS having heard the arguments in the Sprague case, has commuted his sentence to imprisonment for life. A San Bueneventura dispatch says: Sprague exhibits no gratitude for the commutation, but seems disappointed and angry that he had not fared still better at the hands of the Executive.

W. H. ENGLISH promises the National Democratic Committee that he will supply all further money needed in the Indiana canvass, but gives notice that he must not be called upon to contribute for other States. His contribution for Indiana, it is stated, will not be much short of $100,000.

GEN. A. J. MYER, better known as "Old Probs," Chief Signal Service Officer of the United States, died of heart disease, August 24, at Buffalo, New York.

The assessment roll of thirty-one counties of California foot up $514,000,000, which is an increase of $88,000,000 over those of 1870.

A FORGOTTEN LAW.

On page 751 of "California Statutes in Force" may be found a law, approved March 28, 1874, to which considerable importance was attached at that time, but which law, though yet in force (nominally) seems to have been a dead letter from the date of its approval down to the present. That it has proved so is, we believe, primarily attributable more to neglect of duty on the part of the successive State Superintendents than to any other cause; the nature of this neglect will be presently explained. The law in question is entitled "An Act to enforce the educational rights of children," or, commonly, as the "Compulsory educational law."

Stripped of its legal verbiage, every school census child in the State, living within one mile of a school house, and not physically disabled from any cause, or of unsound mind, shall have the benefit of at least three consecutive months' schooling every year; and any parent or other person having control of children between eight and fourteen years of age (not exempt from any legal cause), who shall refuse or neglect to send them to school as required shall be deemed guilty of a misdemeanor, and liable to a fine not exceeding $50. It is made the duty of the Board of District Trustees, through the clerk of the Board, to prosecute every such violation of the law on complaint of any teacher or taxpayer; provided, for good causes shown, the required attendance has not been excused by order of the Trustees.

SEC. 2. It shall be the duty of the President of each Board of Education, and of the Clerk of each Board of District Trustees of the State of California, to cause to be posted three notices of this law in the most public places in the city, or city and county, or in the district, or published in one newspaper therein for three weeks, in the month of June, in each year, the expense of each publication to be paid out of the School Fund of such city, or city and county, or school district, as the case may require.

The statutes require that all blanks, etc., relating to the management of the public schools, shall be provided by the State Printing Office, and be distributed through the State and County Superintendents. Among such blanks or forms copies of this law for posting would, of course, be included, and sent out by the State Superintendent. But we doubt if anything of the kind has ever been done since the law became a law. Owing to this neglect on the part of the State Superintendent, the law has never been of the slightest avail, but few knowing that such a law even exists. If any good is to come of this law, the State and County Superintendents must first do *their* duty in the matter of supplying copies of it as in case of other blanks for district officers.

AN Eastern exchange remarks that in all the coal breakers of Pennsylvania, small boys are employed to pick the shale and bad coal from the slides after the broken fragments have left the hopper; and often a single breaker will employ as many as fifty boys. They are little ragged urchins, black from morning till night with the soot of the coal, but withal merry, mischievous, bright-eyed little fellows. The law prohibits employment of any under ten years of age, but it is not uncommon for a miner to put his six-year old boy into the shutes for the 30 cents a day he can earn. These little fellows have something of a protective organization of their own, and play the Molly Maguire on a small scale occasionally just to show the power of the strike. Insignificant as their powers appear to be, they have it in their power to stop the work of the whole company from the loft of the breaker to the stables of the mules below. There is no use in mining the coal if it cannot be lifted to the breaker and sorted by the boys; and hence all work ceases when the boys prefer to play. At this time the coal companies are in trouble with their boys, for a circus is making the tour of the coal region, and mining must stop while the boys go the circus, and sometimes for a few days afterward till the they have tired of hanging by their legs from trees and playing circus generally. When a circus approaches a mining town the mining companies take steps to corral the boys in the top of the breaker, but usually their quick wit and nimble legs are more than a match for the bosses.

THE disposition of the Congressional library, which has increased enormously, is the subject of serious consideration at Washington. It is estimated that within 50 years a building will be required as large as the Capitol itself to hold the books, and plans are being drawn already for such a building, which, for architectural reasons, must be erected so far from the present site as to be at an inconvenient distance.

A DISPATCH from Victoria, B. C., of the 1st instant, says the bark *Malay*, eight days from Ounalaska, had just arrived, but brought no tidings of the *Jeannette*, and that at Ounalaska she was given up as lost on account of the severity of last Winter.

THE present political managers of Mono County, at least so far as the County Central Committees of the respective parties are concerned, seem to be men as equally unfamiliar with the political history and system of these two counties as they are unknown individually. Long ante-dating the apportionment of 1873-4 giving Mono and Inyo a joint Assemblyman, we were coupled with Tuolumne for legislative representation. At every election the parties of that county conceded one nominee each to this side of the mountains, and under this system the representation has invariably alternated since the organization of this county in 1865. Up to the time Mono gained its Bodie population, had party managers here seen fit, it was always within the political power of Inyo to totally ignore the votes of Mono. The system has worked unquestioned for fifteen years, becoming an unwritten law. In its regular turn, Mono had both nominees last year and of course elected the Representative, Mr. Wasson. The two counties and all the mining interests in the State should be proud of his success, and it is possible the Inyo Republicans may waive their right to the nomination in consideration of that fact—and expediency. On the Democratic side, Mono demands the nominee on the grounds of urgent political necessity—United States Senator business, etc. They made such a fancy success of it with Messec last election that Democrats here would be disposed to let them try it, were it not for the destruction of a just and well-established rule. In the next contest Mono county's present flush of population will be so badly overslaughed by that of Inyo that the former will be assigned to a back seat, politically.

A JUDGMENT has recently been rendered against "Baron" Grant in England and in favor of the Emma Mining Company for $600,000. Grant was the promotor of the scheme of putting a large amount of the stock on the English market at extreme rates. The amount which he unlawfully made in promoting the scheme is probably that represented by the judgment. When the stock went down on the English market to a few shillings, there was something of a panic. The mine never had any such value as that for which the stock was at one time floated in England. Yet it was a tangible mine, and not a wildcat, and the output of bullion had been large. The Baron Grant swindle was not essentialy different in character from half a dozen which have been perpetrated in this country, and not worse than one which has been perpetrated within a twelvemonth in connection with certain mines in Colorado. The Emma mine was placed on the English market at the rate of $5,000,000 for the whole, and nearly $4,000,000 of the stock changed hands at that rate. The shares were sold at the par value of $100, and suddenly dropped down to about $8.

A CURIOUS instance of natural silver-plating is reported from the Lord of Lorne Mine, of the American Flat section, Nevada. The sides next to the veins and the hanging walls of the ledge are covered with a thin coating of natural plating of pure silver as smooth as glass. The vein itself is narrow, and is being prospected by means of a tunnel. The superintendent says this peculiar feature of the inclosing walls is observable so far as the tunnel has followed the ledge. The ore of the vein itself is of a soft, easily-worked nature, showing considerable chloride as well as sulphurets, yet not giving very high assays. The filmy deposit of silver on the walls was evidently condensed and forcibly deposited there under immense pressure, as it has a smooth, burnished appearance.

IN the matter of the motion to quash the indictments against the eleven Mussel Slough settlers for obstructing Marshal Pool in his attempt to put in possession of the lands persons who had purchased them from the Southern Pacific Railroad, Judge Sawyer on the 23d rendered the opinion of the Court, holding that the indictments are good. Judge Hoffman rendered a concurring opinion. J. J. Doyle, J. B. Flewelling, J. M. Peterson, J. B. Purcell, W. L. Prior and Wm. G. Brandon were then arraigned separately and each pleaded not guilty. The causes were set for trial on Tuesday, October 7. The five defendants arrested have each obtained $3,000 bail, and have been released from custody pending trial.

CHARLES DARWIN lately entertained a scientific association at his house in Kent with a dinner and a lecture on "Insectivorous Plants." In a pleasant speech the old gentleman spoke of the generous support his labor had always received at the hands of the Germans and Americans. Mr. Darwin is an agreeable old man, having handsome eyes, a noble and kind expression and simple and courteous manners.

JOHN SHERMAN made his first speech for Garfield in Cincinnati Monday evening.

The Stockton *Independent* says: The wheat crop of the present year is acknowledged to be the largest ever known, especially in the San Joaquin Valley. On every hand we hear that the farmers are sorely troubled to procure threshing machines, and although the supply of threshers in this section has been equal to the demand, this year it is not the case, owing to the great production.

All Spain is now in a state of excitement over the forthcoming accouchment of the Queen of Spain. The inhabitants of Madrid were up all night waiting for the salutes which were to welcome the advent of the baby. The royal mother is very anxious to nurse her child when it is born, but State etiquet forbids. This is the tough part of being a Queen.

The Govenor has offered a reward of $500 for the arrest and conviction of the murderer or murderers of the boys Marion Gardner and Henry Fitch, who met their death about four miles from Little Lake, in Mendocino County, on July 11th, under such circumstances as led to the belief that they were murdered.

Several missionaries, with their families, left Chicago on Monday for China and Japan, via California. Better stay at home and put in their work right in Chicago, where they can do as much good as they will where they are going.

The Salt Lake *Tribune* says: Prof. Newberry has taken samples of all the important deposits of coal and iron of southern Utah for analysis, and will soon publish a report upon them that will have much practical and scientific value.

The School census as reported to State Superintendent Campbell gives Mono 688 children entitled to draw school moneys which at $1 32 per child allows Mono county the sum of $888 16.

John Thomas, a native of Albermarle, Va., is the father of 32 children. He has been twice married, and 21 daughters were born to him before a son.

The volcano reported near Los Angeles proves to be an immense geyser, spouting water one hundred feet high, and emitting a bright light at night.

During the year ending June 30th, 457,243 immigrants arrived in this country. A goodly number of them will vote for President in '84.

The Servian Government is seeking 100,000 rifles of the newest pattern in the United States, deliverable before the end of the year.

A man holding a second class ticket to the East, was found drowned near Ogden a few days ago. He also had $3500 in his pocket.

Carlton of the Hollister *Telegraph*, who killed Brummet, a rival editor, has been sent to the State Prison for six years.

Four steamers arrived at New York on Wednesday from Europe with $2,300,000 in gold coin.

Our new Postmaster-General, Maynard, has taken charge of his department.

The value of the fruit crop of Sacramento county this year is $472,000.

Three years ago Antonio Serano, a Mexican living in Cerro Gordo, lost a valuable mule, which he had owned for several years, and was very much attached to the animal for the reason of his intelligence and sagacity. He was out hauling wood at the time, and the animal strayed away and, until yesterday, he never came within sight of the animal. While out cutting wood near Bridgeport, Serano saw the mule hitched to a tree. They both recognized each other, and the beast showed its pleasure in unmistakable signs. The man who had the mule in his possession said he bought it in Benton two years ago and would not part with it unless $100 was put up. This demand was readily complied with and the "old partners" started off together.—*Bodie Free Press.*

MONO county has fallen $43,000 behind since January 1st. This increase of debt is the result of crime at the mining towns. And yet no convictions. A mockery of justice cheated the county out of $43,000. Judge Lynch should have administered justice at Bodie and Lundy, and saved the taxpayers $43,000. The people are weary waiting for the "due course of law."—*Bodie Chronicle.*

THE following approved township plats were yesterday filed in the U. S. Land Office of this place.

Township 7 north, range 25 east.
Township 13 south, range 37 east.
Township 14 south, range 38 east.
Township 15 south, range 39 east.
Township 15 south, range 40 east.
All Mount Diablo base and meridian.
—*Bodie Free Press.*

GEN. SHERMAN says that the letters he wrote to Hancock in 1876, and to which Hancock replied at length, are to be published in the new biography of the General, in connection with the letter already printed.

The Milwaukee & St. Paul and Chicago & Northwestern railroads have obtained permission from the friendly Sioux to cross their reservation on the way to the Black Hills.

A WHITE boy met a colored lad and asked him what he had such a short nose for? "I'spects so's it won't poke itself into other people's business."

THE Prince of Wales' life is insured for $200,000. His annual premium is $4,000.

INYO INDEPENDENT.

INDEPENDENCE, CAL.:
SATURDAY, SEPTEMBER 4.....1880

SCHOOL MONEYS.—The August apportionment of State school money to the several counties has been made. The sum total so apportioned footed up to $285,090 96; the total number of school children between five and seventeen years of age is 215,978, so that the above sum allows $1 32 for each child. Inyo county has 405 census children, and on the above basis, now receives $534 60 to be apportioned among her ten school districts. This sum goes to make up the deficit of last year in the $500 allowed each district, said deficit having been caused by the diversion of the poll taxes from the County to the State School Fund, pursuant to Constitutional requirement (Art. XIII, Sec. 12). To avert injury from that diversion, an Act, approved April 15, 1880, made this August apportionment available on last year's indebtedness, and authorized County Superintendents to draw their warrants against this August apportionment in advance, provided the amount so drawn added to that previously received was not in excess of the $500 to which each district was entitled. Accordingly, warrants applicable on last year's salaries were sometime since drawn in several of the districts. These warrants call for about $60 each, being the amount required to make up the $500. This State apportionment, evenly divided, places only $53 46 to the credit of each district; there is now but a dollar or two in the County Fund to be similarly divided—the result is, these $60-warrants can't be paid for lack of a sufficiency of funds, although the sum lacking is but small. In view of these facts, Supt. Symmes deems it best to delay the district apportionment until further instructions from the State Superintendent. In our opinion, the only way to settle the difficulty is to go on and make the apportionment, and at the same time call in and cancel the warrants in question and issue new ones equal to the exact amount on hands, the difference to be made up in some other way.

HARVESTING MACHINERY.—C. F. Roe, Esq., agent for D. M. Osborne & Co., the heaviest firm of dealers in agricultural machinery on the coast, passed through here a day or since on his return below. He has spent some little time at Bishop and Round Valley in introducing the "Osborne Self-Binding Harvester," one of which was purchased and immediately set to work by those most enterprising of Inyo farmers, J. E. and T. E. Jones, of Round Valley. We are told the machine is "just the thing" for this valley—far ahead of any other harvester, not excepting the celebrated headers, yet put to a practical test in this region. We hope the Messrs. Jones will furnish us for publication some account of how this machine operates, provided it displays any points of material superiority, or enough so to give promise of benefit by its general introduction. We will do that much advertising for the firm gratis if it promises a benefit to our home patrons. The "coming" harvester and mower for a country cut up with irrigating ditches as this is and ever will be, will be a machine mounted on wheels of full double the diameter of those now in use—a fact manufacturers may do well to take into consideration. Mr. Roe, by the way, is one of the original pioneers and mill builders of this region, having, eighteen years ago, helped to build and run the notable old Slate Range mill near Borax Lake.

DEMOCRATIC DELEGATES.—So far as received up to date the following comprises the list of Delegates to the Democratic County Convention, which, as also the Republican, meets on the 18th instant: Round Valley—C. H. Parsons, and J. S. McGee; Bishop Creek—J. L. Bourland, A. R. Eugley, P. W. Forbes, B. Peeler, W. G. McCroskey, and J. B. White; Big Pine—W. A. Baker, and J. W. McMurry; Lone Pine—C. Meysan, and J. G. Dodge; Cerro Gordo—W. L. Hunter; Independence—S. P. Moffat, J. C. Irwin, J. D. Mairs, and A. W. Eibeshutz.

NEW BATTERY.—All the machinery for the battery to be added to the steam reduction works of Messrs. Chandler, McEvoy & Taylor, at Freeborn's Cañon in Beveridge District, has arrived at the foot of the trail on this side of the Inyos. Hunter's train of mules is now engaged in packing it across. The total weight is 12,575 pounds, and is so constructed in sections that the heaviest piece weighs but 285 pounds.

GOOD.—The crop of small grain throughout the Valley, especially the upper portion, is turning out remarkably well, both in quantity as well as quality. The prospects for a big crop of corn was never better, barring early frosts. The fruit crop in this vicinity is of excellent quality, but the yield is not near as bountiful as last year's.

ANOTHER CANDIDATE.—Delegates to the ensuing Democratic Convention will note the announcement this week of Stephen G. Gregg, of Big Pine, as a candidate for Sheriff. This adds another popular man to the list.

THE BALL COMMITTEE.—The following gentlemen compose the Committee to look after the dancing arrangements for next Tuesday evening: John C. Irwin, G. W. Brady, Dan'l Crough, J. E. Parker and Thos. Webb.

PREACHING.—Rev. F. M. Willis will hold his usual services in this place tomorrow evening, the last for this locality till after his return from the Nevada Conference.

FROST.—There was quite a frost, a few nights ago, at Bishop and Round Valley, but the damage to crops was but slight.

DOING WELL.—We are glad to note that Uncle Abe Parker, with his broken leg, is progressing as favorably as possible.

NOW WORKING.—It begins to look as though an era of practical work has begun upon some of the immense number of mineral deposits which abound throughout the Inyo range. A complete geological survey, and comprehensive mining description of this wonderful mineral zone would open the eyes of the whole world to some facts of the utmost importance bearing upon the mineral product of the future. But this is a work devolving upon the Government and the State, through legislation and appropriations. This mention is merely to refer to points in the range where work is now being done. Commencing at the northern boundary line of the county, there is now, we believe, a paying operation going on at the Piute mill, on the Golden Era, Tender, Buena Vista and Luella mines, by parties leasing from the owners—Spencer, Sneden and others. Late reports speak of there being a number of prospectors operating between this point and the Mineral Hill mine, but we have no particulars now at hand. The Mineral Hill property, belonging to Reed & Co., is situate on the summit of the range opposite Bishop Creek; it has been working a small force for some months, the developments being of the best character. On this side, down to Chrysopolis there are a number of claims upon which the assessment work has been done for the year, but which are idle at present. On the other side, the mines of Deep Spring have probably 25 men employed; arrangements are being made for a new mill and the district is on the eve of a "boom." The old Chrysopolis property is undergoing examination by Mr. Phillips, with a force of ten men, the result of which can only be guessed at for some time to come. Next south and nearly opposite Independence is the Green Monster mine, now being opened by Mr. Wingard with eight or ten miners. The Mazurka Cañon has prospected for several weeks by Messrs. Thompson and Tichener, who will remove to the summit and commence prospecting a new gold discovery. This a ledge from six to eight feet wide, traceable for a distance of 3,000 feet, the ore assaying $46 gold per ton. Mr. Thompson is a thorough miner, and we regard his discovery as important as proving the theory of the existence of large "mother lodes" near the summit. Across the summit again and to the northeast old Waucoba District shows signs of returning life. Further south, the Brown Monster, Hirsch and surrounding properties are at present idle. Over at Beveridge, the king-pin gold region of the county, somewhat extensive operations are being carried on at Freeborn Cañon by Peter Taylor & Co.; at Hunter's Cañon by Hunter, Hughes & Co., and near the Mexican camps by Chris. Crohn. Besides that taken out by the Mexicans, all these properties are producing gold in paying quantities, and as the mines are opened and improvements made in reduction facilities, the aggregate yield will soon be something worth reporting on. On this side, once more, Swansea District, under the impetus of important sales and others under way, has a number of men prospecting. A little work is being done on the Palma ledge near Cerro Gordo, while the staunch old camp itself is getting over its season of lethargy and conflagrations. The greatest known mineral outcrop of the whole chain—the Buena Vista or Crapo ledge—is under control of a heavy San Francisco company, and is being opened by a force under Mr. Holland. The Enterprise mine, the property of Hawley & Keeler, is working a few men. If all signs don't fail, the Ygnacio bonanza will soon be turning into silver bullion at the new reduction works on the lake, at the hands of New York investors. Of Darwin, Old Coso and Lookout it is unnecessary here to speak. Suffice it to conclude, that throughout the great belt there are more men employed and a greater degree of activity displayed than at any time for years past.

THE SCHOOL TAX.—A light vote was cast at the school election for this district on Saturday last, upon the question of levying a special tax in the sum of $240 to pay salary due teacher, etc. One out of twenty-one voted "no," but it don't appear that the effort will finally save him three or four bits, about which his proportion of the tax will amount to. Another declined to cast a vote adding six or eight dollars to his taxes, indicating property worth from $7,000 to $10,000, whereas the Assessor puts him down at $600. All those who did vote, however, are taxpayers, and include the leading ones. It now becomes the duty of the County Assessor to furnish the Board of Supervisors with a list of the taxable property of the Independence school district, and when the annual levy is made that body will add two or three mills on the dollar to cover this school indebtedness, the proceedings involving no further expense.

ACROSS THE MOUNTAINS.—Last Tuesday there arrived in town by way of the Kearsarge trail Dr. P. Chamberlin and J. P. Ford, who have been two months in traveling through and crossing the Sierras. Both are old Californians, but in all their prospecting and mountaineering never went through quite such an experience. In attemping some cut-offs and shorter routes across, they not only lost the time but discovered the impossibility of doing it that way, although they attained places where in all probability no human has ever before reached with animals. Mr. Ford, although a professional miner and engineer, is one of the "Mussel Slough settlers," and gives a graphic account of the monstrous wrongs attempted by the railroad company. Dr. Chamberlin is a resident of Reno, Nev., but has been taking in the mountains for a year or more. Both went on northward the next morning.

SICK.—John Shepherd is having rather a tough time of it with an attack of intermittent fever, and general prostration from over work, but Dr. George is not at all apprehensive of serious results. No man in the valley has a greater number of friends to share the natural anxieties of his family at such an unusal experience in his strong life than has Mr. John Shepherd.

THE SPEAKING.—According to the announcement of last week, Hon. Wallace Leach, candidate for Congressman, will address the people of Inyo at the Court House on Tuesday evening next. Mr. Leach's engagements are such that he cannot arrive here before the evening of Tuesday, on the stage, but it will be pushed through an hour or more ahead of time, so that the assembled audience will have but a short time to wait or be entertained by other speakers. Mr. Leach is traveling and talking constantly, being now en route from Tucson, A. T., to meet this appointment. He states that it will be necessary for him to push on northward on the following morning. The committee here regret the lack of positive information as to Mr. Leach's northern appointments, but feel safe in announcing that he will speak at Bishop Creek on Wednesday evening. Let men and women of all political faiths turn out to hear him.

FOR CONFERENCE.—Rev. F. M. Willis expects to start on Monday next for Virginia City for the purpose of attending the annual M. E. Conference, which assembles there on the 22d instant. He will stop a day or two enroute at Bishop to aid in getting the work on the long-talked of church building there fairly inaugurated, for which there is now an encouraging prospect. There is no reason to doubt but the Conference will willingly return Mr. Willis to this work, where he has unquestionably accomplished a very great deal for the betterment of society in general. And it is the decided wish of everybody in the least interested in such things that he, aided by his excellent wife, should continue their labors here in preference to any stranger whomsoever.

MUSIC.—Some half a dozen or more "bran' splinter" new organs have passed through here on the last two or big freight teams bound for Bishop, which indicates the awakening of a most commendable taste. Probably not less than an even dozen of these instruments have been received in the valley in the last two months. These are good things to have, but a greater need for the ground-work of even a passable musical education is the training of our young people in the principles and thorough practice in vocal music, and without the aid of an instrument at all. A good teacher of vocal music could secure at least a half a dozen good schools in the valley for the Winter through, were such to offer.

STARTED UP.—Mr. Wm. Hedge arrived last evening from the head of Cottonwood creek, where has been engaged in putting the Owens Lake M. & M. Co's sawmill in complete repair. Parson English and Mr. McPhail have the mill leased under contract to cut out 150,000 feet of lumber for the company, and for the general market; the mill was to start up on this contract yesterday, with conditions all favorable for speedy execution. The long V flume, down which a distance of eight or ten miles, the lumber is run to near the lake shore, has been overhauled and put in good repair from end to end.

MINING OFFICE.—At the assay office of Mr. S. D. Woodhull, adjoining the Postoffice building, is on exhibition one of the most complete collections of Inyo ores and minerals ever collected in this county. It comprises choice specimens and samples from all the mining districts in this region. Mr. W. has established a valuable reputation as an assayer and metallurgist, and in our judgment our mine owners cannot consult him too often. Visitors should not fail to see Mr. Woodhull's collection if they wish to know what Inyo county can produce.

THE WRONG JONES.—And now we are told that it was John E., not his brother Thos. E. Jones, who orated on the occasion of the recent irruption of Garfielders into Round Valley. Very well. We accept the apology. But how could we know there wasn't two orators in the same family? And if but one, how were we to know which from the written testimony upon which we made up the verdict? All we know about it is, that Thos. E. could norate if he would—hence the error.

POLITICAL.—The Garfield Club meets at the Court House on Wednesday evening, when primaries will be held and delegates to the Republican County Convention chosen. The Hancock and English Club will assemble on Tuesday, the preceding evening, to receive the public and listen to Wallace Leach.

SPECIAL.—The Hancock and English Club will hold a special meeting at the Court House to-night, to perfect arrangements for the reception of Wallace Leach.

CAMPAIGNING.—The Bishop Creek Garfield Club will make Big Pine howl to-night, so it is said.

THE bullion shipments from Bodie, through Wells, Fargo & Co., during August, were as follows: Standard Con., $177,081 69; Bodie Con., $27,936 35; Noonday and North Noonday, $49,088 89; Belvidere, $12,018 41; scattering, $2,363 50. Total, $301,038 50. This is the largest month's shipment made during the year.

EXTENSIVE preparations are being made in Sacramento, San Francisco and other cities en route, to receive President Hayes in a manner becoming his exalted station. He is expected in Oakland on the 8th.

IT is estimated that four million dollars in foreign gold will arrive in New York each week until November 1st.

THE Workingmen of the Second District have endorsed Glasscock, the Democratic nominee, for Congress.

NEARLY all the business houses of Wheatland were burned on the 29th ultimo.

MONEY continues plentiful at all the banks. Rates vary according to character of loan and standing of borrower. The extremes are 6@12 per cent. The average rates for commercial paper are 6@10 per cent. Wheat borrowers are being accommodated at 7@9 per cent., inside figure for selected warehouses. There is a good demand from the farmers. Stock brokers and dealers are taking rather more money. Commercial borrowing is about the same as usual. Silver bullion is exceedingly dull, and there is a wide margin on quotations. The stock of bars is the largest in a long time. Drafts on New York are drawn at 20c for mail and 25c premium per $100 for telegraphic. Exchange on London is 49¼@49⅝d for banker's bills, and 49⅞@50d for commercial bills. Refined Silver is 11@12 per cent. discount. Mexican Dollars are nominal at 91½@92c.—*S. F. Bulletin.*

BUILDING THE DAM.—We learn from the Marysville *Appeal* that the work of building the dam on the Yuba river has been commenced. The workmen seem to have come from the four quarters. It is estimated that there will be work for 500 men weeks to come, and although this is the busy season, it is believed that enough men can be obtained for the work. No Chinese will be employed in any capacity. The contractors expect to pay the laborers $40 a month and board.—*Scientific Press.*

Tinctured With Fun.

Only a question of time—asking the hour.

A mosquito always settles before he presents his bill.

"Strive to make a good impression where ever you go", said Jones as he pulled his foot out of the mud.

An Englishman upon hearing the cackling in a poultry yard exclaimed, "Oh this is really hen chanting"

A man who wants a partner with cash capital says there is money in his business. The trouble is to get it out.

Life is real and life is earnest, when the buttoner is mislaid, and a man is invited to fasten his wife's boots with his fingers.

Can Ezekiel have had an eye to the coming bycicle in that vision where he saw "one wheel with one cherub and another wheel with another cherub."

"If you was a man, Jimmie," said a little shaver to his chum, "who would you vote for, Hancock or Garfield?" "I'd go with the biggest procession, you bet."

The angel of midnight—the woman who unlocks the street door for her husband when he is trying to unlock the bell-knob, and then lets him sleep on the hall-floor.

It is strange what horror of mud a woman will display when she has got on a new pair of embroidered stockings. She is terribly afraid she will get her new dress soiled.

A poor truckman in a Vermont town drew the big prize in the lottery; it was a book-case, and he drew it from the depot to the place where the lottery was run.—*Advertiser.*

A Hibernian presented himself at the coroner's office yesterday when an inquest was in progress. "Are you a juryman?" asked the officer at the door. "Juryman! No!" was the prompt reply. "I am an Irishman."

Boarding house chicken soup can be made, it is said by hanging up a hen in the sun so that her shadow will fall into a pot of salt and water. The only trouble is that on a cloudy day the soup is liable to be weak.

A Chicago man swore a great oath that if a neighbor called him a liar he would whip that neighbor. But as it appeared that the neighbor only accused him of poisoning a cow and abducting a child no fight took place.

An Irishman being asked what he came to America for, said: "Is't what I came here for, you mane? Arrah, by the powers! you may be sure it wasn't for want, for I left plenty of that at home."

Commissioner: "Did you hear the whistle of the boat you run down?" Pilot: "Hey!" Commissioner: "Did you hear the whistle of the boat you ran down?" Pilot: "No sir," Commissioner: "Why not?" Pilot: "Coz I'm deef."—*Puck.*

A rapid recital of the following narrative is said to be an infallible cure for lisping: "Hobbs meets Snobbs and Nobbs; Hobbs bobs to Snobbs and Nobbs; Hobbs nobs with Snobbs and robs Nobbs fobs." "This is," says Nobbs, "the worst of Hobb's jobs," and Snobbs sobs.

A fellow once walked out of a store in Gloucester with a fish, which he had stolen, tucked under his vest. He hadn't gone far with his plunder before he was brought to a halt by a shrewd passer-by, who, taking in the situation at glance, exclaimed: "See here my friend, you ought either to wear longer vests or steal shorter fish."

A man threw a stone at a dog in Galveston. An old negro toddled out of the house and said: "It's lucky foah you, white man, dat de Gineral ain't at home." "What General? "Gen. Dollypimple ob de Galbeston divishun ob de Grand Army ob ocupation ob Mezzico. You is foolin' wid a cyclone, chile."

A doctor tells with pardonable pride how being called in at the debut of his career to a consultation with an eminent prince of science, he had insisted, despite the opinion of his famous senior, that the patient had an incurable affection of the heart. "And what were my delight and pride," he says beamingly, "on learning three days later that my patient had gone off precisely as I had declared he would."

A fast friend says to a fast young man: "You seem depressed, Gus; what is the matter?" Gus—"I'm awfully down at the mouth. I was out in my new buggy yesterday and I ran over a child." "That must have been a terrible shock." "Yes; and the worst of it is, a new cuggy never gets over a shock of that kind—it hurts the springs. I don't see what the Galveston police are for if they can't keep the children out of the streets."—*Galveston News.*

An honest ignoramus, who had accomplished an act of heroism was complimented for his bravery. One lady said, "I wish I could have seen your feat." Whereupon he blushed and stammered, and finally producing his pedal extremities, said, "Well, there they be, mum."

It would never do to elect women to all offices. If a female sheriff should visit the residence of a handsome man and explain to his jealous wife that she had an attachment for him, there would be a vacancy of that office in about two minutes.

Caroline A. Soule has recently been ordained to the Universalist ministry in Scotland. She is said to be the first lady preacher in Europe upon whom the service of ordination has been officially pronounced.

A country editor, being asked, "Do hogs pay?" says a great many do not. They take the paper several years, and then have the postmaster send it back "Refused."

In driving a hen a woman is generally slow but shoo-herr.

OFFICIAL.

INYO COUNTY TRESPASS LAW

ADOPTED BY THE BOARD OF Supervisors August 7, 1880.

It is hereby ordered by the Board of Supervisors of the County of Inyo, State of California, that the following law be and the same is hereby declared to be the Trespass Law of Inyo County:

SECTION 1. Any owner, or any occupant of any land or possessory claim, finding any horse, mare, colt, mule, jack, jenny, horned cattle, hogs, sheep or goats, or any number of such animals, upon such land or possessory claim, whether such land or claim be inclosed or not, may take up and safely keep such animal or animals at the expense of the owner or owners, and shall be allowed for keeping said animal or animals the following named sums: For each horse, mare, colt, mule, jack or jenny, the sum of twenty cents per day; for each head of horned cattle, the sum of twenty cents per day; and for each head of swine, sheep or goats, the sum of five cents per day.

SEC. 2. Any person taking up animals under the provisions of this Act shall, immediately upon the taking up of such animals, notify the owner or owners of such animals, or his, her, or their agent or agents, if known to him, and living within six miles of the place where such animals were taken up, of the time and place of such taking up, together with the number, character and description thereof; also, as nearly as he can, the marks and brands, if any, of each animal; and such owner or owners, his, her, or their agent or agents, may, at any time after the receipt of such notice, and upon proof of ownership, tender the amount of damages claimed, and demand the delivery into his, her, or their possession, of such animals; and if suit shall have been commenced, such tender may be to the Justice or Judge before whom such suit is brought, or the owner or owners may give bonds with sureties, to be approved by the Justice or Judge trying the case, for the payment of all damages and costs of suit, and he may demand the release and delivery into his or their possession, of all animals held under the action, and the Judge or Justice shall order the immediate delivery of such animals; but if no owner, owners or agents of owners appear within two days to claim said animals, or if he or they appear and fail to pay satisfactory damages, or if the owner is unknown to him or her, or lives more than six miles from the place of taking up, then if the compensation and damages claimed be less than three hundred dollars ($300) the taker up of such animals shall, within two days, file a written complaint, verified by his or her oath, with the nearest acting Justice of the Peace in the township where such animals were taken up; or if the amount of compensation and damages claimed be more than three hundred dollars, then in the Superior Court of said county, setting forth in said complaint the facts, nature, location, and amount of the damages claimed, and a description of all animals so takenup, the number, the marks and brands, if any, and the supposed value of each animal, or the supposed aggregate value of such animals, and the time and place of taking up. The action shall be in favor of the owner or owners, or occupants of said lands or possessory claims, and against the property in rem; and any action thus commenced, may include all the animals thus found trespassing at any one time, whether of one or more marks or brands; and no judgment shall be entered under the provisions of this Act for damages done, except upon the testimony of at least two credible witnesses, whose names shall be entered in the Justice's docket, or in the minutes of the Court in which the action is had.

SEC 3. Upon the filing of the complaint, a summons shall be issued, and if said action be in a Justice's Court, shall be made returnable not less than fifteen nor more than twenty days from the date of issuance, and directed to all owners and claimants of the property described, and shall contain a description of each animal, with its marks and brands, if any. The summons shall be served by posting a copy of the same at the door of the room where said Justice or Superior Court is held, for ten days before the return day thereof, and also at the same time by filing a copy of such summons with the Recorder of said county; but the Recorder shall not file the copy of summons until the payment of a fee of one dollar; and it shall be the duty of said Recorder, on payment of his fee of one dollar, to forthwith compare the marks and brands, if any, described in said summons, with the record of marks and brands in his office, and thereupon to notify the owner or owners of such marks and brands of the fact of the pendency of such action, and of the time and Court when and where the same is set for hearing. The certificate of the officer stating the facts of such posting and filing, or the affidavit of any person, competent to be a witness who shall have so posted and filed, shall be conclusive evidence of a sufficient service thereof; *provided*, that in any case when any animal or animals, seized under this Act, are alleged in said complaint to be worth fifty dollars or more, it shall be the duty of the County Recorder to cause publication to be made of the fact and time of seizure, and marks and brands, with a description of the animal or animals, in a newspaper of the county, at least ten days before the sale, the newspaper in which all such notices are to be made to be designated, and the rates of publication to be fixed, by the Board of Supervisors of the county.

SEC. 4. If the judgment be in favor of the plaintiff, the property may be levied upon and sold as other personal property seized on execution. The officer selling shall give a bill of sale to the purchaser, describing the animal or animals sold, and to whom, and the price paid for each, and referring to the judgment under which such sale was made. Any overplus of the proceeds of such sale, after satisfying the judgment and costs, shall be paid by the Justice or Clerk to the owner of the property, upon demand, if demanded within six months from the date of sale; and if not so demanded, the same shall, at the expiration of said time, be paid into the County Treasury, for the benefit of the County School Fund; and the owner may also redeem any animal or animals sold under the provisions of this Act at any time within sixty days after the sale, by producing satisfactory proof of ownership, and paying the purchaser the amount of purchase money in gold coin, with interest at the rate of two per cent per month; but if no redemption be made within sixty days such bill of sale shall be conclusive evidence of title in favor of the purchaser of the animal or animals therein described.

SEC. 5. The fees of all officers for service required under this Act shall be the same as now allowed by law for similar services in other civil actions, and shall be taxed as costs in the judgment.

SEC 6. The Justice and Clerk shall keep a book, which shall be open to public inspection, and shall record therein all sales made pursuant to any judgment rendered in their respective Courts under the provisions of this Act, which record shall contain a description of the animals sold, the prices paid, the name of the purchaser, the amount of fees and charges, and the amount of surplus money, if any, arising from each sale, and whether any animal or animals have been redeemed; and if such surplus money shall be received by the owner of any animal, he shall receipt for it in the margin opposite such record, and the Justice or Clerk shall, without fee, deliver such book to his successor in office, and also all surplus money in his hands arising from any sale made by authority of this Act, taking his receipt therefor.

SEC. 7. Any person who shall drive stock from any lands or possessory claim other than his own, to any other lands or possessory claim, or shall take up any such animal or animals on any land or possessory claim other than his own, for the purpose of taking advantage of any of the provisions of this Act shall be deemed guilty of a felony; and any person who shall fail or neglect to give the notice required by the second section of this Act, or shall rescue or take from the possession of the taker-up any animal or animals, with or without having paid the compensation, fees, and damage claimed or awarded, and any officer violating any of the provisions of this Act, shall be deemed guilty of a misdemeanor.

SEC. 8 The owner or occupant of any land or possessory claim, whether inclosed or not, independent of the foregoing provisions of this Act, and if he fail to avail himself therefe, may maintain an action; *provided*, such action be commenced within sixty (60) days in any court of competent jurisdiction, against the owner of, or person having the control of, any of the animals named in section one, for any damages such animals may commit upon his said land or claim, and if judgment be rendered in his favor, it shall be entered for the amount of the actual damage proved.

SEC. 9 Nothing in this Act shall be so construed as to prevent the free use for grazing purposes of all unoccupied lands not taxed; *provided* that each actual settler, who shall have a prima facie title to the land upon which he is settled, shall be protected in the possession of one hundred and sixty acres, and residence on the land shall be considered a prima facie title; *and, provided further*, that said one hundred and sixty acres shall be marked and defined by visible and well defined monuments.

Approved and adopted this Seventh day of August, A. D. 1880 and ordered that the same be published in THE INYO INDEPENDENT for four successive weeks.

J. R. W. STERVILLE,
Chairman of the Board of Supervisors.
Attest: JOHN CROUGH Clerk.
n530t4

PROPOSALS

....FOR....

Publishing and Printing.

NOTICE IS HEREBY GIVEN THAT sealed proposals will be received by the Board of Supervisors of the County of Inyo, State of California, at the office of the County Clerk, up to the hour of 12 o'clock M. on MONDAY, the FOURTH day of OCTOBER, A. D. 1880, to contract for county printing as follows:

1. Advertising, such as is required by law and shall be ordered by said Board, including Notices for Proposals to Contract, Reports of Auditor and Treasurer, Proceeding of the Board of Supervisors, and the annual List of Delinquent Taxes. Said proposals shall submit to the Board the rate which will be charged per square of two hundred and fifty ems space for the first and each subsequent weekly publication.

2. The printing of two hundred and fifty copies of the Great Register of Inyo County, in the usual form, bound in paper. Bids must specify the price of such printing per name of each elector. Printed matter to be delivered at the Court House of said county.

Said contracts to continue for the term of one year from and after ratification.

Payment for such advertising and printing shall be made on bills duly sworn to and presented at the regular meetings of the Board, by warrants drawn upon the General Expense Fund.

The right to reject any and all bids is reserved.

Said proposals must be indorsed "Proposals for Advertising," and "Proposals for County Printing," and addressed to the Clerk of the Board of Supervisors, Inyo County. The same will be opened between the hours of 1 and 4 o'clock P. M., on said Fourth day of October, 1880.

By order of the Board of Supervisors.

JOHN CROUGH, Clerk.

MINING.

MINING APPLICATION NO 161,

....TO THE....

OCCIDENT MINE.

U. S. LAND OFFICE,
Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred linear feet of the "Occident Mine" or vein, bearing silver and gold, with surface ground three hundred feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 37, in Township ——, Range —— of —— Meridian, said Lot No. 37 being described in field notes of survey as follows, to-wit:

SURVEY OF EXTERIOR BOUNDARIES:

Began at a post on the southwest cor. of claim; marked the post "Post 1 Occident Mine." Said post is 2x3 inches square by 30 inches long and set in a mound of earth 20 inches high. From which var. 15 deg 55 min E., a pine stump 8 inches diameter bears N. 28 deg 50 min W 11 links. A pine stump 6 inches diameter bears N. 85 deg 1 min W. 45 links. A pine stump 20 inches diameter bears S. 33 deg 5 min W. 76 links. A pine tree 7 feet high x6 inches diameter bears S 39 deg 51 min E 82 links. A pine bush 2 feet high x3 inches diameter bears N. 69 deg 10 min E. 67 links. From said Post the "Armagh U. S Mineral Monument" by calculation bears N 20 degs 48 min W 17.17 chains. Thence with a var 15 deg 55 min E, 1st course—N 11 deg W 3.03 chains, ascending to point of hill at bottom of old prospecting cut 6.49 chains. End of slope—6.88 chains. On level line—commence descending 7.64 chains, old prospecting tunnel 8.42 chains. Old prospecting cut 12.47 chains. Old dump of prospecting cut 14.13 chains. Middle of Ygnacio Ravine—Ravine bears N 65 degs W 15.21 chains. Trail on ridge dividing Ygnacio Ravine from Cerro Gordo Cañon. Ridge bears W 16.07 chains. Rocky ridge—commence descending 17.19 chains. Middle of Cerro Gordo Cañon—commence ascending 21.86 chains. Wagon road—Citizens grade 22.72 chains. To post on N W cor of claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of rocks 2 feet high, marked the post "Post 2 Occident Mine." At foot of post is a cactus burr 20 inches in diameter growing in the rock. From said post a pine stump 2½ feet in diameter standing 8 feet below the wagon road, Citizen's grade, bears S 38 deg E 1.54 chains. No other suitable natural object within measuring distance. Thence with a var 15 deg 55 min E, 2d Course—N 79 deg E 2.27 chains, ascending rocky slope to "Post 3 Occident Mine" on north end of line of lode 3.42 chains. Rocky ridge bears south 4.54 chains. To a post on N E corner claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of rocks 20 inches high, marked the post "Post 4 Occident Mine" from which a pine stump 20 inches in diameter bears S 40 deg 30 min E 1.01 chains. The top of a blue slate reef 10 links high bears S 43 min E 15 links. Thence with a var 15 deg 55 min E, 3d Course—S 79 deg E .97 chains. Wagon road—descending 3.03 chains. An old stone cabin. A tall pine tree stands 25 links to East of line, 3.42 chains. Middle of Cerro Gordo Cañon—bears S W. Commence ascending on steep, rocky ridge, 8.48 chains. Trail on ridge dividing Cerro Gordo Cañon from Ygnacio Ravine 11.77 chains. Open cut 30 feet west of mouth of an old prospecting tunnel in blue slate, 12.98 chains. Old trail—runs N 65 deg W 13.69 chains. Summit of ridge at old trail 14.34 chains. Summit of ridge commence descending 15.38 chains. Crossing of Belshaw toll road 22.72 chains. Post on S E cor of claim. Said post is 36 inches long, 3x3 inches square and is set in a mound of earth 25 inches high, marked the post "Post 5 Occident Mine," from which a red iron boulder 2½x3¾ feet square and standing 26 inches high bears S 84 deg 40 min E 36 links. A pine tree 9 links high standing 6 ft. west of bottom of a gulch—gulch bears S. bears N 35 deg 11 min E 1.06 chains. The middle of the Belshaw toll road bears S 79 deg W 18 links. Thence with a var 15 deg 55 min E, 4th Course—South 79 deg W 18 chains. Road—commence ascending, 2.04 chains. Quartzite ridge bears N—S 2.27 chains. Post marked "Post 6 Occident Mine" on south end of line of lode—commence descending 2.87 chains. Trail—runs N W and S E 4.54 chains. To place of beginning, "Post 1 Occident Mine," containing 10 32 100 acres. From the Armagh U. S. Mineral Monument as herein described the mouth of entrance to the "Armagh Tunnel" as noted near the head of "Report" bears S 76 deg 55 min W 9 24 chains. The course of said Tunnel is S 58 deg 55 min E. Length 350 feet on the 27th of March, 1880.

ARMAGH U. S. MINERAL MONUMENT

The "Armagh U. S. Mineral Monument" is built on the apex of a red rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon and very precisely on the W B line of the Ygnacio mine (as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Dep. Min. Sur.) and distant 17.51 chains from the S W cor stake of the Ygnacio mine.

At the point above given I dig a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter x16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high x5 feet in diameter at its base. Marked the top of post "U. S. Mineral Monument. Erected January 31, A. D. 1880, by Wm Crapo, U. S. Deputy Mineral Surveyor—under authority of the U. S. Surveyor General for California." From said post in mineral monument, with a variation of 15 deg 55 min E the extreme end of the bluff on which the monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face of rock 7½ feet high bears N 60 degs E .67 links. The N E cor of an old adobe vaso chimney bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The N W cor of Rafael Diaz' house bears S 28 deg 33 min E 1.58 chains. An old well 30 feet deep on north side of Cerro Gordo Cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE

Commence at "Post 1 Occident mine," thence with a var 15 deg 55 min E, S 79 deg W 3.03 chains to Post on S W cor of Ygnacio mine as surveyed for a patent N 11 deg W 17.51 chains. To U. S. Mineral Monument which when computed gives for a closing line from "Post 1 Occident Mine" to U. S. Mineral Monument N 20 deg 48 min W 17.77 chains.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 147 of locations.

The adjoining claimants are, on the west the San Francisco mine, on the south the Moter mine and on the east the Tachyte Flat mine.

Any and all persons claiming adversely any portion of said Occident mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

MINING APPLICATION NO. 162,

...TO THE....

ARMAGH MINE.

U. S. LAND OFFICE,
Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred (1 500) linear feet of the "Armagh Mine" or vein bearing gold and silver, with surface ground six hundred (600) feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 38, in Township —— Range ——, of Mount Diablo Meridian, said Lot No. 38 being described in field notes of survey as follows, to-wit:

Commenced at "Post 1 Armagh Mine," on S E corner of claim. Said post is 30 inches long 2x3 inches square and is set in a mound of rocks 2 feet high, from which with a var 15 deg 55 min E a pine stump 18 inches high by 10 inches in diameter bears S 15¾ deg E 77 links. A pine stump 15 inches diameter bears S 2½ deg 30 min 91 links. A red ferrugenous quartz reef standing 4 feet high bears N 24 links. A pine stump 12 inches high x5 inches in diameter bears N 49 deg 30 min E 15 links. Thence with a var 15 deg 55 min E, N 11 deg W 3.20 chains. Ascending to summit of ridge commence descending, 6 98 chains; dump of old prospecting cut, 10.80 chains; Belshaw toll road, 13.16 chains; Belshaw toll road in middle of Cerro Gordo Cañon, commence ascending 14.25 chains; road running to Potosi house, 21.66 chains; wagon road—Citizens' grade—22.72 chains; post on the N E corner of claim. Said post is 30 inches long, 2x3 inches square, and is set in a mound of earth 20 inches high. Sage brush slope, sloping S W; no natural object for witness mark in vicinity. Marked post "Post 2 Armagh Mine." Thence with a var 15 deg 55 min E, S 79 deg W .07 chains. Trail runs N S; commence descending—2.20 chains; wagon road, Citizen's grade—4.54 chains; post on north end of line of lode, marked the post "Post 3 Armagh Mine"—8.43 chains. Trail runs N S—9.09 chains. To post on N W corner of claim, situated on sage brush slope, sloping to S W. Said post is 3 feet long, 2x3 inches in diameter and is set in a mound of earth 2 feet high; marked the post "Post 4 Armagh Mine." No suitable natural object within measuring distance. Thence with a var 15 deg 55 min E, S 11 deg E, commence ascending—1.75 chains; commence ascending—3.97 chains; crossing of foot trail runs west—8.27 chains; toll road in middle of cañon, commence ascending, 18.45 chains; summit of ridge bears west; commence descending, 19.74 chains; south end of "Silver Wedge" claim, 22.72 chains, to post on S W corner of claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of earth 20 inches high; marked the post "Post 5 Armagh Mine," from which a pine bush 2 feet high bears N 76 deg W 19 links. The chimney of an old deserted vaso bears N 22 deg 30 min E 24 links. Thence with a var 15 deg 55 min E, N 79 deg E 63 chains. Descending into bottom of gulch—gulch bears south, commence ascending—4.85 chains. "Post 6 Armagh Mine," or south end of line of lode, 3.90 chains; crossing of toll road, 9.09 chains; "Post 1 Armagh Mine," place of Beginning. From which post the Armagh U. S. Mineral Monument bears N 4 deg 10 min W 12.67 chains, by calculation, containing 20 64 100 acres.

Location of the Armagh Tunnel.—From the "Armagh U. S. Mineral Monument" the mouth of the Armagh tunnel bears S 76 deg 55 min W 9 24 chains. The course of said tunnel is S 58 deg 55 min E. Length, 350 feet.

ARMAGH U. S. MINERAL MONUMENT—DESCRIPTION THEREOF:

There not being any lines of the U S public land surveys within 100 chains of the Armagh mine, I built a Mineral Monument and connected therewith. Said Mineral Monument is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon and very precisely on the west boundary line of, and distant 17.51 chains from the southwest corner stake of the Ygnacio mine, as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Deputy Mineral Surveyor. At this point drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter by 16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high by 5 feet in diameter at its base. Marked the top of the post "U. S. Mineral Monument. Erected January 3d, 1880, by Wm. Crapo, U. S. Deputy Mineral Surveyor, under authority of the U. S. Surveyor General for California." From said post in Mineral Monument, with a variation 15 deg 55 min E, the extreme end of the rocky bluff on which the Mineral Monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face 7½ feet high bears N 60 deg E .07 links. The northeast corner of an old adobe vaso chimney, a Mexican furnace for smelting silver and lead ores, bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 62 links. The northwest corner of Rafael Diaz' house bears S 38 deg 23 min E 1.58 chains. An old well 30 feet deep on north side of cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE.

Commence at "Post 1 Armagh Mine," thence with a var 15 deg 55 min E, N 79 deg E 1.51 chains to west boundary line of Ygnacio mine, and at a point 325 feet—4.92 chains from the southwest corner stake of the Ygnacio mine, thence with a var 15 deg 55 min E, N 11 deg W 12.59 chains to U. S. Mineral Monument.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 146, of locations. The adjoining claimants are, on the East, the Greenly mine.

Any and all persons claiming adversely any portion of said Armagh mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, in the State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

ASSESSMENT NOTICE.

LOS ANGELES MINING AND SMELTING Company.

Location of Works, Resting Springs, Inyo County, California.

Location of Principal Place of Business, Los Angeles, Los Angeles County, California.

Notice is hereby given that at a meeting of the Board of Directors of said Company, held on the Third day of August, 1880, an assessment (No. 4) of two dollars per share was levied upon the entire capital stock of said corporation, payable immediately, in United States gold coin, to J. M. Elliott, Secretary of said Company, at his office, No. 1 Temple Block, in the city and county of Los Angeles, State of California.

Any stock upon which this assessment shall remain unpaid on Monday, the Twentieth (20th) day of September, 1880, will be delinquent and advertised for sale at public auction, and unless payment is made before will be sold on TUESDAY, the NINETEENTH (19th) day of OCTOBER, 1880 to pay said delinquent assessment, together with costs of advertising and expenses of sale. By order of the Board of Directors.

J. M. ELLIOTT, Secretary.

Office of the Secretary—No. 1 Temple Block, City and County of Los Angeles, California.

LEGAL.

PROBATE NOTICE.

IN THE SUPERIOR COURT OF THE County of Inyo, State of California. In the matter of the Estate of Nancy Williams, deceased. Order to show cause why order of sale of real estate should not be made. It appearing to said Court, by the petition this day presented and filed by John A. Lank, the Administrator of the estate of Nancy Williams, deceased, praying for an order of sale of real estate, that it is necessary to sell the whole of the real estate to preserve the same from destruction.

It is therefore ordered by the said Court that all persons interested in the estate of said deceased appear before the Superior Court on MONDAY, the SIXTH day of SEPTEMBER, A. D. 1880, at 10 o'clock in the forenoon of said day, at the Court Room of said Court, at the Court House, in the County of Inyo, to show cause why an order should not be granted to the said Administrator to sell the real estate of said deceased as shall be necessary.

And that a copy of this order be published at least four successive weeks in THE INYO INDEPENDENT, a newspaper printed and published in said county. JOHN A. HANNAH, Judge.

Dated July 17, 1880.

OFFICE OF THE COUNTY CLERK of the County of Inyo.

I, John Crough, County Clerk of the County of Inyo, State of California, and ex-Officio Clerk of the Superior Court in and for said County, do hereby certify the foregoing to be a true, full and correct copy of an order duly made and entered upon the minutes of said Superior Court.

WITNESS, my hand and the Seal of said Superior Court, this Seventeenth day of July, A. D. 1880. [SEAL] JOHN CROUGH, Clerk, By DANIEL CROUGH, Deputy Clerk.

Paper—How It is Made.

The antiquity of the paper manufacture is excelled by but few other products of civilization, Chinese historians carrying it back far in the twilight of our history. In England it was first introduced near the close of the fifteenth century, and in this country in 1693, at Germantown, Pa. The materials from which paper is produced are numerous, but wholly of vegetable origin, neither wool nor hair possessing the capability of being reduced to fibrous pulp, a prerequisite to the formation of paper. Linen and cotton rags, straw, the leaves and stalks of the okra plant, jute stalks, manila, hemp and even wood fibre, are used in the manufacture of paper. No substance, however, can equal good linen rags, of which the toughest and finest paper is made. Next in rank are cotton rags, from which the best writing and note paper is made. In this manufacture great care is taken in the selection of the material and in every process.

Gathered from all parts of the country by tin pedlers and by peripatetic ragmen in cities, the rags arrive at the mill in bags, a portion of the stock, perhaps, coming in pressed bales from over the sea. The first process is sorting, and then the rags are cut, usually by girls, by means of a fixed blade in a bench, like a short upturned scythe, the operator picking them up by handfuls and drawing them over the edge of the blade. Each girl is furnished with a sandstone rifle, and when a large roomful of girls are at work the sounds remind one strongly of a gang of mowers at work before the days of the mowing machine. A second sorting for the removal of all buttons, hooks and eyes and hard seams follows, and the rags are then dusted. The duster is a large cylinder, the surface of which is fine woven wire, inside of which is a shaft carrying arms set around it in a spiral form, and revolving at a higher rate of speed than the cylinder. This difference in speed gives the rags a thorough stirring, while the spiral arrangement of the blades facilitates the exit of the rags, which traverse the cylinder sieve from end to end. White paper can be made from colored as well as white rags, and for a removal of the color as well as the dirt they are submitted to a boiling with lime water. The rags are placed in a large rotating boiler made of half-inch plate, mounted on journals and driven by proper gearing, as a worm and wheel. Through the hollow journal steam is admitted and kept at a pressure of from forty-five to sixty pounds, representing a heat from 292° to 308°. Lime water, in the proportion of about one part by weight to ten or twelve of rags, is mixed with them and the boiler is set in motion. Usually a charge requires from eight to twelve hours' boiling. Even this severe test does not fully purify the rags, which are next passed through an "engine."

To the unintiated a brief description of this appratus is necessary. It is a tank of oval form; the walls rising two and a half feet from the floor. This is partially divided longitudinally by a straight, upright partition, not extending to the ends, however, but leaving a space between its ends and the tank's sides, of a width corresponding to that between the sides of the partition and those of the tank. On one side of this partition, across the center of the tank, is a toothed drum, the teeth or blades of which alternate with fixed teeth at the bottom. These teeth tear the rags to tatters, but without destroying the fiber. A stream of water is constantly passing through the tank, and is constantly removed. This is done by a wheel of fine wire netting that revolves on the side opposite to the toothed drum, taking up the mass, but detaining the pulp, the water running off through the wheel, which is hollow. Thus the water is used only while making a single passage around the tank, the current being produced and maintained by the rotary movement of the beater or tearer. The condition of the rag material when it comes from this cleansing engine is that of a coarse pulp, technically known as "half stuff," which is subsequently submitted to the action of another engine, known as a beating engine, but essentially the same as the cleaning engine.

But still further cleansing is necessary. The material is next mixed with chloride of lime and again passed through the engine. It is then heaped upon drainers, and looks like a mass of half-melted snow. The white, however, is a dead white, having no brilliancy. To receive this quality it must literally be colored. As the laundress blues her clothes to make whiter, so must the paper stuff be blued, and when so tinted it has the same quality of whiteness as wind driven snow, always shows a bluish tinge. This is quite different, however, from the blue writing paper so affected by the fashionable twenty years ago, and now the favorite tint in the South and in England. That is really blue paper, while our usual white paper is merely tinted sufficiently to remove the dead, yellow, lusterless appearance of absolute whiteness. The bluing is ultramarine, as is used in calico printing and other manufacturing purposes, made from silicate of soda, alumina, sulphurets of iron, and carbonate of soda, and not from lapis-lazuli. This is mixed in powder with the half stuff just before the final heating.

After the final heating the material is apparently a thin, milky fluid, having no trace, to the unaided eye, of the fibrous character that it really possesses. Formerly the paper was formed by hand, the workman dipping a rectangular sieve into the fluid pulp, and depositing the pulp on a piece of felt to dry. But very little paper is made so now, the Fourdrinier machine having taken the place of the hand workman. This "machine," as it is called *par excellence*, is a wonderful production of skill; it is almost wholly automatic in action, and works with marvellous exactness. It is scarcely possible to describe it without detailed engravings, but a brief account of its work may aid in its comprehension. Some of the machines are not less than six feet wide and seventy-five feet long, requiring a building by itself, and making a sheet of paper over five feet in width. The pulp is pumped into an elevated tank, from which it is delivered to the machine through an adjustable gate opening from a reservoir. The amount of pulp fed to the machine regulates and determines the weight of the paper, and of course it must be governed absolutely and exactly, the speed of the machine being constant. The pulp flows on to a roller, which deposits it on an endless apron of fine woven wire, which has constantly a jarring motion, tending to shake out the water and aid in the homogeneous union of the particles. Thick rubber straps on each side of the endless apron determine the width of the sheet. Passing between rollers which compress it, the sheet of paper goes over perforated boxes from which the air is exhausted by a pump, and much of the remaining moisture is driven out by atmospheric pressure. A bath of liquid glue gives a proper sizing to the sheet after it is fully dried by cylinders heated by steam. The sheets, dampened by glue, are taken to a drying room, from whence, all wrinkled, they are submitted to a calender consisting of a stand of rolls, three of chilled iron and two of paper. These latter are made of manila paper, cut in disks, with a hole for the axis or shaft, and compressed by hydraulic pressure. When turned and finished, these paper rolls are as smooth and almost as hard as iron, presenting a highly finished surface. The sheets are then trimmed by a machine suggestive of the guillotine, and ruled. The pens used on the ruling machine are of peculiar form, made of sheet brass and fed with ink by a wick. Most of those used in this country are made by a concern in Harrisburg, Pa.

Book paper is made of old paper entirely. The processes are similar to those emrloyed in making paper from rags, except that owing to the more pliable nature of the material, they are not so long continued.

Jute is used for making coarse paper, such as is extensively used for making flour bags, for which it is well adapted, being very tenacious of fiber, a full grown man having been carried by four persons, each lifting a corner of a sheet of paper from which bags are made, designed to hold a quarter of a barrel of flour—forty-nine pounds. The jute stalks come in lengths of from ten to fourteen inches. They are imported from Calcutta, and are the same material from which gunny cloth and sacks are made. The stalks pass through a rotary cutter with stationary knives set in a cylinder, by which they are torn to coarse shreds. A boiling under pressure, in a rotary boiler, with lime, follows, when the mass is heaped and allowed to "sweat" a few days. It passes through the cleaning engine, as do the rags described above, is bleached with chloride of lime, and sized with a size made of rosin and washing soda. The after machining is similar to that used on writing paper.

Envelope paper and fine wrapping papers are made from old manila rope, and paper for paper collars from cotton rags. In both cases the processes are of a similar character to those employed in the manufacture for writing purposes.

A necessity for paper making is pure water; so paper mills are never found on the banks of sluggish streams, or the shores of a marshy, muddy pond. The coloring matter for tints is introduced into the beating engine when finishing the half stuff.—*Journal of Commerce.*

AN electric light shines on Vesuvius.

Chaff, Chaffy.

The Arab who invented alcohol died nine hundred years ago, but his spirit still lives.

A good conversationalist may make himself heard at a feast, but the small boy takes the cake.

A church down in Texas has on its inner door the following legend: "no smoking allowed."

When a girl pnrchases a pair of kid gloves she always likes to have them sent home in a red wagon.

They enforced the rule the other day at a Cape May hotel against the admission of dogs, and one Philadelphia dame, who has a pug for a favorite, left in disgust.

A tailor, who was giving his pet dog some medicine to cure him of asthma, on being asked by a friend what he was doing, replied: "I'm mending my dog's pants."

The Boston *Globe* is of the opinion that a well cooked breakfast will do more toward preserving peace in the family than will seven mottoes on the wall, even though they be framed in the most elaborate of gold moldings.

A California man who counts his acres by the tens of thousands, upon being remonstrated with for monopolizing tendencies, responded: "I dont want to monopolize any land. All in the world I want is the land that adjoins mine."

A little fellow, turning over the leaves of a scrap book, came across the well known picture of some chickens just out of their shells. He examined the picture carefully, and then with a grave sagacious look, slowly remarked: "They came out 'cos they was afraid of being cooked."

"Is there any opening here for an intelligent writer?" asked a seedy, red-nosed individual of an editor. "Yes, my friend," remarked the man of quills; "a considerate carpenter, foreseeing your visit, left an opening for you. Turn the knob to the right."

"Thrashing by steam," murmured a fond mother as she glanced at an article in the agricultural paper. "What gitups they do have nowadays. If I'd had one of those steam thrashers for my four boys, my arms wouldn't have been so rheumaticky as they are today," and she dreamily thought of the past as it might have been.

A little bootblack picked up a cigar stump in front of a Galveston hotel, and after examining it for a moment, said mournfully to a comrade: "I say, Bill, I believe we are going to be quarantined this year, and everything is going to be dear." "What makes you think so?" "Just see how short the cigar stumps are already."

When Macaulay was an undergraduate he attended an election meeting in Cambridge, and was rewarded by a dead cat being thrown in his face. The man who hurled the offensive article apologized by saying that he had no wish to hit Mr. Macaulay, as he intended it for Mr. Adeane. "I wish," replied Macaulay, "you had intended it for me and hit Mr. Adeane."

IT is so seldom that married people tire of each other a few days after the knot has been tied, that a divorce case which may not prove uninteresting, affording ground for speculation. On the 24th of Febuary, 1879, R. H. Gouley, of this city, took unto himself a Normal School girl as a wife. That night they retired—a quite natural performance. The next morning she arose with the lark, and took herself bodily away from the board and bed of her liege lord, staying not on the order of her going. She then purchased a ticket overland, and shook the dust of California from her feet. The forlorn husband waited in vain for her return, but she came not. Then he spplied for a divorce from his Isabella on the ground of desertion. This was promptly granted by Judge Belden. At the time of her marriage she was 22 years of age—old enough, it would seem to know her own business—and from neither of the two witnesses examined—the husband and another—was the cause of her leaving ascertained.

YESTERDAY, about 1 o'clock, a boy of about 12, went up Market street at such a rate of speed that everybody who saw him was satisfied he was running for the doctor.

A man with kindly expression of countenance, caught the flying boy by the arm and asked him:

"Sonny, is there anybody right sick at your house?"

"No, but there will be if you don't turn me loose."

"Who is it, bubby?"

"Will you let me go if I tell you?"

"I will, my boy."

"Well, then, it is my brother Bob. He will be a remains before night if I don't get home right off. You see, we have cucumbers, green corn, clabber, watermelon and cabbage for dinner, and if I ain't there to get my share he will founder himself and die. Please let me go, so I can save my little brothers life."

THE Grand Jury of Merced found ten indictments against the County Auditor, E. J. Hamilton, and are now looking around for evidence against other officials. The people of Merced feel proud of the prominence they have attained on account of the action of the Grand Jury and are having a real nice time gossiping about the matter.

THE United States stated receipts for August will aggregate $30,500,000; expenses, $16,500,000, exclusive of interest on the public debt, which is light. The acting Secretary of the Treasury estimates the decrease in the debt for August to be over $11,500,000.

IT isn't what goes in but what comes out of the inkstand that makes the trouble.—*Transcript.*

HOTELS.

INYO INDEPENDENT.

PUBLISHED EVERY SATURDAY, BY

CHALFANT & PARKER.

J. E. PARKER. P. A. CHALFANT.

INDEPENDENCE, CAL.:

SATURDAY, SEPTEMBER 11 1880

IT yearly takes 200,000 acres of forest to supply cross-ties for the railroads of the United States. It takes 15,000,000 ties to supply the demand, for which, on an average, the contractors get 35 cents apeice, making in the aggregate $5,250,000. In building a new road the contractors figure on 2,700 ties to the mile, while it takes 300 ties to the mile to keep a constructed road in repair. The average of a good peice of timber land is 200 ties to the acre and 12 ties to the tree. White or burr oak is considered the best timber for the purpose, although cherry, maple, ash and even locust have been used. The business gives employment to an army of choppers, who are paid ten cents apeice for each tie. A continued practice makes the choppers expert in the use of the axe, and a single man has been known to get out thirty-five ties in a day, yet the average is only ten, while an expert will probably get out twenty.

THE affairs of this country have become so extended that it is only by a carefully prepared synopsis in the form of figures that one can hope to understand what is really going on. Hon. A. R. Spofford, the Librarian of Congress, is the only man who has the facilities at his command for collecting complete national statistics and he does it with the greatest care and accuracy. His latest issue, "The American Treasury of facts," has been sent us by Messrs. H. H. Warner & Co., proprietors of the valuable Warner Safe Remedies. This book is a miniature cyclopædia in itself, containing, in addition to a vast amount of national matter, about all of value that has transpired in this country during the past year and reflects credit upon the compiler as well as upon the enterprise of Messrs. Warner & Co. in selecting it.

IT is customary to mine coal so closely as to leave pillars of insufficient size and strength to support the earth which is left on top. The people of the Plains, near Wilkesbarre, are greatly distressed by the caving in of the earth beneath them from this cause. The fall goes on peice-meal, with a succession of petty earthquakes. These wreck houses and barns, and produce general alarm among the residents, who cannot tell at what moment any house may be tipped over and demolished.

GOLD has been discovered in the Mexican village of Las Placitas, about thirty miles from Santa Fé, N.M. The lead is about eighty-four feet wide (?), and the yield is from three to six thousand dollars worth of gold to the ton(?). The discoverer is a prospector named Wesse Martin. The discovery creates intense ezcitement in Santa Fé and vicinity.

THE postoffice department now issues money orders payable to the party purchasing, thus enabling any one going on a journey to a strange city to avoid carrying surplus money, and to collect at the desired point without further identification than that afforded by the order.

A Mobile accident insurance company pays policies for casualties resulting on an average from the following causes: Out of fifteen claims recently presented one man was killed by a fall, two by railroad accidents, one by drowning, one by lynching and ten by bullet wounds.

THE production of petroleum is still so great that the storage is inadequate and immense quantities are wasted. In the Bradford district alone it is reckoned that during last month an average of 6,000 barrels a day ran to waste.

FOUR feet of solid ore between well defined walls, assaying, every piece of it, up in the hundreds, is something that can not be shown in a mine every day. This is what is in the May Lundy tunnel 340 feet from its mouth. Great chunks of the ore come out fairly glistening with particles of fine gold. Small streaks are encountered that are fabulously rich. Where work is being done on the croppings the ledge manifests improvement. In the air shaft, which is being sunk rapidly, the ledge shows two feet of exceedingly rich ore. So much ore is being extracted that the number of pack mules will have to be trebled to take it away with the present force of men working.—*Homer Index.*

THE Los Angeles *Express* says there seems to be but little doubt that the directors of the Atchison, Topeka and Sante Fe company have signed a contract to commence work next month on the road from San Diego. It says their thirty-fifth parallel road will undoubtedly pass through Prescott and cross the Colorado at the Needles. The *Express* thinks the road to San Francisco will be up the Coast.

THE Directors of the California State Prison have contracted with an English firm for a jute factory of one hundred looms, which, it is estimated, will turn out the first year five million sacks.

STAGE ROBBING—A ROAD AGENT GETS HIS QUIETUS.

At 4 o'clock last Sunday morning a desperate fight took place at a point on the Bodie–Carson road, nine miles this side of Wellington's Station, between Wells, Fargo's shot-gun messengers and two bold highwaymen, in which one of the former was wounded and one of the latter instantly killed. The stage was going toward Carson, and meeting the stage coming south, learned that at that point this stage had been robbed the night previous. Upon this information, Tovey, one of the shot-gun messengers, got off to look for the tracks of the foot-pads, which he found leading in the direction the stage was going. About every half-mile he repeated this examination with like results. About five miles from where he made the first examination, a place where a road turns off to Hall and Simpson's was reached. Here Tovey got off again and was bending down looking at the tracks when two men suddenly came out of the darkness, and the foremost, covering him with a rifle, exclaimed: "Throw up your hands, you ——!" Tovey straightened up and throwing up his hands, stood still for a moment, and then remarked:

"Don't shoot; I'll go back and get the box."

"Go back, you whelp, and if you make a move we'll murder every mother's son of you."

As the man said this his companion stepped to the right and opened fire with a rifle, his shot striking the near leader in the hest, the horse, after a plunge or two, falling dead. The remainder of the team was rearing and plunging with fright, but were prevented from running away with the load of frightened passengers by the dead horse as well as the efforts of the driver. During this confusion Tovey managed to get back to the stage and get his shotgun, which Billings, the Division Agent, who was yet on the seat, quickly handed him. He then jumped back of the lamps, the rays from which showed the positions of the two robbers. The one that had killed the horse moved around to the right to flank the stage, the other approaching direct, saying:

"Don't move or I'll murder every last —— ——."

"Whose moving?" said Tovey, cocking both barrels without any noise. "You've got the drop on us; come and get what you want."

This was said in such a well assimulated tone of fright that the robber, who had his rifle to his shoulder, lowered it and advanced into the full glare of the light, being then close to the fallen leader. Tovey told the driver to "Throw down the box, quick; let's get out of this." The driver made a noise as if getting out the box, when the robber laughingly remarked:

"Your heads are level."

These were his last words, for at the instant a load of heavy shot from Tovey's gun blew his head to smithereens.

Billings then fired two shots at the other robber. Tovey ran to the rear of the stage and raised his gun to fire at the robber, who was about twenty yards away. The robber fired first, the ball going through Tovey's arm, causing him to drop the gun, which was discharged at the same moment. With his left hand he managed to get out his revolver and fire two shots at the retreating robber, but did not hit him.

Finding that he was bleeding profusely, Tovey called to Billings and Woodruff, the other messenger, to get down and help him up to Hall and Simpson's farm house, not far away.

It was then getting daylight. The messengers were on the way to the house, and the passengers were grouped about the dead horse and robber as they lay touching each other, when the driver was again startled with the order to "Throw down the box!" It came from the other robber, who had come back to finish up his undertaking. He got the box, cut it open with a hatchet, and coolly pocketed the few hundred dollars it contained. He then asked the driver which way his partner had gone, not suspecting that he was lying dead, being hidden from his view by the dead horse. The driver feared to tell him that such was the fact, and replied that he didn't know. The robber then walked rapidly away.

A RUMOR prevails that a company of capitalists is forming in New York with $100,000,000 of money represented by Government bonds, to issue certificates in three classes, agricultural, mining, and manufacturing, that those in such lines may get currency to an amount equal to one-third of his property at six per cent interest. It proposes also to issue certificates of deposit for bullion for international use at less than regular exchange.

THE Pacific Coast Steamship Company's new wharf at San Pedro is completed, and grain is now being received and shipped directly on board steamers lying at the wharf.

A couple of colored people in Bodie are strongly attached to each other, and he addresses her as his "luscious brunette," while she responds with "my precious black and tan."

THE BAD MAN OF BODIE.

The bad man of Bodie is rapidly acquiring something like a national reputation. But, at present rates, he will be as extinct as the mastodon ere he derives much felicity from his reputation—he will die that his name may live; pretty soon he will be exterminated. In plain English here is the record of lawlessness in Bodie for the past week only:

On Wednesday night of last week, Geo. Watkins, one of Bodie's bad young men, aided and abetted by John Sloan, of like ilk, went into the Comstock saloon and very deliberately shot Robert Whitacre to death. Whitacre was an officer of the law, with instructions to keep bad characters, Watkins in particular, out of the saloon. In an attempt to eject Watkins a short time previous to the shooting, the officer had deemed it necessary to club Watkins over the head with a six-shooter. For this, Watkins subsequently shot the officer so as to make the thing even as required by the Bodie code. Watkins was taken to to prison; he was an opium eater and otherwise dissipated, which, together with the effects of the blows he had received, caused his death in his cell on the Saturday night following.

Saturday's issue of the Bodie *Free Press* concludes a reference to this affair as follows:

Hon. P. Reddy, it is understood, will defend Watkins. Thomas Ryan will have Sloan's case in charge, and Gen. Kittrell will prosecute the two prisoners. The respectable portion of this community are in sympathy with the course Whitacre took, and hope a thorough examination will take place.

Watkins is dead, therefore Mr. Reddy will not be called upon to defend him. We doubt if any criminal lawyer in the United States can anywheres near show such an extended record of unvarying successes in defending man-slayers as can he, and in as many different Courts. It is a recognized fact that this uniformity is the result of power, strengthened by his individual faith in each case that his client had a real justification for his bloody deed. In any event the faith in his powers in this way has become such that many people have come to think it is made a part of the advance calculations of some who think to right their wrongs, real or fancied, by the knife or revolver. And the above case looks as if it might have been in point. But whether this is so or not, we feel warranted in saying that Mr. Reddy proposes hereafter to quit that branch of his practice in toto. This being his determination, it is quite certain he would not have appeared for Watkins.

But to go on with the record: The same night Watkins died, John Hackwell gave a Spanish woman a beating. For this, a Mexican, whose name we do not now recall, shot and killed Hackwell. Then, growing out of the same difficulty, John Raun shot and killed M. Costello, a former resident of this county. So there were three men buried on Sunday and one on Monday, all having died by reason of the prevailing belief that the pistol is the only arbitrator in personal differences.

In close connection with this record of violence, comes the death of the stage robber, and the shooting of the messenger, mentioned in another column, and three other stage robberies, all taking place during the time the killing was going on in Bodie, and all more or less associated with the affairs of that place. This shows that the somewhat noted "bad man of Bodie" is becoming an established "institution," though an indefinite one withal.

Mine Ventilation.

THE Gold Hill *News* tells of a simple and efficient method of ventilation adopted by the Scorpion mine, on the Comstock, as follows:

As is usual with good inventions, the method adopted by the Scorpion is exceedingly simple. An eight-inch pipe is led from the surface to near the face of the east drift on the 500-foot level; total length of pipe, about 850 feet. On the surface the exhaust of the hoisting engine is thrown into this pipe. This exhaust as it goes out to the surface from this pipe creates partial vacuum, which is filled by air coming up the pipe, thus causing the "fill" to take place at the lower end. By this means fresh air is induced to flow dawn the shaft and to the face of the drift to supply the place of that literally sucked out by the exhaust.

The practical working of this method is most satisfactory. Where it was next to impossible a short time ago to exist, and where after a blast the workman were unable to get in for hours, now there is an abundant supply of fresh air, and the fumes of powder are cleared out in a few minutes.

The system is to be patented, and letters have been applied for.

OUR private information confirms the cable dispatch announcing that a definite formation of DeLessep's Canal Company is imminent. It is probable, moreover, that the syndicate will embrace the support of several banking houses in this city and San Francisco. The bankers appear to have concluded that the prestige of DeLessep as a successful promotor of the Suez Canal will insure the sufficient subscriptions for the first issue of about five hundred million francs. There is good reason to believe that the stock will be placed on the market by a syndicate of American bankers in a few days who will act under protection.—*S. F. Bulletin.*

NEWS ITEMS.

HE who does a good deed makes heaven his debtor.

A thoroughly good man is invariably a brave one.

"Is your programme full, Miss Beetlecrusher?" asked a young man of a Western damsel who had just struggled out of the refreshment room with disappointment in her eye and an "order of dances" in her hand. "Programme full?" said the daughter of the Setting Sun, "Waal, I guess not! I hain't had nothing but a piece of cake and an ice-cream, and that don't go far toward filling my programme, I can tell you."

THE 15–14 puzzle has been brought to the attention of so learned a body as the Royal Society, Edinburgh. At a meeting June 8th, Prof. Tait, the distinguished mathematician, sent in a note on the theory of the puzzle, and gave a rule for determining whether a particular arrangement was solvable or not.

NOTICE.

THE UNDERSIGNED HAS PURCHASED the interest of W. M. Nichols in and to the Bishop Creek Stable, as also all the indebtedness due to said Stable, and will hereafter conduct the same. JOHN CLARKE.

Bishop Creek, Cal., Sept. 8, 1880. n534t4

Allgemeine Deutsche Unterstuetzungs Gesellschaft.

[German General Benevolent Society.]

SAN FRANCISCO, August 28 1880.

Messrs. Harris & Rhine, Independence, Cal.:

DEAR SIRS—The undersigned, President of the German Benevolent Society, begs leave to call your attention to this truly benevolent institution, founded in the early days of California, and being now in the 27th year of its existence. The Society was formed to carry out three objects viz.: to assist poor and worthy or deserving people by support, to find employment for those out of work, and to cure those who are stricken down with sickness. For the latter purpose the Society owns a magnificent Hospital, surrounded by extensive grounds, where all patients are under the charge of excellent physicians and a consulting board of the most eminent medical talent of this city. The Society has expended for hospital and grounds the sum of $188,895

The object of this communication is to propose to you to act as agent for this Society, either personally or through one of your employees, suited for such position, for the purpose of enlisting new members.

The monthly fee is only one dollar and the initiation fee on becoming a member two dollars. Only healthy persons can become members, and only Germans or those who speak that language, also their wives and children. Any member who meets with sickness is treated in the hospital without any expense to him until he has been restored to health. All persons who are not members, or can not become such, not speaking the German language, are admitted for medical treatment in the hospital at as low terms as it is possible to make them.

In this city we have about 3,000 members, but throughout the interior only about 300. It is our aim to increase the number of members throughout the State to make the hospital as much as possible self-sustaining, to enable us to extend the charitable department in this benevolent institution. For the trifling sum of one dollar per month members have the best aid and care in the German Hospital.

Frequently sick people in the country are crippled for life by false treatment from incompetent doctors, or even brought to a premature death. Only too late do they find out that if they had become members they would have been restored to health, and their earnings of years would not have gone into the pockets of inexperienced doctors, as the hospital employs only the best physicians. If there are no earnings, the employers and the friends of the sick are generally called upon to pay for his support. All this can be avoided, if the employers would vigorously enforce the rule, now introduced in most of San Francisco's establishments, that every man employed should belong to a relief society in order that in case of sickness he might be well cared for and not be reduced to the rather humiliating necessity of asking aid from the purses of his employer and his friends.

Persons of all nations of the age of 50 years or over are admitted as pensioners for life by paying a certain sum to be agreed upon to the society. They receive a home at the hospital, first-class board, washing and attendance in in case of sickness, free of any expense

To enable Germans and others who do not know of the existence of this institution, neither of the hospital nor its great advantages, to become members, I have addressed you the above, and hope that you will cheerfully accept the agency and do all in your power to further the interests of this society by enlisting new members, and recommending our hospital to those who may be compelled to seek medical aid.

Your Obedient Servant,

JULS. BANDMANN,

President G. G. B. S.

HARRIS & RHINE,

Agents at Independence, Cal.

ADMINISTRATOR'S SALE OF REAL ESTATE.

NOTICE IS HEREBY GIVEN, THAT IN pursuance of an order of the Superior Court of the county of Inyo, State of California, made on the Sixth day of September, 1880, in the matter of the estate of Nancy Williams, deceased, the undersigned, the Administrator of said estate, will sell at public auction, to the highest bidder, for cash, and subject to confirmation by said Superior Court, on TUESDAY, the TWELFTH day of OCTOBER, 1880, at 1 o'clock P. M., at the Court House door, in the town of Independence, in the county of Inyo, all the right, title, interest and estate of the said Nancy Williams at the time of her death, and all the right, title and interest that the said estate has, by operation of law or otherwise, acquired other than or in addition to that of the said Nancy Williams at the time of her death, in and to all that certain lot, piece or parcel of land situate, lying and being in the said county of Inyo, State of California, and bounded and described as follows, to-wit:

Lot 25x100 feet on Main street, in the town of Darwin; said lot being known as Nancy William's lot, and being almost opposite Waterman & O'Brion's store, in said Main street, together with the frame building thereon 25x30 feet, known as Nancy Williams' lodging house. Also, a kitchen 10x15 feet, on said lot.

Terms and conditions of sale: Cash. Deed at expense of purchaser.

JOHN A. LANK,

Administrator of the Estate of Nancy Williams, deceased.

September 11, 1880. n534t4

INDEPENDENCE, CAL.:

SATURDAY, SEPTEMBER 11.....1880

Superior Court Proceedings.

The Superior Court, Judge Hannah presiding, convened in regular term on Monday last.

The case of the People vs. Ellis, (murder) was passed for the present.

On Tuesday the slander suit, Isaacs vs. Rhine, came up for trial; S. P. Moffat and District Attorney Laird appeared for plaintiff, and P. Reddy, of Reddy & Conklin, as chief manager for defendant.

A trial jury was empaneled as follows: H. C. Wright, Joseph J. Steward, J. R. Eldred, Jas. Shaw, W. R. Edson, E. Robinson, Schuyler Williams, Wm. Price, E. H. Blake, W. W. Vaughn, A. Hood and H. M. Dickenson.

Before the panel was filled the original venire of 19 was exhausted, and a special venire for five, returnable in half an hour, was ordered, from which the last two above named were accepted.

The following were of the original venire, and are still held: H. Grover, W. H. Wheaton, Albert Wayland, Henry Evans, J. P. Brown, H. D. Gelatt, Wm. Lowe and C. A. Walters.

W. A. Greenly was put on the stand as a witness for plaintiff, and at this writing still remains there, though he has hardly spoken a dozen words in the whole time; but the attorneys have considerably more than made up for this in the profuseness of their arguments, pro and con, as to the admissibility of what little he does have to offer. Altogether it is quite an interesting trial.

The proceedings were interrupted on Wednesday by Juryman Vaughn being taken sick. The Court then adjourned till Friday in deference to the Governor's proclamation that Thursday (Admission Day) should be observed as a legal holiday. On Friday Mr. Vaughn was excused, and by agreement the case is proceeding with eleven.

POLITICAL.—Mr. Wallace Leach, the Democratic nominee for Congressman for this Congressional District (comprising 19 large counties) arrived here on Tuesday evening, pursuant to appointment, and with barely time to wash the dust from his face, found himself facing a goodly audience in the court-room anxious to see and hear the first Congressional nominee who has ever honored this section with a visit. The audience was a brilliant one by reason of the presence of a large number of old and young folks of both sexes who came to do honor to the distinguished gentleman and the occasion as well as to take part in the social dance which, at daylight on the following morning, closed the ceremonies. Big Pine, Georges Creek and Lone Pine each sent good delegations of ladies and gentlemen, and they were most welcome. Mr. Leach is a fluent, if not an eloquent speaker, and his pleasant manners made a decidedly favorable impression upon all. It was expected, as it was ardently desired by his party friends, that he would proceed hence northward to Bishop Creek, Benton and Bodie, then back home through the coast counties. In thus "swinging around the circle," he would, at Bishop Creek, have met the bulk of the Inyo population, and at Benton and Bodie the greater portion of the Mono people, and all with less expenditure of money, time and hard traveling than in getting back over the road he came even to the railroad. But according to the stupid programme arranged for him by the Committee at Los Angeles, he had to start back from here at daylight on the following morning to meet his appointments beginning at Bakersfield; thence, to Bodie, it is some six hundred miles, while from this place, with at least two important intermediate points, it is but 130 miles to the same place. As strategists, that Committee is the worst failure on record, so far as evidenced by the plan of their campaign for this side of the mountains. It remains to be seen whether the Republican Committee in planning Mr. Pacheco's route, are equally as ignorant of the geography of this country.

MORE POLITICS.—As will be seen by advertisement in this issue as well as by posters scattered about, Hon. R. Pacheco, candidate on the Republican ticket for re-election to Congress from this District, and Hon. Calvin Edgerton, an orator of renown, will address Inyo people in this place next Tuesday evening. All members of the Garfield Club are requested to be on hand in good season. A special invitation is extended to the ladies to be present as well as everybody else without regard to locality, race, religion, or present or previous condition of party servitude. The Committee here are entirely ignorant as to the further movements of the distinguished gentlemen, having received no advices whatever on that point.

FROM CANDELARIA.— Dr. Blair returned here a day or two since from Candelaria, where he is established in business. He is satisfied that is a solid camp for years to come, although by no means a desirable place to live on account of the wretchedly bad water with which it is supplied. Nevertheless, he will take his family with him on his return a week or so hence. As this leaves his dwelling here unoccupied, he offers it rent free to any one who will see that it is properly cared for.

TO THE FRONT.—Inyoites, when they stray off to other regions, don't hide their light under a peck measure. For instance, here's Jimmy Macdonald who is President of a Hancock-English Club at Lundy, Mono county, and T. A. Gardner who is Drum Major of a recently organized Post of the Grand Army of the Republic at Bodie.

ANOTHER.—Mr. A. N. Bell, whom everybody in the county knows and respects, announces himself in this issue as a candidate for County Treasurer, subject to nomination by the Democratic Convention.

A NEW ENTERPRISE.—The increasing inquiry for Inyo mining properties, and the notable lack, hitherto, of any organized firm of correspondents, has induced Messrs. Geo. K. Phillips and S. D. Woodhull to associate themselves in the business. Their work will be the examination and reporting upon mines, handling of properties and assaying, analyzing and sale of ores--in short, would-be investors can obtain through these gentleman all necessary information and *facts* regarding any and all mines in the county. Their long study of mining and metallurgy and practical experience in the business will, in our judgment, give a value to their correspondence and reports unequalled by that of parties less familiar with the county, no matter what the fame of other operators may be as "experts." Our mine owners should work together in these matters, and we predict right now the fullest success of Messrs. Woodhull & Phillips. They have already undertaken some important movements, which we will report at the proper time.

GERMAN HOSPITAL.—Particular attention of all Germans is directed to the circular letter addressed to Harris & Rhine, by the "Allgemeine Deutsche Unterstuetzungs Gesellschaft," San Francisco, and printed in this issue. Such an appeal should be met by a generous response from our German citizens in this county. Messrs Harris & Rhine will undertake the agency, not for the sake of the remuneration offered, but will consider themselves much better paid if their efforts should meet with the desired success. By sending your application from any part of the county to Harris & Rhine, it will receive prompt attention.

FROM TEXAS.—Frank Blaney, who left here a few months since to reside in Texas, has at different times, placed us under obligations for copies of Texas newspapers, and now sends us a full blown cotton plant, which is something of a curiosity to most people in this region. Writing from Bryan, Texas, August 27th, he says; "We have better crops of corn and cotton here this year than before for many years. Last year Texas had to buy all her corn from Kansas. We are all for Hancock and English down here, how is it with you in California?" We can give a more definite answer to this sometime in November.

THE DELEGATES.—Following is a partiat list of the Delegates chosen last Wednesday to the Republican Convention, to meet next Saturday: Round Valley—R. Hilton, W. W. Vaughn; Bishop Creek—A. Spencer, Frank Parker, John Stoutenborough, A. McCloy, J. S. Turner, L. A. James, L. Munzinger and Chas. Wonacott; Independence—V. G. Thompson, Isaac Harris, H. D. Gelatt and Jacob Vagt; Lone Pine—J. J. Stewart, Paul Houard, I. P. Rittgers, John Dodge and S. V. Stevens.

JUSTICES COURT.—In Justice Parker's court, yesterday and to day, a hearing was had upon complaint of one Refugio Galaviz, charging Wm. Crapo, of Cerro Gordo, with having committed an assault with a deadly weapon with intent to kill and murder the complainant. After a full examination of the facts the action was dismissed. The affair grew out of some prior difficulties and the possesion of the Gold Hill mine, from which Galaviz was driven by Mr. Crapo, one of the owners.

THE CONVENTIONS.—The Conventions of both parties come off next Saturday, the 18th, to name victors and victims for the November killing, provided the Supreme Court does not in the meantime decide the County Government Bill unconstitutional, thereby rendering nominations for county officers unnecessary. We, however, feel quite sure the bill will be sustained.

INCORPORATED.—The Gun Sight Mining Company, to carry on mining in all its branches at Resting Springs in this county, has just been incorporated with its principal place of business in New York. Capital, $200,000, in shares of $1 each. Trustees—J. P. Robinson, Wm. J. Peake, J. S. Thompson, E. B. Wisley and P. F. Bellinger.

ARTIST WANTED—Jas. Birchim, of Round Valley, is here as a witness, and wants to get a good charcoal artist to execute a drawing in colors of the entire Court as a warning to future generations not to go to law. Does anybody know of such an artist?

UNCLAIMED LETTERS.—Letters addressed as follows remained in the Independence Postoffice on September 1st; John Bowman, Frank Cardozo, Mr. Garnom, Richard Hassard, A. Johnson, C. F. Roe, Peter Sieh.

SCHOOL.—The public school here, Mr. Dan'l Crough, teacher, opens on the 4th of next month.

News has been received at Candelaria of the death of old man Price, the erratic and eccentric prospector, who for many years has been in that section of the State. He was found by some Indians lying insensible by his camp fire on the headwaters of a stream putting into Fish Lake Valley from the east side of the White mountains, and died soon after. Old man Price had been the pioneer in more outside camps than any other man in the State. In all his prospecting he never found a mine, or even a prospect that indicated any permanency.

ENGINEERING and MINING JOURNAL.

PUBLISHED WEEKLY.

DEVOTED TO

Mining, Metallurgy, Engineerng and Science.

RICHARD P. ROTHWELL, C.E., M.E., ROSSITER W. RAYMOND, Ph.D., } Editors.
WILLIAM H. WAHL, Ph. D., Department of Progress in Science and the Arts.

IT IS AN ACCEPTED AUTHORITY ON ALL questions relating to the great mining industries of the country. It is the oldest publication of its class in America, thoroughly independent; being of the trade and not in it, occupies a just and impartial position, which enables it to advise and teach without fear or favor. It devotes much space to questions bearing upon economical management of mines, and from time to time illustrates the more important improvements in mining machinery and engineering methods. Special attention is given to reliable mining news from all parts of the country, which is gathered by an efficicient corps of correspondents in every section, and from an extended exchange list. The metal and ore markets, and gold, silver and miscellaneous stocks are reported and commented upon weekly by experienced financiers, who are unbiased by private interests, and upon these matters it is accepted as a reliable guide and unfailing instructor. Gives statistics of production of coal and iron, and of our great gold, silver and other mines. Its scientific notes are an epitome of the latest researches, its trade reports full, and its editorials sagacious and comprehensive. It enjoys the widest circulation and greatest influence of any journal of its class in the world; its patrons and readers comprising the most select and intelligent men in every quarter.

Subscription, $4 per year, in advance; 10c., single copy.

Advertising rates on application.

INDEPENDENCE, CAL.

SATURDAY, SEPTEMBER 11.....1880

THE tables are turned. A short time since we would read dispatches from New York stating that such and such steamer had sailed for Europe taking so many thousand dollars in gold and so many in silver. Now read such dispatches as this: "Yesterday $500,000 in bullion was withdrawn from the Bank of England for shipment to this country, and the German steamer *Gellert* from Hamburg $1,600,000." This outflow of specie from Europe is both suggestive of the favorable turn in our foreign trade and the increasing favor in which American securities are held abroad. The foreign capitalists now prefer to hold our bonds rather than the gold, hence the increasing shipments to this country of the latter.

POLITICAL.

Republican Convention.

A REPUBLICAN COUNTY CONVENTION for Inyo County is hereby called to meet at the District School House, in Independence, on

Saturday, September 18, 1880,

At 10 o'clock A. M., for the purpose of nominating candidates for county and other offices.

The Convention will be composed of thirty-one Delegates, apportioned as follows:

Round Valley	2
Bishop Creek	8
Big Pine	2

OFFICIAL.

INYO COUNTY TRESPASS LAW

ADOPTED BY THE BOARD OF Supervisors August 7, 1880.

It is hereby ordered by the Board of Supervisors of the County of Inyo, State of California, that the following law be and the same is hereby declared to be the Trespass Law of Inyo County:

SECTION 1. Any owner, or any occupant of any land or possessory claim, finding any horse, mare, colt, mule, jack, jenny, horned cattle, hogs, sheep or goats, or any number of such animals, upon such land or possessory claim, whether such land or claim be inclosed or not, may take up and safely keep such animal or animals at the expense of the owner or owners, and shall be allowed for keeping said animal or animals the following named sums: For each horse, mare, colt, mule, jack or jenny, the sum of twenty cents per day; for each head of horned cattle, the sum of twenty cents per day; and for each head of swine, sheep or goats, the sum of five cents per day.

SEC. 2. Any person taking up animals under the provisions of this Act shall, immediately upon the taking up of such animals, notify the owner or owners of such animals, or his, her, or their agent or agents, if known to him, and living within six miles of the place where such animals were taken up, of the time and place of such taking up, together with the number, character and description thereof; also, as nearly as he can, the marks and brands, if any, of each animal; and such owner or owners, his, her, or their agent or agents, may, at any time after the receipt of such notice, and upon proof of ownership, tender the amount of damages claimed, and demand the delivery into his, her, or their possession, of such animals; and if suit shall have been commenced, such tender may be to the Justice or Judge before whom such suit is brought, or the owner or owners may give bonds with sureties, to be approved by the Justice or Judge trying the case, for the payment of all damages and costs of suit, and he may demand the release and delivery into his or their possession, of all animals held under the action, and the Judge or Justice shall order the immediate delivery of such animals; but if no owner, owners or agents of owners appear within two days to claim said animals, or if he or they appear and fail to pay satisfactory damages, or if the owner is unknown to him or her, or lives more than six miles from the place of taking up, then if the compensation and damages claimed be less than three hundred dollars ($300), the taker up of such animals shall, within two days, file a written complaint, verified by his or her oath, with the nearest acting Justice of the Peace in the township where such animals were taken up; or if the amount of compensation and damages claimed be more than three hundred dollars, then in the Superior Court of said county, setting forth in said complaint the facts, nature, location, and amount of the damages claimed, and a description of all animals so taken up, the number, the marks and brands, if any, and the supposed value of each animal, or the supposed aggregate value of such animals, and the time and place of taking up. The action shall be in favor of the owner or owners, or occupants of said lands or possessory claims, and against the property in rem; and any action thus commenced, may include all the animals thus found trespassing at any one time, whether of one or more marks or brands; and no judgment shall be entered under the provisions of this Act for damages done, except upon the testimony of at least two credible witnesses, whose names shall be entered in the Justice's docket, or in the minutes of the Court in which the action is had.

SEC. 3. Upon the filing of the complaint, a summons shall be issued, and if said action be in a Justice's Court, shall be made returnable not less than fifteen nor more than twenty days from the date of issuance, and directed to all owners and claimants of the property described, and shall contain a description of each animal, with its marks and brands, if any. The summons shall be served by posting a copy of the same at the door of the room where said Justice or Superior Court is held, for ten days before the return day thereof, and also at the same time by filing a copy of such summons with the Recorder of said county; but the Recorder shall not file the copy of summons until the payment of a fee of one dollar; and it shall be the duty of said Recorder, on payment of his fee of one dollar, to forthwith compare the marks and brands, if any, described in said summons, with the record of marks and brands in his office, and thereupon to notify the owner or owners of such marks and brands of the fact of the pendency of such action, and of the time and Court when and where the same is set for hearing. The certificate of the officer stating the facts of such posting and filing, or the affidavit of any person, competent to be a witness, who shall have so posted and filed, shall be conclusive evidence of a sufficient service thereof; *provided*, that in any case when any animal or animals, seized under this Act, are alleged in said complaint to be worth fifty dollars or more, it shall be the duty of the County Recorder to cause publication to be made of the fact and time of seizure, and marks and brands, with a description of the animal or animals, in a newspaper of the county, at least ten days before the sale, the newspaper in which all such notices are to be made to be designated, and the rates of publication to be fixed, by the Board of Supervisors of the county.

SEC. 4. If the judgment be in favor of the plaintiff, the property may be levied upon and sold as other personal property seized on execution. The officer selling shall give a bill of sale to the purchaser, describing the animal or animals sold, and to whom, and the price paid for each, and referring to the judgment under which such sale was made. Any overplus of the proceeds of such sale, after satisfying the judgment and costs, shall be paid by the Justice or Clerk to the owner of the property, upon demand, if demanded within six months from the date of sale; and if not so demanded, the same shall, at the expiration of said time, be paid into the County Treasury, for the benefit of the County School Fund; and the owner may also redeem any animal or animals sold under the provisions of this Act at any time within sixty days after the sale, by producing satisfactory proof of ownership, and paying the purchaser the amount of purchase money in gold coin, with interest at the rate of two per cent per month; but if no redemption be made within sixty days such bill of sale shall be conclusive evidence of title in favor of the purchaser of the animal or animals therein described.

SEC. 5. The fees of all officers for service required under this Act shall be the same as now allowed by law for similar services in other civil actions, and shall be taxed as costs in the judgment.

SEC. 6. The Justice and Clerk shall keep a book, which shall be open to public inspection, and shall record therein all sales made pursuant to any judgment rendered in their respective Courts under the provisions of this Act, which record shall contain a description of the animals sold, the prices paid, the name of the purchaser, the amount of fees and charges, and the amount of surplus money, if any, arising from each sale, and whether any animal or animals have been redeemed; and if such surplus money shall be received by the owner of any animal, he shall receipt for it in the margin opposite such record, and the Justice or Clerk shall, without fee, deliver such book to his successor in office, and also all surplus money in his hands arising from any sale made by authority of this Act, taking his receipt therefor.

SEC. 7. Any person who shall drive stock from any lands or possessory claim other than his own, to any other lands or possessory claim, or shall take up any such animal or animals on any land or possessory claim other than his own, for the purpose of taking advantage of any of the provisions of this Act, shall be deemed guilty of a felony; and any person who shall fail or neglect to give the notice required by the second section of this Act, or shall rescue or take from the possession of the taker-up any animal or animals, without first having paid the compensation, fees, and damage claimed or awarded, and any officer violating any of the provisions of this Act, shall be deemed guilty of a misdemeanor.

SEC. 8. The owner or occupant of any land or possessory claim, whether inclosed or not, independent of the foregoing provisions of this Act, and if he fail to avail himself thereof, may maintain an action; *provided*, such action be commenced within sixty (60) days in any Court of competent jurisdiction, against the owner of, or person having the control of, any of the animals named in section one, for any damages such animals may commit upon his said land or claim; and if judgment be rendered in his favor, it shall be entered for the amount of the actual damage proved.

SEC. 9. Nothing in this Act shall be so construed as to prevent the free use for grazing purposes of all unoccupied lands not taxed; *provided*, that each actual settler, who shall have a prima facie title to the land upon which he is settled, shall be protected in the possession of one hundred and sixty acres, and residence on the land shall be considered a prima facie title; *and, provided further*, that said one hundred and sixty acres shall be marked and defined by visible and well defined monuments.

Approved and adopted this Seventh day of August, A. D. 1880, and ordered that the same be published in THE INYO INDEPENDENT for four successive weeks.

J. R. WESTERVILLE,

Chairman of the Board of Supervisors.

Attest: JOHN CROUGH, Clerk.

PROPOSALS

....FOR....

Publishing and Printing.

NOTICE IS HEREBY GIVEN THAT sealed proposals will be received by the Board of Supervisors of the County of Inyo, State of California, at the office of the County Clerk, up to the hour of 12 o'clock M. on MONDAY, the FOURTH day of OCTOBER, A. D. 1880, to contract for county printing, as follows:

1. Advertising, such as is required by law and shall be ordered by said Board, including Notices for Proposals to Contract, Reports of Auditor and Treasurer, Proceedings of the Board of Supervisors, and the annual List of Delinquent Taxes. Said proposals shall submit to the Board the rate which will be charged per square of two hundred and fifty ems space for the first and each subsequent weekly publication.

2. The printing of two hundred and fifty copies of the Great Register of Inyo County, in the usual form, bound in paper. Bids must specify the price of such printing per name of each elector. Printed matter to be delivered at the Court House of said county.

Said contracts to continue for the term of one year from and after ratification.

Payment for such advertising and printing shall be made on bills duly sworn to and presented at the regular meetings of the Board, by warrants drawn upon the General Expense Fund.

The right to reject any and all bids is reserved.

Said proposals must be indorsed "Proposals for Advertising," and "Proposals for County Printing," and addressed to the Clerk of the Board of Supervisors, Inyo County. The same will be opened between the hours of 1 and 4 o'clock P. M., on said Fourth day of October, 1880.

By order of the Board of Supervisors.

JOHN CROUGH, Clerk.

MINING.

MINING APPLICATION NO 161,

....TO THE....

OCCIDENT MINE.

U. S. LAND OFFICE,
Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred linear feet of the "Occident Mine" or vein, bearing silver and gold, with surface ground three hundred feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 37, in Township ——, Range —— of —— Meridian, said Lot No. 37 being described in field notes of survey as follows, to-wit:

SURVEY OF EXTERIOR BOUNDARIES:

Began at a post on the southwest cor. of claim; marked the post "Post 1 Occident Mine." Said post is 2x3 inches square by 30 inches long and set in a mound of earth 20 inches high. From which var. 15 deg 55 min E., a pine stump 8 inches diameter bears N. 28 deg 50 min W. 11 links. A pine stump 6 inches diameter bears N. 85 deg 1 min W. 45 links. A pine stump 20 inches diameter bears S. 33 deg 5 min W. 76 links. A pine tree 7 feet high x6 inches diameter bears S. 39 deg 51 min E. 82 links. A pine bush 2 feet high x3 inches diameter bears N. 69 deg 10 min E. 67 links. From said Post the "Armagh U. S. Mineral Monument" by calculation bears N 20 degs 48 min W 17.17 chains. Thence with a var 15 deg 55 min E, 1st course—N 11 deg W 3.03 chains, ascending to point of hill at bottom of old prospecting cut 6.49 chains. End of slope —6.88 chains. On level line—commence descending 7.64 chains, old prospecting tunnel 8.42 chains. Old prospecting cut 12.47 chains. Old dump of prospecting cut 14.13 chains. Middle of Ygnacio Ravine—Ravine bears N 65 degs W 15.21 chains. Trail on ridge dividing Ygnacio Ravine from Cerro Gordo Cañon. Ridge bears W 16.07 chains. Rocky ridge—commence descending 17.19 chains. Middle of Cerro Gordo Cañon—commence ascending 21.85 chains. Wagon road—Citizens grade 22.72 chains. To post on N W cor of claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of rocks 2 feet high, marked the post "Post 2 Occident Mine." At foot of post is a cactus burr 20 inches in diameter growing in the rock. From said post a pine stump 2½ feet in diameter standing 8 feet below the wagon road, Citizen's grade, bears S 38 deg E 1.54 chains. No other suitable natural object within measuring distance. Thence with a var 15 deg 55 min E, 2d Course—N 79 deg E 2.27 chains, ascending rocky slope to "Post 3 Occident Mine" on north end of line of lode 3.42 chains. Rocky ridge bears south 4.54 chains. To a post on N E cor of claim. Said post is 30 inches long, 2x3 inches square, and is set in a mound of rocks 20 inches high, marked the post "Post 4 Occident Mine." From which a pine stump 20 inches in diameter bears N 40 deg 35 min E 1.01 chains. The top of a blue slate reef 10 links high bears S 43 min E 15 links. Thence with a var 15 deg 55 min E, 3d Course—S 11 deg E .97 chains. Wagon road—descending 3.03 chains. An old stone cabin. A tall pine tree stands 15 links to East of line, 3.42 chains. Middle of Cerro Gordo Cañon—bears S W. Commence ascending on steep, rocky ridge, 8.48 chains. Trail on ridge dividing Cerro Gordo Cañon from Ygnacio Ravine 11.77 chains. Open cut 30 feet west of mouth of an old prospecting tunnel in blue slate, 12.98 chains. Old trail—runs N 65 deg W 13.69 chains. Summit of ridge at old trail 14.34 chains. Summit of ridge commence descending 15.38 chains. Crossing of Belshaw toll road 22.72 chains. Post on S E cor of claim. Said post is 36 inches long, 3x3 inches square and is set in a mound of earth 25 inches high, marked the post "Post 5 Occident Mine," from which a red iron boulder 2½x3¾ feet square and standing 26 inches high bears S 84 deg 40 min E 85 links. A pine tree 9 links high standing 6 ft. west of bottom of a gulch—gulch bears S. bears N 35 deg 11 min E 1.06 chains. The middle of the Belshaw toll road bears S 79 deg W 18 links. Thence with a var 15 deg 55 min E, 4th Course—South 79 deg W 18 chains. Road—commence ascending, 2.04 chains. Quartzite ridge bears N—S 2.27 chains. Post marked "Post 6 Occident Mine" on south end of line of lode—commence descending 2.87 chains. Trail—runs N W and S E 4.54 chains. To place of beginning, "Post 1 Occident Mine," containing 10.32 100 acres. From the Armagh U. S. Mineral Monument as herein described the mouth or entrance to the "Armagh Tunnel" as noted under the head of "Report" bears S 76 deg 55 min W 9.24 chains. The course of said Tunnel is S 58 deg 55 min E. Length 350 feet on the 27th of March, 1880.

ARMAGH U. S. MINERAL MONUMENT.

The "Armagh U. S. Mineral Monument" is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon, and very precisely on the W. B. line of the Ygnacio mine (as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Dep. Min. Sur.) and distant 17.51 chains from the S W cor stake of the Ygnacio mine.

At the point above given I drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter x16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high x5 feet in diameter at its base. Marked the top of post "U. S. Mineral Monument. Erected January 31, A. D. 1880, by Wm Crapo, U. S. Deputy Mineral Surveyor—under authority of the U. S. Surveyor General for California." From said post in mineral monument, with a variation of 15 deg 55 min E, the extreme end of the bluff on which the monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face of rock 7½ feet high bears N 60 degs E .07 links. The N E cor of an old adobe *vaso* chimney bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bear N 62 links. The N W cor of Rafael Diaz' house bears S 28 deg 33 min E 1.58 chains. An old well 30 feet deep on north side of Cerro Gordo Cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE.

Commence at "Post 1 Occident mine," thence with a var 15 deg 55 min E, S 79 deg W 3.03 chains to Post on S W cor of Ygnacio mine as surveyed for a patent N 11 deg W 17.51 chains. To U. S. Mineral Monument which when computed gives for a closing line from "Post 1 Occident Mine" to U. S. Mineral Monument N 20 deg 48 min W 17.77 chains.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 147 of locations.

The adjoining claimants are, on the west the San Francisco mine, on the south the Moter mine and on the east the Trachyte Flat mine.

Any and all persons claiming adversely any portion of said Occident mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

JAMES E. GOODALL, Register.

MINING APPLICATION NO. 162,

...TO THE....

ARMAGH MINE.

U. S. LAND OFFICE,
Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerrobordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred (1.500) linear feet of the "Armagh Mine" or vein bearing gold and silver, with surface ground six hundred (600) feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 38, in Township ——, Range ——, of Mount Diablo Meridian. Said Lot No. 38 being described in field notes of survey as follows, to-wt:

Commenced at "Post 1 Armagh Mine," on S E corner of claim. Said post is 30 inches long 2x3 inchs square and is set in a rock mound 2 feet high from which with a var 15 deg 55 min E a pine stump 18 inches high by 10 inches in diameter bears S 15¾ deg E 77 links. A pine stump 15 inches diameter bears S 2½ deg 30 min W 91 link. A red ferrugenous quartz reef standing 4 feet high bears N 24 links. A pine stump 12 inchs high x5 inches in diameter bears N 49 deg 30 min E 15 links. Thence with a var 15 deg 55 min E, N 11 deg W 3.20 chains. Ascending to summit of ridge commence descending, 6.98 chains; dump of old prospecting cut, 10.80 chains; Belshaw toll road, 13.16 chains; Belshaw tollroad in middle of Cerro Gordo Cañon, commence ascending 14.25 chains; road running to Potsi house, 21.66 chains; wagon road—Citizens' grae—22.72 chains; post on the N E corner of clah. Said post is 30 inches long, 2x3 inches squre, and is set in a mound of earth 20 inches hig. Sage brush slope, sloping S W; no natural object for witness mark in vicinity. Marked post "Pst 2 Armagh Mine." Thence with a var 15 deg55 min E, S 79 deg W .07 chains. Trail runs N; commence descending—2.20 chains; wagon rod, Citizen's grade—4.54 chains; post on north end of line of lode, marked the post "Post 3 Armagh Min"—8.43 chains. Trail runs N S—9.09 chins. To post on N W corner of claim, situated on sage brush slope, sloping to S W. Said post is 3 feet long, 2x3 inches in diameter and is set in a mound of earth 2 feet high; marked the post "Post 4 Armagh Mine." No suitable natural object within measuring distance. Thence Thence with a var 15 deg 55 min E, S 11 deg E, commence ascending—1.75 chains; commence ascending—3.97 chains; crossing of foot trail runs west—8.27 chains; toll road in middle of cañon, commence ascending, 18.45 chains; summit of ridge bears west; commence descending, 19.74 chains; south end of "Silver Wedge" claim, 22.72 chains, to post on S W corner of claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of earth 20 inches high; marked the post "Post 5 Armagh Mine," from which a pine bush 2 feet high bears N 76 deg W 19 links. The chimney of an old deserted vaso bears N 22 deg 30 min E 24 links. Thence with a var 15 deg 55 min E, N 79 deg E 63 chains. Descending into bottom of gulch—gulch bears south, commence ascending—4.55 chains. "Post 6 Armagh Mine," or south end of line of lode, 3.99 chains; crossing of toll road, 9.09 chains; "Post 1 Armagh Mine," place of beginning. From which post the Armagh U. S. Mineral Monument bears N 4 deg 10 min W 12.67 chains, by calculation, containing 20.64 100 acres.

Location of the Armagh Tunnel.—From the "Armagh U. S. Mineral Monument" the mouth of the Armagh tunnel bears S 76 deg 55 min W 9.24 chains. The course of said tunnel is S 58 deg 55 min E. Length, 350 feet.

ARMAGH U. S. MINERAL MONUMENT—DESCRIPTION THEREOF:

There not being any lines of the U. S. public land surveys within 100 chains of the Armagh mine, I built a Mineral Monument and connected therewith. Said Mineral Monument is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon and very precisely on the west boundary line of, and distant 17.51 chains from the southwest corner stake of the Ygnacio mine, as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Deputy Mineral Surveyor. At this point drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter by 16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high by 5 feet in diameter at its base. Marked the top of the post "U. S. Mineral Monument. Erected January 3d, 1880, by Wm. Crapo, U. S. Deputy Mineral Surveyor, under authority of the U S. Surveyor General for California." From said post in Mineral Monument, with a variation 15 deg 55 min E, the extreme end of the rocky bluff on which the Mineral Monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face 7½ feet high bears N 60 deg E .07 links. The northeast corner of an old adobe vaso chimney, a Mexican furnace for smelting silver and lead ores, bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The northwest corner of Rafael Diaz' house bears S 38 deg 23 min E 1.58 chains. An old well 30 feet deep on north side of cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE.

Commence at "Post 1 Armagh Mine," thence with a var 15 deg 55 min E N 79 deg E 1.51 chains to west boundary line of Ygnacio mine, and at a point 325 feet—4.92 chains from the southwest corner stake of the Ygnacio mine; thence with a var 15 deg 55 min E, N 11 deg W 12.59 chains to U. S. Mineral Monument.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 146, of locations. The adjoining claimants are, on the East, the Greenly mine.

Any and all persons claiming adversely any portion of said Armagh mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, in the State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

ASSESSMENT NOTICE.

LOS ANGELES MINING AND SMELTING Company.

Location of Works, Resting Springs, Inyo County, California.

Location of Principal Place of Business, Los Angeles, Los Angeles County, California.

Notice is hereby given that at a meeting of the Board of Directors of said Company, held on the Third day of August, 1880, an assessment (No. 4) of two dollars per share was levied upon the entire capital stock of said corporation, payable immediately, in United States gold coin, to J. M. Elliott, Secretary of said Company, at his office, No. 1 Temple Block, in the city and county of Los Angeles, State of California.

Any stock upon which this assessment shall remain unpaid on Monday, the Twentieth (20th) day of September, 1880, will be delinquent and advertised for sale at public auction, and unless payment is made before, will be sold on TUESDAY, the NINETEENTH (19th) day of OCTOBER, 1880, to pay said delinquent assessment, together with costs of advertising and expenses of sale. By order of the Board of Directors.

J. M. ELLIOTT, Secretary.

Office of the Secretary—No. 1 Temple Block, City and County of Los Angeles, California.

35th YEAR.

The Scientific American.

THE "SCIENTIFIC AMERICAN" IS A large, First-Class Weekly Newspaper of Sixteen Pages, printed in the most beautiful style, *profusely illustrated with splendid engravings*, representing the newest Inventions and the most recent Advances in the Arts and Sciences; including New and Interesting Facts in Agriculture, Horticulture, the Home, Health, Medical Progress, Social Science, Natural History, Geology, Astronomy. The most valuable practical papers, by eminent writers in all departments of Science, will be found in the Scientific American.

Terms, $3.20 per year; $1.60 half year, which includes postage. Discount to Agents. Single copies, ten cents. Sold by all Newsdealers. Remit by postal order to MUNN & CO., Publishers, 47 Park Row, New York.

PATENTS. In connection with the SCIENTIFIC AMERICAN, Messrs. MUNN & Co. are Solicitors of American and Foreign Patents; have had 35 years experience, and now have the largest establishment in the world. Patents are obtained on the best terms. A special notice is made in the SCIENTIFIC AMERICAN of all inventions patented through this Agency, with the name and residence of the Patentee. By the immense circulation thus given, public attention is directed to the merits of the new patent, and sales or introduction often easily effected.

Any person who has made a new discovery or invention, can ascertain, *free of charge*, whether a patent can probably be obtained, by writing to MUNN & Co. We also send *free* our Hand Book about the Patent Laws, Patents, Caveats, Trade-Marks, their costs, and how procured, with hints for procuring advances on inventions. Address for the Paper, or concerning Patents,

MUNN & CO.,
37 Park Row, New York.

Striking Figures About Cotton.

The following is an extract from a somewhat extended and suggestive article we find in a late number of the *Scientific American:*

A prominent New England manufacturer, and the foremost authority on cotton statistics in the country, has recently written a letter giving some figures as to the growth and probable future development of the cotton industry, which are almost startling, and, coming from any less trustworthy source, would seem rather the dreams of a visionary than the conclusions of a well informed business man. The writer first points out the increased product with free as against the former slave labor, and says: "The very habit of the cotton plant itself has been altered; it has been forced to mature earlier, and been made more prolific, and stronger to resist insect enemies," so that, with probably a less number of laborers in the cotton fields now, the production is greatly in excess of what it formerly was, that of the present year being estimated as "at least 25 per cent. in excess of the largest crop ever raised by slaves." The writer then says that from 6,000,000 bales of cotton fiber, after deducting enough seed for the next year's planting, there will remain 3,000,000 tons of seed, which, "if treated as a small portion is now treated," will yield about 90,000,000 gallons of oil, about 1,300,000 tons of oil-cake or meal, and hulls which it is thought may be profitably worked into 750,000 tons of paper, although, if these hulls be worked into the meal, they will serve as so much food for stock. The writer then figures out the possible proceeds, as an actual addition to the wealth of the country, of "the almost unrealized portion" of our present cotton crop in figures which seem almost startling, and says that "there never was so great a field so suddenly opened for the introduction of new tools, new cotton gins, new presses, and for every variety of implements and processes."

WHEN Mrs. Grant was in Denver, Col., she was asked if it was true that long before the war she had predicted that her husband would be President. Her reply was: "I know such statements have been made, but they are utterly without foundation. I did not dream of my husband becoming President any length of time before he was really called to the position. In fact I was not ambitious to have him fill the position until they began to abuse him. I was perfectly satisfied to have him remain General of the Army. About two weeks before the Convention which nominated him I spoke to him about the reports that were being circulated that he would receive the nomination, and asked him if he thought he would be nominated, and he said he thought he would be, and that if he were chosen he would be elected. I asked him if he thought he could fill the office, and he replied that he thought he could do as well as most others."

THE umbrella as a lightning-rod will not probably come into general use. But General Fay, of Elizabeth, was in Newark last week during the shower, and while passing in front of a church which was struck by lightning; the fluid burned several holes in his umbrella and ran down the ribs, passing off without injuring him. He exhibited the umbrella to his friends, who found that its future usefulness is greatly impaired until it gets repaired.

THREE couples of Colorado young folks got married the other evening just for a joke, and the girls went into sky-blue convulsions when they found out that a real Justice had officiated. It was a trick on the part of the young men, and the girls don't know yet what to do about it.

All Sorts.

Leonidas was one of the original dead-heads. He held the pass at Thermopylæ.

"Sanctuary shoes" are advertised in England. They are warranted not to squeak.

Doctors are like verbs. They are regular, irregular and defective.

A Western paper informs its readers that its candidate for Congress slings the most eloquent lip of any man in the State.

The Chinese army is estimated all the way from 30,000 to 200,000 men, which indicates that nobody knows much about the Chinese army.

The best thing for a bathing dress would be a duck suit.

There are two distinct kinds of boys in this world—the human boy and the boy who exists in Sunday School books.

Louisa Sheldon, a beautiful girl of 19, whose family is well off and respected, hanged herself in a barn at Compton Mills, N. J., because her parents stopped her correspondence with a summer resort suitor.

"Come home drunk, will you?" said Ben Luca to his intoxicated father, at Welles, O.; "I'll give you a lesson," and killed him with one blow.

"Well, I declare, I don't know what to preserve this Fall!" exclaimed Mrs. Fussabout; "peaches is high, and plums isn't worth putting up, and quinces is as bad as hive syrup." There is no knowing how much longer she would have gone on, if Mr. F. had not suggested that she might preserve her temper for want of anything better. Then she stopped; but he didn't. He left.

What is the difference between a seedsman's shop and a jaded horse? The one is a seed store; the other a sore steed.

The Habit of Self-Control.

If there is one habit which, above all others, is deserving of cultivation, it is that of *self-control*. In fact it includes so much that is of value and importance in life, that it may almost be said that, in proportion to its power, does the man obtain his manhood and the woman her womanhood. The ability to identify self with the highest parts of nature, and to bring all the lower parts into subjection, or rather to draw them all upwards into harmony with the best that we know, is the one central power which supplies vitality to all the rest. How to develop this in the child may well absorb the energy of every parent; how to cultivate it in himself may well employ the wisdom and enthusiasm of every youth. Yet it is no mysterious or complicated path that leads to this goal. The habit of self-control is but the accumulation of continued acts of self-denial for a worthy object; it is but the repeated authority of the reason over the impulses, of the judgment over the inclinations, of the sense of duty over the desires. He who has acquired this habit, who can govern himself intelligently, without painful effort, and without any fear of revolt from his appetites and passions, has within him the source of real power and of all true happiness. The force and energy which he has put forth day by day, and hour by hour, is not exhausted, nor even diminished; on the contrary, it has increased by use, and has become stronger and keener by exercise; and, although it has already completed its work in the past, it is still his well-tried, true and powerful weapon for future conflicts in higher regions.—*Phila. Public Ledger*

A GOOD joke is available at the expense of Rev. Wm. H. Hill, the much-respected Episcopal clergyman of Los Angeles. A lady parishioner of his was supposed to be lying at the point of death. As in duty bound, Mr. Hill paid her a visit, to impart the last consolations of religion. He was met at the door by the invalid's husband, who stated that, by the physician's orders, no one was to be admitted to see his wife. "But" said Mr. Hill, "I understand that she is at the point of death, and she needs spiritual consolation." "God bless you," said the good-hearted but obdurate husband, "she has the very best spiritual consolation the market affords. Dr. Barton has tasted of it, and he says it is excellent, and if he don't know I'd like to know who does! Money is no object when it comes to spiritual consolation for my poor, sick wife."—*Los Angeles Herald.*

ALVAREZ OLIVA and his mistress were convicted of murder at Madrid, and sentenced, the former to death by the garrote, the latter to ten years imprisonment. They craved permission to be united in matrimony, and the jail chaplain pronounced the blessing of the Church upon their union on the morning of the day appointed for Alvarez's execution. Having duly exchanged rings and pronounced vows of mutual fidelity "till death should part them," they took an eternal and affecting leave of one another, after which the bride was removed to the scene of her future punishment and the bridegroom was conducted to the scaffold.

A PASSENGER on the New York elevated railroad remarked to Mr. Pullman: "Are not these cars too nice for the general mob?" "There is nothing too nice for the people," he replied. "People behave themselves better when they enter a car like this. It is suggestive of refinement and elegance. It has an educating effect, I believe, as has everything elegant or beautiful."

THE Dallas (Tex.) City Council has removed Mayor Thurmond for sympathy with horse thieves, gamblers and other bad characters, but he declares that he will appeal for re-election.

Brevities.

Two sisters in Massachusetts have lain in bed forty years from a lack of vitality. One of them has just died.

There is said to be a cabinet maker in Paris who fires small shot into his cabinets to give them the appearance of worm eaten antiquity.

In a shooting affray at Salt Lake, on the 7th instant, Dr. B. C. Snedekar was instantly killed and R. T. Smith was fatally wounded. Smith alleged that Snedekar had seduced his affianced.

"Mrs. John W. Mackay of Consolidated Virginia," is the way the Chicago *Tribune* refers to the lady.

Of several large herds of cattle which left Utah this season for the East, some are returning and some are held in Colorado, there being no buyers for them.

The population of what is known as the Gunnison country is now as large as the entire white population of Colorado when the Denver-Pacific was built, and the cash paid for travel by stage into that country and returns aggregate about $250 per day.

THIS is the way a St. Louis paper puts it: "The Nevada Senatorship is again for sale, Mr. Sharon's term being almost out. The seat generally costs half a million dollars, and always goes to the highest bidder. Mr. Sharon is again in the field, and, if he is willing to pay more money than any one else, will no doubt be successful. He rarely goes to Washington, and his pretense of representing the State (in which he does not live) is the merest mockery."

THE Vermont housewife who read that English nobles have lots of hares in their preserves, says she tried it to the extent of putting a whole chignon into some blackberry jam, and the jam didn't seem a bit better for it.

INDEPENDENCE, CAL.:

SATURDAY, SEPTEMBER 18 1880

THE State election in Maine took place last Monday. The final result is not fully known here yet, except enough to render it certain that Republicans have not made the winning they hoped for. The probabilities are that the Fusion Governor and three Fusion Congressmen are elected by small majorities, and that the Republicans get the Legislature by a fair working majority. These results are of small moment of themselves, but in their moral effect on the October elections, may prove of vast consequence in shaping the great Presidential contest, the tendency being in favor of the Democrats. There is one fact, however, that is now obvious; namely: There is nothing akin to a stampede in favor of or against either party notwithstanding the claims of both that such would be the case. This obvious fact will add greater heat to what promises to be the hottest Presidential campaign the country has had for many years.

A KANSAS paper brags a little and justly. Kansas at the present day is recognized as the leading fruit State in the Union, having taken the prize at every horticultural exhibition where she has competed. As a grain producing State she yields precedence to but one or two commonwealths, while in 1878 she led the States in the number of bushels of wheat raised. It will also be remembered that Kansas is not yet 20 years old. Her increase of population has been phenomenal—over 300 per cent—the like of which has never been known in the history of any nation or State on the globe. She has over 3,000 miles of railway, and it is hardly fifteen years since the first rail was laid within her borders.

ON the other side of Jordan is the town of Salt, ascertained to be the ancient Ramoth Gilead, containing a population of about 8,000 nominal Christians and Mahometans. There are upward of one thousand eight hundred vineyards in this town and neighborhood, and also large fields of corn land. It is a singular fact, as credibly reported that these people know nothing of intoxicating drinks, and make their grapes into raisins, honey and a kind of sweetmeat called milban.

SOME newpapers recently created a sensation by announcing that a conspiracy existed between Gen. Trevino and the American Gen. Ord, to establish the States of Nuevo Leon, Durango Chihuahua, San Luis Potosi and Tamaulpas, and afterwards for the annexation of the new Republic to the United States.

THE papers are still after Chicago regarding the Templar' celebration. The Cincinnati *Commercial* says the Knights should have engaged Phil Sheridan to move that column at Chicago. With Phil at the head of the column, and Hancock and Fred. Grant to ride down the line and swear, the march might have been accomplished.

ON January 1st, 1880, there were in the United States 86,497 miles of railroad. Illinois had the largest number, 7,578, and Montana the smallest, 10 miles. Utah had 592 miles. Three States had over 5,000 miles each, seven more thrn 3,000, and seventeen more than 1,000.

THE Rev. E. P. Adams, convicted of heresy by the Presbytery of Buffalo for refusing to accept the Evangelical dogma of endless damnation, said to the tribunal that the dogmas of election and reprobation were as binding as the first named, although obsolete, ignored and practically repudiated by the clergy.

THE Bodie *Free Press* has entered upon its second year of usefulness and manifest prosperity, which last is without doubt the result purely of able, enterprising and honorable management. It is a most excellent paper, and has our cordial wishes for its continued prosperity.

A RECENT Russian news-paper contained nothing but advertisments and the following: "Through a cause not our own, the articles prepared for this issue cannot be published, therefore we publish only advertisments."

THE London *Times* affirms that there is no connection whatever between the land agitation in Ireland and the rumored revival of Fenianism.

THE new census, it is said, will show that the popular belief that the bulk of government bonds is held by large capitalists and corporations is incorrect.

LAST year Louisiana produced $20,000,000 worth of sugar. This looks as if material prosperity had not departed from the South.

A SHORT LESSON ON FINANCE.

It isn't every one who can see why it is that a silver dollar is not worth as much as a gold dollar. A New York paper called the *Bullion*, devoted to questions of finance, makes the matter plain enough. The metals, gold and silver, in their native state, have each a certain value. They had each a value before they were used for money. They have a value now, without any stamp upon them, or being coined. When not coined, but in a bar, ingot or natural mass, gold and silver are each called bullion, and their value in this state is their bullion value.

When any foreign coins are received at the United States mint they are melted into a mass, which is weighed and assayed, and paid for simply by weight and fineness, or their bullion value. The value of our coins in other countries is measured solely by the amount of gold or silver they contain, or or their bullion value. If a laborer or merchant is paid in gold or silver by weight, he gets an article of value in its *substance*, not name, for his wages or merchandise. This substance is of like value, less cost of transportation, the world over. Under the laws of some nations this substance, when stamped with certain devices, *i. e.*, coined, takes another value called the legal value. For instance, a miner takes silver bullion from his mine to our mints for coinage. The Government pays him for it at the bullion value in silver dollars. They contain only about 88 cents' worth of bullion; but if he takes gold bullion and gets gold dollars, he gets coins that contain as much bullion (less slight charge for coining) as he brought. In gold the legal value and bullion value are virtually the same. Another illustration: The laws of several States differ as to the legal number of pounds of wheat in a bushel—the legal bushel of one State containing a less amount of wheat than the legal bushel of another—but the *pound* of wheat is the same quantity everywhere. The pound value of wheat means its quantity, and is the same as the bullion value of gold or silver. It is the quantity of the substance. The bullion value applied to the pound Troy means twelve ounces; to our yard, 36 inches; and so on. The bullion basis means a full measure; no short quarts, yards, pounds or dollars hidden under some device that is of no value in itself.

IN commenting upon our late remarks concerning the Joint Assembly-business, the Bodie *Chronicle* says:

Our Inyo contemporary is seemingly soured through the nomination of our present Assemblyman for a re-election, and intimates that Mono is "hogging" the game ia both parties. We surmise that the editor of THE INDEPENDENT would like the Democratic nomination, and that is where the shoe pinches.

The intent of the article was to give the Bodie people some idea of the right in the case, and perhaps enlighten our venerable friends of the *Chronicle*. Now, some years ago, one of the editors of THE INDEPENDENT got his everlasting satisfy on legislative experience. His political troubles at present, and for the second time in his life, run toward a local office, and our other editor could not be induced to accept any office in the public gift.

NOTWITHSTANDING some murmurings to the contrary, President Hayes and all in his party are being splendidly received at every place in Nevada and this State yet visited by them. Mrs. Hayes is made a great pet wherever she goes, and next to her "Old Tecump" (General Sherman) is a great favorite. At last accounts the President was at the Sonoma County Fair at Petaluma. His hobby in all his speeches is national or universal education. He eschews politics entirely, which is a sensible thing for him to do.

A REPORTER of the *Independent*, of Harrisburg, Pa., secured remarkably accurate particulars of various burglaries, and published them in advance of the discovery of the crimes by the victims thereof. This could not, and did not pass unnoticed. A detective was placed on his tracks, and he was soon arrested. He confessed to most of the thefts, and was sentenced to one year's imprisonment.

MINERS in the Sutro tunnel complain of rats in the headers and of the numerous bats at the junctions of the two branches. The former persist in getting in to the lunch buckets when opportunity affords; the latter trouble the mules by flying about their heads.

THE next great national exhibtion will be the World's Fair, at New York in 1883.

THE big blast at the Blue Tent diggings that has been so much talked of, has been fired off. The charge consisted of 1,542 kegs of powder at 25 pounds to the keg, making in all 38,550 pounds. The firing was done by electricity. The result was a very successful one. The bank, which is 238 feet perpendicular, was torn away for 150 feet back and 206 feet wide. Mr. Power, the Superintendent, thinks this is the largest piece of ground torn from its foundation in one blast that has ever taken place in California.—*Nevada City Herald.*

TICHENOR'S TRICKS

The Man Who Claims to Extract Gold from Calistoga Water.

[San Francisco Chronicle, Sept. 12]

CHICAGO, Sept. 11.

The *Tribune* will publish the following article to-morrow, deaded "A. C. Tichenor; an old fraud turns up again:" The telegraph was called into requisition again yesterday for the purpose of recording another scheme of Colonel Anson C. Tichenor, who was reported to have struck it rich in the vicinity of Calistoga, Cal. The story, as told over the wires, was that the Colonel had recently bought the Hot Springs hotel property there, and had been at work for the past two weeks extracting gold from the water by a process which of course was known only to himself. The clean-up the day before showed that he had succeeded in extracting $10 60 from ten barrels of water. The gold was described as of the highest grade of fineness, and, from the number of springs in the vicinity, the reader was given to understand that it would be useless to estimate their value, if they continued to yield as rich as they had up to date. The Colonel is no new acquaintance. In the latter part of October, 1878, the *Tribune* furnished its readers with an account of his Arkansas gold acts and the clever way in which he had

SALTED HIS ORE

With gold filings and chloride of gold, taking in a number of unwary Chicago investors, and then decamping when found out. His first appearance here dated from July, 1877, when he hailed from Little Rock, Ark. He put up at the Palmer House, and proceeded to lay for gudgeons. His property at that time was an old silver mine, known as the Kellogg, situated about eight miles north of Little Rock. The mine has been worked for silver, and during the war for lead, the latter going to make up confederate bullets. The Kellogg mine, according to the Colonel, was enormously rich, and could be let to a favored few at strictly bottom prices. In the fullness of time even so sagacious a man as Mathew Lapton concluded to take a half interest on a basis of $30,000, subject to an incumbrance of $6,000, due the Tennessee owners. He put up $10,000 in cash, and was to pay the balance, $14,000, out of the mine. He visited and examined the mine and seemed to be satisfied, though he refused to put up machinery, the incumbrance being too heavy. With the laudable design of realizing on his investment as early as possible, he had taken a lot of ore sacks along in which to bag the stuff. To his great surprise he found that Tichenor had no authority to ship a pound of ore until the sum of $10,000 was paid down. Mr. Lapton

DEMANDED HIS MONEY BACK

Saying that the mine might be valuable but that it would cost too much to develop. Tichenor put him off, and in the Spring of 1878 made a break for Cleveland, where the crop of suckers appears to have been even better. But the Kellogg mine wasn't a flea-bite to the scheme which the Colonel afterwards opened up to the view of Chicago capitalists. Having sold a lead and silver mine in Silver county, Ark., to "Diamond Joe" for $1,500, he bought a tract of land near Little Rock, sunk a couple of shafts and began taking out what he called decomposed gold quartz. Then he turned up again in Chicago and announced in the strictest confidence that he had got it—the most stupendous find of the age. In short, several people took hold of it and put their money into it, but in a short time, despite the favorable assays, ugly rumors began to circulate. One A. W. Kellogg went to Little Rock with Tichenor, Andrew Warren, T. C. Eldridge and other

"LUCKY INVESTORS,"

At least so they considered themselves, and set about seeing the thing as it was. Kellogg got some specimens and sent them here, and an assay failed to reveal a trace of gold. The long and short of it was that the ore turned out to be nothing but an argillaceous formation, in which gold was never known to exist, and that the clayey soil had simply been salted with gold filings, and sprinkled with gold in solution with nitro-muriatic acid. Tichenor, so far as is known, shunned Chicago from that time forward and has managed to keep out of the public's eye until now, when he turns up with his gold-water scheme, prepared to deceive the unwary. His operations were set forth in the *Tribune* in the Fall of 1878. They extended to a number of other places besides Chicago and Arkansas, and while they differed somewhat in detail, the same general plan permeated all, it being the usual scheme of selling nothing for something and then clearing out.

THE Alta has an electric signal in its shaft which works to a charm, and by which the engineer can be signaled at any moment, no matter how fast the cage is moving. It is used by a foot, a dinner-bucket, a lantern, or anything else, and operates by a touch upon strips of sheet copper stretched up and down the timbers of the shaft and beside the guides. This touch completes a circuit and blows a whistle on the surface. The invention is one which is destined to come in to general use wherever shafts are used, and that is pretty much all over the world.—*Gold Hill News.*

EIGHT million dollars is due the city of New York in the shape of delinquent assessments for street and other improvements. It was necessary to issue bonds to cover the deficiency in the city's revenue, and efforts are now being made to collect the delinquent taxes in order to redeem the bonds.

THE losses by the Eureka fire are said by the adjusters not to exceed $300,000, instead of $1,000,000, as reported. The Home Mutual, which settled its loss for about $10,000, has canceled all its policies in the town, feeling that it is insecure because of an inadequate supply of water.

THE Sunday-schools of Great Britain are lacking in discipline, and are noted for the irregularity with which the children attend. These schools are also deficient in the picnic and festival element which makes the American Sunday-schools attractive.

A GOOD MOVE.

The Citizens of Bishop Creek Organize a Stock Breeders' Association.

A meeting was held at Bishop Creek on the 4th instant for the purpose of organizing a Stock Breeders' Association for Owens River Valley. A temporary organization being effected, it was resolved to perfect a permanent organization, whereupon, Messrs. J. L. Bourland, Barna Peeler and L. Case were appointed a Committee to draft by-laws for the government of such Association, to be reported at a meeting to be held September 11, to which time the meeting then adjourned.

At the appointed time the citizens assembled. L. J. Powers was chosen Chairman pro tem., and I. P. Yaney Secretary pro tem. Mr. Bourland, of the Committee, submitted a preamble and a set of by-laws, which were considered article by article and adopted.

The preamble sets forth that the approach of a railroad must soon change the farming business of the valley, making the production of butter, cheese, etc., and stock raising of the first importance, and that co-operation was the best means to meet the coming change. Therefore it was

Resolved, That we, the citizens of Owens Valley, do form ourselves into an association to be known as the "Owens Valley Stock Breeders' Association," for the purpose of importing and raising all kinds of improved farm stock.

The by-laws provide for the usual officers, and three Trustees, who are to have charge of all stock, subject to the direction of the members. Capital stock was classed by Nos. 1, 2, 3, and upward—cattle No. 1, horses No. 2; other stock not yet numbered. Parties can take shares in any one or more classes, without being required to do so in any others, but shall have no right of voting on questions pertaining to classes in which shares are not so held. Each share in each class is entitled to one vote in its class. Price of Class No. 1 was fixed at $20. That for other classes was left for future action.

It was provided that no assessments should be levied upon the capital stock other than to meet current expenses.

Provided, also, that members rated in good standing when not in arrears on assessments.

The following named gentlemen were chosen a Committee to solicit subscriptions to the capital stock and membership, viz:

Bishop Creek—J. L. Bourland, J. H. Stoutenborough. Jas. Shaw and F. Hutchison; Round Valley—D. Olds, C. H. Parsons, R. Hilton and J. G. Birchim; Big Bine—S. G. Gregg, J. M. McMurry and D. Campbell.

Ordered that a synopsis of these proceedings be furnished THE INYO INDEPENDENT with a request to publish the same.

The Association then adjourned to meet again at 2 o'clock P. M. on Saturday, September 25.

It is highly important that all desiring shares should be present on that occasion. Prompt action is needed that the stock may be brought into the valley before severe cold weather sets in; otherwise serious loss of the stock may occur on the road.

L. CASE,
Com. on Publication.

All About A Baby.

It happens now and then that a girl baby, in Spain, is considered of very great consequence, even by people other than its doting mother, father, aunts, and cousins. Here is what was telegraphed under the sea to the New York *Herald* concerning one little thing that probably didn't weigh over 7 pounds;

NEW YORK, September 13.—The intelligence of the approaching confinement of the Queen of Spain was of course in a short time communicated to nearly the whole city, and, as the welcome news spread, it was only natural that the populace should have been attracted to the palace. People of all classes stayed in the Plaza Del Oriente under the palace windows all day, and the crowd slowly increased until the afternoon, when it was known that the palace messenger had been ordered off at 4:30 o'clock to summon the Ministers. The hours passed, and the crowd increased as the intelligence went abroad, until by nightfall the environs of the palace presented a very animated scene. Directly Queen Christina felt the first symptoms of travail, her Austrian physician advised the Duke of Sexto, the Lord Chamberlain, who immediately ordered the commanding officer of the halberdiers of the guard to send eighty messengers, to request the instant attendance at the palace of the Ministers, the diplomatic corps and the native personages named by royal order to be present at the birth. The ancient usages of the monarchy required that directly after the birth the doors of the bedchamber should be thrown open to let the King present his child to the assembly in the antechamber, and Alfonso strictly conformed to this practice. A few minutes after the Lord Chamberlain had announced the event to the distinguished personages the King entered, bearing on a gold tray his child, and while all the assembly bent forward to gaze, the veil that covered the royal infant was raised and every one looked at the child—a strong, healthy baby-princess. King Alfonso received hearty congratulations, especially from the foreign Envoys and the Ministers. Before any one departed the Minister of Grace and Justice prepared a deed recording the birth, and it was signed by many witnesses according to precedence. Then a solemn Te Deum for the happy recovery of the Queen was sung in the chapel of the palace by the Cardinal primate and the Patriarch of the Indies, in the presence of a numerous attendence of the nobility. All classes are highly elated at an event so fortunate for the dynasty. Directly after the presentation of the child the chief governess conveyed her to the apartments which had been prepared in the story below the royal bedchamber. The baptism ceremony is to take place in the chapel within the palace on the 14th inst. At the christening, his Eminence Juan Ignacio Moreho, Archbishop of Toledo, will represent the Pope. When the crowd outside the palace saw the flag and the light, showing the birth of a Princess, or Infanta, as she is styled in Spain, some demonstrations of loyalty took place.

AND the cry is still they come! The Canadian Pacific is an assured fact. A London syndicate is to build it. The Dominion Government gives $30,000,000 worth of land as a subsidy, with the part of the road already completed, and bonds besides. There is only one contingency. The Dominion Parliament must sanction the bargain. And they doubtless will.

MARRIED.

At Bishop Creek, Inyo Co., Cal., Sept. 14, 1880, by Seth G. Sneden, Justice of the Peace, at the residence of John C. Mills, Esq., JACOB KOCH to BARBARA KRAFT.

NEW ADVERTISEMENTS.

MINING APPLICATION NO 180,

....TO THE....

VENTURA MINE.

U. S. LAND OFFICE,
Bodie, California, September 8, 1880.

NOTICE IS HEREBY GIVEN THAT thomas Henning and John T. Belshaw, whose postoffice address is Cerro Gordo, Inyo County, California, have this day filed their application for a patent for fifteen hundred linear feet of the VENTURA mine or vein, bearing silver, lead, etc., with surface ground six hundred feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 52, in Township Sixteen South, Range Thirty-eight East, of Mount Diablo Meridian. Said Lot No. 52 being described as follows, to-wit:

Beginning at a post on the south end of lode near the middle of Cerro Gordo cañon. Said post is 4 ft high x 4 in. square, set in a mound of earth and rock 3 ft high x 4½ ft dia. at base; marked the post on its N. side "P. A. V. M.," from which the middle of the cañon bears north 0 30 chs. The entrance to the New Enterprise tunnel bears south 18 deg west 1 21 chains. A quartz reef 4 ft high x 6 feet long bears south 18½ deg west 0.86 chs. Thence, var. 15 deg 40 min E., 1—north 4 deg west 2.73 on the supposed line of the lode, rock in place not appearing on the surface to gulch bears southwest. Commence ascending at an angle of 26 deg. 3 94 center of road locally known as the Citizens' Grade runs east and west 8 90 open cut on the vein, cut 0.30 chs long, 9 30 upper crossing of Citizens' Grade runs southwest and northeast from which a shaft sunk in ferrugenous quartz croppings to a depth of 25 feet bears south 80 deg east 0 90 chs. 12.12 shaft 6 ft deep on the lode containing lead ores. 18.18 summit of slope 21.21 brow of hill commence descending to north 22.72 post in mound of rock and earth 4 ft dia. at base by 3 ft high marked the post "P. B V. M." from which a slate ridge extending northwest down the mountain and being elevated from 1 to 2 feet above the surrounding rock bears north 60 deg east 0 12 chs A ferrugeneous quartz vein 0 16 chs high by 0 06 chs thick and 55 feet lower than P. B V. M having a north and south strike bears north 27½ deg west 1.37 chs to its topmost pinnacle. A pine bush 5 in. in dia. bears north 88 deg west 0.53 chains.

CONNECTING LINE.

From post "P. 1 V. M." the cor to Sec. 3 and 4 on 4th standard line south T. 17 S., R. 38 E., M. D. M., bears by calculation south 27 deg 24 min 41 sec west 421.48 chs distant

SURVEY OF EXTERIOR BOUNDARIES.

Commencing at post "P. A V. M.," as described in the survey of lode. Thence, var 15 deg 40 min east, 1—north 71 deg east 2 10 ascending bottom of cañon to forks of road the junction of "Belshaw toll road" and the Citizens' grade 4.70 post 4 ft high in mound of earth 3 ft high by 5 ft dia. situated in gulch running southwest, marked the post "P 1 V M," from which the middle of Belshaw's toll road bears south 1 50 chs; post in mound of earth marking the northwest cor of the New Enterprise mine bears north 71 deg east 0 13 chs Thence, var 15 deg 40 min east, 2—north 40 deg west 2.04 ascending to gulch bears southwest 6.85 crossing of a trail running east and west 7.53 center of Citizens' grade, road runs east and west 19.54 steep ascent 26 deg to summit of ridge of slate, bears east and west descending to west 19 60 commence descending to north 24 deg 22.72 post 4 feet high built in mound of rock on steep side hill 41 deg, marked the post "P 2 V M," from which a nut pine 10 in. dia bears north 20 deg west 0.33 chs. Pine stump 12 in. dia bears north 40 deg east 0 60 chs. A slate ridge running north and south bears north 80 deg east 0 52 chs. Thence, var 15 deg 40 min east, 3 south 71 deg west 3.33 descending mountain diagonally to an old prospecting cut and shaft situated on a vein of white ferrugenous quartz from 12 to 15 inches thick striking northwest and southeast 4.69 post "P B, V M," described in survey of lode, 9.40 post in rock mound on steep side of mountain sloping west; marked the post "P 3, V M," from which a pine stump 12 in. dia bears north 10 deg west 0.33 chains, limestone reef running northwest down the mountain bears 70 deg east 0 26 chs The mountain at this place slopes northwest at an angle of 29 deg. Thence, var 15 deg 40 min east, 4—south 4 deg east 6 97 slightly ascending to gulch bears west 7 12. tunnel running east on a vein of ironstone 7 15 vein of iron 4 ft thick bears north 70 deg east 9.10. Trail runs east and west 10 84 summit of ridge bears southwest commence descending, 12 50 road Citizens grade runs east and west 16 44 lower crossing of road runs northwest and southeast 21.51 Belshaw's toll road in middle of cañon, 22.72 post on south side of cañon 0.19 chs, higher than bottom of cañon built a mound of rocks around post and marked post "P 4, V M," from which the top of a slate reef situated above a short tunnel 6 ft long running south on a copper stained seam 2 in. thick bears north 50¼ deg east 0 13 chs. A ridge of slate running down the mountain northwest bears south 33 deg west 0.06 chs. Thence, var 15 deg 40 min east, 5—north 71 deg east 4.70 ascending cañon to place of beginning. Containing 20 63-100 acres.

Magnetic variation 15 deg 40 min E., containing 20 63 100 acres.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District in Book —— of ——. The adjoining claimants are New Enterprise

Any and all persons claiming adversely any portion of said Ventura mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

JAMES E GOODALL, Register.

MINING APPLICATION NO. 181,

...TO THE....

NEW ENTERPRISE MINE.

U. S. LAND OFFICE,
Bodie, California, September 8, 1880.

NOTICE IS HEREBY GIVEN THAT Thomas Henning, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred linear feet of the NEW ENTERPRISE Mine or vein bearing silver, gold, etc., with surface ground six hundred (600) feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 39, in Township 16 South, Range 38 East, Mount Diablo Meridian. Said Lot No. 39 being described as follows, to-wit:

Beginning at a post set in mound of earth on northwest end of line of lode; marked the post "Post 7, New Enterprise mine;" said post is marked on its north side "Post A Ventura Mine," being situated on south end of lode of said Ventura mine. From which var 15 deg 50 min E., the middle of Cerro Gordo cañon bears north 30 chs; the entrance to the New Enterprise tunnel, course of tunnel south 35 deg east, 135 ft long, bears south 18 deg east, 1 21 chs; a quartz reef 4 ft high bears south 18½ deg west 86 chs. Thence, with a var 15 deg 50 min east, south 38 deg 30 min east 1 21; quartz vein alongside New Enterprise tunnel—commencing ascending 14 74 summit of ridge bears west 20 30; gulch bears southwest 22 72; post 4 ft high x4 in. dia set in mound of earth marking southeast end of line of lode; marked the post "Post 4, New Enterprise mine," from which a pine stump 8 in. in dia by 10 in. high bears north 43¼ deg east 33 chs; a pine tree 6 in. dia by 4 ft high bears north 27 deg east 27 chs.

SURVEY OF EXTERIOR BOUNDARIES.

Commenced at post marked "Post 1, New Enterprise mine," standing in a gulch on north cor. of claim, from which a post marking the southeast cor of the Ventura mine bears south 71 deg west 11 chs. Thence, with var 15 deg 50 min east, 1—south 38 deg 30 min east 3 18, crossing of road in cañon; commence ascending; 18.71 summit of ridge bears west 20 82 "Post 2 New Enterprise mine," marking the point of junction of the New Enterprise, Silver Wedge and Armagh mines, from which the "Armagh U. S. Mineral Monument" bears by calculation north 36 deg 52 min east 14 21 chs. From "Post 2, New Enterprise mine" a pine stump 8 in. in dia bears north 23 deg east 30 chs. A pine tree 4 ft high bears north 71 deg east 62 chs; a pine tree 6½ ft high bears south 50 deg 14 min west 57 chs. Thence, with a var 15 deg 55 min east, 2—south 11 deg east 1.82; descending, "Post 3 New Enterprise mine," on the west boundary line of the Armagh mine, from which "Post 5 Armagh mine" bears south 11 deg east 1 21 chs. Thence, with a var 15 deg 50 min east, 3—south 71 deg west 3 94 "Post 4 New Enterprise mine," on southeast end of line of lode; commence descending; 8.75 "Post 5 New Enterprise mine" on south corner of claim; said post is 4½ ft high x5½ in in dia and is set in a mound of rocks and earth 2½ ft high, from which a pine stump 11 in high x15 in. in dia bears north 38 deg 1 min east 33 chs; an old prospecting hole 5 ft deep x4 ft square bears south 82 deg east 51 chs. Thence, with a var 15 deg 50 min east, 4—north 38 deg 30 min west 1.15; descending into gulch, commence ascending 4 32; ridge bears southwest; 12 80 main ridge of mountain bears west, commence descending; 22 72 "Post 6 N E mine" on steep rocky side hill; post set in a hole in the rock, from which an old prospecting cut 11 ft long x4½ ft wide from its face bears north 50 deg east 29 chs. "Post 4 Ventura mine" bears north 71 deg east 11 chs. Thence, with a var 15 deg 50 min east, 5—north 71 deg east 11 "Post 4 Ventura mine;" 4 81 "Post 7 New Enterprise mine" and Post of Ventura mine; 6 92 road, Citizens' grade; 9 52 "Post 1 Ventura mine;" 9 63 "Post 1 New Enterprise mine," place of beginning, containing 20 55-100 acres.

SURVEY OF CONNECTING LINE.

Commenced at "Post 2 New Enterprise mine." Thence, var 15 deg 55 min east, south 11 deg east 3.63 "Post 5 Armagh mine;" north 79 deg east 10 60 point on W. B. line of the Ygnacio mine; north 11 deg west 12 59 to "U. S. Mineral Monument," which when computed gives for a direct closing line from "Post 2 New Enterprise mine" "Armagh U. S. Mineral Monument" north 36 deg 52 min east 14 21 chs.

DESCRIPTION OF THE ARMAGH U. S. MINERAL MONUMENT:

Said Mineral Monument as described in the field notes of survey of the Armagh mine is built on the apex of a red rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon and very precisely on the west boundary line of, and distant 17.51 chains from the southwest corner stake of the Ygnacio mine, as patented. At this point caused a hole to be drilled in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter by 16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high by 5 feet in diameter at its base. Marked the top of the post "U S. Mineral Monument. Erected January 3d, 1880, by Wm. Crapo, U. S. Deputy Mineral Surveyor, under authority of the U S. Surveyor General for California." From said post in Mineral Monument, with a variation 15 deg 55 min E, the extreme end of the rocky bluff on which the Mineral Monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face 7½ feet high bears N 60 deg E .07 links. The northeast corner of an old adobe vaso chimney, a Mexican furnace for smelting silver and lead ores, bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¼ deg W 1.06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The northwest corner of Rafael Diaz' house bears S 38 deg 23 min E 1.58 chains. An old well 20 feet deep on north side of cañon bears N 58 deg 20 min W 1.93 chains.

Magnetic variation 15 deg 50 min east, containing 20 55-100 acres.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book —— of ——. The adjoining claimants are the Ventura and Armagh mines.

Any and all persons claiming adversely any portion of said New Enterprise mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, in the State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

SATURDAY, SEPTEMBER 18.....1880

Proceedings in the Superior Court.

Monday last, in the case of H. M. Isaacs vs. Nathan Rhine, the long pending slander case, plaintiff asked a dismissal of the suit in words as follows:

Now comes the plaintiff by his attorneys, S. P. Moffat and J. W. P. Laird, and asks that the action be dismissed for the following reasons, to wit: That, under the rulings of this Court, plaintiff finds it impossible to prove the material allegations as charged in his complaint.

S. P. MOFFAT,
J. W. P. LAIRD,
Att'ys for Plaintiff.

A similar motion was made in plaintiff's case of like character against Isaac Harris, whereupon an order of dismissal was entered in both cases.

Juryman W. W. Vaughn, being sick, was excused for the term.

The other jurors were excused attendance until Monday next, the day set for the trial of Ellis, charged with murder, and to which date the Court then adjourned.

POLITICAL.—On Tuesday last, Judge Conklin and Omie Mairs, with the latter's fine four-horse rig, went to Lone Pine to meet Congressman Pacheco and the Hon. Calvin Edgerton, who, as mentioned last issue, were that evening to address the people of this locality from the Republican standpoint. By the above mentioned arrangement, the distinguished gentleman were brought here two hours ahead of the regular stage time, thereby enabling them to be on hand at the hour set for the opening of the meeting. The Court room was befittingly decrated with flags and flowers for the occasion. At the appointed hour, after a campaign song, with organ accompaniment, by the glee club, the ex-Governor was appropriately introduced by the chairman, Judge Conklin, and discoursed for more than half an hour, mostly upon matters of local bearing and in relation to the difficulties in the way of securing prompt Congressional action upon bills of any character. In like manner, Mr. Edgerton was then introduced, and in an eloquent address of a full hour's duration, reviewed the principal issues before the people. After the speaking a sort of levee was held through which by far the largest portion of our people, the young folks included, were given the opportunity io take the Governor by the hand. His pleasant, genial manners commended him to the friendship and good wishes of every one save, of course, that only his political friends could wish him success politically. The impression made by Mr. Edgerton, both as a soeaker and socially was highly flattering to that gentleman. This being the first time a live Congressman ever visited this section. people without regard to politics, made it a point to be present, and to show him the respect due his extended public services, as well as personal worth. On this account, perhaps more than any other, the attendance was much larger than at the meeting of last week. On the following morning the two gentleman with the same conveyance and escort of the day previous, started for the north, calling at Camp Independence en route, and, at Big Pine, expecting to meet an escort from Bishop, at which place they were that night to address the people, and two nights later, those of Bodie, and so on till the day of election—a tremendous labor.

FAILED TO CONNECT.—C. R. Greathouse, of San Francisco, and Gen. Kittrell, of Bodie, were retained by plaintiff as counsel in "Isaacs vs. Rhine," and "Isaacs vs. Harris," slander suits of very great moment to the parties litigant in possible results, more especially the plaintiff, for which reason he sought the best counsel obtainable, and paid both a full and liberal fee in advance, for which they agreed to see the cases to the end whenever and wherever that end might come. When the cases, after due and ample notice, came up for trial at last neither of these counsel put in an appearance in any manner whatever, even by a letter of excuse. With the lights now before us, we are constrained to say that this is the most pronounced case of bad faith that has ever come under our notice, although, for all we can say to the contrary, it may be susceptible of a satisfactory explanation. This explains how it came that Messrs. Moffat and Laird had to take full charge of the case at the last moment when neither, up to that day, had anticipated any such responsibility for a moment, and, of course, were less prepared to undertake it; nevertheless, it is the general belief that they managed it just as well, or at least accomplished just as much as the counsel above named could have done had both been present. There is perhaps more to be said about this, one way or the other, hereafter. We hope to do those non-resident attorneys full justice, when certain in which direction justice lies.

A HEAVY SENTENCE.—One Nevis Calderon, a Mexican, has been lodged in the County Jail for sixty days for the offence of stealing a chicken and three gallons of water. It appears that the Mexican took the water from Chris Crohn's place in Cerro Gordo and was found by a Portugese in the barn in possession of a dead chicken, the rightful property of Crohn. Upon complaint, the Mexican was brought before Justice Houard of Lone Pine and in about five minutes was under a sixty day sentence. Chris himself is hugely disgusted with the whole matter. The Mexican will probably be released to day by the Superior Court, upon motion. The fact that no time intervened between finding the judgment of guilty and passing the sentence will form a sufficient flaw in the proceeding.

TO MEET.—Republicans will take notice that a regular meeting of the Garfield Club takes place on Wednesday evening next. See notice under "New Advertisements."

RELATING TO HORNED CATTLE.

MESSRS. EDITORS—A word in regard to stock may be of interest to your readers. What kind does the valley stand in need of? I answer, a cow that will give a large quantity of milk suitable for both butter and cheese; that will not under high feeding take on too much fat and yet when no longer useful in the dairy be profitable for beef. Some members of the Association who claim to have investigated the matter think they have found this rare combination of qualities in the "Holstein," the finest cow of Holland. Mr. Bourland, of Bishop, is in correspondence with the importers, Smiths & Powell, of Syracuse, N. Y. He has their milk and butter record which I shall quote below. In color they are spotted black and white and remarkable for docility. Also for early maturity, many having calves at two years of age, a very important point. Their size also commends them, the largest cows while in milk weighing upwards of 1700 pounds. One prize bull weighed at one year old 1390 pounds.

Another thing worthy of mention is, the Holstein is the coming stock. While the other breeds are cheapening by reason of abundance this must hold its own anyway, and probably steadily rise in value for some years.

But foremost of all they are remarkable for their milking qualities. While the best common cows give from 3500 to 4000 pounds of milk per year the best of this stock give from 12,000 to 16,000 pounds per year.

Milk Record—Netherland Queen; imported heifer 2 years old; 58 lbs. 12 oz. one day; 1670 lbs. 7 oz. one month; 7239 lbs. 7 oz. in 5 months; 11473 lbs. 5 oz. in 7 months.

Porceleintje; imported cow 5 years old; 65 lbs. in a day at 4 years old and 1810 lbs. in a month at 5 years old. Now allow nine pounds for a gallon and you have it.

A letter of Powell & Smiths now before me states that they have made from 14½ to 18 pounds of butter in a week from some of their cows without extra feeding. Of course this is from their best cows. Also that they tried two year old heifers nine months after calving and found that they would then make upwards of a pound a day.

I do not know that this cow will be selected, but think it is probable that it will. One thing is certain: hard times are at the door and unless the farmers of this valley organize and push new and paying industries they are "gone up." Beef, Butter, Cheese and Bacon must go or we must go. With alfalfa only safe plan is to soil the stock—I have found by experience that it pays. A corral of half an acre or less, a shed for the worst weather, a scythe or machine for cutting and a cart or one-horse wagon for hauling is all that is required. I have tried it for two years and have not lost a cow and have had but one serious case of bloat. Besides one acre will keep as much stock as two will if pastured.

L. CASE.

DRUNKEN INDIANS—A WARNING.—There are parties who make it a regular business to supply Indians with whiskey. One of these parties is an old county pauper, another is a man of family, not long a resident of the county, and two others are young men who live here and there as circumstances seem to require. By their united efforts, scores of drunken Indians are to be seen reeling, fighting, and quarrelling every Sunday, in various localities, particularly in the vicinity of Camp Independence. The demonstrations made at times by some of these whiskey-crazed Indians towards white persons as well as towards each other, occasioned a well-founded fear that a tragedy may be precipitated at any time. In consequence of this fear, men with families living in isolated localities often-times fear to leave their families unprotected at any time, even in the day time. The law affords no remedy against the miscreants who supply whiskey to Indians. This being an admitted fact a number of law abiding citizens, and men of families have come to this conclusion, and request to make it known, viz: the white miscreants above alluded to as furnishing Indians whiskey, must stop their nefarious operations now and at once, or each and all of them will receive a coat of tar and feathers, if not a more lasting hint that such scoundrels as they are shall not any longer jeopardize the lives and property of honest citizens as they have been doing heretofore. "A wink is just as good as a nod to a blind man."

TO REMOVE.— Ex-Treasurer Harry Isaacs, with his family, start in a few days for San Francisco there to remain indefinitely. It is with feelings of unfeigned regret we chronicle the departure of Mr. and Mrs. Isaacs. For years both have occupied prominent places in the social affairs of our little town, while, almost from the creation of the county Harry himself has been identified with its social and political history, and but few if any similarly associated with the county's history have enjoyed a greater degree of general popularity, or so wide an acquaintance. His going is the tearing down of one of our oldest landmarks, and will be felt as a positive loss by friendships of the hopeful old Taboose Days down to far beyond the present. The pleasantest episodes in our own ten year's acquaintance with Inyo affairs are so invariably associated with the name of "Harry Isaacs" as to bring those memories trooping in to add to our regrets at this final dissociation, if final it is.

SUPERIOR COURT.—Benancio Robles, a Mexican, has filed a complaint in the Superior Court through his counsel, Messrs Reddy & Conklin, against Paul Houard, C. Meysan, Geo. Palmer and Louis Padillo far damages in the sum of $1,000, for alleged illegal arrest and detention.

SCHOOL.—The Lone Pine school under the charge of S. D. Baker, teacher, began a six months term last Monday, with a roll of 35 pupils.

THE RIGHT MOVE.—The farmers of the upper end of the valley certainly take the correct view of things, as set forth in communications elsewhere in this issue relating to the organization of a Stock Breeders' Association. There will surely be a railroad in this valley, or within a few hours' reach of it inside of two years. Such is the present promise at least. That means some material changes in farming objects. Grain raising will not be much if any less profitable than now, but stock raising in all its branches is bound to be far more so, and in time, will become the leading business in every part of the valley, and for which business there is not, with proper peparation, any part of the coast better suited.

AHEAD OF TIME.—Circumstances of rather an imperative nature compel us to close our columns, this issue, twenty hours earlier than usual, in consequence of which we are obliged to defer to next week publication of some advertisements as well as other local matter that ought to have found space in this number.

WITHDRAWN.--The political announcement on the fourth page of this issue of John R. Hughes, Esq., for Sheriff, should have been withdrawn, as that gentleman has authorized us to state that he is entirely out of the field.

F. & A. M. — The stated meeting of Inyo Lodge, No. 221, F. & A. M. takes place to-night, at which time considerable important business comes up for consideration.

AROUND AGAIN.—We are pleased to see Mr. John Shepherd around again, after his protracted sickness.

IT seems that Chief Ouray's death did not prevent or even delay the signing by the Utes of the agreement to dispose of their reservation in Colorado for homes elsewhere. The agreement has been signed and the arrangements for the removal of the Indians from the Centennial State will at once proceed. Ere long Colorado will be rid of the treacherous Utes, and their large reservation thrown open to settlement. Some of these Indians are to be quartered in Utah, which means that the Government regards them as too bad for Colorado but not for this Territory. —*Salt Lake Herald.*

A LEADVILLE gambler advertises in handbills as follows: "Keno, as played at Wyman's, is a very honest, religious game. It is religious, because Wyman don't allow anyone to swear or make those vulgar expressions sometimes used in playing keno. It is respectable, because the Rev. Mr. Talmage was in the other evening to see the game. Wyman has no noise or trouble, because he treats all his customers to the finest liquors and cigars free; also, a hot free lunch three times a day. Therefore there is nothing for anyone to quarrel about."

THE new census gives Kentucky a gain in the past ten, of more than in the previous thirty years; Virginia more than in the previous fifty years, and South Carolina more than in the previous seventy years.

THE Southern Pacific is advancing at the rate of two miles per day, and is now within twelve miles of the New Mexican line, and 126 miles east of Tucson.

THE BEST PAPER. TRY IT!

BEAUTIFULLY ILLUSTRATED.

35th YEAR.

The Scientific American.

THE "SCIENTIFIC AMERICAN" IS A large, First-Class Weekly Newspaper of Sixteen Pages, printed in the most beautiful style, *profusely illustrated with splendid engravings*, representing the newest inventions and the most recent Advances in the Arts and Sciences; including New and Interesting Facts in Agriculture, Horticulture, the Home, Health, Medical Progress, Social Science, Natural History, Geology, Astronomy. The most valuable practical papers, by eminent writers in all departments of Science, will be found in the Scientific American.

Terms, $3.20 per year; $1.60 half year, which includes postage. Discount to Agents. Single copies, ten cents. Sold by all Newsdealers. Remit by postal order to MUNN & CO., Publishers, 37 Park Row, New York.

PATENTS. In connection with the SCIENTIFIC AMERICAN, Messrs. MUNN & Co. are Solicitors of American and Foreign Patents, have had 35 years experience, and now have the largest establishment in the world. Patents are obtained on the best terms. A special notice is made in the SCIENTIFIC AMERICAN of all inventions patented through this Agency, with the name and residence of the Patentee. By the immense circulation thus given, public attention is directed to the merits of the new patent, and sales or introduction often easily effected.

Any person who has made a new discovery or invention, can ascertain, *free of charge*, whether a patent can probably be obtained, by writing to MUNN & Co. We also send *free* our Hand Book about the Patent Laws, Patents, Caveats, Trade Marks, their costs, and how procured, with hints for procuring advances on inventions. Address for the Paper, or concerning Patents,

THE ENGINEERING and MINING JOURNAL.

PUBLISHED WEEKLY.

DEVOTED TO

Mining, Metallurgy, Engineering and Science.

RICHARD P. ROTHWELL, C.E., M.E., ROSSITER W. RAYMOND, Ph.D., } Editors.
WILLIAM H. WAHL, Ph. D., Department of Progress in Science and the Arts.

IT IS AN ACCEPTED AUTHORITY ON ALL questions relating to the great mining industries of the country. It is the oldest publication of its class in America, thoroughly independent; being of the trade and not in it, occupies a just and impartial position, which enables it to advise and teach without fear or favor. It devotes much space to questions bearing upon economical management of mines, and from time to time illustrates the more important improvements in mining machinery and engineering methods. Special attention is given to reliable mining news from all parts of the country, which is gathered by an efficient corps of correspondents in every section, and from an extended exchange list. The metal and ore markets, and gold, silver and miscellaneous stocks are reported and commented upon weekly by experienced financiers, who are unbiased by private interests, and upon these matters it is accepted as a reliable guide and unfailing instructor. Gives statistics of production of coal and iron, and of our great gold, silver and other mines. Its scientific notes are an epitome of the latest researches, its trade reports full, and its editorials sagacious and comprehensive. It enjoys the widest circulation and greatest influence of any journal of its class in the world; its patrons and readers comprising the most select and intelligent men in every quarter.

Subscription, $4 per year, in advance; 10c., single copy.

INYO COUNTY TRESPASS LAW

ADOPTED BY THE BOARD OF Supervisors August 7, 1880.

It is hereby ordered by the Board of Supervisors of the County of Inyo, State of California, that the following law be and the same is hereby declared to be the Trespass Law of Inyo County:

SECTION 1. Any owner, or any occupant of any land or possessory claim, finding any horse, mare, colt, mule, jack, jenny, horned cattle, hogs, sheep or goats, or any number of such animals, upon such land or possessory claim, whether such land or claim be inclosed or not, may take up and safely keep such animal or animals at the expense of the owner or owners, and shall be allowed for keeping said animal or animals the following named sums: For each horse, mare, colt, mule, jack or jenny, the sum of twenty cents per day; for each head of horned cattle, the sum of twenty cents per day, and for each head of swine, sheep or goats, the sum of five cents per day.

SEC. 2. Any person taking up animals under the provisions of this Act shall, immediately upon the taking up of such animals, notify the owner or owners of such animals, or his, her, or their agent or agents, if known to him, and living within six miles of the place where such animals were taken up, of the time and place of such taking up, together with the number, character and description thereof, also, as nearly as he can, the marks and brands, if any, of each animal; and such owner or owners, his, her, or their agent or agents, may, at any time after the receipt of such notice, and upon proof of ownership, tender the amount of damages claimed, and demand the delivery into his, her, or their possession, of such animals; and if suit shall have been commenced, such tender may be to the Justice or Judge before whom such suit is brought, or the owner or owners may give bonds with sureties, to be approved by the Justice or Judge trying the case, for the payment of all damages and costs of suit, and he may demand the release and delivery into his or their possession, of all animals held under the action, and the Judge or Justice shall order the immediate delivery of such animals; but if no owner, owners or agents of owners appear within two days to claim said animals, or if he or they appear and fail to pay satisfactory damages, or if the owner is unknown to him or her, or lives more than six miles from the place of taking up, then if the compensation and damages claimed is less than three hundred dollars ($300), the taker up of such animals shall, within two days file a written complaint, verified by his or her oath, with the nearest acting Justice of the Peace in the township where such animals were taken up, or if the amount of compensation and damages claimed be more than three hundred dollars, then in the Superior Court of said county, setting forth in said complaint the facts, nature, location, and amount of the damages claimed, and a description of all animals so taken up, the number, the marks and brands, if any, and the supposed value of each animal, or the supposed aggregate value of such animals, and the time and place of taking up. The action shall be in favor of the owner or owners, or occupants of said lands or possessory claims, and against the property in rem; and any action thus commenced, may include all the animals thus found trespassing at any one time, whether of one or more marks or brands; and no judgment shall be entered under the provisions of this Act for damages lone, except upon the testimony of at least two credible witnesses, whose names shall be entered in the Justice's docket, or in the minutes of the Court in which the action is had.

SEC 3. Upon the filing of the complaint, a summons shall be issued, and if said action be in a Justice's Court, shall be made returnable not less than fifteen nor more than twenty days from the date of issuance, and directed to all owners and claimants of the property described, and shall contain a description of each animal, with its marks and brands, if any. The summons shall be served by posting a copy of the same at the door of the room where said Justice or Superior Court is held, for ten days before the return day thereof, and also at the same time by filing a copy of such summons with the Recorder of said county; but the Recorder shall not file the copy of summons until the payment of a fee of one dollar; and it shall be the duty of said Recorder, on payment of his fee of one dollar, to forthwith compare the marks and brands, if any, described in said summons, with the record of marks and brands in his office, and thereupon to notify the owner or owners of such marks and brands of the fact of the pendency of such action, and of the time and Court when and where the same is set for hearing. The certificate of the officer stating the facts of such posting and filing, or the affidavit of any person, competent to be a witness, who shall have so posted and filed, shall be conclusive evidence of a sufficient service thereof; *provided*, that in any case when any animal or animals, seized under this Act, are alleged in said complaint to be worth fifty dollars or more, it shall be the duty of the County Recorder to cause publication to be made of the fact and time of seizure, and marks and brands, with a description of the animal or animals, in a newspaper of the county, at least ten days before the sale, the newspaper in which all such notices are to be made to be designated, and the rates of publication to be fixed, by the Board of Supervisors of the county.

SEC. 4. If the judgment be in favor of the plaintiff, the property may be levied upon and sold as other personal property seized on execution. The officer selling shall give a bill of sale to the purchaser, describing the animal or animals sold, and to whom, and the price paid for each, and referring to the judgment under which such sale was made. Any overplus of the proceeds of such sale, after satisfying the judgment and costs, shall be paid by the Justice or Clerk to the owner of the property, upon demand, if demanded within six months from the date of sale; and if not so demanded, the same shall, at the expiration of said time, be paid into the County Treasury, for the benefit of the County School Fund; and the owner may also redeem any animal or animals sold under the provisions of this Act at any time within sixty days after the sale, by producing satisfactory proof of ownership, and paying the purchaser the amount of purchase money in gold coin, with interest at the rate of two per cent per month; but if no redemption be made within sixty days such bill of sale shall be conclusive evidence of title in favor of the purchaser of the animal or animals therein described.

SEC. 5. The fees of all officers for service required under this Act shall be the same as now allowed by law for similar services in other civil actions, and shall be taxed as costs in the judgment.

SEC. 6. The Justice and Clerk shall keep a book, which shall be open to public inspection, and shall record therein all sales made pursuant to any judgment rendered in their respective Courts under the provisions of this Act, which record shall contain a description of the animals sold, the prices paid, the name of the purchaser, the amount of fees and charges, and the amount of surplus money, if any, arising from each sale, and whether any animal or animals have been redeemed; and if such surplus money shall be received by the owner of any animal, he shall receipt for it in the margin opposite such record, and the Justice or Clerk shall, without fee, deliver such book to his successor in office, and also all surplus money in his hands arising from any sale made by authority of this Act, taking his receipt therefor.

SEC. 7. Any person who shall drive stock from any lands or possessory claim other than his own, to any other lands or possessory claim, or shall take up any such animal or animals on any land or possessory claim other than his own, for the purpose of taking advantage of any of the provisions of this Act, shall be deemed guilty of a felony; and any person who shall fail or neglect to give the notice required by the second section of this Act, or shall rescue or take from the possession of the taker-up any animal or animals, without first having paid the compensation, fees and damage claimed or awarded, and any officer violating any of the provisions of this Act, shall be deemed guilty of a misdemeanor.

SEC. 8. The owner or occupant of any land or possessory claim, whether inclosed or not, independent of the foregoing provisions of this Act, and if he fail to avail himself thereof, may maintain an action; *provided*, such action be commenced within sixty (60) days in any court of competent jurisdiction, against the owner of, or person having the control of, any of the animals named in section one, for any damages such animals may commit upon his said land or claim, and if judgment be rendered in his favor, it shall be entered for the amount of the actual damage proved.

SEC. 9. Nothing in this Act shall be so construed as to prevent the free use for grazing purposes of all unoccupied lands not taxed; *provided*, that each actual settler, who shall have a prima facie title to the land upon which he is settled, shall be protected in the possession of one hundred and sixty acres, and residence on the land shall be considered a prima facie title; *and, provided further*, that said one hundred and sixty acres shall be marked and defined by visible and well defined monuments.

Approved and adopted this Seventh day of August, A. D. 1880, and ordered that the same be published in THE INYO INDEPENDENT for four successive weeks.

J. R. WESTERVILLE,

Chairman of the Board of Supervisors.

Attest: JOHN CROUGH, Clerk.

PROPOSALS

....FOR....

Publishing and Printing.

NOTICE IS HEREBY GIVEN, THAT sealed proposals will be received by the Board of Supervisors of the County of Inyo, State of California, at the office of the County Clerk, up to the hour of 12 o'clock M. on MONDAY, the FOURTH day of OCTOBER, A. D. 1880, to contract for county printing, as follows:

1. Advertising, such as is required by law and shall be ordered by said Board, including Notices for Proposals to Contract, Reports of Auditor and Treasurer, Proceedings of the Board of Supervisors, and the annual List of Delinquent Taxes. Said proposals shall submit to the Board the rate which will be charged per square of two hundred and fifty ems space for the first and each subsequent weekly publication.

2. The printing of two hundred and fifty copies of the Great Register of Inyo County, in the usual form, bound in paper. Bids must specify the price of such printing per name of each elector. Printed matter to be delivered at the Court House of said county.

Said contracts to continue for the term of one year from and after ratification.

Payment for such advertising and printing shall be made on bills duly sworn to and presented at the regular meetings of the Board, by warrants drawn upon the General Expense Fund.

The right to reject any and all bids is reserved.

Said proposals must be indorsed "Proposals for Advertising," and "Proposals for County Printing," and addressed to the Clerk of the Board of Supervisors, Inyo County. The same will be opened between the hours of 1 and 4 o'clock P. M., on said Fourth day of October, 1880.

By order of the Board of Supervisors.

JOHN CROUGH, Clerk.

MINING.

MINING APPLICATION NO. 161,

....TO THE....

OCCIDENT MINE.

U. S. LAND OFFICE,
Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred linear feet of the "Occident Mine" or vein, bearing silver and gold, with surface ground three hundred feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 37, in Township ——, Range —— of —— Meridian, said Lot No. 37 being described in field notes of survey as follows, to-wit:

SURVEY OF EXTERIOR BOUNDARIES:

Began at a post on the southwest cor. of claim; marked the post "Post 1 Occident Mine." Said post is 2x3 inches square by 30 inches long and set in a mound of earth 20 inches high. From which var. 15 deg 55 min E., a pine stump 8 inches diameter bears N. 28 deg 60 min W. 11 links. A pine stump 6 inches diameter bears N. 85 deg 1 min W. 45 links. A pine stump 20 inches diameter bears S. 33 deg 5 min W. 78 links. A pine tree 7 feet high x6 inches diameter bears S 39 deg 51 min E. 82 links. A pine bush 2 feet high x3 inches diameter bears N. 69 deg 10 min E. 67 links. From said Post the "Armagh U. S. Mineral Monument" by calculation bears N 20 degs 48 min W 17.17 chains. Thence with a var 15 deg 55 min E. 1st course—N 11 deg W 3.03 chains, ascending to point of hill at bottom of old prospecting cut 6.49 chains. End of slope —6.88 chains. On level line—commence descending 7.64 chains, old prospecting tunnel 8.42 chains. Old prospecting cut 12.47 chains. Old dump of prospecting cut 14.13 chains. Middle of Ygnacio Ravine—Ravine bears N 65 degs W 15.21 chains. Trail on ridge dividing Ygnacio Ravine from Cerro Gordo Cañon. Ridge bears W 16.07 chains. Rocky ridge—commence descending 17.19 chains. Middle of Cerro Gordo Cañon—commence ascending 21.85 chains. Wagon road—Citizens grade 22.72 chains. To post on N W cor of claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of rocks 2 feet high, marked the post "Post 2 Occident Mine." At foot of post is a cactus burr 20 inches in diameter growing in the rock. From said post a pine stump 2½ feet in diameter standing 8 feet below the wagon road. Citizen's grade, bears S 38 deg E 1.54 chains. No other suitable natural object within measuring distance. Thence with a var 15 deg 55 min E, 2d Course—N 79 deg E 2.27 chains, ascending rocky slope to "Post 3 Occident Mine" on north end of line of lode 3.42 chains. Rocky ridge bears south 4.54 chains. To a post on N E cor of claim. Said post is 30 inches long, 2x3 inches square, and is set in a mound of rocks 20 inches high, marked the post "Post 4 Occident Mine." From which a pine stump 20 inches in diameter bears N 40 deg 35 min E 1.01 chains. The top of a blue slate reef 10 links high bears S 48 min E 15 links. Thence with a var 15 deg 55 min E. 3d Course—S 11 deg E .97 chains. Wagon road—descending 3.03 chains. An old stone cabin. A tall pine tree stands 15 links to East of line, 3.42 chains. Middle of Cerro Gordo Cañon—bears S W. Commence ascending on steep, rocky ridge, 5.48 chains. Trail on ridge dividing Cerro Gordo Cañon from Ygnacio Ravine 11.77 chains. Open cut 20 feet west of mouth of an old prospecting tunnel in blue slate, 12.98 chains. Old trail—runs N 65 deg W 13.69 chains. Summit of ridge at old trail 14.35 chains. Summit of ridge commence descending 15.88 chains. Crossing of Belshaw toll road 22.72 chains. Post on S E cor of claim. Said post is 36 inches long, 3x3 inches square and is set in a mound of earth 25 inches high, marked the post "Post 5 Occident Mine," from which a red iron boulder 2½x3¾ feet square and standing 26 inches high bears S 84 deg 40 min E 85 links. A pine tree 9 links high standing 6 ft. west of bottom of a gulch—gulch bears S, bears N 35 deg 11 min E 1.03 chains. The middle of the Belshaw toll road bears S 79 deg W 18 links. Thence with a var 15 deg 55 min E. 4th Course—South 79 deg W 18 chains. Road—commence ascending, 2.04 chains. Quartzite ridge bears N—S 2.27 chains. Post marked "Post 6 Occident Mine" on south end of line of lode—commence descending 2.87 chains. Trail—runs N W and S E 4.54 chains. To place of beginning, "Post 1 Occident Mine," containing 10.32-160 acres. From the Armagh U. S. Mineral Monument as herein described the mouth or entrance to the "Armagh Tunnel" as noted under the head of "Report" bears S 76 deg 55 min W 9.24 chains. The course of said Tunnel is S 58 deg 55 min E. Length 350 feet on the 27th of March, 1880.

ARMAGH U. S. MINERAL MONUMENT.

The "Armagh U. S. Mineral Monument" is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon, and very precisely on the W. B. line of the Ygnacio mine (as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Dep. Min. Sur.) and distant 17.51 chains from the S W cor stake of the Ygnacio mine.

At the point above given I drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter x16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high x5 feet in diameter at its base. Marked the top of post "U. S. Mineral Monument. Erected January 3d, A. D. 1880, by Wm. Crapo, U. S. Deputy Mineral Surveyor—under authority of the U. S. Surveyor General for California." From said post in mineral monument, with a variation of 15 deg 55 min E, the extreme end of the bluff on which the monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face of rock 7½ feet high bears N 60 degs E 1.07 links. The N E cor of an old adobe vase chimney bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The N W cor of Rafael Diaz' house bears S 28 deg 38 min E 1.58 chains. An old well 30 feet deep on north side of Cerro Gordo Cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE.

Commence at "Post 1 Occident mine," thence with a var 15 deg 55 min E, N 79 deg W 3.03 chains to Post on S W cor of Ygnacio mine as surveyed for a patent N 11 deg W 17.51 chains. To U. S. Mineral Monument which when computed gives for a closing line from "Post 1 Occident Mine" to U. S. Mineral Monument N 20 deg 48 min W 17.77 chains.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 147 of locations.

The adjoining claimants are, on the west the San Francisco mine, on the south the Motero mine and on the east the Trachyte Flat mine.

Any and all persons claiming adversely any portion of said Occident mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

JAMES E GOODALL, Register.

MINING APPLICATION NO. 162,

....TO THE....

ARMAGH MINE.

U. S. LAND OFFICE,
Bodie, California, July 1, 1880.

NOTICE IS HEREBY GIVEN THAT George Jackson, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred (1,500) linear feet of the "Armagh Mine" or vein, bearing gold and silver, with surface ground six hundred (600) feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 38, in Township —— Range ——, of Mount Diablo Meridian. Said Lot No. 38 being described in field notes of survey as follows, to-wit:

Commenced at "Post 1 Armagh Mine," on S E corner of claim. Said post is 30 inches long 2x3 inches square and is set in a rock mound 2 feet high, from which with a var 15 deg 55 min E a pine stump 18 inches high by 10 inches in diameter bears S 15¾ deg E 77 links. A pine stump 15 inches diameter bears S ¾ deg 30 min E 91 links. A red ferrugenous quartz reef standing 4 feet high bears N 24 links. A pine stump 12 inches high x8 inches in diameter bears N 49 deg 30 min E 15 links. Thence with a var 15 deg 55 min E, N 11 deg W 3.20 chains. Ascending to summit of ridge commence descending 6.98 chains; dump of old prospecting cut, 10.80 chains; Belshaw toll road, 13.18 chains; Belshaw toll road in middle of Cerro Gordo Cañon, commence ascending 14.25 chains; road running to Potosi house, 21.66 chains; wagon road—Citizens' grade—22.72 chains; post on the N E corner of claim. Said post is 30 inches long, 2x3 inches square, and is set in a mound of earth 20 inches high. Sage brush slope, sloping S W; no natural object for witness mark in vicinity. Marked post "Post 2 Armagh Mine." Thence with a var 15 deg 55 min E, S 79 deg W .07 chains. Trail runs N S; commence descending—2.20 chains; wagon road, Citizen's grade—4.54 chains; post on north end of line of lode, marked the post "Post 3 Armagh Mine"—8.43 chains. Trail runs N S—0.09 chains. To post on N W corner of claim, situated on sage brush slope, sloping to S W. Said post is 3 feet long, 2x3 inches in diameter and is set in a mound of earth 2 feet high; marked the post "Post 4 Armagh Mine." No suitable natural object within measuring distance. Thence with a var 15 deg 55 min E, S 11 deg E, commence ascending—1.75 chains; commence ascending—3.97 chains; crossing of foot trail runs west—8.27 chains; toll road in middle of cañon, commence ascending, 18.45 chains; summit of ridge bears west; commence descending, 19.74 chains; south end of "Silver Wedge" claim, 22.72 chains, to post on S W corner of claim. Said post is 30 inches long, 2x3 inches square and is set in a mound of earth 20 inches high; marked the post "Post 5 Armagh Mine," from which a pine bush 2 feet high bears N 76 deg W 19 links. The chimney of an old deserted vase bears N 22 deg 30 min E 24 links. Thence with a var 15 deg 55 min E, N 79 deg E 63 chains. Descending into bottom of gulch—gulch bears south, commence ascending—4.65 chains. "Post 6 Armagh Mine," or south end of line of lode, 3.99 chains; crossing of toll road, 9.09 chains; "Post 1 Armagh Mine," place of beginning. From which post the Armagh U. S. Mineral Monument bears N 4 deg 10 min W 12.67 chains, by calculation, containing 20.64-100 acres.

Location of the Armagh Tunnel.—From the "Armagh U. S. Mineral Monument" the mouth of the Armagh tunnel bears S 76 deg 55 min W 9.24 chains. The course of said tunnel is S 58 deg 55 min E. Length, 350 feet.

ARMAGH U. S. MINERAL MONUMENT—DESCRIPTION THEREOF:

There not being any lines of the U. S. public land surveys within 100 chains of the Armagh mine, I built a Mineral Monument and connected therewith. Said Mineral Monument is built on the apex of a red, rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon and very precisely on the west boundary line of, and distant 17.51 chains from the southwest corner stake of the Ygnacio mine, as surveyed for a patent in the year 1875 by Joseph Seeley, U. S. Deputy Mineral Surveyor. At this point drilled a hole in the rock to a depth of 9 inches, in which drove a piece of gas pipe 1 inch in diameter by 16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high by 5 feet in diameter at its base. Marked the top of the post "U. S. Mineral Monument. Erected January 3d, 1880, by Wm. Crapo, U. S. Deputy Mineral Surveyor, under authority of the U. S. Surveyor General for California." From said post in Mineral Monument, with a variation 15 deg 55 min E, the extreme end of the rocky bluff on which the Mineral Monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face 7½ feet high bears N 60 deg E .07 links. The northeast corner of an old adobe vase chimney, a Mexican furnace for smelting silver and lead ores, bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¾ deg W 1.06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The northwest corner of Rafael Diaz' house bears S 38 deg 23 min E 1.58 chains. An old well 30 feet deep on north side of cañon bears N 58 deg 20 min W 1.93 chains.

SURVEY OF CONNECTING LINE.

Commence at "Post 1 Armagh Mine," thence with a var 15 deg 55 min E, N 79 deg E 1.51 chains to west boundary line of Ygnacio mine, and at a point 325 feet—4.92 chains from the southwest corner stake of the Ygnacio mine; thence with a var 15 deg 55 min E, N 11 deg W 12.59 chains to U. S. Mineral Monument.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book F, page 146, of locations. The adjoining claimants are, on the East, the Greenly mine.

Any and all persons claiming adversely any portion of said Armagh mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, in the State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

ASSESSMENT NOTICE.

LOS ANGELES MINING AND SMELTING Company.

Location of Works, Resting Springs, Inyo County, California.

Location of Principal Place of Business, Los Angeles, Los Angeles County, California.

Notice is hereby given that at a meeting of the Board of Directors of said Company, held on the third day of August, 1880, an assessment (No. 4) of Two Dollars per share was levied upon the entire capital stock of said corporation, payable immediately, in United States gold coin, to J. M. Elliott, Secretary of said Company, at his office, No. 1 Temple Block, in the city and county of Los Angeles, State of California.

Any stock upon which this assessment shall remain unpaid on Monday, the Twentieth (20th) day of September, 1880, will be delinquent and advertised for sale at public auction, and unless payment is made before, will be sold on TUESDAY, the NINETEENTH (19th) day of OCTOBER, 1880, to pay said delinquent assessment, together with costs of advertising and expenses of sale. By order of the Board of Directors.

J. M. ELLIOTT, Secretary.

Office of the Secretary—No. 1 Temple Block, City and County of Los Angeles, California.

Allgemeine Deutsche Unterstuetzungs Gesellschaft.

[German General Benevolent Society.]

SAN FRANCISCO, August 28, 1880.

Messrs. Harris & Rhine, Independence, Cal.:

DEAR SIRS—The undersigned, President of the German Benevolent Society, begs leave to call your attention to this truly benevolent institution, founded in the early days of California, and being now in the 27th year of its existence. The society was formed to carry out three objects, viz: to assist poor and worthy or deserving people by support, to find employment for those out of work, and to care those who are stricken down with sickness. For the latter purpose the Society owns a magnificent Hospital, surrounded by extensive grounds, where all patients are under the charge of excellent physicians and a consulting board of the most eminent medical talent of this city. The Society has expended for hospital and grounds the sum of $158,895.

The object of this communication is to propose to you to act as agent for this Society, either personally or through one of your employees, suited for such position, for the purpose of enlisting new members.

The monthly fee is only one dollar and the initiation fee on becoming a member two dollars. Only healthy persons can become members, and only Germans or those who speak that language, also their wives and children. Any member who meets with sickness is treated in the hospital without any expense to him until he has been restored to health. All persons who are not members, or can not become such, and speaking the German language, are admitted for medical treatment in the hospital at as low terms as it is possible to make them.

In this city we have about 3,000 members, but throughout the interior only about 300. It is our aim to increase the number of members throughout the State to make the hospital as much as possible self-sustaining, to enable us to extend the charitable department in this benevolent institution. For the trifling sum of one dollar per month members have the best aid and care in the German Hospital.

Frequently sick people in the country are crippled for life by false treatment from incompetent doctors, or even brought to a premature death. Only too late do they find out that if they had become members they would have been restored to health, and their earnings of years would not have gone into the pockets of inexperienced doctors, as the hospital employs only the best physicians. If there are no earnings, the employers and the friends of the sick are generally called upon to pay for his support. All this can be avoided, if the employers would vigorously enforce the rule, now introduced in most of San Francisco's establishments, that every man employed should belong to a relief society in order that in case of sickness he might be well cared for and not be reduced to the rather humiliating necessity of asking aid from the purses of his employer and his friends.

Persons of all nations of the age of 50 years or over are admitted as pensioners for life by paying a certain sum to be agreed upon to the society. They receive a home at the hospital, first-class board, washing and attendance in in case of sickness, free of any expense.

To enable Germans and others who do not know of the existence of this institution, neither of the hospital nor its great advantages, to become members, I have addressed you the above, and hope that you will cheerfully accept the agency and do all in your power to further the interests of this society by enlisting new members, and recommending our hospital to those who may be compelled to seek medical aid.

Your Obedient Servant,

JULIUS BANDMANN,

President G. G. B. S.

Acting Between Acts.

Nym Crinkle says, in the *Sunnyside Press*, that the best acting he ever saw Adelaide Neilson do was between the acts. He called upon her one afternoon at the Fifth Avenue Hotel, and while there three enormous baskets of flowers were sent in by the wife of a millionaire banker. The actress was to choose the one which was to be sent to her upon the stage in the evening. She was severely critical, turned them around, and finally with delightful disdain, "thought that one would do." That night after the second act of "Romeo and Juliet," she was recalled. While bowing at the footlights, there was a stir in the aisle, two ushers made their way to the orchestra with the ponderous and beautiful basket of flowers. "I never saw anything so spontaneous," says the writer, "so childishly natural, and so unspeakably charming as her astonishment at the gift. She looked at it with her handsome eyes filled with surprise, and then she looked at the audience as if there must be some mistake, and the gift could not be intended for so unworthy an artist as herself. The audience encouraged her by applause, and she clasped her hands and peered over its edge, and trembled a little with the force of an unexpected honor. Then she picked it up, and, beaming like the morning star, flowers and actress went off in one variegated mass of loveliness. I never saw her do anything which, for high art, compared with that."

VAST HYDRUALIC SCHEME.—We learn that a remarkable mining project is in contemplation by a party of California hydraulic miners. It is no less than to dig a tunnel on Feather river, commencing at Whisky Bar, on the northern end of Big Bend, at a point about three miles from Yankee Hill to Island Bar, on the southern end of Big Bend. This tunnel is to run under the Big Bend mountains about two and a half miles, and is to be capacious enough to turn the water of Feather rever so that the entire bed of the river between those points can be worked. The Chico *Enterprise* says a company with ample means has been formed to carry out the bold scheme, and that a surveyor is now engaged in making a survey of the route of the proposed anal. The length of ground that can be worked, if the river can be successfully turned, is over 12 miles, and no part of the mining region in this country has given better prospects than the whole of Big Bend. For many a long year the Feather river has flowed through this ancient channel which is nothing less than a natural sluice, and the quantity of gold that lies embedded in its hidden recess must be incalculable. The project is a bold one, yet seems feasible. There are no difficulties apparent in the way of running the tunnel, and when once completed, so that the water is carried through the short cut of two and a half miles, the work of washing the enormous mass of pay dirt will be simplicty itself.

PREMONITION of a storm is often given by the falling of a branch from a tree. During a camp meeting service at Hannibal, Mo., lately, a heavy beech limb fell upon a tent, though the sky was clear and there was no wind, but a heavy storm soon followed. Farmers tell of numerous falls of trees and limbs in the stillness that precedes great storms of wind and rain.

THE mints of France belong to private corporations, but coin money under the supervision of the national authorities. Any one possessing silver or gold can have it coined. The five-franc piece in silver is the only standard national money, the other pieces being mere bullion for market convenience.

KANSAS has a million inhabitants, and gains five Congressmen.

Curious Facts About the Albatross.

The tracts of lower, nearly flat land of Marion Island, skirting the sea, and the lower hills and slopes along the shore, presented a curious spectacle, as it steamed in towards a likely-looking sheltered spot for landing. The whole place was everywhere dotted over with albatrosses, the large white albatross or goney (*D. exulans.*) The birds were scattered irregularly all over the green in pairs, looking in the distance not unlike geese on a common.

The albatrosses were all around, raised from the ground. Their nests are in the style of those of the mollymauks, but much larger, a foot and a half at least in diameter at the top.

They are made up of tufts of grass and moss, with plenty of adhering earth beaten and packed together, and are not so straight in the sides as those of the mollymauks, but more conical, with broad bases. The female albatross is sprinkled with gray on the back, and is thus darker than the male, which is of a splendid snow white, with the least possible gray specking, and which was now, of course, seen in his full glory and best breeding plumage; the tails and wings of both birds are of course dark.

The albatrosses one meets with at sea are most frequently birds in young plumage or bad condition, and have rather a dirty, draggled look. The brooding birds are very striking objects, sitting raised up on the nest, commonly with the male beside it. They sit fast on the nest when approached, but snap their bills savagely together, making thus a loudish noise. They will bite hold of a stick when it is pushed up against their bills. They need a good deal of bullying with the stick before they stand up in the nest and let one see whether they have got an egg there or no. Then the egg is seen to appear slowly out of the pouch in which it is held during incubation. It is nearly five inches long, or about as big as a swan's, and is white, with specks of red at the large end. Only one egg is laid. In most of the nests there were fresh eggs; in some, however, nearly full grown birds.

At Campbell Island, of the Campbell and Auckland group, the young of *Diomedea exulans* were found just breaking the shell in February by an exploring party.*

Charles Goodridge, who was one of a sealing party on the Prince Edward Islands in 1820, and spent two years on the Croyets, says the albatrosses there lay at about Christmas, and that the period of incubation is about three months (?). The young, he says, were wing-feathered, and good to eat about May, and did not fly off till December.†

The young albatrosses are dark gray in plumage. They snap their bills, like the old ones, to try and frighten away enemies. The old birds never attempt to fly, though persistently ill-treated or driven heavily waddling over the ground.

Very many were killed by the sailors that their wing bones might be taken for pipe stems, and their feet skinned to make tobacco pouches. The old males tried to run away when frightened, but never even raised their wings.

It is amusing to watch the process of courtship. The male, standing by the female on the nest, raises his wings, spreads his tail and elevates it, throws up his head with the bill in the air, or stretches it straight forwards as far as he can, and then utters a curious cry, like the mollymanks, but in a much lower key, as would be expected from his larger larnyx. While uttering the cry the bird sways his neck up and down. The female responds with a similar note, and they bring the tips of their bills lovingly together. This sort of thing goes on for half an hour or so at a time. No doubt the birds consider that they are singing. Occasionally an albatross flies around and alights upon the grass, but I saw none take wing. —*H. N. Mosely.—Challenger Notes.*

*"Notes on the Geology of the Outlying Islands of New Zealand. Reported by Dr. Hector, F. R. S." 1869

†"Narrative of a Voyage to the South Seas and Eight Years' Residence in Van Dieman's Land." Goodridge; 1833.

FOR the exclusive benefit of our host of lady readers we take delight in announcing the following details concerning Princess Stephanie's bridal vail, now on view at Brussels: "It is valued at $5,000 and 150 workwomen were employed three months in its making. It is entirely in point a l'aiguille and the largest piece of work of this kind that has ever yet been made. It is three yards and a half long and three yards wide." By the way, if Stephanie's vail cost $5,000, how many two-bit cigars per day must her husband smoke to keep even?

CHARLIE BOYD, of Bellville, Illinois, made a signal failure of his plan of vengeance. He tried to shoot David Walker, who had been attentive to Mrs. Boyd, but missed him and let him escape. Then he attempted to murder the woman, but only wounded her slightly. Finally he was himself killed by Walker, who had returned with a gun.

A WISCONSIN cow died not long ago, after a lingering illness, attended by a persistent cough. After her death a veterinary surgeon opened the windpipe to discover the cause of the irritation, and found in the upper part of the lung a live striped frog of ordinary size. The surrounding portion of the lung was much discolored.

THEY have a woman over in Roop county, Nevada—the wife of a Justice of the Peace—who made the wedding cake for a couple her husband married, dressed the bride, and then turned in and gave birth to twins, a boy and a girl, all in the same day.

Machine Jokes.

The day wore on. Well, what did it wear? Wore the close (clothes) of the day, of course.

"In the bright complexion of my youth I'll have no such word as 'pale,'" and with the complexion of an angel she reached for the rouge-box.

A Maine school teacher captured thirty-three cuds of gum from her pupils in one day and it was a rainy day at that.—*Detroit Free Press.* Most any school teacher can do that if she but chews.

An English servant girl who had returned from the United States to visit her friends at home was told that she "looked really aristocratic," to which she responded: "Yes; in America all of us domestics belong to the hire class."

Harvey Denton says that it puzzles him how strange men walk in houses and abstract fifty or a hundred dollars from a bureau drawer. He says he can't do in his own house and he knows every nook and corner in it.

The following letter was received by an undertaker recently from an afflicted widower: "Sur—my waif is ded and wonts to be berried to-morrow at Woner klock. U nose wair to dig the Hole—by the siad of my two other wiafs—let it be deep."

A three-year-old's mother reproved him for always wanting sugar on his bread and butter, and was shocked one evening when the little fellow, in repeating the Lord's Prayer after her, added, after the phrase "Give us this day our daily bread," a petition of his own, which was, "Please, Dod, wid shuddar on it."

A Nashua man left a cannon ball on the grass in front of his house, and sixteen boys, nine middle aged men, two old men, and one woman who had pretty stockings on mistook it for a football, and the men hopped around and made up faces and swore profusely, and the woman tried to look as though she merely pushed it to see what it was as she limped away.

"Why, how do you do?" and there was a cordial but brief kissing season. "I haven't seen you for ever so long. You haven't called, you know." "I know it. I don't go anywhere. Last week I was at the shore, next week I'm off to the mountains. September is so delightful, you know, and I'm over to sister's or up to mother's about every day, and so much shopping to do. I really don't go anywhere." And they smiled and said good-bye three times apiece.

The Indian summer hat for women is said to be of straw. It will be knocked in on the front, jammed in on the back, shoved in on each side and kicked in on top. Then the rim will be jammed up all around to make the whole effect harmonious. It will be trimmed with strips of sheet tin, turkey wings, old fruit cans and debris generally. It is an economical kind of hat, as it can be made by taking a boy's old straw hat, running a wheelbarrow over it a few times, and hitching on whatever comes handy.

THE relatives of a missing man at Hyde Park, Mass., credit the statement of a fortune teller that his body lies at a certain point in the river, and are building an extensive coffer dam in order to reach the spot.

CHALFANT & PARKER.

J. E. PARKER. P. A. CHALFANT

INDEPENDENCE, CAL.:

SATURDAY, SEPTEMBER 25 1880

Mrs. Hayes Puts On No Style.

There is a report current that at one of the receptions given Mrs. Hayes in Oakland the host charged his loial guests one dollar apiece "to defray the expense of decorating his palatial mansion." For this and other reasons, relating to the reception of Mrs. Hayes, Oakland is experiencing a social convulsion. Mrs. Hayes was admirally entertained and the leading features of the programme arranged for her edification were strictly carried out. But some of the ladies were not altogether pleased with their experience. And these are the reasons: The Presidential party had no time for elaborate dressing on Thursday. They arose at half-past 4 in the morning to see Cape Horn. Thence forward to Oakland, the members of the party, especially the President and Mrs. Hayes were receiving calls all the time. Mrs. Hayes was therefore attired in her traveling costume when she reached Oakland. The ladies who entertained her were richly dressed and finely bejewelled. They had arranged themselves with a view to "putting on style" and were of course profoundly ignorant of the sensible and unpretending ways of their guest. Result; a bright, amiable, winning lady in a plain black dress, was conspicuous for her breeding and bearing among a crowd of ladies who had had every recourse to art and coin to make them selves specially attractive. We regret to say that some of the ladies thought Mrs. Hayes erred in not appearing before them in silk and satins.—*Stock Report.*

THAT LONG SOUGHT-FOR CEMENT. For the past seventeen years fabulous stories of rich gold-bearing cement having near the head of Deadman Fork of Owens River have been going the rounds, and numerous parties have expended time, labor and money in the vain search therefor. That such deposits do exist is firmly believed by some and doubted by many. During the past ten days there has been a quiet excitement regarding this long-sought treasure among the prospectors of this section. There are many rumors in the air, and one among the many is that certain Indians now in Mammoth know where it is to be found and offer to show the place for a small consideration. We also hear that some parties have offered to pay the price demanded by the Indians. If there is anything in this we may be able to give some particulars in our next issue. A somewhat amusing cause for the renewal of the old excitement in our midst was the appearance on our streets last week of a man named Brady, from Independence, or thereabouts, who, having dreamed dreams and seen visions, knew exactly where this hidden treasure was to be found. He went to the place pictured by his imagination, and sure enough it was not there. Boys, it will take more muscle than dreams to find this myth of the Sierras.—*Mammoth Herald.*

PARTIES who have recently returned from Lida Valley and the country in that section, report the mining out look very favorable. Everywhere that any work is being done the mines show well. The entire range is one mass of mineral and wherever prospecting has been pursued to any definite extent the showing has been more than satisfactory When the country becomes more closely connected with the rest of the world by rail and other communication it is certain to make itself felt in mining circles.—*Candelaria True Fissure.*

A NEW ENTERPRISE.—Dr. Wainright, of our sister county, Inyo, is now manufacturing and shipping to all parts of the county his new remedy, Sage-Brush Bitters; and it would seem from the success of his remedy here that we are to have a new era in the treatment of fevers. The basis of this medicine is a species of wild sage found growing on the elevated plains of Inyo county, and has been used by the early settlers and natives successfully as a remedy for fevers and Summer complaints.—*Kern County Gazette.*

THE Los Angeles *Express* of the 18th contains these items:

Twelve bars of bullion passed through Wells, Fargo & Co.'s office in this city yesterday from Arizona.

Mr. J. E. Burke, of Los Nietos, will this year clear about $5,000 from his forty acres planted in walnuts.

Charles T. Park has already engaged 135,000 lbs. of walnuts, and will take all that offers at a low price.

Seven tons of ore from the Sanchez mine, Mohave district, recently smelted in San Francisco, yielded $1,700 net.

H. Newmark & Co. have evinced their generosity and public spirit, by donating an excellent milch cow to the Los Angeles Orphan's Home.

The cool Summer had a depressing effect on the seaside sojourning at Santa Monica. The campers came late in the season and left early. Only four tents now remain at the old Santa Monica Cañon.

PRESIDENT SEGNIER never spared the lawyers in his court, and some of his remarks concerning them were quite in the savage vein of Czar Peter. When the docket was being called one day one case was called where neither advocate was present. "Go on with the case," said the President, gleefully, "now we have a chance of getting at the truth."

IN Havana the editor's life is not a happy one. One journal was fined $500 for announcing the loss of the *City of Vera Cruz* before the Government saw fit to allow the news to be made public.

TRACK-LAYING progresses on the Texas Pacific Railroad at the rate of two miles per day.

ARE WE TO VOTE FOR COUNTY OFFICERS THIS FALL?

The Supreme Court having decided the County Government Bill unconstitutional, inquiry is being made as to the effect of this decision upon the election of county officers this Fall.

We are of the opinion that Section 10 of Article 22 of the Constitution is self-acting, or independent of legislation. It reads as follows:

In order that future elections in this State shall conform to the requirements of this Constitution, the terms of all officers elected at the first election under the same shall be, respectively, one year shorter than the terms fixed by law or by this Constitution; and the successors of all such officers shall be elected at the last election before the expiration of the terms as in this section provided. The first officers chosen, after the adoption of this Constitution, shall be elected at the time and in the manner now provided by law. Judicial officers and the Superintendent of Public Instruction shall be elected at the time and in the manner that State officers are elected.

If the Legislature had passed no act intended to regulate the terms of office, then there could and would be no question as to the terms of office, for the old law regulated the matter. Now that the new or attempted law fails, being a nullity, we are in the same position as if no such law had been passed or proposed. Such being the fact, those officers who would have held for two years under the election last Fall, simply hold for one year under the Constitution, and the same offices must be again filled by an election this Fall. Otherwise the Constitution itself becomes a nullity in its provisions relative to the time and intervals of general elections. If the first portion of the section above quoted does not provide, in itself, for the election of county officers this Fall, of what value is the last sentence which fixes the time for the election of judicial and State officers?

But Section 5 of Article 11 gives the Legislature power to fix the terms and compensation of county officers, and from this it is assumed that it rests with that body to fix the time when such officers shall be elected. To a certain extent, this is true; beginning with any even numbered year, in which only may general elections in this State be constitutionally held, the terms of county officers may be extended to some future even numbered year. But, by reason of the failure of the County Government Bill, the Legislature has done nothing whatever in relation to it, so that, without an extra session to make up the default, the old law must govern as to the terms of office, while the Constitution fixes the time for the term to begin—that is, when the second election under it shall take place, which, in express terms, was fixed for the first even numbered year after the adoption of the instrument. The Legislature could not have changed the time for this second election even if so disposed. In effect it made no change at all from the old law concerning county officers, and the old law still remains in force in all respects except where modified by the Constitution, as in the dates when elections shall take place.

An agreed case may be submitted to the Supreme Court to obtain a timely decision in this matter, or Governor Perkins may call an extra session of the Legislature to take action upon it, but whether either is done or not done, we are satisfied the proper thing to do is to go right on with the business of the election as if nothing had taken place to raise a doubt as to its legality.

WHEN you see an article in the editorial columns of a paper headed, "The Political Outlook," look at the bottom line, and if it says "sold by all druggists," don't read it. There is such an article going the rounds which is the advertisment of a patent medicine. It is a counterfeit well calculated to deceive. Don't read a political article unless the owner's name is blown in the bottle.

THE Grantsville (Nevada) mines—almost a solid mountain of ore—will change hands before long. A gentleman who is well posted in that section says that mining matters there are moving slow, but if the company now negotiating get control, Grantsville will boom, long and loud.

THE new mining district called Mojave, in San Bernadino county, is beginning to attract attention by the abundance and richness of its ores. They are black oxide of silver in copper stained quartz, and are located exactly 110 miles east of Santa Ana.

NEW mines have been discovered in El Dorado Cañon, San Bernardino. Ore from the Lone Star mine assays $2,000 per ton; ore from the Savage, $1,720, and ore from the Morning Star $5,900, with others up in the hundreds.

THE Princess of the Piutes, Sarah Winnemucca, has been provided with a comfortable little house in Oregon, with a yearly pension of $600, as a reward for her services during the last Bannock war.

THE prospects for another war in Europe are good.

NOTES ON BEVERIDGE DISTRICT.

LONE PINE, INYO CO., CAL., Sept. 18, 1880.

MESSRS. EDITORS — Thinking your readers would like to hear something from Beveridge Mining District, I will try to give a description of a pleasant trip I made there last week.

Started from Lone Pine in the morning; crossed the Inyos through Slate Cañon, via Hunter's trail; got as far as Hunter, Hughes & Britton's camp; the last named gentleman insisted on our staying over night with him, he being the only one of the proprietors there; did so; he was very kind in showing us the mine, which we visited next day.

The mine varies from two to four or five feet in width, and crops out for a distance of over two thousand feet in length. They have sunk shafts and ran drifts in a number of places, but only took out such ores as would pay to work in their steam arastras. One shaft is down 170 feet; in the bottom of this shaft there is an abundance of ore that will go from $25 to $40 per ton; it is so difficult to work they have lost from $10 to $15 a ton. They have saved the tailings, which will be worked over after concentration.

Mr. Britton, being left in charge by his partners, thinks of trying

A NEW PROCESS

Which he learned in Colorado from Prof. Hill. It is very simple, and some account of it may interest others who have base gold ores. As described by Mr. Britton, small pits in the ground are partly filled with wood, which is in turn covered with the ore, precisely as in burning charcoal. The heat is not strong enough to melt the lead, but still enough so to drive away the arsenic and other volatile minerals which prevent successful amalgamation. The wood is reduced to charcoal, the same as in a regular pit, so that the expense for wood is nothing as compared to ordinary roasting processes. Mr. Britton informs me that after working the ores prepared in this way and concentrating the tailings, the latter would not assay $5 a ton. Geo. Gregory and Herman Isenduphs were at the camp, assisting Mr. Britton.

After remaining here half a day (and one night), started for Craig's Cañon over an Indian trail; got down to the creek and found James Hanger and D. Pobst busily engaged in making a trail, and fixing up a shop for sharpening tools with which to work their mines. Started the next morning under the guidance of Jim Hanger for a visit to their mines. They will have to build about two miles and a half of trail before they can do any work on their mines. They have two of these lying about two hundred feet apart, each being about

FOUR FEET WIDE

In places, and both prospect well. The gold in places in one of these ledges can be seen with the naked eye. They have also located a mill site in Craig's Cañon, in which there are forty inches or more of water. Stayed two nights and one day at this camp, and then started in the morning for

"JAUREZ CITY,"

Or the Mexican Camp; had to go back via Hunter's trail, then follow the summit of the Inyos about five miles north, and then down the cañon five miles to the Mexican Camp. Met several old acquaintances here; among others, the Morano brothers, with whom I stayed that night, and Frank Miranda. They own several promising mines in partnership, Frank superintending at the mines, the Mirandas running the arastras, boarding house, saloon and stable. They have bonded several mines to Mr. Oliver, the Hidalgo among the number. It is about four feet wide, and would alone furnish ore to keep five stamps running. There are several other ledges in the camp that look quite as promising as the Hidalgo. In the evening Otero invited me over to his camp. They retorted the twenty-three days' run of one arastra, and on weighing the clean gold, found the yield to be one and one-half pounds, worth, according to the last lot sold, $15 77 per ounce. Next morning went on to

CHRIS CROHN'S CAMP.

He, before he could do any work on his mines, had to build a quarter of a mile of trail along a cañon so rough as to require solid stone walls, ten and twenty or more feet at a time, in many places, to hold the trail, and in other places, blast it out of the solid granite. The cliffs project over the trail, below which at different points there is a sheer precipice from one hundred to a thousand feet perpendicular. The trail is a splendid piece of work—wide and substantial, but I did not care to ride over it. Its cost was about $1,800, being more that he has spent to get to his mines than others expend to develop equally as promising mines where there are no trails to build. There being one cliff too rugged for Chris to cut a trail into to reach the north end of the mine, he will tunnel directly through it, a distance of 150 feet. But in doing this he will be taking out ore all the time. This tunnel is being run by our old friend, Nat. Randall. Bob Gurley is taking out ore on the highest croppings. Several other men are employed in taking out ore and in sinking; have quite a number of tons on the dumps. Some of this shows both native silver and gold. The lode has a width of six feet in the widest place. Everything is being done in good shape, and if sufficient ore is found and on the dumps, a mill will be ordered by the middle of October. As the mines lie below those of the Mexicans and of Taylor & Co., there is no reason why they should not be equally as rich.

On the following day visited the camp of

TAYLOR, M'EVOY AND CHANDLER,

Who own about a dozen mines, and are at present erecting a five-stamp mill. They have a number of tons of ore on the different dumps. On one lode they have an incline down 70 feet, in ore all the way to the bottom. I looked at but two of their mines, but am satisfied that one will keep their mill going constantly. One lone cedar tree grew near where they are building, and they are using it and other pieces for a battery block. The other timbers for the mill are such as can be packed on a mule. It is making a great deal more work by having to splice the timbers. H. P. Cartier is doing the carpenter work, and making a No. 1 job of it. The grading and mason work is completed, and the machinery is all on the ground. Thirty days more will hear the stamps pounding away on the rich ores of their mines, and after centuries of solitude the bats and owls will have to give way to the bustle of a lively mining camp. At this camp they only have about

ONE HOUR'S SUNSHINE

During the Winter days. At Juarez City the sun does not shine for four months. At Chris Crohn's there are places the sunshine never reaches.

The mines from Taylor & Co.'s to Hanger & Pobst's mines are on the same gold-bearing belt, between a distance of eight or ten miles, and a five or ten stamp mill could be kept running in nearly every cañon of that distance. After spending a week in Beveridge looking at the mines, I am satisfied of the great future of the district. Was treated well by all. Knowing that I was not a bloated capitalist, especial pains was taken to show me around, neither did they know that I intended to write up the trip.

OSWALD.

A NEW Ministry has been formen in France.

NEW ADVERTISEMENTS.

TO REPUBLICANS OF INYO COUNTY!

It has been the custom between the Republicans of Inyo and Mono Counties to alternate in the selection of a candidate for Representative. This year, under the rule, Inyo County was entitled to the nomination. Our Convention on the 18th inst., generously gave way to Mono County, and chose Hon. JOE WASSON as the candidate. The Republicans of Mono have selected Mr. D. M. Riordan. We, as Republicans of Inyo County, claim that if we give the nomination to a Mono man, we have the right to name the candidate. We have done so, and let us stand by the works. It is JOE. WASSON, or no man from Mono County.

A. R. CONKLIN,
Chairman of the Inyo Co. Rep. Con.
Independence, Cal., Sep. 25th, 1880. t1

J. W. BRIER, ESQ.,

Of San Francisco,

WILL ADDRESS THE CITIZENS OF INYO County in behalf of the Republican party as follows, commencing at the hour of 7 o'clock each evening:

Lone Pine	October 7th
Independence	October 9th
Big Pine	October 11th
Bishop Creek	October 12th
Round Valley	October 13th

Turn out and hear a good speaker and true principles discussed.

T. F. A. CONNELLY, Chairman.
A. R. CONKLIN, Secretary. n53tf2

CARFIELDERS.

THE NEXT MEETING OF THE INYO Garfield Club will take place on

Wednesday Evening, September 29,

and every two weeks thereafter, at the Court House, in Independence. By order of the

EXECUTIVE COMMITTEE.
Independence, Cal., Sept. 18, 1880. n535td

DELINQUENT SALE NOTICE.

LOS ANGELES MINING AND SMELTING Company.

Location of Principal Place of Business, Los Angeles, Los Angeles County, California.

Location of Works, Resting Springs, Inyo County, California.

NOTICE.—There is delinquent upon the following described stock, on account of assessment (No 4) levied on the Third day of August, 1880, the several amounts set opposite the names of the respective shareholders, as follows:

Names.	No. Cert.	No. Shares.	Am't.
Bent, H K W	98	5	$ 10 00
Bent, H K W	161	714	1428 00

SATURDAY, SEPTEMBER 25.....1880

"MURDER IN THE FIRST DEGREE."

Proceedings in the Superior Court.

At 7 o'clock this morning, the Jury in the case of the People vs. W. A. Elllis, brought in a finding of murder in the first degree with imprisonment for life as the penalty.

If this Jury erred in their judgment in any way it was to the side of mercy —if this man Ellis did not fully earn and deserve the rope, no Inyo murderer ever did—and that is putting it to the extreme of comparison.

The trial began on Monday morning last; the case was given to the Jury at about 11 last night; a portion of two days was lost from the real work of the trial in awaiting the return on a special venire for thirty jurors out of which to obtain four additional jurymen to fill the panel. Except this, the whole time of the Court was occupied in hearing testimony; though quite voluminous, the essential points might be given in comparatively few words; but as even this, to be satisfactory, demands an examination of the entire record, for which we have no time for this issue, we are compelled to defer that part till next week. District Attorney Laird began his argument about 5 o'clock yesterday evening, closing at the time previously stated. Mr. Moffat, for the defense, is credited with a highly creditable argument in reply as well as a good defense throughout. It is probable he would have made a successful defense but for the fact that the acts of the defendant preceding the final tragedy showed conclusively that he had murder in his heart, and had failed to commit it sooner only because the caps on both barrels of his gun had failed him.

The Jury was composed as follows: J. R. Eldred, H. D. Gelatt, Henry Evans, Henry Grover, W. R. Edson, Jos. J. Steward, Jas. Shaw, Albert Wayland, John Mullane, Lafe Gill, Henry Giles and J. H. Dodge.

Defendant, W. A. Ellis, on the morning of the 22d of July last, shot and instantly killed, Hans Jacob Mohr. The two men were living in John R. Westerville's house, near Fish Springs in this county, and in the absence of the proprietor, were, with some Indian help, carrying on the business of the ranch, Mohr doing the cooking. Bad blood had existed between the two men for some time. On the morning in question, Ellis stood inside the house and, as Mohr was about to enter to begin his morning work, fired a charge of shot into his throat.

Defendant will receive his sentence next Wednesday, the 29th.

YGNACIO.—Prof. Wm. P. Blake, the renowned geologist and metallurgist, on Wednesday last paid a professional visit to the famous old Ygnacio mine, Cerro Gordo, in the interest of New York capitalists. He was accompanied by W. A. Greenly, until lately an owner and for many years Superintendent of the mine, and by J. H. Holt, Superintendent of construction of the Keeler mill. Pressing engagements elsewhere rendered the Professor's stay on the hill too short to admit of his visiting the recent important developments on the great Buena Vista ledge, as was greatly desired by all. However, he saw so much that he was evidently pleased, and expressed a strong wish to examine the district thoroughly. On his way here he came around by the Brown Monster and made an examination of that property for the owners. He refers to the trip as having been made most pleasant for him all around, by Omie Mairs with four-in-hand, by the people at the mill and by John Davis at the mine. The Ygnacio property, it will be remembered, including the Hawley-Keeler mill on the lake, is under bond to Jos. Wasson and associates until the 23d of November next, but this visit, we think, indicates a successful sale before that time.

MONO NOMINATIONS.—On the 22d instant, the Republicans of Mono held their County Convention, and nominated the following ticket: D. M. Riordan, Assemblyman; M. P. Wiggin, Superior Judge; Henry Battin, Clerk; W. T. Elliott, Treasurer; P. B. Taylor, Sheriff; Mrs. C. W. Sullivan, School Superintendent; T. A. Stevens, District Attorney. The selection for Assemblyman is what surprises the Inyo Republicans, as will be inferred by a card elsewhere on the subject.—"Not that they love Riordan less, but Wasson more." The Democratic Convention took place on the 24th. The results will also possess interests of a personal character to our Inyo readers.

SCHOOL MONEY.—On the 17th instant County Superintendent Symmes made the following apportionment of school funds:

Districts.	State Fund.	Library Fund.	County Fund.
Bishop Creek....	$90 40	$13 60	$ .22
Big Pine.....	74 58	5 81	.11
Cerro Gordo.....	— —	— —	—
Darwin.....	14 17	1 72	.11
Irving.....	31 67	5 94	.11
Independence....	76 23	5 94	.11
Lone Pine.....	29 36	6 73	.11
Milton.....	74 33	6 69	.11
Round Valley....	14 17	4 35	.11
Union.....	76 23	2 77	.10
	$481 14	$53 46	$1 09

WHO CAN VOTE.—No citizen can vote who is not registered on or before October 2d, 1880. All persons (native born) who will become of age before November 2d, 1880, can be registered upon making the proper affidavit that they will be 21 years of age before November 2d, and filed with the County Clerk on or before the 2d day of October, 1880. All who wish to vote this year will do well to note carefully that the time for registration is short.

SPECIAL MEETING.—There will be a special meeting of the Inyo Garfield Club at the Court House next Wednesday evening, September 29. It is hoped that every member will be present.

REPUBLICAN COUNTY CONVENTION.

Delegates to the Republican County Nominating Convention convened, pursuant to notice, in Independence, Saturday, September 18, 1880, at 10, A. M., and were called to order by T. F. A. Connelly, Chairman County Central Committee.

A. McCloy and John Stoutenborough each having in turn declined the honor of the Chairmanship, Judge A. R. Conklin was chosen Chairman and S. V. Stevens, Secretary, pro tempore.

After addresses by the Chairman and S. G. Sneden, on motion, the Chair appointed Committees as follows:

On Credentials—Web. Walker, I. P. Rittgers, J. J. Steward, F. R. Parker and Isaac Harris.

Permanent Organization and Order of Business—T. F. A. Connelly, R. Hilton, J. H. Stoutenborough, Thomas Boland and John Dodge.

On Resolutions—S. G. Sneden, A. Spencer, H. D. Gelatt, A. McCloy, Paul Houard and, on motion, Mr. Chairman.

AFTER RECESS,

The Convention was called to order at 1:30 P. M. Reports of the several Committees adopted as reported.

The Committee on Permanent Organization reported for

Chairman—A. R. Conklin;
Secretary—S. V. Stevens;
Sergeant-at-Arms—L. Munzinger;
Tellers—John J. Stewart and L. A. James, and order of nominations as given below, which report was adopted.

The Committee submitted the following

RESOLUTIONS,

Which were unanimously adopted:

Resolved, That we, as Republicans, endorse the principles and platform adopted by the National Convention which met at Chicago, and placed in nomination those true representatives of American statesmanship, James A. Garfield and Chester A. Arthur, in whom we recognize the only true touchstone to our peoples' suffrages: honesty, capability and efficiency.

Resolved, That in Hon. Romualdo Pacheco, our present Congressman, we find embodied the true gentleman, an honest man and an incorruptible public servant.

THE DELEGATES.

The Committee on Credentials reported Delegates entitled to seats as follows:

Round Valley — W. W. Vaughn (Sneden, proxy), and R. Hilton.

Bishop Creek—A. Spencer, Frank R. Parker, A. McCloy, L. Munzinger, J. H. Stoutenborough, L. A. James, C. Wonacott (Spencer, proxy), and J. S. Turner (Spencer, proxy).

Big Pine—Jos. J. Steward (Conklin, proxy), and W. J. Smith (Steward, proxy).

Fish Springs—J. R. Westerville (by vote of Convention).

Independence—V. G. Thompson, J. Vagt, H. D. Gelatt and Isaac Harris.

Lone Pine—I. P. Rittgers, J. H. Dodge, John J. Stewart, Paul Houard and S. V. Stevens (John Stewart, proxy).

Darwin—Thos. Boland (Connelly, proxy).

Lookout—J. H. Van Nuys (Boland, proxy).

Georges Creek—John Kispert.

Olancha—W. H. Walker.

Deep Springs—Thos. Brothers (by vote of Convention).

Resting Springs, Panamint and Cerro Gordo not represented.

THE NOMINATIONS.

The following named candidates were placed in nomination, in every instance by acclamation and by unanimous vote:

Joint Assemblyman (Inyo and Mono) —Jos. Wasson, Mono.

Sheriff—J. W. Smith, Black Rock.

Clerk—S. V. Stevens, Lone Pine.

Treasurer—Geo. H. Hardy, Independence.

District Attorney—No nomination.

Coroner—V. G. Thompson, Independence.

Surveyor — M. H. White, Bishop Creek.

An adjournment was then had, and Supervisor District Conventions held, which severally reported nominations for Supervisors, respectively as follows:

First District (Bishop Creek, etc.)—A. Spencer.

Second District (Independence, etc.) —Wm. Barrows.

Third District (Lone Pine, etc.)—H. Bellows.

These nominations were endorsed by the Convention, which then, by nominations of delegations each for its own precinct, appointed the following as

THE COUNTY CENTRAL COMMITTEE:

T. E. Jones, Round Valley; A. Spencer and J. H. Stoutenborough, Bishop Creek; Jas. Mitchell, Big Pine; Geo. H. Shedd, Fish Springs; T. F. A. Connelly, A. R. Conklin and Isaac Harris, Independence; John Kispert, Georges Creek; J. J. Stewart, Lone Pine; Web. Walker, Olancha; Sam. Cowles, Cerro Gordo; Thos. Boland, Darwin; B. H. Hubbard, Panamint; George Turner, Lookout; H. P. Gregory, Resting Springs; W. A. Greenly, Deep Springs.

With three rousing cheers for the Republican cause and ticket, the Convention then adjourned *sine die*.

UNWELL.—We regret to have it to state that Mr. C. F. O'Brion, of Darwin, experienced rather a frightful hemorrhage of the lungs on Sunday last, and some lighter attacks of the same kind two or three times since. Dr. George was called in immediately, and, under his care, Mr. O'Brion feels himself so nearly recovered that he thinks of starting home in a day or two. This was his very first experience of this kind, and it was astonishing to note the nerve or bravery with which he met it, peculiarly alarming as such attacks always are. No man has more warm friends to feel solicitous for his perfect restoration to health than has Mr. O'Brion.

PUBLIC SPEAKING.—As will be seen by notice published in this issue, J. W. Brier, Esq., of San Francisco, is to address the people of this county on the political issues of the day, as seen from the Republican standpoint. For further particulars, see the advertisement.

DEMOCRATIC COUNTY CONVENTION.

The Delegates to the Democratic County Convention assembled at the Court House at 10 o'clock on Saturday last, the 18th instant, and were called to order by S. P. Moffat, Chairman County Central Committee.

Temporary organization was effected by the selection of S. P. Moffat Chairman, John B. White, Secretary and Henry M. Isaacs, Assistant Secretary.

THE COMMITTEES APPOINTED.

On Credentials—John L. Bourland, W. A. Baker, C. F. O'Brion, John C. Irwin, Frank Fitzgerald.

On Permanent Organization and Order of Business—C. Meysan, J. D. Mairs, C. H. Parsons.

On Platform and Resolutions—P. W. Forbes, A. W. Eibeshutz, C. F. O'Brion.

On motion, Convention adjourned until 1 o'clock P. M., and upon reassembling received the following

REPORTS.

For permanent officers— Chairman, S. P. Moffat; Secretary, J. B. White; Assistant Secretary, H. M. Isaacs.

Adopted, unanimously.

The Committee on Credentials reported the following Delegates entitled to seats in the Convention:

Round Valley—C. H. Parsons and John S. McGee, by C. H. Parsons, proxy.

Bishop Creek—J. L. Bourland, A. K. Eugley, by P. W. Forbes, proxy; J. B. White, P. W. Forbes, W. G. McCrosky, by J. B. White, proxy: Barna Peeler, by J. L. Bourland, proxy.

Big Pine—J. W. McMurry, W. A. Baker.

Fish Springs—J. G. Bonds, proxied by W. A. Baker.

Independence—S. P. Moffat, A. W. Eibeshutz, J. C. Irwin, J. D. Mairs.

George's Creek—F. S. Hamilton.

Lone Pine—C. Meysan, J. G. Dodge.

Olancha—Wm. Walker.

Swansea—J. H. Holt, proxied by H. H. Buckles.

Cerro Gordo—W. L. Hunter, by J. G. Dodge, proxy.

Darwin—John Connors and H. Jackson, proxied by C. F. O'Brion.

Lookout—F. Fitzgerald and A. Smith, proxied by F. Fitzgerald.

Panamint—W. C. Smith, proxied by F. Fitzgerald.

On motion, report adopted.

The Committee on Platform and Resolutions submitted the following, which was unanimously adopted:

Resolved, 1—That the Democratic party of Inyo county pledges its loyal and undivided support to Winfield S. Hancock and Wm. H. English for the offices of President and Vice President of the United States; that we recognize in them statesmen and patriots worthy of the confidence of the people.

2—That we assert that the nomination of Hancock and English augurs success for the Democratic party, and is a most fortunate event in the history of the country, as presaging a certain return to the pure principles and honest conduct of the Government as administerod by Washington, Jefferson and Jackson.

3—That the principles of Democracy as enunciated in the National and State platforms be and are hereby ratified and endorsed.

4—That this Convention, in its choice of candidates for county offices, should earnestly endeavor to select only such men as are known to possess the requisite qualifications, and of known integrity and ability.

In accordance with the order of business presented by the Committee, the Convention proceeded to the following nominations:

For Sheriff—Stephen G. Gregg, of Big Pine, nominated by acclamation.

For County Clerk—John Crough, of Lookout, nominated by acclamation.

For County Treasurer—A. N. Bell and Jas. E. Parker were placed in nomination.

Delegate Bourland moved that the vote be taken *vive voce*. Lost.

Upon balloting the vote stood: Bell, 13; Parker, 12. Mr. Bell's nomination was made unanimous.

For District Attorney—John W. P. Laird, of Bishop Creek, nominated by acclamation.

For Coronor—G. W. Brady, of Independence, nominated by acclamation.

For County Surveyor—John Alexander, of Lone Pine, nominated by acclamation. [Mr. Alexander has since notified the Central Committee of his positive refusal to accept the candidacy.]

SUPERVISORS.

After a short intermission, the Delegates from the different Supervisor Districts reported the following, which nominations were unanimously ratified by the Convention:

First District—J. L. Bourland submitted the following: *Resolved*, That we, the Delegates of the First Supervisor District, do cheerfully endorse Alexander Spencer, a member of the Republican party, as candidate for the office of Supervisor of said District, and make no nomination therefor.

Second District—E. Robinson, of Independence.

Third District — Wm. Walker, of Olancha.

JOINT CONVENTION.

The following Delegates were selected to represent Inyo in a joint nominating Convention with Mono county, to place in the field a joint Assemblyman, time and place to be arranged: J. L. Bourland, C. H. Parsons, S. P. Moffat, J. W. P. Laird, A. W. Eibeshutz.

COUNTY CENTRAL COMMITTEE.

Round Valley, D. Olds; Bishop Creek, P. W. Forbes; Big Pine, J. W. McMurry; Fish Springs, Jas. Jones; Independence, E. Robinson, J. W. P. Laird, S. P. Moffat, G. W. Brady, J. A. Lank, J. E. Parker; George's Creek, John Shepherd; Lone Pine, C. Meysan; Olancha, Edward Walker; Cerro Gordo, J. R. Hughes; Keeler City, J. H. Holt; Darwin, Martin Mee; Lookout, F. Fitzgerald; Panamint, W. C. Smith; Resting Springs, ——; Deep Springs, J. S. Broder.

Convention adjourned *sine die*.

At a subsequent meeting of the Central Committee, S. P. Moffat, Esq., was chosen Chairman and Jas. E. Parker Secretary.

REMOVED.—Dr. W. H. George has removed his office and drug store to the late residence of Harry Isaacs, nearly opposite the Pioneer Brewery, where he has cosy and elegant quarters.

LETTER FROM ROUND VALLEY.

MESSRS. EDITORS—In compliance with your request, seeking information respecting the OSBORNE SELF-BINDING HARVESTER, we are pleased to state that, after a thorough trial on some very rough ground, it is, in our opinion, a complete seccess. Mr. C. F. Roe, agent of the D. M. Osborne Co., accompanied by Mr Joel Smith, visited this valley some time ago, and expatiated eloquently (all agents are remarkably fluent), upon the advantages of the Binder —its special adaptability to this section—its simplicity, durability, etc. To refute the arguments couched in flowing words and nicely rounded sentences, of book, lightning-rod and machine agents, is too much for plain, honest farmers. Such an irresistible torrent of facts and figures is poured forth that you are compelled, at the time, to believe every word. Even the brilliant Mark Twain was once overwhelmed —captivated by a lightning rod agent —yielded—had his house top completely covered with them, and also gave orders to have some lightning rods put on the cow.

Recollecting these facts we were inclined to be prejudiced against agents —thought these binders were of the "new fangled" order. However, Mr. Roe offered such favorable inducements that remonstrance was impossible. Said he "I will demonstrate to you that the Binder is what I represent it to be; will stay here until its arrival; put it up in the field and run it to your entire satisfaction, or no sale." This was strong talk. Mr. Roe remained here thirty days (the machine had to be shipped from San Francisco) and set it up; started the machine, which cut and bound the grain satisfactorily. Before the machine arrived here considerable of our grain was cut, still the undersigned has cut and bound with this Osborne Binder about 150 acres of oats and wheat, which ought to be a sufficient test of its merits or demerits. We are highly pleased with its operations. Several practical farmers have witnessed its performance, Olds, Hiltons, Gunter, Wildassin, Shipley and others, all of whom pronounce it a success. Two gentlemen from Independence, Baxter and White Smith, were here lately scanning its operations. They pronounced it the "boss machine." Mr. B. did not regret having travelled 60 miles to see it work.

A description of this Self Binder is needless, as the Osborne catalogues are widely scattered over the land. Suffice it to say that we have run this machine over very rough ground cut up with deep irrigating furrows (will take more pains next year to have the ground smoother) without any breakages of either wood or iron. They are strongly built and nicely adjusted. The driver can, without leaving his seat or even stopping the team, adjust the reel, lengthen or shorten the binding table for long or short straw, raise or lower the cutting bar and also thread the needle, but the machine has to stop a moment for threading. The bundles can be made either large or small—20 inch bundle being the maximum. The binding apparatus is easily adjusted to bind the bundles tight as you please.

We find that three acres or more of bound grain can be hauled and stacked to one acre of loose grain. This machine has an eight-foot cut. From 16 to 20 acres per day (all bound) can be harvested.

Parties wishing information should consult Mr Joel Smith, Bishop Creek, who has this season sold quite a number of the Osborne mowers and reapers; but, probably this is the first and only Self Binder yet introduced either in Inyo or Mono.

SATURDAY, SEPTEMBER 25.....1880

SOME of the cigarittes which are smoked to so large an extent are said to be dangerous articles. One of them, being analyzed, was found to be strongly impregnated with opium, while the so-called rice-paper in which it was wrapped was ordinary paper whitened with arsenic. These poisons create in the smoker the habit of using opium without being aware of it, and its craving can only be satisfied by an incessant use of cigarittes.

THE United States Treasury Department has issued notices to the various Sub-Treasuries that the standard silver dollars will be sent, free of postage, in lots of $65, at the risk of the party to whom sent, and his risk for registration of ten cents, to be deducted at the Treasury.

THE ENGINEERING and MINING JOURNAL.

PUBLISHED WEEKLY.

DEVOTED TO

Mining, Metallurgy, Engineering and Science.

RICHARD P. ROTHWELL, C.E., M.E., ROSSITER W. RAYMOND, Ph.D., } Editors.
WILLIAM H. WAHL, Ph. D., Department of Progress in Science and the Arts.

IT IS AN ACCEPTED AUTHORITY ON ALL questions relating to the great mining industries of the country. It is the oldest publication of its class in America, thoroughly independent; being of the trade and not in it, occupies a just and impartial position, which enables it to advise and teach without fear or favor. It devotes much space to questions bearing upon economical management of mines, and from time to time illustrates the more important improvements in mining machinery and engineering methods. Special attention is given to reliable mining news from all parts of the country, which is gathered by an efficicient corps of correspondents in every section, and from an extended exchange list. The metal and ore markets, and gold, silver and miscellaneous stocks are reported and commented upon weekly by experienced financiers, who are unbiased by private interests, and upon these matters it is accepted as a reliable guide and unfailing instructor. Gives statistics of production of coal and iron, and of our great gold, silver and other mines. Its scientific notes are an epitome of the latest researches, its trade reports full, and its editorials sagacious and comprehensive. It enjoys the widest circulation and greatest influence of any journal of its class in the world; its patrons and readers comprising the most select and intelligent men in every quarter.

Subscription, $4 per year, in advance; 10c., single copy.

INYO COUNTY TRESPASS LAW

ADOPTED BY THE BOARD OF

Supervisors August 7, 1880.

It is hereby ordered by the Board of Supervisors of the County of Inyo, State of California, that the following law be and the same is hereby declared to be the Trespass Law of Inyo County:

SECTION 1. Any owner, or any occupant of any land or possessory claim, finding any horse, mare, colt, mule, jack, jenny, horned cattle, hogs, sheep or goats, or any number of such animals, upon such land or possessory claim, whether such land or claim be inclosed or not, may take up and safely keep such animal or animals at the expense of the owner or owners, and shall be allowed for keeping said animal or animals the following named sums: For each horse, mare, colt, mule, jack or jenny, the sum of twenty cents per day; for each head of horned cattle, the sum of twenty cents per day; and for each head of swine, sheep or goats, the sum of five cents per day.

SEC. 2. Any person taking up animals under the provisions of this Act shall, immediately upon the taking up of such animals, notify the owner or owners of such animals, or his, her, or their agent or agents, if known to him, and living within six miles of the place where such animals were taken up, of the time and place of such taking up, together with the number, character and description thereof; also, as nearly as he can, the marks and brands, if any, of each animal; and such owner or owners, his, her, or their agent or agents, may, at any time after the receipt of such notice, and upon proof of ownership, tender the amount of damages claimed, and demand the delivery into his, her, or their possession, of such animals; and if suit shall have been commenced, such tender may be to the Justice or Judge before whom such suit is brought, or the owner or owners may give bonds with sureties, to be approved by the Justice or Judge trying the case, for the payment of all damages and costs of suit, and be may demand the release and delivery into his or their possession, of all animals held under the action, and the Judge or Justice shall order the immediate delivery of such animals; but if no owner, owners or agents of owners appear within two days to claim said animals, or if he or they appear and fail to pay satisfactory damages, or if the owner is unknown to him or her, or lives more than six miles from the place of taking up, then if the compensation and damages claimed be less than three hundred dollars ($300), the taker up of such animals shall, within two days, file a written complaint, verified by his or her oath, with the nearest acting Justice of the Peace in the township where such animals were taken up; or if the amount of compensation and damages claimed be more than three hundred dollars, then in the Superior Court of said county, setting forth in said complaint the facts, nature, location, and amount of the damages claimed, and a description of all animals so takenup, the number, the marks and brands, if any, and the supposed value of each animal, or the supposed aggregate value of such animals, and the time and place of taking up. The action shall be in favor of the owner or owners, or occupants of said lands or possessory claims, and against the property in rem; and any action thus commenced, may include all the animals thus found trespassing at any one time, whether of one or more marks or brands; and no judgment shall be entered under the provisions of this Act for damages done, except upon the testimony of at least two credible witnesses, whose names shall be entered in the Justice's docket, or in the minutes of the Court in which the action is had.

SEC 3. Upon the filing of the complaint, a summons shall be issued, and if said action be in a Justice's Court, shall be made returnable not less than fifteen nor more than twenty days from the date of issuance, and directed to all owners and claimants of the property described, and shall contain a description of each animal, with its marks and brands, if any. The summons shall be served by posting a copy of the same at the door of the room where said Justice or Superior Court is held, for ten days before the return day thereof, and also at the same time by filing a copy of such summons with the Recorder of said county; but the Recorder shall not file the copy of summons until the payment of a fee of one dollar; and it shall be the duty of said Recorder, on payment of his fee of one dollar, to forthwith compare the marks and brands, if any, described in said summons, with the record of marks and brands in his office, and thereupon to notify the owner or owners of such marks and brands of the fact of the pendency of such action, and of the time and Court when and where the same is set for hearing. The certificate of the officer stating the facts of such posting and filing, or the affidavit of any person, competent to be a witness, who shall have so posted and filed, shall be conclusive evidence of a sufficient service thereof; *provided*, that in any case when any animal or animals, seized under this Act, are alleged in said complaint to be worth fifty dollars or more, it shall be the duty of the County Recorder to cause publication to be made of the fact and time of seizure, and marks and brands, with a description of the animal or animals, in a newspaper of the county, at least ten days before the sale, the newspaper in which all such notices are to be made to be designated, and the rates of publication to be fixed, by the Board of Supervisors of the county.

SEC. 4. If the judgment be in favor of the plaintiff, the property may be levied upon and sold as other personal property seized on execution. The officer selling shall give a bill of sale to the purchaser, describing the animal or animals sold, and to whom, and the price paid for each, and referring to the judgment under which such sale was made. Any overplus of the proceeds of such sale, after satisfying the judgment and costs, shall be paid by the Justice or Clerk to the owner of the property, upon demand, if demanded within six months from the date of sale; and if not so demanded, the same shall, at the expiration of said time, be paid into the County Treasury, for the benefit of the County School Fund; and the owner may also redeem any animal or animals sold under the provisions of this Act at any time within sixty days after the sale, by producing satisfactory proof of ownership, and paying the purchaser the amount of purchase money in gold coin, with interest at the rate of two per cent per month; but if no redemption be made within sixty days such bill of sale shall be conclusive evidence of title in favor of the purchaser of the animal or animals therein described.

SEC. 5. The fees of all officers for service required under this Act shall be the same as now allowed by law for similar services in other civil actions, and shall be taxed as costs in the judgment.

SEC. 6. The Justice and Clerk shall keep a book, which shall be open to public inspection, and shall record therein all sales made pursuant to any judgment rendered in their respective Courts under the provisions of this Act, which record shall contain a description of the animals sold, the prices paid, the name of the purchaser, the amount of fees and charges, and the amount of surplus money, if any, arising from each sale, and whether any animal or animals have been redeemed; and if such surplus money shall be received by the owner of any animal, he shall receipt for it in the margin opposite such record, and the Justice or Clerk shall, without fee, deliver such book to his successor in office, and also all surplus money in his hands arising from any sale made by authority of this Act, taking his receipt therefor.

SEC. 7. Any person who shall drive stock from any lands or possessory claim other than his own, to any other lands or possessory claim, or shall take up any such animal or animals on any land or possessory claim other than his own, for the purpose of taking advantage of any of the provisions of this Act, shall be deemed guilty of a felony; and any person who shall fail or neglect to give the notice required by the second section of this Act, or shall rescue or take from the possession of the taker-up any animal or animals, without first having paid the compensation, fees, and damage claimed or awarded, and any officer violating any of the provisions of this Act, shall be deemed guilty of a misdemeanor.

SEC. 8. The owner or occupant of any land or possessory claim, whether inclosed or not, independent of the foregoing provisions of this Act, and if he fail to avail himself there f, may maintain an action; *provided*, such action be commenced within sixty (60) days in any court of competent jurisdiction, against the owner of, or person having the control of, any of the animals named in section one, for any damages such animals may commit upon his said land or claim; and if judgment be rendered in his favor, it shall be entered for the amount of the actual damage proved.

SEC. 9. Nothing in this Act shall be so construed as to prevent the free use for grazing purposes of all unoccupied lands not taxed; *provided*, that each actual settler, who shall have a prima facie title to the land upon which he is settled, shall be protected in the possession of one hundred and sixty acres, and residence on the land shall be considered a prima facie title; *and, provided further*, that said one hundred and sixty acres shall be marked and defined by visible and well defined monuments.

Approved and adopted this Seventh day of August, A. D. 1880, and ordered that the same be published in THE INYO INDEPENDENT for four successive weeks.

J. R. WESTERVILLE,
Chairman of the Board of Supervisors.

Attest: JOHN CROUGH, Clerk.
n530t4

PROPOSALS

....FOR ...

Publishing and Printing.

NOTICE IS HEREBY GIVEN THAT sealed proposals will be received by the Board of Supervisors of the County of Inyo, State of California, at the office of the County Clerk, up to the hour of 12 o'clock M. on MONDAY, the FOURTH day of OCTOBER, A. D. 1880, to contract for county printing, as follows:

1. Advertising, such as is required by law and shall be ordered by said Board, including Notices for Proposals to Contract, Reports of Auditor and Treasurer, Proceedings of the Board of Supervisors, and the annual List of Delinquent Taxes. Said proposals shall submit to the board the rate which will be charged per square of two hundred and fifty ems space for the first and each subsequent weekly publication.

2. The printing of two hundred and fifty copies of the Great Register of Inyo County, in the usual form, bound in paper. Bids must specify the price of such printing per name of each elector. Printed matter to be delivered at the Court House of said county.

Said contracts to continue for the term of one year from and after ratification.

Payment for such advertising and printing shall be made on bills duly sworn to and presented at the regular meetings of the Board, by warrants drawn upon the General Expense Fund.

The right to reject any and all bids is reserved.

Said proposals must be indorsed "Proposals for Advertising," and "Proposals for County Printing," and addressed to the Clerk of the Board of Supervisors, Inyo County. The same will be opened between the hours of 1 and 4 o'clock P. M., on said Fourth day of October, 1880.

By order of the Board of Supervisors.

JOHN CROUGH, Clerk.

MINING.

MINING APPLICATION NO 180,

....TO THE....

VENTURA MINE.

U. S. LAND OFFICE,
Bodie, California, September 8, 1880.

NOTICE IS HEREBY GIVEN THAT Thomas Henning and John T. Belshaw, whose postoffice address is Cerro Gordo, Inyo County, California, have this day filed their application for a patent for fifteen hundred linear feet of the VENTURA mine or vein, bearing silver, lead, etc., with surface ground six hundred feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 52, in Township Sixteen South, Range Thirty-eight East, of Mount Diablo Meridian. Said Lot No. 52 being described as follows, to-wit:

Beginning at a post on the south end of lode near the middle of Cerro Gordo cañon. Said post is 4 ft high x 4 in. square, set in a mound of earth and rock 3 ft high x 4½ ft dia at base; marked the post on its N side "P. A. V. M.," from which the middle of the añon bears north 0 30 chs. The entrance to the New Enterprise tunnel bears south 18 deg east 1 21 chains. A quartz reef 4 ft high x 6 feet long bears south 18½ deg west 0.86 chs. Thence, var. 15 deg 40 min E., 1—north 4 deg west 2.73 on the supposed line of the lode, rock in place not appearing on the surface, to gulch bears southwest. Commence ascending at an angle of 26 deg. 3 94 center of road locally known as the Citizens' Grade runs east and west 8.90 open cut on the vein, cut 0.30 chs long, 9 30 upper crossing of Citizens' Grade runs southwest and northeast from which a shaft sunk in ferrugenous quartz croppings to a depth of 25 feet bears south 80 deg east 0 90 chs. 12.12 shaft 6 ft deep on the lode containing lead ores. 18.18 summit of slope 21.21 brow of hill commence descending to north 22.72 post in mound of rock and earth 4 ft dia. at base by 3 ft high marked the post "P. B. V. M." from which a slate ridge extending northwest down the mountain and being elevated from 1 to 2 feet above the surrounding rock bears north 60 deg east 0 12 chs. A ferrugenous quartz vein 0 16 chs high by 0 06 chs thick and 55 feet lower than P. B. V. M having a north and south strike bears north 27½ deg west 1.37 chs to its topmost pinnacle. A pine bush 5 in. in dia. bears north 88 deg west 0.53 chains.

CONNECTING LINE.

From post "P. 1 V. M." the cor. to Sec. 3 and 4 on 4th standard line south T. 17 S., R. 38 E., M. D. M., bears by calculation south 27 deg 24 min 41 sec west 421.48 chs distant.

SURVEY OF EXTERIOR BOUNDARIES.

Commencing at post "P. A. V. M," as described in the survey of lode. Thence, var 15 deg 40 min east, 1—north 71 deg east 2 10 ascending bottom of cañon to forks of road the junction of "Belshaw toll road" and the Citizens' grade 4.70 post 4 ft high in mound of earth 3 ft high by 5 ft dia. situated in gulch running southwest; marked the post "P 1 V M," from which the middle of Belshaw's toll road bears south 1 50 chs; post in mound of earth marking the northwest cor of the New Enterprise mine bears north 71 deg east 0 13 chs. Thence, var 15 deg 40 min east, 2—north 40 deg west 2 04 ascending to gulch bears southwest 6.85 crossing of a trail running east and west 7.83 center of Citizens' grade, road runs east and west 19.54 steep ascent 26 deg to summit of ridge of slate, bears east and west descending to west 19 60 commence descending to north 24 deg 22.72 post 4 feet high built in mound of rock on steep side hill 41 deg; marked the post "P 2 V M," from which a nut pine 10 in. dia bears north 20 deg west 0.33 chs. Pine stump 12 in. dia bears north 40 deg east 0 60 chs. A slate ridge running north and south bears north 80 deg east 0 52 chs. Thence, var 15 deg 40 min east, 3 south 71 deg west 3.33 descending mountain diagonally to an old prospecting cut and shaft situated on a vein of white ferrugenous quartz from 12 to 15 inches thick striking northwest and southeast 4.69 post "P B, V M," described in survey of lode, 9 40 post in rock mound on steep side of mountain sloping west; marked the post "P 3, V M," from which a pine stump 12 in. dia bears north 10 deg west 0.33 chains; limestone reef running northwest down the mountain bears 70 deg east 0 26 chs. The mountain at this place slopes northwest at an angle of 29 deg. Thence, var 15 deg 40 min east, 4—south 4 deg east 6 97 slightly ascending to gulch bears west 7.12, tunnel running east on a vein of ironstone 7 15 vein of iron 4 ft thick bears north 70 deg east 9.10. Trail runs east and west 10 84 summit of ridge bears southwest commence descending, 12.50 road Citizens grade runs east and west 16 44 lower crossing of road runs northwest and southeast 21 51 Belshaw's toll road in middle of cañon, 22.72 post on south side of cañon 9.19 chs, higher than bottom of cañon built a mound of rocks around post and marked post "P 4, V M," from which the top of a slate reef situated above a short tunnel 6 ft long running south on a copper-stained seam 2 in. thick bears north 50½ deg east 0 13 chs. A ridge of slate running down the mountain northwest bears south 38 deg west 0.06 chs. Thence, var 15 deg 40 min east, 5—north 71 deg east 4.70 ascending cañon to place of beginning. Containing 20 63-100 acres.

Magnetic variation 15 deg 40 min E., containing 20 63 100 acres.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District in Book —— of ——. The adjoining claimants are New Enterprise.

Any and all persons claiming adversely any portion of said Ventura mine or surface ground are required to file their adverse claims with the R gister of the United States Land Office at Bodie, State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

JAMES E. GOODALL, R gister.

MINING APPLICATION NO. 181,

...TO THE....

NEW ENTERPRISE MINE.

U. S. LAND OFFICE,
Bodie, California, September 8, 1880.

NOTICE IS HEREBY GIVEN THAT Thomas Henning, whose postoffice address is Cerro Gordo, Inyo County, California, has this day filed his application for a patent for fifteen hundred linear feet of the NEW ENTERPRISE Mine or vein bearing silver, gold, etc., with surface ground six hundred (600) feet in width, situated in Cerro Gordo Mining District, County of Inyo and State of California, and designated by the field notes and official plat on file in this office as Lot No. 39, in Township 16 South, Range 38 East, Mount Diablo Meridian. Said Lot No. 39 being described as follows, to-wit:

Beginning at a post set in mound of earth on northwest end of line of lode; marked the post "Post 7, New Enterprise mine;" said post is marked on its north side "Post 4 Ventura Mine," being situated on south end of lode of said Ventura mine. From which var 15 deg 50 min E., the middle of Cerro Gordo cañon bears north 30 chs; the entrance to the New Enterprise tunnel, course of tunnel south 35 deg east, 135 ft long, bears south 18 deg east, 1 21 chs; a quartz reef 4 ft high bears south 18½ deg west 86 chs. Thence, with a var 15 deg 50 min east, south 38 deg 30 min east 1.21; quartz vein alongside New Enterprise tunnel—commencing ascending 14.74 summit of ridge bears west 20 30; gulch bears southwest 22 72; post 4 ft high x4 in. dia set in mound of earth marking southeast end of line of lode; marked the post "Post 4, New Enterprise mine," from which a pine stump 8 in. in dia by 10 in. high bears north 43¼ deg east 33 chs; a pine tree 6 in. dia by 4 ft high bears north 27 deg east 27 chs.

SURVEY OF EXTERIOR BOUNDARIES.

Commenced at post marked "Post 1, New Enterprise mine," standing in a gulch on north cor. of claim, from which a post marking the southeast cor of the Ventura mine bears south 71 deg west 11 chs. Thence, with var 15 deg 50 min east, 1—south 38 deg 30 min east 3 18, crossing of road in cañon; commence ascending: 18.71 summit of ridge bears west 20.82 "Post 2 New Enterprise mine," marking the point of junction of the New Enterprise, Silver Wedge and Armagh mines, from which the "Armagh U. S. Mineral Monument" bears by calculation north 36 deg 52 min east 14 21 chs. From "Post 2, New Enterprise mine" a pine stump 8 in. in dia bears north 23 deg east 30 chs. A pine tree 4 ft high bears north 71 deg east 62 chs; a pine tree 6½ ft high bears south 50 deg 14 min west 57 chs. Thence, with a var 15 deg 55 min east, 2—south 11 deg east 1.82; descending, "Post 3 New Enterprise mine," on the west boundary line of the Armagh mine, from which "Post 5 Armagh mine" bears south 11 deg east 1 21 chs. Thence, with a var 15 deg 50 min east, 3—south 71 deg west 3 94 "Post 4 New Enterprise mine," on southeast end of line of lode; commence descending; 8.75 "Post 5 New Enterprise mine" on south corner of claim; said post is 4½ ft high x5½ in in dia and is set in a mound of rocks and earth 2½ ft high, from which a pine stump 11 in. high x15 in. in dia bears north 38 deg 1 min east 33 chs; an old prospecting hole 5 ft deep x4 ft square bears south 82 deg east 51 chs. Thence, with a var 15 deg 50 min east, 4—north 38 deg 30 min west 1 15; descending into gulch, commence ascending 4 32; ridge bears southwest; 12 80 main ridge of mountain bears west, commence descending; 22 72 "Post 6 N E mine" on steep rocky side hill; post set in a hole in the rock, from which an old prospecting cut 11 ft long x4½ ft wide from its face bears north 50 deg east 29 chs. "Post 4 Ventura mine" bears north 71 deg east .11 chs. Thence, with a var 15 deg 50 min east, 5—north 71 deg east 11 "Post 4 Ventura mine;" 4 81 "Post 7 New Enterprise mine" and Post of Ventura mine; 6 92 road, Citizens' grade; 9 52 "Post 1 Ventura mine;" 9 63 "Post 1 New Enterprise mine," place of beginning, containing 20 55-100 acres.

SURVEY OF CONNECTING LINE.

Commenced at "Post 2 New Enterprise mine." Thence, var 15 deg 55 min east, south 11 deg east 3.03 "Post 5 Armagh mine;" north 79 deg east 10 60 point on W B. line of the Ygnacio mine; north 11 deg west 12 59 to "U S. Mineral Monument," which when computed gives for a direct closing line from "Post 2 New Enterprise mine" "Armagh U S. Mineral Monument" north 36 deg 52 min east 14 21 chs.

DESCRIPTION OF THE ARMAGH U. S. MINERAL MONUMENT:

Said Mineral Monument as described in the field notes of survey of the Armagh mine is built on the apex of a red rocky point at the intersection of Ygnacio Ravine and Cerro Gordo Cañon and very precisely on the west boundary line of, and distant 17.51 chains from the southwest corner stake of the Ygnacio mine, as patented. At this point caused a hole to be drilled in the rock to a depth of 9 inches in which drove a piece of gas pipe 1 inch in diameter by 16 inches long. On top of gas pipe set a post 4x4 inches square by 4 feet long, around which built a monument of rocks 5 feet high by 5 feet in diameter at its base. Marked the top of the post "U S. Mineral Monument. Erected January 3d, 1880, by Wm. Crapo, U. S. Deputy Mineral Surveyor, under authority of the U S. Surveyor General for California." From said post in Mineral Monument, with a variation 15 deg 55 min E. the extreme end of the rocky bluff in which the Mineral Monument is situated bears N 25 deg W 17 links. The east edge of ridge at the top of a vertical face 7½ feet high bears N 60 deg E .07 links. The northeast corner of an old adobe vaso chimney, a Mexican furnace for smelting silver and lead ores, bears S 38 deg 16 min W 16 links. The middle of the Belshaw toll road at a point where it turns out of Cerro Gordo Cañon bears N 81¼ deg W 1 06 chains. The middle of Cerro Gordo Cañon bears N 62 links. The northwest corner of Rafael Diaz' house bears S 38 deg 23 min E 1.58 chains. An old well 10 feet deep on north side of cañon bears N 58 deg 20 min W 1 93 chains.

Magnetic variation 15 deg 50 min east, containing 20 55 100 acres.

The location of this mine is recorded in the Recorder's office of Cerro Gordo Mining District, in Book —— of ——. The adjoining claimants are the Ventura and Armagh mines.

Any and all persons claiming adversely any portion of said New Enterprise mine or surface ground are required to file their adverse claims with the Register of the United States Land Office at Bodie, in the State of California, during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the Statute.

Allgemeine Deutsche Unterstuetzungs Gesellschaft.

[German General Benevolent Society.]

SAN FRANCISCO, August 28 1880.

Messrs. Harris & Rhine, Independence, Cal.:

DEAR SIRS—The undersigned, President of the German Benevolent Society, begs leave to call your attention to this truly benevolent institution, founded in the early days of California, and being now in the 27th year of its existence. The Society was formed to carry out three objects viz.: to assist poor and worthy or deserving people by support, to find employment for those out of work, and to cure those who are stricken down with sickness. For the latter purpose the Society owns a magnificent Hospital, surrounded by extensive grounds, where all patients are under the charge of excellent physicians and a consulting board of the most eminent medical talent of this city. The Society has expended for hospital and grounds the sum of $188,895.

The object of this communication is to propose to you to act as agent for this society, either personally or through one of your employees, suited for such position, for the purpose of enlisting new members.

The monthly fee is only one dollar and the initiation fee on becoming a member two dollars. Only healthy persons can become members, and only Germans or those who speak that language also their wives and children. Any member who meets with sickness is treated in the hospital without any expense to him until he has been restored to health. All persons who are not members, or can not become such, not speaking the German language, are admitted for medical treatment in the hospital at as low terms as it is possible to make them.

In this city we have about 3,000 members, but throughout the interior only about 300. It is our aim to increase the number of members throughout the State to make the hospital as much as possible self-sustaining, to enable us to extend the charitable department in this benevolent institution. For the trifling sum of one dollar per month members have the best aid and care in the German Hospital.

Frequently sick people in the country are crippled for life by false treatment from incompetent doctors, or even brought to a premature death. Only too late do they find out that if they had become members they would have been restored to health, and their earnings of years would not have gone into the pockets of inexperienced doctors, as the hospital employs only the best physicians. If there are no earnings, the employers and the friends of the sick are generally called upon to pay for his support. All this can be avoided, if the employers would vigorously enforce the rule, now introduced in most of San Francisco's establishments, that every man employed should belong to a relief society in order that in case of sickness he might be well cared for and not be reduced to the rather humiliating necessity of asking aid from the purses of his employer and his friends.

Persons of all nations of the age of 50 years or over are admitted as pensioners for life by paying a certain sum to be agreed upon to the society. They receive a home at the hospital, first-class board, washing and attendance in in case of sickness, free of any expense.

To enable Germans and others who do not know of the existence of this institution, neither of the hospital nor its great advantages, to become members, I have addressed you the above, and hope that you will cheerfully accept the agency and do all in your power to further the interests of this society by enlisting new members, and recommending our hospital to those who may be compelled to seek medical aid.

Your Obedient Servant,

JULIUS BANDMANN,
President G. G. B. S.

THE PIONEERS.—A SONG.

AIR—"AULD LANG SYNE."

A noble and veteran band
Of brothers, good and true,
Who left their homes in every land
Their fortunes to pursue,

By digging gold with pick and drill,
And fluming rivers wide,
Or running tunnels in the hill
Along the mountain side.

They braved the perils of the sea,
And hardships of the plains;
But little thought how long 'twould be
That they should here remain.

The years rolled on, the fickle Dame
Of Fortune smiled on few.
While hard they strove for gold or fame
Where all was strange and new.

Here, to the Eastern Slope, they came
These fearless Pioneers,
Turning the sands to golden grain—
Indians subdued by fears

Of weapons they were made to feel
Ere they were taught to know
To tillers of the soil must yield
Those who don't reap and sow.

The desert, like a garden fair,
With plenty made to smile,
With cooling streams and mountain air
They feign would stay awhile,

And beautify their valley homes
With things of living growth.
Now many lovely flowers adorn
This barren waste of earth.

One by one has this brave band,
Who once stood side by side,
Helping to free this favored land,
Since gone away or died.

A few remain among us here—
All honor to their names—
Forever be their memory dear,
And sacred their remains!

L. H.

How Railway Time Is Kept.

There are in use between this city and New York 13 electric clocks, two of the number being placed in the waiting rooms and one in the dispatcher's office at the Grand Central depot, New York. The time on the clock in the depot at East Albany corresponds exactly with the time in New York. Each one of the clocks is connected with the General Superintendent's office in New York, in which the railroad time is kept on what is called the "big clock." Conductors, train men and others are compelled to keep their watches in strict conformity with the Superintendent's clock. It is set by standard time, and connected with the time service department of the gold and stock telegraph. The time is distributed over the line each week day as follows: At 10 o'clock 58 minutes, 3 seconds A. M., the word "time" is sent by the main office to the telegraph stations between New York and Albany. This word is repeated for 28 seconds, during which operators must see that their instruments are adjusted. At 10 o'clock and 50 seconds, seconds commence beating and continue for 50 seconds. The word "switch" is then sent over the wire, and operators having electric clocks connect them immediately with the circuit known as No. 9 wire. Ten seconds are allowed in which to make the connection. At 11 A. M., with one touch of the New York key, the hands on the different clocks are set to 11 o'clock. If they are fast or slow they change all at once to the hour named.—*Albany Argus.*

TO BE EXTENDED.—Work on the C. & C. Railroad will not stop at Candelaria, as generally expected, but is to continue without interruption at least to Silver Peak, one hundred miles further south, and it is not by any means improbable that it will not stop till it reaches the Colorado.—*Esmeralda Herald.*

A. B. PAUL, connected with the Mineralogical Department of the Census, is making a thorough tour of the mines of Idaho.

The New Bible.

Queen Victoria has authorized the printing of a new version of the Bible, and the Queen's printer, the only person authorized in England to print Bibles, has just affixed his signature to the last proof sheet. This version is to supercede the King James' version which was given to the world three centuries ago. A correspondent of the Chicago *Times* says that this new edition will shock the Protestant world on account of its many omissions and bold changes. The first noticeable change is the departure from the old method of dividing the narrative into chapters and verses. Each book of the new Bible reads continuously. In many places old familiar passages are taken out altogether, and pains has been taken throughout the new version to discard obsolete words and supplant them with more modern phrases. For instance, the words, "the quick and the dead," are rendered into "the living and dead." Many will hold that the hand of modern sacrilege has been laid upon this cherished volume, but those who reflect a moment will admit the fact that when King James ordered a revision of the Bible, the learned men who carried out his design made no more violent changes than those which mark the Victoria version. It is a fact perhaps not generally known that there are several American and English versions of the Bible which materially differ, and there is at this time no regular standard version. The present version of the Bible is based upon a very few modern manuscripts, not exceeding five in number. The new version is made from careful comparison of over twelve hundred, ninety-eight being ancient—from the fourth to the tenth century. In addition, all quotations by the patristic and early writers have been collected, and the early translations into Syric, Latin, Gothic, Egyptian, Celtic, Arabic and Slavonic. Three centuries ago the translators of King James had few aids and little material for the work. These of Victoria have the accumulated treasure of ten thousand able workers, and storehouses filled with material. It will not be long before the new version will be distributed over the country and placed within the reach of everybody. Many will purchase from curiosity, the majority will accept it as bearing the stamp of authority from the English Church, and not a few will be bigoted enough to refuse to read it, looking at it in the light of an infidel innovation and not the "real Bible" at all.

"Beware of Dolls."

In his address, "From the Anvil to the Pulpit," before the students at Eastman's Business College last evening, Robert Collyer said it is "a great thing for a man to be well born," and, describing his father as a brawn and his mother as a blonde, both of remarkable health, he spoke of the latter as "a woman of such faculty—though she could hardly read and write—that I believe that if she had been ordered to take charge of a seventy-gun ship and to carry it through a battle, give her time to learn the ropes and she would do it." It is evident that Mr. Collyer attributes much of what he has become to his mother, who he says was "beyond all question the better half in those finer powers on which the children have to draw for their chance in life." It is noteworthy that almost every man who attains distinction attributes much of his success to what he inherited from his mother. Like Napoleon, all great men have great mothers, and Mr. Collyers, allusion to the "dolls" of modern society in contrast with his strong, healthy, sensible mother, should produce a deep impression upon the minds of the women of America. A woman cannot change her inherited faculties, but she can develop that superb health which Mr. Collyer considers the prime condition of his mother's strength of character. Nowhere else in the civilized world is there such a disregard for health among women as in the United States. Unwholesome food and want of daily out-door exercise, such as English women of the higher class invariably take, change the rosy-cheeked girl into a feeble woman, and one of the greatest obstacles to our national progress is the poor health of American women. Mr. Collyer's injunction to the young men at Poughkeepsie was, "Beware of dolls!" There is abundant reason for the majority of American women to beware of becoming mere dolls.

IT is stated that a prominent citizen of Galveston was brought home very late in a comatose condition. His terrified wife, thinking it was apoplexy, sent for the family physician. The doctor examined the patient carefully and then directed that the clergyman be sent for. In a few minutes the spiritual adviser was bending over the couch of the dying man. Finally the clergyman said: "Why he is drunk! that's what's the matter. Why am I sent for here at 12 o'clock at night?" "Do you suppose," replied the doctor, "that I am going to be the only fool on Galveston Island?" That's the story they tell.

THE wedding of Miss Easton, neice of Mr. D. O. Mills, and Mr. C. F. Crocker, vice-president of the Southern Pacific Railway, was a pretty and picturesque one. It took place at Millbrae, the California country-seat of Mr. Mills, and a special train of five drawing-room cars conveyed a crowd of guests in full dress from San Francisco to Millbrae Station. Mr. Charles Crocker, the father of the young husband, gave him a wedding present of a handsome residence in San Francisco, while Mr. Mills presented to his neice a costly country house at Menlo.

THOSE GOLD-BEARING SPRINGS.

Some Curious Information Furnished by Mark Twain.

Mark Twain writes as follows to the New York *Evening Post:* "I have just seen your dispatch from San Francisco, in Saturday's *Evening Post*, about 'Gold in Solution' in the Calistoga Springs, and about the proprietor's having 'extracted $1,060 in gold of the utmost fineness from 10 barrels of water during the past fortnight by a process known only to himself. This will surprise many of your readers, but it does not surprise me, for I once owned those springs myself. What does surprise, me, however, is the falling off in the richness of the water. In my time the yield was $1 a dipperful. I am not saying this to injure the property in case a sale is contemplated; I am only saying it in the interest of history. It may be that this hotel proprietor's process is an inferior one—yes, that may be the fault. Mine was to take my uncle—I had an extra uncle at that time, on account of his parents dying and leaving him on my hands—and fill him up, and let him stand fifteen minutes to give the water a chance to settle well, then insert him in an exhausted receiver, which had the effect of sucking the gold out through his pores. I have taken more than $11,090 out of that old man in a day and a half. I should have held on to those springs but for the badness of the roads and the difficulty of getting the gold to market. I consider that gold-yielding water is, in many respects, remarkable, and yet not more remarkable than the gold-bearing air of Catgut canyon, up there, toward the head of the auriferous range. This air—or this wind, for it is a kind of tradewind which blows steadily down through six hundred miles of rich quartz croppings during an hour and a quarter every day except Sundays—is heavily charged with exquisitely fine and impalpable gold. Nothing precipitates and solidifies this gold so readily as contact with human flesh heated by passion. The time that William Abrahams was disappointed in love he used to step out doors when the wind was blowing, and come again and begin to sigh, and his brother, Andover J., would extract over a dollar and a half out of every sigh he sighed right along.

"And the time that John Harbison and Aleck Norton quarreled about Harbison's dog, they stood there swearing at each other all they knew how—and what they didn't know about swearing they couldn't learn from you and me, not by a good deal—and at the end of every three or four minutes they had to stop and make a dividend; if they didn't their jaws would clog up so that they couldn't get the big nine-syllabled ones out at all; and when the wind was done blowing they cleaned up just a little over $1,600 apiece. I know these facts to be absolutely true, because I got them from a man whose mother I knew personally. I do not suppose a person could buy a water privilege at Calistoga now at any price, but several locations along the Catgut Canyon Gold-bearing Tradewind are for sale. They are going to be stocked for the New York market. They will sell, too; the people will swarm for them as thick as Hancock veterans in the South."

A British ship was wrecked on the California coast last week with 1800 tons of rails consigned to the Carson and Colorado Railroad Company. It was supposed that the disaster would delay the completion of the railroad to Candelaria. Superintendent Yerrington, however, informs the Carson *Times* that the wrecked rails were intended for a railroad in Oregon. The rails for the Bodie extension are coming from Oregon, a company there having a lot on hand which they have sold to the C. & C. Co. Mr. Yerrington states that the Carson and Colorado will have its trains at the south end of Walker Lake early in December.

SOLDERING LIQUIDS.—The *American Manufacturer* of July 23, 1880, gives the following recipe for soldering liquid: "Dissolve scrap zinc in hydrochloric acid in excess by means of heat, neutralize the free acid with water of ammonia, and dilute with an equal bulk of water." In practice the following has been found as good as the above and easier to prepare: Dissolve chloride of zinc in about twice its bulk of water for iron and steel articles. For copper, brass, etc., it may be diluted to four or five times its volume. The chloride may be had of any wholesale druggist for about ten cents per ounce.

ALREADY many persons are making arrangements to go to the new town near the head of Walker Lake, where the Carson and Colorado railroad will make its station, and from which point the Bodie wagon road will start. The dull times on the Comstock will cause many of its people to take up their residence there, and several people from other parts of the State are already talking of trying their luck at the new town.—*Candelaria True Fissure.*

WE are informed by a gentleman who is in a position to know, that the building of the Nevada Southern Railway, to connect with the Nevada Central six miles from this city, has been decided on, but the exact time of commencing operations is not yet fully determined. The route over which the road is to be built between here and Cloverdale, seventy or eighty miles wes, is being considered.—*Austin Reveille*

A SHEET of paper dipped in chloride of cobalt, when the weather is to be dry and pleasant will become blue; when wet weather approaches it will become pink. The barometer flowers of France are thus manufactured.

HOTELS.

THE BLANEY HOUSE,
Independence, - Cal.,
V. G. THOMPSON, Prop'r.

THE PROPRIETOR OF THE "BLANEY" respectfully announces to his friends and the traveling public that the house will be conducted as a

CHALFANT & PARKER.

J. E. PARKER. P. A. CHALFANT.

INDEPENDENCE, CAL.:

SATURDAY, OCTOBER 2 1880

THE Rocky Mountain *Mining Review* in a recent number contains a very sensible article on extravagance and waste in mining camps in which it says: "It is necessary now in order to ensure success that mining should be carried on in as systematic manner as any other business; but it is a well known fact tha it is not every one that is conversant with mining that know well of the thousand and one things which bring the net results down far below what they should be, We have not space to print, neither do we care to speak of the many serious wastes caused by negligence or ignorance on the part of superintendents and managers. Several years since with great flourish of trumpets an English company came here and invested heavily in the mines at Hall's Gulch. Fine tramways and elegant houses were built, grounds were laid out that would have been a credit to a Rothschild, but the treasury was at last emptied and the stockholders refused to come down with more capital. Work was shut down, and to-day Hall's Gulch is not one-tenth as well known and not producing one-hundredth of the amount of ore it would have been had the work been properly done. Recently a gentleman leased one of the dumps of a mine in that gulch and has been digging out the ore and shipping it, and after he has paid all expenses of working, shipping and milling the ore he makes over $50 per ton as net profit. From the dump of one of the best known if not one of the best mines in Leadville, a gentleman who was passing picked a piece of ore at random which ran over $200 per ton. We do not expect that mill runs would come to that amount, but we do believe that thousands of tons of good mill ore are thrown on the mine dumps of Colorado as waste."

A CLERGYMAN at Nahant one hot afternoon during the Summer, was attacked while preaching for a brother minister, by a severe bleeding at the nose. He endeavored to stanch the blood, but after saturating his own handkerchief and that of one of the congregation which was passed up to him he was forced to retire. The pastor of the church, a very absent-minded man, rose solemnly, and remarked, "While our brother is absent let us sing a hymn. Will the choir lead in singing 'There is a fountain filled with blood.' "

THE struggle over the United States Senatorship in Nevada promises to be more than usually interesting. Senator Sharon is the Republican candidate, and Colonel James G. Fair, a member of the Bonanza firm, the Democratic. The indications are that coin is likely to circulate more freely among the sagebrushers this Fall than for some time past, for in that State it is generally the longest purse that knocks the persimmons.

CHILDREN, it seems, are imported directly from Italy and sent into the streets of New York to make a profitable business of begging. The choicest importations of this class are blind, lame and deformed children. One enterprising manager has sent several beggars to Saratoga to test the market there. These incidents illustrate the folly of indiscriminate charity.

A SERIOUS interruption of diplomatic relations has occurred between France and the Vatican. The estrangement has arisen out of the clerical policy of the French Government, especially towards the Jesuits. Matters are said to have gone so far that the French representative of the Vatican has been practically recalled, while the Nuncio at Paris has demanded his papers.

FARMER STOUFFER of Chambersburg, Pa., shot and killed a neighbor who was stealing his corn and potatoes. Stouffer was indicted for murder, but has been acquitted. Pennsylvania has no law authorizing anybody to shoot a thief; but in this case the prosecution was purposely weak, and the jury agreed without quitting their seats.

Two of the special agents sent to South Carolina to investigate the alleged census frauds have returned and are now preparing their report to Gen. Walker. The nature of the report it is impossible to learn, as the General forbids any intimation of it to be given out until completed and submitted to the Secretary of the Interior.

THE London and San Francisco Bank will reduce its capital from 600,000 to 420,000 pounds sterling. The cause is that it cannot find employment for its money.

THE next States to hold elections are the following: Colorado, October 5th; Georgia, October 6th; Indiana, Ohio, and West Virginia, October 12th.

MINING "EXPERTS."

There are on the Pacific coast quite a large number of so called "mining experts" and "rock sharps," but who are knaves and humbugs—without principle or honesty—without knowledge or experience in mining. These fellows are generally good, plausible talkers, and have any amount of cheek and assurance. They worm themselves into the confidence of the honest and unsuspecting capitalist who contemplates investing in mines; they are sent out to examine and report. In many cases the report is favorable; money is invested and after practical working of the mine, it proves to be worthless, and the investor comes to grief through the ignorance of the expert. During the past two years some of these Pacific Coast expert-humbugs, finding themselves too well known in California and Nevada, and scenting new dupes in New York and other Eastern cities, have "lit out" for the Atlantic Coast. We have lately had one of these "squirts" in Inyo County, sent out from New York to examine and report on a number of mines and prospects located at Chrysopolis, near Independence. This gentleman from "Cornwall," for sublimity of cheek, unblushing assurance, huge conceit, and pig-headed ignorance, surpasses anything heretofore seen in Inyo County. His investigations at Chrysopolis were a perfect farce, and he made himself an object of contempt and derision to the miners working under his instructions; persisting in drifting away from a ledge in order to prospect it, refusing to take any samples whatever from the ore vein, and assaying barren rock taken from thirty to fifty feet distant from the ledge; he remarked that "there was nothing in it;" that he was "a high priced man" (and on that point we agree with him, as we think he would be high priced at ordinary miner's wages); "that his principal could not afford to keep him here looking at worthless stones." Now this conceited humbug is well known in California, and we venture to say that he could not get an appointment by any mining operator in San Francisco to report on a sand bank. We regret that the New York parties did not send out some competent and intelligent engineer to Inyo, as we think the result would have been much more satisfactory to the employers than that of the great "author and mining engineer" from Cornwall. The mining prospects of Inyo County are too well and favorably known for the report of this "expert" to have any prejudicial effect.

THE *Bentonian*, which is Dan Jones' organ up here at Benton, has just completed its first volume and a little more than its first year, and is Hancock from truck to keelson. It indulges in a little speech in relation to its past and future which we had "hooked" for reproduction, but which, except one extract, will have to go over to another issue. All we shall now say is that if our good wishes will lighten the *Bentonian's* cares it will have no cares, except the cares of bounding success for itself and its locality. Here is part of what Jones has to say;

The paper will be published just so long as we see fit to publish it, and no amount of bucking on the part of croakers can prevent it. We embarked in the enterprise with implicit faith in the future of this mining region. We believed that we saw what others were too blind or too stupid to see; so, until the grave of Benton is effectually dug, and the body ready to be lowered, the *Bentonian* will continue to be issued every Wednesday morning.

THEODORE GLANCEY, editor of th Santa Barbara *Press*, was murdered in that place on the 25th of the past month by a cutthroat named Clarence Gray. The latter, though known to be a man of bad reputation, had been put on the Republican ticket as a candidate for District Attorney. The *Press*, as a Republican paper, denounced the nomination as one unfit to have been made, and said the choice of such a candidate was a disgrace to any party—a statement every one acquainted with Gray's career knew to be true, and also a legitimate criticism if it was true. Gray, in order to prove himself a brave and also an honorable man, finding Glancey unarmed, shot him down in the streets. Glancey lived for some hours after receiving the shot. The feeling against his cowardly assassin is bitter and wide spread.

METHODIST CHURCH APPOINTMENTS. The following are the appointments of the Nevada Conference for the ensuing year:

Northern District: Rev. W. Carver, Presiding Elder—Truckee, T. S. Uren; Reno, C. McKelvey; Sierra Valley, L. Barstow; Eureka Mills, to be supplied; Surprise Valley, John W. Pondleton; Quincy, N. G. Luke; Indian Valley, L. Ewing.

Central District: John, D. Hammond, Presiding Elder—Virginia City, W. C. Gray; Carson, R. E. Willis; Gold Hill, to be supplied; Austin, C. W. Crall; Winnemucca, J. B. Willis; Eureka, J. T. Ladd; Ruby Hill, R. A. Ricker; Elko, George Jennings.

Southern District: G. B. Hinkle, Presiding Elder—Bodie, F. M. Warrington; Coleville, W. Nims; Bishop Creek, F. M. Willis.

ACCORDING to the *Bulletin*, the yield of precious metals of the Pacific Coast for the month of August was $1,775,000.

NEW ADVERTISEMENTS.

J. W. BRIER, ESQ.,

Of San Francisco,

WILL ADDRESS THE CITIZENS OF INYO County in behalf of the Republican party as follows, commencing at the hour of 7 o'clock each evening:

A CARD.

Revenge Behind the Pulpit, and a Reply.

MESSRS. EDITORS—AS I WOULD LIKE to make a response to a guilty minister of the Gospel I will ask you to spare me space for the following. I wish to state to our community some facts concerning right and wrong and the principles of men, which will have a bearing on a preacher of the Gospel—one whom I would take to be a reformed hoodlum. The readers of these lines, by careful observation, will see at once that he is not a fit specimen of humanity to be looked upon as a minister.

Now, ladies and gentlemen, you that are not thoroughly acquainted with the facts that I will here state may perhaps think most of them false, but if called upon I can swear to most of what I relate, and what I can't swear to I think there are parties here who are willing at any time to take oath to my statement. I do not wish to put anything in these lines but what I think are facts. Before going too far with the details of what I wish to publish, I will here state what has brought this affair fresh to the memory of myself and to the memory of our whole community—a revenge in the house of God, by a supposed believer in God and a minister of the Gospel. Most of our people of this community know how unjustly this man Case and a few others tried first to destroy my property, and through me defending my rights they tried their utmost to have me sent to San Quentin.

I being down town a few days ago, and it being the Sabbath day, instead of sitting around and loafing in the saloons, I thought I would go to church. It happened to be Case's time to preach. He, seeing me in church, takes his revenge behind the pulpit, and throws his string of willful lies, at me and others. This water affair, I thought, had died away. Would it not have been far better for one in his place, even if I had done him a wrong, to have returned good for evil? But, no; he believeth not in the Book of God; he is an infidel. It would have been more pleasure for me to have been in a saloon at the gambling table throwing dice for the drinks than to be before a respectable audience of gentlemen and ladies, to have the slang of willful lies thrown at me. And still there he threw his slang on others. Was not this unjust and disrespectful in the eyes of a respectable people? But I do not think him civilized yet, as he is so much like a Piute. Perhaps he is *locoed*. I did not think it my place to reply in church, as I thought we were there for something else than picking up an old grudge; at least, I had better training. Readers, just think of this ridiculous affair for a moment. Does not this show something of what he is?—going so far as to say he could not get justice in Court, stating that he should have came up and given me a good clubbing? Now, I assure you, he has plenty time yet to use his muscle, as well as he has used his lying tongue. He goes further, speaking of corruption and men lying, saying that they grow with a man. Then lies, according to Case's preaching, are bound to stay with him; and I think that there is no salvation for him.

Now, for the benefit of those that have likely forgotten, and others that are not acquainted with this affair, I will here give you a correct statement of this water trouble, and I shall not exert the facts in the least. It will show corrupt Case is, and others that aided him. Now, reader, believe me or not, Case or others wishing to know whether I state correctly, can have ample proof, as I know of respectable men who are willing to swear that the statement which I here make is a true one.

About the 1st of April, 1875, myself and eleven others went into an agreement, and was signed by M. S. Hall and other parties, making in all twelve signers or owners of Indian Water Ditch. This article of agreement went on record at Independence April 19, 1875. According to agreement each signer or owner was to have an equal portion of water, or one twelfth. Being about the first on the creek, according to our agreement I was to have my proportion of water measured on my place, and all parties living below White's farm were to have their water measured on White's farm, as the creek forked there. Mr. Hall's farm is some distance down in the valley, far down below me and White's farm, so his portion of water had to run through several ranches before reaching him, and as water is in general scarce, parties would not let any more water run to Hall's place than was his part. Case's place is further down in the valley, and has no water right. So is Bowman's place far down, and has no water right. This Bowman place was taken up by Hall's son-in-law, so of course Hall wanted enough water to come to his place to furnith the two farms, and I have heard time and again that Hall was selling water. Now, in spite of this article of agreement, Hall and Case make a large ditch above my farm, away out in the sage brush, called Sage Brush Ditch, and carries our water way around all of us, so as to get hold of water to run their two new ranches. At the same time Hall claims the water alone. Case well knew he had no right to take this water, but 'twas done in a smooth way, handled through Hall. This ditch generally had more water in it than Indian Ditch. When Hall took the privilege to run his water in this ditch he had no business to use or take any more than one-twelfth part. To carry this water from Indian ditch they cut it on the lower and north side, turns out our water in a ditch they made, carry it down some distance till they get to where the land lies sloping enough to the south to carry it to their places. To do this they had to make a flume across Indian Ditch—one that will carry four to five hundred inches of water. After fluming across our ditch they make a large ditch above my place. This ditch they have overflowed, and washed large ditches through my field several times, always doing me more or less damage, besides depriving me and others of our water. So very frequently, as well as others interested in this water, I would go up and turn our water back where it belonged; but they would turn it back again. Finally they hired a man and hid him in the brush near where they stole our water, for the purpose of keeping their ditch full and robbing us. Is not this nice work for Christians? When I or some one of us would go up and turn our water back where it belonged and turn our backs to go home this man would step from his hiding place and turn our water back into Hall and Case's ditch. We watched for several days and never could see any one go up there; but no sooner had we turned the water back where it belonged than it was turned off again. Suspicioning something wrong, some of us went up and searched the brush and found a man hidden there to steal water; but he lost no time in getting away. Is not this fine for a man of the Gospel? Just think of such a rascal; what is he but an infidel? These parties came down and told of finding the man up there, and their only regret was that it wasn't Case, so they could have drowned him. The water was then all right again, and for a while we had peace. One morning, however, I found the water low in Indian Ditch. I had been up but a short time until I heard a great rushing of water out in my field. There came rolling from four to five hundred inches of water, making direct for my cellar, where I had about five tons of vegetables. I knew at once what had to be done, so I grabbed my axe; went up to the flume and knocked out the small gate on the side, which was filled in. But the water was so swift but very little ran out the gate, so I knocked off two more boards that were about five feet long, from the side of the flume, and put them in front so as to turn the water back into Indian Ditch. As I started back home I saw Mr. Edson coming up the ditch; I went out and met him; he had just crossed over where the water had been running; he could see what great harm the water could have done me. I told him I had knocked part of the flume down; he replied, "I do not blame you, Mr. Eisele." I think Mr. Edson was at that time staying at Hall's. Now, why did not Case and Hall do as just citizens would have done—come up and see what damage their water had done me and paid damages. But no; they were those contemptible Christians we often have about. If any one should have been arrested for maliciousness it should have been the men that had me arrested. But they thought if they could punish the innocent it would make the wrong look more just.
